Fitzgerald Manufacturing Company, The. (See Fitzgerald, Maurice F., assignor.)
Flanagan, Malcolm T., Spokane, Wash. Hand tool for forming bit wings. 1,568,372; Jan. 5.
Fleming, Cornelius S., Berkeley, assignor to The Paraffine Companies, Inc., San Francisco, Calif. Paint. 1,568,215; Jan. 5.
Flint, George B., Kaysville, Utah. Conveying mechanism. 1,568,594; Jan. 5.
Florence, Eugene A., San Simeon, Calif. Self-locking nut. 1,568,821; Jan. 5.
Foley, Frederick J. (See Chalmers, S., and Foley.)
Force, Howard J., Scranton, Pa. Rail steel. 1,568,822; Jan. 5.
Ford, Ernest L., Darlington, England. Ventilator of the ejector type. 1,568,373; Jan. 5.
Forsyth, Valoris L., Fort Worth, Tex. Deep-well pump. 1,568,447; Jan. 5.
Foss, William A., Cleveland, Ohio. Fishing reel. 1,568,149; Jan. 5.
Foster, Theodore C., assignor to Theodore W. Foster & Bro. Co., Providence, R. I. Container. 1,568,150; Jan. 5.
Foster, Theodore W., assignor to Theodore W. Foster & Bro. Company, Providence, R. I. Vanity case. 1,568,151; Jan. 5.
Foster, Theodore W., & Bro. Co. (See Foster, Theodore C., assignor.)
Foster, Theodore W., & Bro. Co. (See Noble, Arthur H., assignor.)
Fostoria Glass Company. (See Magee, William H., assignor.)
Fowler, Fred D., assignor to Hood Rubber Company, Watertown, Mass. Straight-side bead flapping machine. 1,568,823; Jan. 5.
Fox, Gordon, assignor to Freyn Engineering Company, Chicago, Ill. Method and apparatus for heating rolls. 1,568,892; Jan. 5.
Frank, John J., Pittsfield, Mass., assignor to General Electric Company. Corrugated-sheet-metal casing. 1,568,727; Jan. 5.
Freeman, George C., assignor to Antiscale Corporation, Philadelphia, Pa. Protection of metallic surfaces. 1,568,728; Jan. 5.
Freeman, Norman, Cambridge, Mass. Identification and sales tag. 1,568,595; Jan. 5.
Freeman, William A., Sycamore, Ga. Insecticide-applying machine. 1,568,448; Jan. 5.
French, Elsamur S., Denver, Colo. Electric handsaw and grooving machine. 1,568,328; Jan. 5.
Freund, Guillermo, Lima, Peru. Action for player pianos. 1,568,824; Jan. 5.

Freyn Engineering Company. (See Fox, Gordon, assignor.)
Frieman, Jacob G., St. Paul, Minn., and W. A. Rankin, Oak Park, Ill.; said Rankin assignor to said Frieman. Combination signal device for vehicles. 1,568,662; Jan. 5.
Friend, Hardy A., Marshalltown, Iowa. Automobile steering gear. 1,568,825; Jan. 5.
Fritz, Philip, Grand Rapids, Mich. Ice-cream cabinet. 1,568,216; Jan. 5.
Fröhlich, Jaroslav. (See Riber, E., and Fröhlich, assignors.)
Frost, William, Fulton, Mich. Fencepost. 1,568,596; Jan. 5.
Füber, Maximilian, Lubeck, Germany. Lock with several tumblers. 1,568,663; Jan. 5.
Fuller Fuel Company. (See Jones, Michael D., assignor.)
Fulton, George E. (See Larner, Daniel, assignor.)
Furgason, Raymon B. (See Neiswender C. W., and Furgason.)
Gallagher, Martin F., San Francisco, Calif. Shoe. 1,568,893; Jan. 5.
Gallemore, Sadie E., Casper, Wyo. Garment. 1,568,826; Jan. 5.
Garden City Feeder Company. (See Van Howveling, Arthur C., assignor.)
Gardner, Florinda, assignor of one-half to D. Alexander, Salt Lake City, Utah. Child's garment. 1,568,449; Jan. 5.
Garod Corporation. (See Rodman, Isaac P., assignor.)
Gault, Clyde, et al. (See Williams, Elmer R., assignor.)
Gautier, Trevor R., assignor to Nashua Gummed & Coated Paper Company, Nashua, N. H. Strip-serving machine. 1,568,506; Jan. 5.
Gearon, Kathryne. Camden, N. J. Post-card cabinet. 1,568,729; Jan. 5.
Gebrüder Hardy Maschinenfabrik und Giesserei A.-G. (See Rihosek, J., and Leuchter, assignors.)
Gehrking, George H., Elk Mound, Wis. Harvester. 1,568,450; Jan. 5.
Geisler, Edgar W., assignor to R. H. Comey Brooklyn Company, Brooklyn, N. Y. Preparing straw braid for bleaching. 1,568,664; Jan. 5.
Gelly, Evans, Quebec, Quebec, Canada. Propulsion device. 1,568,665; Jan. 5.
General Electric Company. (See Barton, Theophilus F., assignor.)
General Electric Company. (See Butcher J. H., and Young, assignors.)
General Electric Company. (See Cox, Frank P., assignor.)
General Electric Company. (See Frank, John J., assignor.)
General Electric Company. (See Griffin, M. C., and Berkey, assignors.)
General Electric Company. (See Hepperlen, John A., assignor.)
General Electric Company. (See Leddick, George S., assignor.)
General Electric Company. (See Marcellus, Fredrick S., assignor.)
General Electric Company. (See Moore, Roy W., assignor.)
General Electric Company. (See Pollock, Alan A., assignor.)
General Electric Company. (See Ruggles, William A., assignor.)
General Electric Company. (See Seiz, Walter, assignor.)
General Electric Company. (See Warner, John C., assignor.)
General Electric Company. (See Warren, Henry E., assignor.)
General Fireproofing Company, The. (See Ball, Alfred J., assignor.)
General Fireproofing Company, The. (See Schmitz, Fred A., assignor.)
General Motors Corporation, et al. (See Burke, Frank L., assignor.)
General Motors Corporation. (See Parker, Victor C., assignor.)
General Motors Corporation. (See Waller, Einar, assignor.)
General Motors Corporation. (See White, John W., assignor.)
General Motors Research Corporation. (See Summers, Caleb E., assignor.)
General Optical Company. (See Clement, H., and Barron, assignors.)
General Tire and Rubber Company, The. (See Iredell, Robert, assignor.)
Generich, Arnold, assignor to A. Bebel, New York, N. Y. Electric-fan blade. 1,568,946; Jan. 5.
Gerns, William H., East Orange, assignor, by mesne assignments, to Brandes Laboratories, Inc., Newark, N. J. Apparatus for testing telephone receivers. 1,568,827; Jan. 5.
Gibson, Alexander T., Oakland, Calif. Clamp for window locks. 1,568,374; Jan. 5.
Gibson, Earl S. (See Williams, S. B., and Gibson.)
Gibson, Francis W., West Roxbury, Mass., assignor to H. D. Beach Company, Coshocton, Ohio. Display stand. 1,568,941; Jan. 5.
Gibson, Guy T., New Rochelle, N. Y. Perfume bottle. Des. 69,177; Jan. 5.
Gibson, John A., Washington, D. C. Can opener and stopper. 1,568,828; Jan. 5.
Gillespie, Charles, New Braunfels, Tex. Railway signal. 1,568,152; Jan. 5.
Gillett, Eugene, Long Beach, Calif. Lath rack or holder. 1,568,375; Jan. 5.
Gleason, C. Roy, Chicago, Ill. Minnow bucket. 1,568,730; Jan. 5.
Godley, Charles E., assignor to Edmunds & Jones Corporation, Detroit, Mich. Connecter sleeve. 1,568,666; Jan. 5.
Goff, Wetzel, Weston, W. Va. Battery indicator. 1,568,829; Jan. 5.
Goldman, David H., Cleveland, Ohio. Antislipping device for shoe soles and heels. 1,568,064; Jan. 5.
Goodcell, Rex. (See Buttress, G. A., and Craig, assignors.)
Goodrich, B. F., Company, The. (See MacDonald, Frank J., assignor.)
Goodwin, George D., McRae, Mont. Leg rest for chairs. 1,568,217; Jan. 5.
Goodyear Tire & Rubber Company, The. (See Morse, Herman E., assignor.)
Goodyear Tire & Rubber Company, The. (See Snyder, Robert W., assignor.)
Goodyear Tire & Rubber Company. (See Sohl, Ralph W., assignor.)
Gormley, Charles W., Mount Morris, N. Y. Washing machine. 1,568,597; Jan. 5.
Gottesman, Osias M., and I. Rosenfeld, New York, N. Y., assignors to Harvey Instrument Co., Inc. Holder. 1,568,550; Jan. 5.
Gottschalk, Karl P., Dresden, Germany, assignor, by mesne assignments, to The Diamond Match Company, Chicago, Ill. Match-making machine. 1,568,153; Jan. 5.
Gould Coupler Company, The. (See Sauvage, William H., assignor.)
Gould, Harry G., assignor to Gould Manufacturing Company, Oshkosh, Wis. Running gear for coaster wagons. 1,568,218; Jan. 5.
Gould Manufacturing Company. (See Gould, Harry G., assignor.)
Goyne, William E., Brooklyn, N. Y. Spring system for vehicles. 1,568,551; Jan. 5.
Grabler, Peter, Rocky River, Ohio. Copyholder apparatus. 1,568,552; Jan. 5.
Grabler, Peter, Rocky River, Ohio. Copyholder apparatus. 1,568,553; Jan. 5.
Graham, James E., et al. (See Thomson, Elihu, assignor.)
Grant, Benjamin F., Los Angeles, Calif. Ironing board. 1,568,376; Jan. 5.
Graves, Carl R., Clarion, Iowa. Highway-crossing signal system. 1,568, 219; Jan. 5.
Graves, Carl R., Clarion, Iowa. Highway-crossing signal system. 1,568,219; Jan. 5.
Gray, Harry, Houston, Tex. Cock. 1,568,451; Jan. 5.
Green, George F., Texico, N. Mex. Weeder. 1,568,377; Jan. 5.
Greenberg, Jacob, Rochester, N. Y. Altering waistline of trousers. 1,568,329; Jan. 5.
Greenidge, Samuel M., Washington, D. C. Automatic mechanism for raising liquids. 1,568,221; Jan. 5.
Gribojedoff, Nicolai, Rastatt, Germany. Internal-combustion engine. 1,568,378; Jan. 5.
Griesedieck, Harry L. (See Moody, C. S., and Oepts, assignors.)
Griesinger, Herman A., assignor to Thomas Cusack Company, Chicago, Ill. Electrically-illuminated sign. 1,568,273; Jan. 5.
Griffin, Marvin C., Lynn, Mass., and D. L. Berkey, Philadelphia, Pa., assignors to General Electric Company. Shaft bearing. 1,568,731; Jan. 5.
Griffith, Charles R., Portland, Oreg. Roll for carrying fabric conveyer belts of paper-making machines. 1,568,401; Jan. 5.
Grimes, David, Grasmere, N. Y., assignor to Grimes Radio Engineering Co. Inc. Condenser. 1,568,274; Jan. 5.
Grimes Radio Engineering Co. (See Grimes, David, assignor.)
Gross, Frederick D. (See Akins, R. P., Bucher, and Gross.)
Grossman, Jacob, Maspeth, N. Y. Vehicle jack. 1,568,452; Jan. 5.
Gruber, Morris M., Brooklyn, N. Y., assignor to The Burwood Corporation, Scranton, Pa. Framing device for motion-picture machines. 1,568,598; Jan. 5.
Grubman, Leo J., New York, N. Y., assignor to Voices, Incorporated, Newark, N. J. Sound-producing reed. 1,568,275; Jan. 5.
Gulf Refining Company. (See McAfee, Almer M., assignor.)
Gulf Refining Company. (See Prichard, G. L., and Henderson, assignors.)
Gunderson, Herbert, Stanley, Wis. Waste-oil pan. 1,568,830; Jan. 5.
Gunn, Ross, Dayton, Ohio. Constant-frequency source. 1,568,065; Jan. 5.
Gutekunst, Gurney O., assignor to Eastman Kodak Company, Rochester, N. Y. Carbocyanine dyes and making same. 1,568,667; Jan. 5.
Hanse, Rudolph S., Houston, Tex. End fastener for music-roll sheets. 1,568,453; Jan. 5.

Hackenberg, Otto, Paterson, N. J. Bow shuttle. 1,568,599; Jan. 5.
Hackmann, Frederick, Chicago, Ill. Rail-elevating jack. 1,568,600; Jan. 5.
Hahn, William O. (See Ruiz, Ignacio, assignor.)
Haley, Reuben, Beaver, Pa. Headlight reflector. 1,568,942; Jan. 5.
Hall, Wilfred. (See Turner, Marshall A., assignor.)
Hamill, Charles C., Randsburg, Calif. Amalgamating means. 1,568,276; Jan. 5.
Hamme, Richard F., jr., Wilmington, N. C. Hydrocycle. 1,568,831; Jan. 5.
Hanschen, Walter. (See Symmes, W., and Hanschen.)
Handy, Herbert L., sr. (See Dumas, George A., assignor.)
Hannon, Anna M., Wabek, and W. Lennon, Overly, N. Dak. Table. 1,568,154; Jan. 5.
Hanovia Chemical and Mfg. Co. (See Robinson, F. W., and Knapp, assignors.)
Hanson, Mandus, Muskegon, Mich. Mold. 1,568,601; Jan. 5.
Harding, Jesse S., Stoughton, Mass. Shoe hanger. 1,568,330; Jan. 5.
Hargraves, Albert, assignor to The Firestone Tire and Rubber Company, Akron, Ohio. Resilient tire. Des. 69,178; Jan. 5.
Harp, Franklin H. (See Moritz, H. K., and Harp.)
Harris, Elmer E., Memphis, Tenn., Floor waxing and polishing brush. 1,568,602; Jan. 5.
Harris, John, Cleveland, Ohio. Blowpipe. 1,568,331; Jan. 5.
Harris, John, Cleveland, Ohio. Blowpipe. 1,568,332; Jan. 5.
Harris, Vernon J., Cleveland, Ohio. Piston pin. 1,568,833; Jan. 5.
Harrison, Adria L., Oakland, Calif. Thumb-sucking preventer. 1,568,668; Jan. 5.
Harrison, Frank B., Toledo, Ohio. Dust guard. 1,568,554; Jan. 5.
Harrison, John A., and O. A. Waschatz, West Richmond, Victoria, Australia. Apparatus for the manufacture of composition building sheets or slabs. 1,568,832; Jan. 5.
Hart, Thomas A., Danbury, Conn. Slipping device for neckties. 1,568,454; Jan. 5.
Harter, Isaac, jr., Dongan Hills, N. Y., assignor to The Babcock & Wilcox Company, Bayonne, N. J. Water-tube boiler. 1,568,555; Jan. 5.
Hartley, Frank P., Bangor, Me. Shade-roller winding and holding device. 1,568,379; Jan. 5.
Hartshorn, Harry J., Herne Bay, England. Display stand for tobacco pipes and smokers' accessories. Des. 69,179; Jan. 5.
Hartvig, Christian E., El Reno, Okla. Attaching device for electric cables. 1,568,603; Jan. 5.
Harvey, George L., deceased; by H. A. Harvey and K. Fairbank, executors, Chicago, Ill. Bolster cushion. 1,568,333; Jan. 5.
Harvey, Helen A., et al., executors. (See Harvey, George L.)
Harvey Instrument Co. (See Gottesman, O. M., and Rosenfeld, assignors.)
Hasbrouck, Louis B., Elmira, assignor to Eclipse Textile Devices, Inc., Elmira Heights, N. Y. Yarn cleaner. 1,568,277; Jan. 5.
Hasbrouck, Louis B., Elmira, assignor to Eclipse Textile Devices, Inc., Elmira Heights, N. Y. Yarn cleaner. 1,568,278; Jan. 5.
Haslinger, Franz, Vienna, Austria. Automatically-supported device for the direct examination of the larynx. 1,568,732; Jan. 5.
Hastings, H. Gibson, et al. (See Anderson, Roy H., assignor.)
Hathaway, Edgar F., Wellesley, assignor to Shawmut Engineering Company, Boston, Mass. Spool-retarding means for tuft frames. 1,568,402; Jan. 5.
Hauge, Oscar, and W. A. England, assignors to Parent Cone Company, San Francisco, Calif. Ice-cream-cone package. 1,568,834; Jan. 5.
Hauser & Weil. (See Hauser, Leopold, assignor.)
Hauser, Leopold, assignor to Hauser & Weil, New York, N. Y. Hatbox. 1,568,733; Jan. 5.
Hawley, John B., jr., Fort Worth, Tex. Internal-combustion engine. 1,568,835; Jan. 5.
Hawley, John B., jr., Fort Worth, Tex. Well pumping machine. 1,568,836; Jan. 5.
Hawmack Manufacturing Company, The. (See McNair, Charles, assignor.)
Hayes, Frank A. (See Chilton, R., and Hayes.)
Haywood, Jack S., Petersburg, Ill. Auxiliary attachment for internal-combustion engines. 1,568,837; Jan. 5.
Heath, Frederick, assignor to Heath Unit Tile Company, Tacoma, Wash. Fireproof hollow wall construction. 1,568,155; Jan. 5.
Heath Unit Tile Company. (See Heath, Frederick, assignor.)
Hedenburg, Oscar F., Pittsburgh, Pa., assignor to F. O. Moburg, Toledo, Ohio. Fungicide and insecticide composition. 1,568,455; Jan. 5.
Heim Grinder Company, The. (See Reeves, Milton O., assignor.)
Hellerman, Adolph C., assignor to Wolf, Sayer & Heller, Chicago, Ill. Making sausage casings. 1,568,734; Jan. 5.
Hemmer, Albert, Lincoln, assignor of one-half to Harold A. Schneider, Newmarket, N. J. Combined tail-light and license-tag illuminator. 1,568,222; Jan. 5.
Henderson, Herbert. (See Prichard, G. L., and Henderson.)
Henkels, Max. (See Bösebeck, Emil, assignor.)
Henricks, William, Pharr, Tex. Stalk cutter. 1,568,604; Jan. 5.
Hepperlen, John A., East Orange, N. J., assignor to General Electric Company. Motor controller. 1,568,735; Jan. 5.
Herbsman, Abraham M. (See Campbell, N. I., and Herbsman.)
Herskovitz, Abraham, New York, N. Y., assignor to Peerless Light Company, Chicago, Ill. Multiple-plug receptacle. 1,568,156; Jan. 5.
Herskovitz, Max, deceased, Chicago, Ill.; W. Herskovitz and C. Weinfeld, executors. Adjustable strap for electric-lighting fixtures. 1,568,279; Jan. 5.
Herskovitz, William, et al., executors. (See Herskovitz, Max.)
Hess, Francis M., Whiting, Ind. Method of and apparatus for effecting continuous distillation. 1,568,157; Jan. 5.
Hess, John W., Kitchener, Ontario, Canada, assignor to Cluett, Peabody & Company, Inc., Troy, N. Y. Fold-over collar. 1,568,158; Jan. 5.
Heyman, Henry B., New York, N. Y. Garter package. 1,568,838; Jan. 5.
Heywood, Charles F., Detroit, Mich. High-pressure valve. 1,568,159; Jan. 5.
Heywood-Wakefield Company. (See Lloyd, Marshall B., assignor.)
Hibbert, William, Victoria, British Columbia, Canada. Combined salt and pepper shaker. 1,568,160; Jan. 5.
Hill, Harry W., assignor to American Optical Company, Southbridge, Mass. Lens polisher. 1,568,066; Jan. 5.
Hirsch, Louis, Weehawken, and H. Zahn, Union, N. J. Straight-frame knitting machine. 1,568,953; Jan. 5.
Hoar Shovel Company. (See von Mehren, Erick, assignor.)
Hocker, Carl D., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Coating composition. Re16,240; Jan. 5.
Hodgman, Emma A., executrix. (See Hodgman, Willis K. and W. K., jr.)
Hodgman, Willis K., decensed, and W. K. Hodgman, jr., Taunton, Mass.; Emma A. Hodgman, executrix. Drypipe valve. 1,568,839; Jan. 5.
Hodgman, Willis K., jr. (See Hodgman, Willis K. and W. K., jr.)
Hoerner, Milton, Hummelstown, Pa. Recorder. 1,568,280; Jan. 5.
Hohfelder, Alfred L. (See Kacirek, Frank, assignor.)
Hokanson, Otto A., assignor to Woodstock Typewriter Company, Woodstock, Ill. Typewriter. 1,568,736; Jan. 5.
Holley, Earl. (See Meloche, Daniel H., assignor.)
Holmes, Thomas J., Boston, Mass. Nebulizer. 1,568,840; Jan. 5.
Holst, Hans J., Hildreth, Nebr. Loose-leaf binder. 1,568,403; Jan. 5.
Hood Rubber Company. (See Fowler, Fred D., assignor.)
Horn, Mabel G., and B. B. Berens, Philadelphia, Pa. Character-reading device. 1,568,841; Jan. 5.
Hotchkiss, William R., St. Paul, Minn. Safety paper. Des. 69,180; Jan. 5.
Hough, Azel C., assignor to Hough Shade Corporation, Janesville, Wis. Color striping wood strips. 1,568,605; Jan. 5.
Hough Shade Corporation. (See Hough, Azel C., assignor.)
Howard, Arthur S., Golton South, via Luveck, Victoria, Australia. Scraper. 1,568,842; Jan. 5.
Howard, Clarence B., Oakland, Calif. Vehicle wheel. 1,568,456; Jan. 5.
Howell, Albert S., assignor to Bell & Howell Company, Chicago, Ill. Photographic-film magazine. 1,568,067; Jan. 5.
Howell, Frank B., Buffalo, N. Y. Boiler jacket. 1,568,556; Jan. 5.
Howell, Kenneth B., Maplewood, N. J., assignor to The Barrett Company. Continuous pulp beater. 1,568,068; Jan. 5.
Howson, Charles T., Silver Creek, N. Y. Roller mill. 1,568,223; Jan. 5.
Hubbard, Frank C., Dennis, Tex. Saw attachment for vehicles. 1,568,843; Jan. 5.
Hubbard, William J., Yarmouth, Nova Scotia, Canada. Mechanical cushion roll for spinning frames. 1,568,334; Jan. 5.
Huempfner, Ferdinand W., assignor of one-third to Mid-States Gummed Paper Company and one-third to G. F. Schilling, Chicago, Ill. Printing press. 1,568,161; Jan. 5.
Huff, Wellman K., Guy, N. Mex. Pinto-bean-harvesting machine. 1,568,844; Jan. 5.
Hull, Cloice B., Cleveland, Ohio. Soldering solution. 1,568,669; Jan. 5.
Humphrey, George F., Bridgetown, assignor to Appo-Krisp Limited, Kentville, Nova Scotia, Canada. Fruit and cereal product and method of producing same. 1,568,162; Jan. 5.

Hunt, Rowland, London, England. Box or carton for electric lamps. 1,568,845; Jan. 5.
Hunter, John A. (See Edge, D., and Hunter.)
Hunter, Thomas M. (See Snodgrass, H. E., and Hunter.)
Husband, Ottie L., Thurman, Iowa. Mold for the manufacture of cement blocks. 1,568,335; Jan. 5.
Hutchings, Charles E., assignor to Eastman Kodak Company, Rochester, N. Y. Bellows support for cameras. 1,568,670; Jan. 5.
Hutchings, Charles E., assignor to Eastman Kodak Company, Rochester, N. Y. Rising front for cameras. 1,568,671; Jan. 5.
Hutton, Asbury B., Indian Head, Pa. Compound for grease. 1,568,606; Jan. 5.
Huyck, F. C., & Sons. (See Wilson, Ezekiel J., assignor.)
Illinois Watch Case Company. (See Emerich, Leonard, assignor.)
Index Visible, Inc. (See Day, William H., assignor.)
Indiana Lamp Corporation et al. (See Burke, Frank L., assignor.)
Ingerö, Karl. (See Ruths, J., Ingerö, and Schrenk.)
International Harvester Company. (See Anderson, Emil F., assigonr.)
International Harvester Company. (See Burger, L. F., and Borgerd, assignors.)
International Harvester Company. (See Johnston, E. A., Benjamin, and Pearson, assignors.)
International Patents Development Company. (See Elliott G., and Walker, assignors.)
International Signal Co., The. (See Webb, Jean F., jr., assignor.)
Iredell, Robert, assignor to The General Tire and Rubber Company, Akron, Ohio. Resilient tire. Des. 69,181; Jan. 5.
Irish, David J. (See Strachan, C., and Irish.)
Isaacs, Mone R. (See Bassett, H. P., and Isaacs.)
Isensee, Otto K., El Monte, Calif. Attachment for steering wheels and the like. 1,568,737; Jan. 5.
Jaeger, Henry G., Rose Hill, assignor of one-fourth to E. R. Lambertson, one-fourth to G. P. Clements, Eagle Rock City, and one-fourth to J. Schneider, Los Angeles, Calif. Railway-tie composition and process. 1,568,507; Jan. 5.
James, Howard R. (See Coss, Clare C., assignor.)
James, Thomas, jr., Philadelphia, Pa. Air-brake system. 1,568,336; Jan. 5.
Jandus, Herbert S., assignor to The C. G. Spring & Bumper Company, Detroit, Mich. Bumper. 1,568,557; Jan. 5.
Jandus, Herbert S., assignor to The C. G. Spring & Bumper Company, Detroit, Mich. Bumper. 1,568,558; Jan. 5.
Jenkins, Isaac T., Tunkhannock, Pa. Squib. 1,568,069; Jan. 5.
Jennens, William N., Kansas City, Mo. Making artificial stone. 1,568,070; Jan. 5.
Johns-Manville Incorporated. (See Pilliod, Frederic L., assignor.)
Johnson, Augusta S., Brooklyn, assignor to Model Brassiere Co., Inc., New York, N. Y. Brassière. 1,568,457; Jan. 5.
Johnston, Edward A., Chicago, B. R. Benjamin, Oak Park, and C. Pearson, Chicago, Ill., assignors to International Harvester Company. Power-driven implement. 1,568,163; Jan. 5.
Johnson, Elmer, Warren, Ariz. Switch attachment. 1,568,508; Jan. 5.
Jones, Hilton I., and F. M. Pinkerton, Wilmette, Ill. Sleeping-car ladder. 1,568,846; Jan. 5.
Jones, John E., West Frankfort, Ill., dedicated, by mesne assignments, to the People of the United States of America. System of arresting mine explosions. 1,568,281; Jan. 5.
Jones, Michael D., Allentown, Pa., assignor to Fuller Fuel Company. Drying materials. 1,568,738; Jan. 5.
Joslin, William E., Sarcoxie, Mo. Post or stake puller. 1,568,741; Jan. 5.
Joyce, Asa W., Newark, N. J., assignor to The Chemical Foundation, Incorporated, New York, N. Y. Vat dyes of the thioindigo series. 1,568,458; Jan. 5.
Judelson, Julius, New York, N. Y. Drier. Re16,244; Jan. 5.
Jung, Henry, Ladysmith, Wis. Rye-bread-baking utensil. 1,568,742; Jan. 5.
Junghans, Oskar, Schramberg, Germany. Clockwork-testing machine. 1,568,404; Jan. 5.
Junkunc, John, Chicago, Ill. Limb-securing device for Christmas trees. 1,568,607; Jan. 5.
Kacirek, Frank, assignor to A. L. Hohlfelder, Cleveland, Ohio. Toy vehicle. 1,568,459; Jan. 5.
Kahn, Bernard J., Denver, Colo. Bricklayers' jointer. 1,568,337; Jan. 5.
Kaisling, William, assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Service meter. 1,568,164; Jan. 5.
Karafiat, Josef, Schwechat, near Vienna, Austria. Bearing metal. 1,568,224; Jan. 5.
Karron, David, Brooklyn, N. Y. Machine for producing frame parts. 1,568,739; Jan. 5.
Karp, George, Long Island City, N. Y. Disappearing telephone table. 1,568,165; Jan. 5.
Kaser, Walter, Baltic, Ohio. Automatic train-control system. 1,568,847; Jan. 5.
Keene, William A., Kansas City, Kans. Internal-combustion engine. 1,568,071; Jan. 5.
Kellendorfer, Richard, Munich, Germany. Starting switch. 1,568,848; Jan. 5.
Keller, John C., assignor of one-half to F. B. Smith, Chicago, Ill. Pneumatic footwear construction. 1,568,405; Jan. 5.
Kellogg, Edward E., Norwalk, assignor of one-half to A. T. Smith, Los Angeles, Calif. Vehicle wheel. 1,568,672; Jan. 5.
Kellogg Switchboard and Supply Company. (See Kaisling, William, assignor.)
Kelly, William E., Cleveland, Ohio. Tire. 1,568,559; Jan. 5.
Kelvinator Corporation. (See Spreen, Charles C., assignor.)
Kilby Frog & Switch Company. (See Yolton, Robert E., assignor.)
Kinnear, Eugene C., Evanston, assignor to Anakin Lock & Alarm Co., Chicago, Ill. Burglarproof auxiliary lock. 1,568,740; Jan. 5.
Kirby, James B., West Richfield, Ohio. Ironing machine. 1,568,166; Jan. 5.
Kitto, Thomas J., Wichita Falls, Tex. Automatic hose-winding reel. 1,568,743; Jan. 5.
Klamon, Joseph M. (See Carrillon, Charles, assignor.)
Klein, Adolph, New York, N. Y. Box construction. 1,568,608; Jan. 5.
Kleinsmith, George, Pine Knot, Calif. Portable camp stove. 1,568,849; Jan. 5.
Knapp, Kenneth V. (See Robinson, F. W., and Knapp.)
Knezevich, Milan, Akron, Ohio. Battery. 1,568,851; Jan. 5.
Knowles, Carroll, Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y. Spring back rest for automatic grinders. 1,568,673; Jan. 5.
Knowles, Thomas B., Oakland, Calif. Stereopticon slide. 1,568,674; Jan. 5.
Koch, Hans, Dietikon, near Zurich, Switzerland. Drawing and writing desk. 1,568,850; Jan. 5.
Koehler Manufacturing Company. (See Albee, William H., assignor.)
Kohl, Alexander. (See Legler, E., jr., and Kohl.)
Kohler, Emil N. (See Kohler, Paul H. and E. N.)
Kohler, Paul H. and E. N., St. Marys, Ohio. Game apparatus. 1,568,852; Jan. 5.
Kohlhepp, John W., Chicago, Ill. Carcass-scalding machine. 1,568,282; Jan. 5.
Kolling, Charles H., and R. Prietz, Jersey City, N. J., assignors of three-eighths to O. O. Lauckner, Hoboken, and three-eighths to O. A. Weissenborn, Jersey City, N. J. Theft-alarm switch for automobiles. 1,568,509; Jan. 5.
Kortes, John H., Telluride, Colo. Adjustable clamp. 1,568,225; Jan. 5.
Krailing, Jacob H., East Haven, Conn. Box covering. Des. 69,182; Jan. 5.
Kronewitter, Carl H., Mishawaka, Ind. Automobile signal switch. 1,568,744; Jan. 5.
Kropp, John A. (See Lundquist, F. A., and Kropp.)
Krueger, Louis C., and L. J. Brecht, Iowa City, Iowa. Foot-measuring device. 1,568,072; Jan. 5.
Kuder, David C., et al. (See Conwell, Simon W., assignor.)
Kuen, Eugene A., assignor, by mesne assignments, to The American Flatlite Company, Cincinnati, Ohio. Making reflectors. 1,568,283; Jan. 5.
Kulage, Domnick, and R. O. Oakley, assignors to Peerless Weatherstrip and Caulking Company, St. Louis, Mo. Weather strip. 1,568,284; Jan. 5.
Kunkle, Joseph, Indianapolis, Ind. Ironing board. 1,568,167; Jan. 5.
Kurowski, Alfred G. F., Brooklyn, assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,568,338; Jan. 5.
Kwasigroch, Roman S., Cudahy, Wis. Longéron and station brace for aeroplane fuselages. 1,568,510; Jan. 5.
Kyle, John, Philadelphia, Pa. Printer's clamp. 1,568,745; Jan. 5.
Lackner Products Corporation. (See Lackner, Rolph J., assignor.)
Lackner, Rolph J., New York, assignor to Lackner Products Corporation, Brooklyn, N. Y. Safety device for swinging scaffolds. 1,568,285; Jan. 5.
Lacy Manufacturing Company. (See Pearne, Frank Y., assignor.)
Lake, Clarke R., Kansas City, Mo. Locker. 1,568,073; Jan. 5.
Lambertson, Everett R., et al. (See Jaeger, Henry G., assignor.)
Lampe, Joseph, et al. (See Tull, W. C., and Bristol, assignors.)
Lamson Company, The. (See Cowley, James T., assignor.)
Lamson Company, The. (See Maclaren, James G., assignor.)
Land, Charles H., jr., Detroit, Mich. Semitrailer. 1,568,560; Jan. 5.
Land, Charles H., jr., assignor of one-half to W. H. Wilson, Detroit, Mich. Trailer. 1,568,168; Jan. 5.
Lane, Joseph P., New York, N. Y. Stove burner and water heater. 1,568,853; Jan. 5.
Larner, Daniel, assignor of one-third to G. E. Fulton, Warren, Ohio. Steel-casting apparatus. 1,568,854; Jan. 5.

Larsh, Everett P., Dayton, Ohio. Short circuiters for electric motors. 1,568,675; Jan. 5.
Larson, Erick, Paullina, Iowa. Automatic currier. 1,568,226; Jan. 5.
Lauckner, Oscar O., et al. (See Kolling, C. H., and Prietz, assignors.)
Lawaczeck, Franz, Enzianhof, Pocking, Germany. Producing blade faces for water turbines, pumps, and other centrifugal machines. 1,568,746; Jan. 5.
Lawrance, Henry, Birtle, Manitoba, Canada. Cow-tail holder. 1,568,747; Jan. 5.
Lawson, Alfred W., New York, N. Y. Passenger compartment. 1,568,855; Jan. 5.
Lebby, States L., Corning, N. Y. Focusing means for light projectors. 1,568,169; Jan. 5.
Le Bret, Ludwig, Charlottenburg, Germany. Pump. 1,568,170; Jan. 5.
Le Bus, John E., Electra, assignor of one-half to Shaw and Rathke, Wichita Falls, Tex. Automatic sheave. 1,568,406; Jan. 5.
Leddick, George S., Schenectady, N. Y., assignor to General Electric Company. Switch assembly. 1,568,748; Jan. 5.
Lee, William A., Wichita, Kans. Traffic signal. 1,568,407; Jan. 5.
Leftwich, Jesse H., Chicago, Ill. Alimentary product and making same. 1,568,339; Jan. 5.
Legler, Edward, jr., and A. Kohl, Fresno, Calif.; said Kohl assignor to said Legler. Reed wind musical instrument. 1,568,460; Jan. 5.
Lehmann, Erich, Berlin-Charlottenburg, Germany. Compensating the copying intensity of cinematographic picture films. 1,568,511; Jan. 5.
Lehr, Lewis F., et al. (See Fenlason, Charles F., jr., assignor.)
Lenzel, William L., assignor to The Nolde & Horst Co., Reading, Pa. Drop-stitch mechanism for knitting machines. 1,568,749; Jan. 5.
Lennon, William. (See Hannon, A. M., and Lennon.)
Leonard, Albert P., New York, N. Y. Method and apparatus for the manufacture of sugar. 1,568,512; Jan. 5.
Leonard, Frank P., assignor of one-half to F. C. Claessens, Troy, N. Y. Roofing. 1,568,227; Jan. 5.
Leppert, Henry E., New Britain, assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Knife-blade switch. 1,568,676; Jan. 5.
Leuchter, Richard L. (See Rihosek, J., and Leuchter.)
Lewis, Thomas A., New York, N. Y. Ball. 1,568,513; Jan. 5.
Lewis, Thomas A., New York, N. Y. Playing ball. 1,568,514; Jan. 5.
Lewis, Thomas J., New York, N. Y. Vanity case. Des. 69,183; Jan. 5.
Lex, Henry E., et al. (See Coldwell, Harry T., assignor.)
Lidbeck, Karl, and V. Bryngelson, Niagara, Wis. Swinging-door check. 1,568,856; Jan. 5.
Lietz, Felix E., Buffalo, N. Y. Roofing construcion. 1,568,750; Jan. 5.
Ligon, William M., Lynchburg, Va. Paper-bag rack. 1,568,515; Jan. 5.
Lindhard, Povl T., Brooklyn, assignor to F. L. Smidth & Co., New York, N. Y. Pump. 1,568,751; Jan. 5.
Lindhard, Povl T., Brooklyn, assignor to F. L. Smidth & Co., New York, N. Y. Ball-grinding mill. 1,568,752; Jan. 5.
Lindmueller, Edward, Cleveland, Ohio. Washing machine. 1,568,074; Jan. 5.
Lindquist, Carl, et al. (See Djuberg, Adolph F., assignor.)
Lippert, George A., Dubuque, Iowa. Concealed ironing board. 1,568,228; Jan. 5.
Lipshitz, Julius E. (See Littlejohn, C. F., and Lipshitz.)
Little, Frederick B., Chicago, Ill., assignor, by mesne assignments, to O. B. Brown, St. Louis, Mo. Portable electric lamp. 1,568,947; Jan. 5.
Littlejohn, Charles F., and J. E. Lipshitz, New Haven, Conn. Corset, girdle, and the like. 1,568,894; Jan. 5.
Littlewood, Herman, Nacozari, Mexico, assignor to Smith Engineering Works, Milwaukee, Wis. Rotary grizzly. 1,568,561; Jan. 5.
Littmann, Edwin R., assignor to Commercial Solvents Corporation, Terre Haute, Ind. Paint and varnish remover and making the same. 1,568,753; Jan. 5.
Lloyd, Marshall B., Menominee, Mich., assignor to Heywood-Wakefield Company, Boston, Mass. Producing woven-reed articles. 1,568,075; Jan. 5.
Longue, Benedict J., St. Paul, Minn. Windshield cleaner and heater. 1,568,229; Jan. 5.
Logan, Judson C. (See Wheeler, W. H., and Logan.)
Lomax, Clarence E., assignor to Automatic Electric Company, Chicago, Ill. Automatic telephone system. 1,568,754; Jan. 5.
Low, Alvin H., Los Angeles, Calif. Machine for pumping fluids from wells. 1,568,516; Jan. 5.
Lowe, Harry F. (See Thompson, Henry R., assignor.)
Lufkin Rule Co. (See Schleicher, John A., assignor.)
Lund, George H., assignor to Rothschild Colortype Company, Chicago, Ill. Printing sample color cards and the like. 1,568,076; Jan. 5.
Lundgaard, Ivar, assignor to The Automatic Refrigerating Company, Hartford, Conn. Refrigerating machine. 1,568,230; Jan. 5.
Lundquist, Frank A., and J. A. Kropp, Chicago, Ill., assignors to H. S. Conrad, trustee, Kansas City, Mo. Automatic telephone system. 1,568,755; Jan. 5.
Lyon, George A. (See Starck, William A., assignor.)
Lyon, Robert H. (See Falkenwalde, Oscar, assignor.)
Lyons, Francis P., Manchester, N. H., assignor to G. W. Pearson, trustee, Lowell, Mass. Bungalow trailer. 1,568,895; Jan. 5.
Mabey, Charles W., Indianapolis, Ind. Glove former. 1,568,078; Jan. 5.
Mable, William, et al. (See Coldwell, Harry T., assignor.)
MacDonald, Frank J., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Method and apparatus for shaping plastic material. 1,568,562; Jan. 5.
MacGregor, Wallace F., assignor to J. I. Case Threshing Machine Company, Racine, Wis. Combination harvester thrasher. 1,568,679; Jan. 5.
MacFarlane, Arthur D., Seattle, Wash. Internal-combustion engine. 1,568,342; Jan. 5.
MacKenzie, George W., Beaver, Pa. Liquid-measuring apparatus. 1,568,517; Jan. 5.
MacKenzie, George W., Springfield, Ill. Liquid-dispensing apparatus. 1,568,518; Jan. 5.
MacKenzie, George W., Beaver, Pa. Liquid-measuring apparatus. 1,568,519; Jan. 5.
Macklanburg, Louis A., Oklahoma City, Okla. Sash plug. 1,568,173; Jan. 5.
Maclaren, James G., Mamaroneck, N. Y., assignor, by mesne assignments, to The Lamson Company. Pneumatic-dispatch apparatus. 1,568,680; Jan. 5.
Macnicol, Arnold N., Melbourne, Victoria, Australia. Reenforcement for concrete pipes. 1,568,233; Jan. 5.
MacQuigg, Charles E., Flushing, assignor to Electro Metallurgical Company, Niagara Falls, N. Y. Carbonizing box or the like. 1,568,174; Jan. 5.
Mader, Alys, Pittsburgh, Pa. Vise. 1,568,563; Jan. 5.
Magee, Chauncey L. C., Chicago, Ill. Winding-drum mechanism. 1,568,175; Jan. 5.
Magee, William H., assignor to Fostoria Glass Company, Moundsville, W. Va. Glass goblet or similar article. Des. 69,184; Jan. 5.
Magin, Jacob G., and A. Wollensak, assignors to Wollensak Optical Company, Rochester, N. Y. Distance finder. 1,568,759; Jan. 5.
Malcolm, James D., Spokane, Wash. Tree holder. 1,568,758; Jan. 5.
Malouf, Charles and N., Chicago, Ill. Coin-controlled clock. 1,568,564; Jan. 5.
Malouf, Charles. (See Pease, Raymond H., assignor.)
Malouf, Nicholas. (See Malouf, Charles and N.)
Marcalus, Nicholas, Plainfield, N. J., assignor to Niles-Bement-Pond Company, New York, N. Y. Adjusting and clamping gib. 1,568,681; Jan. 5.
Marcellus, Fredrick S., Amsterdam, N. Y., assignor to General Electric Company. Commutation. 1,568,682; Jan. 5.
Marshall, William B. (See Davison, W. E., and Marshall.)
Marks, Herbert E., Glen Osborne, Pa. Roof structure. Re16,243; Jan. 5.
Martens, Albert L., Bellmore, assignor of one-half to F. A. Conrad, Brooklyn, N. Y. Rotary cutting machine. 1,568,520; Jan. 5.
Martin, Talbot G., assignor to Automatic Electric Company, Chicago, Ill. Electromagnetic relay. 1,568,760; Jan. 5.
Matheson, James W. (See Duff, A. L., and Matheson.)
Matsukata, Goro. (See Neill, James W., assignor.)
May, Jean L., Salt Lake City, Utah. Vehicle light. 1,568,079; Jan. 5.
McAbee, Philip W., Muncie, Ind. Bottle. Des. 69,185; Jan. 5.
McAfee, Almer M., Port Arthur, Tex., assignor to Gulf Refining Company, Pittsburgh, Pa. Recovery of aluminum chloride. 1,568,171; Jan. 5.
McAlear, James, and E. W. Riesbeck, assignors to The McAlear Mfg. Co., Chicago, Ill. Controlling device for heaters. 1,568,756; Jan. 5.
McAlear Mfg. Co., The. (See McAlear, J., and Riesbeck, assignors.)
McCabe Hanger Mfg. Co., The. (See Cross, Stoughton P., assignor.)
McCanless, William F., Charlotte, N. C. Street-railway construction. 1,568,677; Jan. 5.
McClellan, Lewis K., Belfry, Mont. Antiskid chain for vehicle tires. 1,568,231; Jan. 5.
McCord Radiator & Mfg. Co. (See Owston, Charles W., assignor.)
McCullough, Frederick S., Wilkinsburg, Pa. Thermionic tube. 1,568,172; Jan. 5.
McDonald, Patrick, Westville, Ill. Car coupling. 1,568,678; Jan. 5.
McFadden, Glenn E., Lakewood, Ohio, assignor to Alfred Vester Sons Inc., Providence, R. I. Lighting fixture. 1,568,232; Jan. 5.
McFarland, David M., West Chester, Pa., assignor to Atlas Powder Company, Wilmington, Del. Testing blasting machines. 1,568,609; Jan. 5.
McGee, Oscar P., assignor of one-half to W. A. Sedwick, Dallas, Tex. Safety automatic elevator-door equipment. 1,568,461; Jan. 5.

McGee, William M., Santa Monica, Calif. Circulating plunger pump. 1,568,857; Jan. 5.
McGrath, Patrick J., Brooklyn, N. Y. Game apparatus. 1,568,340; Jan. 5.
McGuire, Thomas W. L., Kansas City, Mo. Carburetor. 1,568,341; Jan. 5.
McIntyre, Edith A., New York, N. Y. Therapeutic leg and foot wrap. 1,568,757; Jan. 5.
McKay, Augusta P., assignor to Towers & Sullivan Manufacturing Co., Rome, Ga. Disk harrow. 1,568,896; Jan. 5.
McKay, Augusta P., assignor to Towers & Sullivan Manufacturing Co., Rome, Ga. Combination weight and depth gauge. 1,568,897; Jan. 5.
McManus, John A., et al. (See Thomson, Elihu, assignor.)
McNair, Charles, assignor, by direct and mesne assignments, to The Hawmack Manufacturing Company, Jackson, Miss. Refrigerating apparatus. 1,568,898; Jan. 5.
McNaught, Norris F., Chicago, Ill. Rebound check. 1,568,858; Jan. 5.
McVoy, Vincen P., assignor to Phoenix Machine Works, Mobile, Ala. Automatic pump and boiler feeder. 1,568,077; Jan. 5.
McWane, Arthur T., Birmingham, Ala. Canopy for loading cars. 1,568,280; Jan. 5.
McWhorter, William H. (See Treiber, Theodore R., assignor.)
Meadowcroft, Joseph W., assignor to Edward G. Budd Manufacturing Company, Philadelphia, Pa. Electric welding. 1,568,080; Jan. 5.
Medford, Brose P. (See Bradley, George W., assignor.)
Melanowski, Leo, assignor to The Citizens Savings and Trust Company, operating trustee, Cleveland, Ohio. Power-transmitting mechanism. 1,568,287; Jan. 5.
Melanowski, Leo, assignor to The Citizens Savings and Trust Company, operating trustee, Cleveland, Ohio. Power-transmitting mechanism. 1,568,288; Jan. 5.
Melanowski, Leo, assignor to The Citizens Savings and Trust Company, operating trustee, Cleveland, Ohio. Power-transmitting mechanism. 1,568,289; Jan. 5.
Meloche, Daniel H., assignor to E. Holley, Detroit, Mich. Coating for molds. 1,568,234; Jan. 5.
Mendenhall, Walter E., assignor to The Union Metals Extraction Company, Lake City, Colo. Ore concentrator. 1,568,761; Jan. 5.
Mercer, Ed. (See Mercer, Jesse and E.)
Mercer, Jesse, Benton, and E. Mercer, West Frankfort, Ill. Sign. 1,568,899; Jan. 5.
Messick, George A., et al. (See Williams, Elmer R., assignor.)
Metcalf, Herbert A., New York, N. Y. Eyeshade. 1,568,900; Jan. 5.
Meyers, John M., Janesville, Wis., assignor to Durant Engineering Corporation, New York, N. Y. Corn harvester. 1,568,683; Jan. 5.
Michel, Hermann, Voorde, Germany. Engine, and particularly internal-combustion engine. 1,568,684; Jan. 5.
Mickey, Edwin M., Gormania, W. Va. Receiver. 1,568,901; Jan. 5.
Mid-States Gummed Paper Company, et al. (See Huempfner, Ferdinand W., assignor.)
Midence, Adolph, Paris, France. Sound amplifying and reproducing device for talking machines and other sound-reproducing instruments. 1,568,521; Jan. 5.
Miehle Printing Press & Manufacturing Company. (See Stevens, Burt D., assignor.).
Miles, Hiram E. and M. E., San Francisco, Calif. Insulator brush. 1,568,408; Jan. 5.
Miles, Mason E. (See Miles, Hiram E. and M. E.)
Miller Auto Bed and Manufacturing Company. (See Miller Sigfrid A., assignor.)
Miller, Dorr, Toledo, Ohio. Window-regulating device. 1,568,343; Jan. 5.
Miller, Fred A., assignor of one-half to D. E. Parks, and one-half to W. T. Bohne, St. Louis, Mo. Transmission band. 1,568,565; Jan. 5.
Miller, Fred A., assignor of one-half to D. E. Parks, and one-half to W. T. Bohne, St. Louis, Mo. Transmission band. 1,568,566; Jan. 5.
Miller, Sigfrid A., assignor to Miller Auto Bed and Manufacturing Company, Oakland, Calif. Camper's folding bed. 1,568,409; Jan. 5.
Miner, Frederick M., Madison, Wis. Gas heater. 1,568,610; Jan. 5.
Miner, W. H., Inc. (See O'Connor, John F., assignor.)
Minter, Clarke C., Bloomfield, N. J. Charge-supply means for internal-combustion engines and means for maintaining uniform mixture conditions of the charge. 1,568,410; Jan. 5.
Michell Bearings Limited. (See Newbigin, Henry T., assignor.)
Mitchell, John, and J. C. G. Cossey, London, England. Brake slack adjuster for railway and like vehicles 1,568,902; Jan. 5.
Mitchell, William L., Grosse Pointe Farms, Mich. Auxiliary gasoline-supply device. 1,568,380; Jan. 5.
Mitterreiter, William, Memphis, Tenn. Gauge cock. 1,568,522; Jan. 5.
Mitton, William E., New London, Wis., assignor to The Borden Company, New York, N. Y. Apparatus for recovering the contents of cans. 1,568,081; Jan. 5.
Mitton, William E., New London, Wis., assignor to The Borden Company, New York, N. Y. Apparatus for loading trays with cans. 1,568,082; Jan. 5.
Moburg, Frank O. (See Hedenburg, Oscar F., assignor.)
Model Brassiere Co. (See Johnson, Augusta S., assignor.)
Mohan, Michael J., Covington, Ky. Milk can. 1,568,176; Jan. 5.
Moody, Clarence S., and W. Oepts, assignors to H. L. Griesedieck, St. Louis, Mo. Apparatus for making photographic films. 1,568,344; Jan. 5.
Moore Dry Kiln Company. (See Williams, Patrick M., assignor.)
Moore, Roy W., Schenectady, N. Y., assignor to General Electric Company. Purification of highly-oxidizable metals. 1,568,685; Jan. 5.
Morden, Charles W., West Linn, Oreg. Slice for paper-making machine. 1,568,903; Jan. 5.
Moreau, Joseph, Montreal, Quebec, Canada. Potato digger. 1,568,235; Jan. 5.
Morelock, Albert E., et al. (See Williams, Elmer R., assignor.)
Morison, George S., Pittsburgh, Pa. Roller eccentrics. 1,568,290; Jan. 5.
Moritz, Harold K., and F. H. Harp, assignors to Frank E. Best, Inc., Seattle, Wash. Faceplate-attaching means for locks. 1,568,462; Jan. 5.
Morgan, John S. (See Duckham, A. M., and Morgan.)
Morgan, Ralph S., assignor to Northern Indiana Brass Company, Elkhart, Ind. Push levers for operating closet-tank valve. 1,568,611; Jan. 5.
Morrell, Jacque C., assignor to Universal Oil Products Company, Chicago, Ill. Refining hydrocarbon oils. 1,568,904; Jan. 5.
Morris, Ephriam W., Rockwood, Tenn., assignor of one-third to O. H. Anderson, Oneida, Tenn. Wheel-locking dog. 1,568,523; Jan. 5.
Morrison, Ralph W., Omaha, Nebr. Stylus-operating means. 1,568,612; Jan. 5.
Morse Drydock & Repair Co. (See Strachan, C., and Irish, assignors.)
Morse, Herman E., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Heel for boots and shoes. Des. 69,186; Jan. 5.
Morse, Waldo G., Yonkers, N. Y. Article of manufacture and making the same. 1,568,463; Jan. 5.
Munro, Murdo J., Hamilton, Ontario, assignor of one-half to G. R. Petrie, Burlington, Canada. Apparatus for rolling sheet-metal pipe. 1,568,905; Jan. 5.
Munro, Murdo J., Hamilton, Ontario, assignor of one-half to G. R. Petrie, Burlington, Canada. Pipe-making apparatus. 1,568,906; Jan. 5.
Munson, Luther S., Washington, D. C. Building block. 1,568,613; Jan. 5.
Munzinger, Friedrich, Berlin, Germany. Boiler water-level control. 1,568,762; Jan. 5.
Murphy, George B. (See Bennett, H. T., Murphy, and Story.)
Musselman, Joseph F., Bronxville, N. Y., assignor, by mesne assignments, to Elliott Company, Pittsburgh, Pa. System for rendering liquids noncorrosive. 1,568,763; Jan. 5.
Myers, Hubert A., Toledo, Ohio. Clutch device. 1,568,567; Jan. 5.
Mytko, Jacob, Depew, N. Y. Lighted plate. 1,568,907; Jan. 5.
Nagin, Harry, Brooklyn, N. Y. Stair construction. 1,568,568; Jan. 5.
Nashua Gummed & Coated Paper Company. (See Gautier, Trevor R., assignor.)
Neidich, Samuel A., Edgewater Park, N. J. Filament-drying apparatus. 1,568,686; Jan. 5.
Neidich, Samuel A., Edgewater Park, N. J. Apparatus for treating filaments formed from viscose. 1,568,687; Jan. 5.
Neill, James W., Pasadena, Calif., assignor to G. Matsukata, Tokyo, Japan. Recovering copper. 1,568,464; Jan. 5.
Nelswender, Charles W., and R. B. Furgason, Bucyrus, Kans. Mail-pouch catcher. 1,568,177; Jan. 5.
Nelson, Edward, Belleville, N. J., assignor to O. & W. Company. Making articles of vulcanizable rubber. 1,568,411; Jan. 5.
New Haven Clock Co., The. (See Whitehead, Richard H., assignor.)
Newark Tube Company. (See Snodgrass, H. E., and Hunter, assignors.)
Newbigin, Henry T., Newcastle-on-Tyne, England, assignor to Michell Bearings Limited, London, England. Thrust bearing or the like. 1,568,908; Jan. 5.
Newman, I., & Sons, Inc. (See Newman, Samuel J., assignor.)
Newman, Samuel J., assignor, by mesne assignments, to I. Newman & Sons, Inc., New Haven, Conn. Corset. 1,568,909; Jan. 5.
Niemes, Jacob, and H. B. Engbersen, deceased, Chicago, Ill.; B. M. Engbersen, administratrix. Tandem arrangement for printing machines and the like. 1,568,381; Jan. 5.
Niles-Bement-Pond Company. (See Marcalus, Nicholas, assignor.)
Nitz, George, assignor to F. Damato, Omaha, Nebr. Adjustable brush handle. 1,568,524; Jan. 5.

Nizamis, Efthimios P., Kalamazoo, Mich. Coin-controlled vending machine. 1,568,764; Jan. 5.
Noble, Arthur H., Pawtucket, assignor to Theodore W. Foster & Bro. Co., Providence, R. I. Lip-stick holder. 1,568,178; Jan. 5.
Noe, William R., & Sons. (See Villaret, Gustave E., assignor.)
Noguchi, Thomas S., New York, N. Y. Cleaning compound. 1,568,910; Jan. 5.
Nolde & Horst Co., The. (See Lengel, William L., assignor.)
Nord, Olof A., Vavenby, British Columbia, Canada. Trap. 1,568,688; Jan. 5.
Northern Indiana Brass Company. (See Morgan, Ralph S., assignor.)
Notz, Felix, and G. Royan, assignors to American Oven & Machine Company, Chicago, Ill. Dough-mixing machine. 1,568,291; Jan. 5.
Nu-Ex-Fire Appliance Company. (See Bargar, Frederick C., assignor.)
Nystrom, Karl F., assignor to Camel Company, Chicago, Ill. Bolt mounting and shoe for car-door posts. 1,568,689; Jan. 5.
O. & W. Company. (See Nelson, Edward, assignor.)
Oakley, Richard O. (See Kulage, D., and Oakley.)
O'Brien, Douglas F., Melbourne, Victoria, Australia. Shock-absorbing device for handle bars of motor cycles and the like. 1,568,911; Jan. 5.
O'Connor, John F., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Friction shock-absorbing mechanism. 1,568,292; Jan. 5.
O'Connor, John F., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Friction shock-absorber mechanism. 1,568,614; Jan. 5.
Oepts, William. (See Moody, C. S., and Oepts.)
Olsen, Hans P., Esther, Alberta, Canada. Shocker. 1,568,179; Jan. 5.
Olin, Gustaf A., Worcester, Mass. Surfacing tool. 1,568,912; Jan. 5.
Olsson, Zacharias, Westport, Conn., assignor to J. K. Wheten, New York, N. Y. Lamp construction. 1,568,463; Jan. 5.
Order of Job's Daughters. (See Vermillion, Helen M., assignor.)
Ormiston, Perley L., Portland, Oreg. Compression gauge. 1,568,913; Jan. 5.
Ortego, Leo, Alexandria, La. Helicopter. 1,568,765; Jan. 5.
Osmera, Frank, Wauneta, Nebr. Feeding attachment for thrashing machines. 1,568,525; Jan. 5.
Osswald, Herman, Niverville, N. Y. Stop mechanism for die presses. 1,568,083; Jan. 5.
Ostermann, Rudolf M., Evanston, Ill., assignor to The Superheater Company, New York, N. Y. Injector. 1,568,466; Jan. 5.
Oswego Falls Corporation. (See Wright, Wilbur L., assignor.)
Otten, Edward, Brooklyn, N. Y. Conditioning inking rolls. 1,568,382; Jan. 5.
Owens, Dabney P., Lake Worth, Fla. Universal joint. 1,568,914; Jan. 5.
Owston, Charles Wm., assignor to McCord Radiator & Mfg. Co., Detroit, Mich. Radiator. 1,568,526; Jan. 5.
P & M Company, The. (See Blair, Rolandis A., assignor.)
Packer, Ezra J., assignor to The Pooley Company, Philadelphia, Pa. Radioamplifier and support. 1,568,467; Jan. 5.
Pader City Glass Manufacturing Company. (See Fisher, David, assignor.)
Paraffine Companies, The. (See Fleming, Cornelius S., assignor.)
Parent Cone Company. (See Hauge, O., and England, assignors.)
Parker, Victor C., Waterloo, Ia., assignor to General Motors Corporation, Detroit, Mich. Overhead cam shaft and valve gear. 1,568,615; Jan. 5.
Parkes, Richard W., San Francisco, Calif. Scooter. 1,568,412; Jan. 5.
Parkes, Willard M., Onaway, Mich. Illuminated license plate. 1,568,915; Jan. 5.
Parks, David E., et al. (See Miller, Fred A., assignor.)
Parr, Lawrence, Seattle, Wash. Spike sandal. 1,568,616; Jan. 5.
Parsons, Philip D., Philadelphia, Pa., assignor to Scott Paper Company. Combination mirror and towel rack. 1,568,690; Jan. 5.
Pasnik, Alexander M., Norwich, Conn. Nailbrush. 1,568,569; Jan. 5.
Patten, Charles H., assignor to Rex Manufacturing Co., Providence, R. I. Extension attachment for flexible bracelets. 1,568,617; Jan. 5.
Paulus, Charles L. (See Russell, H. O., and Paulus.)
Peacock, Samuel. (See Scott, I. M., and Peacock.)
Pearne, Frank Y., assignor to Lacy Manufacturing Company, Los Angeles, Calif. Valve. 1,568,236; Jan. 5.
Pearson, Charles. (See Johnston, E. A., Benjamin, and Pearson.)
Pearson, Charles H., Brookline, Mass. Safety clutch mechanism. 1,568,527; Jan. 5.
Pearson, Gardner W., trustee. (See Lyons, Francis P., assignor.)
Pearsons, George T., assignor to Pyrene Manufacturing Company, New York, N. Y. Fire extinguisher. 1,568,084; Jan. 5.
Pease, Raymond H., assignor to C. Malouf, Chicago, Ill. Coin-controlled mechanism. 1,568,570; Jan. 5.
Peebles, David D., Eureka, Calif. Separator. 1,568,413; Jan. 5.
Peerless Light Company. (See Herskovitz, Abraham, assignor.)
Peerless Weather strip and Caulking Company. (See Kulage D., and Oakley, assignors.)
Pelzer, Adolph, Tacoma, Wash. Lock. 1,568,916; People of the United States of America. (See Jones, John E.)
Pepin, Augustus J., Grand Forks, N. Dak. Combination auto table and trunk. 1,568,766; Jan. 5.
Perkins, Laurence M., Syracuse, N. Y. Generator. 1,568,237; Jan. 5.
Perry, James F., Cove City, N. C. Plow. 1,568,383; Jan. 5.
Perry, Lewis, New York, N. Y. Candy box. Des. 69,187; Jan. 5.
Peterson, Adeline C., New York, N. Y. Undergarment. 1,568,917; Jan. 5.
Petrie, Edward R., New York, N. Y. Whistle. 1,568,528; Jan. 5.
Petrie, George R. (See Munro, Murdo J., assignor.)
Pfadt, John G., Erie, Pa. Snow-melting machine. 1,568,414; Jan. 5.
Pfiffner, Emil, Frybourg, Switzerland. Electric condenser. 1,568,918; Jan. 5.
Pforr, Henry E., Hamberg, N. Dak. Grain cleaner. 1,568,618; Jan. 5.
Phelps, Earle B., Ridgewood, N. J. Proportional-flow device. 1,568,619; Jan. 5.
Phoenix Machine Works. (See McVoy, Vincen P., assignor.)
Pieper, Alphonse F. (See Pieper, Oscar H., and A. F.)
Pieper, Oscar H. and A. F., Rochester, N. Y. Unitary sight-projecting apparatus. 1,568,085; Jan. 5.
Pieper, Oscar H. and A. F., Rochester, N. Y. Unitary apparatus for projecting light rays. 1,568,086; Jan. 5.
Pierce, George L., Brooklyn, assignor to A. G. Spalding & Bros., New York, N. Y. Shoulder pad. 1,568,238; Jan. 5.
Pierson, James R., New York, N. Y. Combined squeezer and beverage shaker. 1,568,691; Jan. 5.
Pilliod, Frederic L., Plainfield, N. J., assignor to Johns-Manville Incorporated. Non-heat-conducting covering. 1,568,415; Jan. 5.
Pinkerton, Flora M. (See Jones, H. I., and Pinkerton.)
Pollock, Alan A., Leamington Spa, England, assignor to General Electric Company. Dynamo-electric machine. 1,568,692; Jan. 5.
Poloskie, Bernard L., Lancaster, Pa. Automobile curtain. 1,568,529; Jan. 5.
Pooley Company, The. (See Packer, Ezra J., assignor.)
Porter, Josephine, et al. (See Conwell, Simon W., assignor.)
Potteiger, William E., Harrisburg, Pa. Automatic ignition device for gas burners. 1,568,620; Jan. 5.
Powell, Sara R., San Francisco, Calif. Electric-light fixture. Des. 69,188; Jan. 5.
Powell, Winfred T., assignor to Automatic Electric Company, Chicago, Ill. Automatic telephone system. 1,568,180; Jan. 5.
Power Specialty Company. (See Primrose, John, assignor.)
Pratt & Whitney Company. (See Knowles, Carroll, assignor.)
Pratt & Whitney Company. (See Thacher, John J., assignor.)
Pratt, Edwin H., Corvallis, Oreg. Unit tray. 1,568,468; Jan. 5.
Price, William E., White Plains, N. Y. Light-reflector fixture. Des. 69,189; Jan. 5.
Prichard, George L., and H. Henderson, Port Arthur, Tex., assignors to Gulf Refining Company, Pittsburgh, Pa. Making chlorides. 1,568,181; Jan. 5.
Prichard, Jordan L., Canyon, Tex. Harvester for cotton bolls. 1,568,530; Jan. 5.
Priebe, Herman C., Chicago, Ill. Car truck. Re16,242; Jan. 5.
Prietz, Reinhold. (See Kolling, C. H., and Prietz.)
Primrose, John, assignor to Power Specialty Company, New York, N. Y. Oil still. 1,568,182; Jan. 5.
Proulx, Walter, Norridgewock, Me. Electrical appliance. 1,568,767; Jan. 5.
Pungs, William A., Detroit, Mich. Garage. 1,568,384; Jan. 5.
Pure Oil Company, The. (See Carr, Richard H., assignor.)
Putterman, Benjamin, Brooklyn, N. Y., assignor to American Auto Lamp Co., Inc. Vehicle signal lamp. Des. 69,190; Jan. 5.
Pyrene Manufacturing Company. (See Pearsons, George T., assignor.)
Quickwork Company, The. (See Smith, Henry C., assignor.)
Rabezzana, Hector, assignor to A C Spark Plug Company, Flint, Mich. Nonmetallic electrode for spark plugs. 1,568,621; Jan. 5.
Ramsey, Archibald D., Tuolumne, Calif. Trouble detector for generators. 1,568,385; Jan. 5.
Rankin, William A. (See Frieman, J. G., and Rankin.)
Rapson, Hobart D., Philadelphia, Pa. Figure toy. 1,568,469; Jan. 5.

Ratcliff, William, and H. Wallace, London, assignors to The Victory-Kidder Printing Machine Company Limited, Birkenhead, England. Printing machine. 1,568,919; Jan. 5.

Ratcliffe, Ernest S. (See Swart, William B., assignor.)

Raymond Bros. Engineering Co. (See Bergman, Lars H., assignor.)

Raymond Brothers Impact Pulverizer Company, The. (See Raymond, Fred L., assignor.)

Raymond, Fred L., River Forest, assignor to The Raymond Brothers Impact Pulverizer Company, Chicago, Ill. Feed regulator. 1,568,571; Jan. 5.

Reber, Emil, and J. Fröhlich, assignors to Society of Chemical Industry in Basle, Basel, Switzerland. Green sulphurized dyestuffs and making same. 1,568,622; Jan. 5.

Redmond, Harriet L., Needham, assignor to The William Carter Company, Needham Heights, Mass. Undergarment. 1,568,416; Jan. 5.

Reeves, Milton O., Columbus, Ind., assignor, by mesne assignments, to The Heim Grinder Company, Danbury, Conn. Balance grinding wheel. 1,568,920; Jan. 5.

Reid, James S., assignor to The Easy-On Cap Company, Cleveland, Ohio. Hub and closure structure. 1,568,768; Jan. 5.

Reilly, Harvey J., Los Angeles, Calif. Tent structure. 1,568,239; Jan. 5.

Renault, Louis. (See Salves, Leon, assignor.)

Rex Manufacturing Co. (See Ballou, David M., assignor.)

Rex Manufacturing Co. (See Patten, Charles H., assignor.)

Reymond, Martin H., Binghamton, N. Y. Quality gauge for leather. 1,568,183; Jan. 5.

Reynolds, Anita S., Greenwich, Conn. Cut-off. 1,568,531; Jan. 5.

Rhenbottom, Charles H., Coldwater, Mich. Steering device. 1,568,417; Jan. 5.

Rice, James R., Elkhart, Kans. Washing machine. 1,568,240; Jan. 5.

Richards, Charles A., Chicago, Ill. Gathering machine. 1,568,293; Jan. 5.

Riddle, Edward N., Company, The. (See Crowell, Frank S., assignor.)

Riesbeck, Ernest W. (See McAlear, J., and Riesbeck.)

Riesner, Benjamin, New York, N. Y. Hood for cooking ranges. 1,568,532; Jan. 5.

Riggs, Garshom A., assignor to Eastman Kodak Company, Rochester, N. Y. Photographic camera. 1,568,623; Jan. 5.

Rihosek, Johann, Vienna, and R. L. Leuchter, Weidlingau-Hadersdorf, assignors to the Firm Gebrüder Hardy Maschinenfabrik und Giesserei A. G., Vienna, Austria. Air-pressure railway brake. 1,568,533; Jan. 5.

Riley, Clifford G., Manchester, England. Pallet. 1,568,294; Jan. 5.

Rimailho, Emile, assignor to Compagnie des Forges & Acieries de la Marine & d'Homecourt, Paris, France. Traveling track device with pneumatic suspension. 1,568,241; Jan. 5.

Robe, Eugene A., Leavittsburg, Ohio. Shipping or storage receptacle of the vacuum type. 1,568,948; Jan. 5.

Roberti, Dario, Springfield, Mass. Combination lock. 1,568,624; Jan. 5.

Roberts, Hugh. (See Roberts, Thomas H. and H.)

Roberts, Thomas H., Cranford, and H. Roberts, Garwood, N. J. Tooth-paste ejector. 1,568,921; Jan. 5.

Robinson, Daniel P., Baltimore, Md., assignor to Continental Can Company, Syracuse, N. Y. Friction-top cans. 1,568,625; Jan. 5.

Robinson, Francis W. J., Germiston, Transvaal, South Africa. Device for obviating the glare of the headlights of motor cars and other vehicles. 1,568,922; Jan. 5.

Robinson, Frederic W., and K. V. Knapp, assignors to Hanovia Chemical and Mfg. Co., Newark, N. J. Therapeutical lamp. 1,568,345; Jan. 5.

Robitoy, Louis P., Fargo, N. Dak., and C. L. Velander, Minneapolis, Minn., assignors to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,568,386; Jan. 5.

Robson, William H., assignor to Brigham-Hopkins Company, Baltimore, Md. Hat brim and method of making. 1,568,626; Jan. 5.

Roché, Jean A., Dayton, Ohio. Airplane-fuselage construction. 1,568,087; Jan. 5.

Rochefort, François, Paris, France. Rotary motor. 1,568,242; Jan. 5.

Rockford Milling Machine Company. (See Sundstrand, Oscar J., assignor.)

Rockwell, Hugh M., Bristol, Conn., assignor, by mesne assignments, to Standard Steel and Bearings Incorporated, Wilmington, Del. Wheel-dressing device. 1,568,243; Jan. 5.

Rodman, Isaac P., Newark, assignor, by mesne assignments, to Garod Corporation, Belleville, N. J. Wireless receiving tuner. 1,568,470; Jan. 5.

Roemar, Max, Lost Hills, Calif. Ventilated seat. 1,568,471; Jan. 5.

Rogers, Nellie S. (See Rogers, Winfield S., assignor.)

Rogers, Winfield S., assignor to N. S. Rogers, Bantam, Conn. Grinding machine. 1,568,184; Jan. 5.

Rogers, Winfield S., assignor to N. S. Rogers, Bantam, Conn. Grinding machine. 1,568,185; Jan. 5.

Roper, Geo. D., Corporation. (See Derwent, Watson E., assignor.)

Rosas, Guadalupe, Los Angeles, Calif. Artificial flowers. 1,568,859; Jan. 5.

Rose, William D., Portland, Oreg. Brush head. 1,568,418; Jan. 5.

Rosenfeld, Irvin. (See Gottesman, O. M., and Rosenfeld.)

Rosenkranz, Wilhelm, Holzminden-on-the-Weser, Germany. Folding chair. 1,568,244; Jan. 5.

Rosenstein, George H., New York, N. Y. Thread-counting apparatus. 1,568,088; Jan. 5.

Rossbrough, Gordon A., Chadwell Heath, England. Convertible chair. 1,568,419; Jan. 5.

Rothman, Robert, Brooklyn, N. Y. Knit fabric. 1,568,693; Jan. 5.

Rothschild Colortype Company. (See Lund, George H., assignor.)

Rough, Robert E. (See Brooks, W. W. and Rough.)

Rowse, Frank J., Pawtucket, R. I. Coin-controlled locking mechanism. 1,568,760; Jan. 5.

Rowse, Frank J., Pawtucket, R. I. Coin-control service apparatus. 1,568,770; Jan. 5.

Roy, Francis V. (See Vaile, P. A., and Roy.)

Roy, Joseph, Cleveland, Ohio, assignor to American Stove Company, St. Louis, Mo. Grid for gas burners. 1,568,771; Jan. 5.

Royan, George. (See Notz, F., and Royan.)

Rubin, Hyman, New York, N. Y. Adjustable hot and cold water mixer, with filter and delivery nozle, for sinks, etc. 1,568,772; Jan. 5.

Ruggles, William A., Schenectady, N. Y., assignor to General Electric Company. Photo-electric device. 1,568,694; Jan. 5.

Ruiz, Ignacio, assignor of one-fourth to W. O. Hahn, New York, N. Y. Spout for sugar bowls. 1,568,923; Jan. 5.

Russell, Herbert O., Detroit, Mich., and C. L. Paulus, Dayton, Ohio. Mount for flexible synchronized guns. 1,568,089; Jan. 5.

Ruths, Johannes, Djursholm, Sweden, K. Ingerö, Christiania, Norway, and H. Schrenk, Charlottenburg, Germany, assignors to Aktiebolaget Vaporackumulator, Stockholm, Sweden. Plant where heat-consuming apparatus cooperates with a number of feed conduits. 1,568,420; Jan. 5.

Ruttle, William H., Seattle, Wash. Ice-cream cutter. 1,568,534; Jan. 5.

Ruze, John, New York, N. Y. Stamp or label moistener. 1,568,245; Jan. 5.

Ryan, Thomas W., Concord Junction, Mass. Slow-closing valve mechanism for fluid-containing tanks. 1,568,346; Jan. 5.

St. Paul Welding & Manufacturing Company. (See Eyleth, Earl M., assignor.)

Salves, Leon, assignor to L. Renault, Billancourt, France. Endless-track vehicle. 1,568,090; Jan. 5.

Sargent & Company. (See Carroll, William J., assignor.)

Sargent & Company. (See Whiting, Victor H., assignor.)

Saunders, Malcolm, Canton, Ohio. Method of and apparatus for setting pouring nozzles in ladles. 1,568,246; Jan. 5.

Sauvage, William H., New York, N. Y., assignor, by mesne assignments, to The Gould Coupler Company. Slack adjuster. 1,568,421; Jan. 5.

Sawyer, Frederick L. (See Berger, Christian, assignor.)

Scarlett, Charles E., et al., trustees. (See Charles, C. L., and Drenning, assignors.)

Schatz, William A., Astoria, assignor of 70 per cent to W. J. Atwood, New York, N. Y. Dispensing device. 1,568,091; Jan. 5.

Schech, Frederick J., Minneapolis, Minn. Floor waxer and polisher. 1,568,773; Jan. 5.

Schetelig, Paul, assignor to the Firm Society of Chemical Industry in Basle, Basel, Switzerland. Condensation product of the Anthraquinone series and making same. 1,568,627; Jan. 5.

Scheuchzer, Auguste, Renens, near Lausanne, assignor to Ferrodesherbeuse Scheuchzer Societe Anonyme, Renens, Switzerland. Railway-track-weeding machine. 1,568,472; Jan. 5.

Schey, Max, Brooklyn, N. Y. Adjustable spit. 1,568,535; Jan. 5.

Schilling, George F., et al. (See Huempfner, Ferdinand W., assignor.)

Schleicher, John A., assignor to Lufkin Rule Co., Saginaw, Mich. Locking device for depth-gauge micrometers. 1,568,295; Jan. 5.

Schleicher, John A., assignor to Lufkin Rule Co., Saginaw, Mich. Spindle-clamping device. 1,568,296; Jan. 5.

Schmelz, Charles F., assignor to The Curtis & Curtis Co., Bridgeport, Conn. Machine for cutting off pipe. 1,568,473; Jan. 5.

Schmidlin, Fritz, assignor to Aktiengesellschaft Brown, Boveri & Cie., Baden, Switzerland. Apparatus for effecting the automatic connecting and disconnecting of electrical machine units. 1,568,474; Jan. 5.

Schmitz, Fred A., assignor to The General Fireproofing Company, Youngstown, Ohio. Edge construction for furniture tops. 1,568,247; Jan. 5.

Schneider, Harold A. (See Hemmer, Albert, assignor.)

Schneider, Julius, et al. (See Jaeger, Henry G., assignor.)

Schrenk, Hans. (See Ruths, J., Ingero, and Schrenk.)

Schroeder, John H., Charleston, S. C. Signal. 1,568,628; Jan. 5.

Schumacher, Elmer L., Southbridge, and W. H. Boutelle, Sturbridge, assignors to American Optical Company, Southbridge, Mass. Making parts for ophthalmic mountings. 1,568,629; Jan. 5.

Schürer, Eugen, assignor to Felten and Guilleaume Carlswerk Actien-Gesellschaft, Cologne-Mulheim, Germany. Self-induction coil. 1,568,422; Jan. 5.

Schwab, Samuel S., Toledo, Ohio. Fire extinguisher. 1,568,536; Jan. 5.

Schwanda, Richard, Hotting-Innsbruck, Austria. Slide rule. 1,568,475; Jan. 5.

Scofield, Theodore J., assignor to The Sparks-Withington Company, Jackson, Mich. Brush. 1,568,774; Jan. 5.

Scott, Isaac M., and S. Peacock, Wheeling, W. Va. Dephosphorizing iron and steel. 1,568,186; Jan. 5.

Scott Paper Company. (See Parsons, Philip D., assignor.)

Searing, John F., New Rochelle, N. Y. Protective means for hydrocarbon motors. 1,568,187; Jan. 5.

Sedwick, W. A. (See McGee, Oscar P., assignor.)

Seeley, Frank E. assignor to Abendroth Brothers, Port Chester, N. Y. Gas range. 1,568,188; Jan. 5.

Seiz, Walter, Baden, Switzerland, assignor to General Electric Company. Cascade induction-motor regulation. 1,568,695; Jan. 5.

Seng, Wendelin P., Chicago, Ill. Telltale switch. 1,568,092; Jan. 5.

Senssenbrenner, Carl, Dusseldorf-Oberkassel, Germany. Ammonia-absorption refrigerator. 1,568,476; Jan. 5.

Shannon, James L., Springfield, Mass. Flash light. 1,568,093; Jan. 5.

Shatkin, Aaron, Brooklyn, N. Y. Gem setting. 1,568,924; Jan. 5.

Shaw and Rathke. (See Le Bus, John E., assignor.)

Shaw, David J., New York, N. Y. Apparatus for screening sewage and other mixtures of liquids and solids. 1,568,572; Jan. 5.

Shaw, Ernest, Rosette, Utah. Holder for graphic instruments. 1,568,347; Jan. 5.

Shaw, Ernest C., Chicago, Ill. Air brake. 1,568,189; Jan. 5.

Shaw, Samuel H., New York, assignor to Universal Shock Eliminator, Inc., Long Island City, N. Y. Automobile bumper. 1,568,925; Jan. 5.

Shawmut Engineering Company. (See Bixby, Walter, assignor.)

Shawmut Engineering Company. (See Hathaway, Edgar F., assignor.)

Shearer, George T., Atlanta, Ga. House number. 1,568,630; Jan. 5.

Shelburne, John W., Hannibal, Mo. Pipe-cleaning tool. 1,568,094; Jan. 5.

Shoe, William W., Philadelphia, Pa. Pavement-breaking device. 1,568,190; Jan. 5.

Shoemaker, Louis H., New York, N. Y. Cantilever bridge. 1,568,631; Jan. 5.

Shutt, Albert, Topeka, Kans. Banjo resonator. 1,568,248; Jan. 5.

Sifferlen, Charles, Joliet, Ill. Adjustable tip for canes and the like. 1,568,423; Jan. 5.

Silver, Pius A. C., New Smyrna, Fla. Cycle plane. 1,568,095; Jan. 5.

Simmen, Paul J., Buffalo, N. Y. Automatic moving-vehicle control. 1,568,775; Jan. 5.

Sims, Frederick L. H., Toronto, Ontario, Canada. Folding bed. 1,568,348; Jan. 5.

Singer, Benjamin F., Lancaster, Pa. Turbine engine. 1,568,191; Jan. 5.

Singer Manufacturing Company, The. (See Clayton, Andrew B., assignor.)

Singer Manufacturing Company, The. (See De Voe, Albert H., assignor.)

Slingerland, Frederick W. (See Elson, Harry A., assignor.)

Slocumb, Lloyd Q., Ferguson, Mo. Radio receiving apparatus. 1,568,632; Jan. 5.

Smalenberger, Edward A., assignor to F. L. Duerk, Brooklyn, N. Y. Telephone switch for radio sets. 1,568,297; Jan. 5.

Small, Frank, Winnipeg, Manitoba, Canada. Support for seating accommodation. 1,568,477; Jan. 5.

Smidth, F. L., & Co. (See Lindhard, Povl T., assignor.)

Smith, A. T. (See Kellogg, Edward E., assignor.)

Smith, Daniel A., and J. M. Davidson, Xenia, Ohio. Automobile license tag. 1,568,192; Jan. 5.

Smith, David F., Washington, D. C. Compressor. 1,568,776; Jan. 5.

Smith Engineering Works. (See Littlewood, Herman, assignor.)

Smith, Erasmus D., Rochester, N. Y. Generator. 1,568,478; Jan. 5.

Smith, Frank B. (See Keller, John C., assignor.)

Smith, Harry A., Mondovi, Wash. Operating attachment for washtubs. 1,568,633; Jan. 5.

Smith, Henry C., assignor to The Quickwork Company, St. Marys, Ohio. Ribbing and perforating machine. 1,568,537; Jan. 5.

Smith, Isabella K., administratrix. (See Smith, James, assignor.)

Smith, James, deceased, by I. K. Smith, Dormont Borough, administratrix, assignor to I. K. Smith, Dormont, Pa. Process and apparatus for casting furnace bosh plates. 1,568,096; Jan. 5.

Smith, Jefferson G., McDonough, Ga. Device for setting and replacing poles. 1,568,777; Jan. 5.

Smith, Jehiel P., Winnipeg, Manitoba, Canada. Ferris wheel. 1,568,424; Jan. 5.

Smith, Lena, Chicago, Ill. Hat pad. 1,568,097; Jan. 5.

Smith, Stanley G., assignor to L. A. Young Industries, Inc., Detroit, Mich. Wire-spring-making machine. 1,568,573; Jan. 5.

Smith, Verner C., Salina, Kans. Copyholder. 1,568,425; Jan. 5.

Smith, William O. (See Williams, Edward T., assignor.)

Smythe, Edwin H., Evanston, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Carrier-wave transmission and communicating system. 1,568,194; Jan. 5.

Smythe, Richard M., Brooklyn, assignor to H. M. Black, New York, N. Y. Pie plate. 1,568,696; Jan. 5.

Snodgrass, Harlan E., Summit, and T. M. Hunter, assignor, by mesne assignments, to Newark Tube Company, Newark, N. J. Method of and apparatus for welding. 1,568,193; Jan. 5.

Snook, Earl E., Billings, Mont. Modeling clay. 1,568,098; Jan. 5.

Snyder, Robert W., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Bead-buffing machine. 1,568,634; Jan. 5.

Society of Chemical Industry in Basle. (See Reber, E., and Fröhlich, assignors.)

Society of Chemical Industry in Basle. (See Schetelig, Paul, assignor.)

Society of Chemical Industry in Basle. (See Stiner O., Hausworth, and Gams.)

Söderlund, Olof, T. Boberg, and N. Testrup, assignors to Techno-Chemical Laboratories, Limited, London, England. Separating solids from liquids. 1,568,249; Jan. 5.

Sohl, Ralph W., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Vulcanizing apparatus. 1,568,778; Jan. 5.

Somerville, Joseph A., St. Louis, Mo. Wiper. 1,568,298; Jan. 5.

Sosnitza, Vladimir B., New York, N. Y. Oil furnace. 1,568,479; Jan. 5.

Spalding, A. G., & Bros. (See Pierce, George L., assignor.)

Sparks, William, Jackson, Mich., assignor to The Sparks-Withington Company, Cleveland, Ohio. Fan. 1,568,779; Jan. 5.

Sparks, William, Jackson, Mich., assignor to The Sparks-Withington Company, Cleveland, Ohio. Fan. 1,568,780; Jan. 5.

Sparks-Withington Company. (See Scofield, Theodore J., assignor.)

Sparks-Withington Company, The. (See Sparks, William, assignor.)

Speer-Rosefelt Calendar Bank, Incorporated. (See Speer, Zeno M., assignor.)

Speer, William C., Quinault, Wash. Straight-pull bolt-action rifle. 1,568,635; Jan. 5.

Speer, Zeno M., Wauwatosa, assignor to Speer-Rosefelt Calendar Bank, Incorporated, Milwaukee, Wis. Bank. 1,568,574; Jan. 5.

Speer, Zeno M., Wauwatosa, assignor to Speer-Rosefelt Calendar Bank, Incorporated, Milwaukee, Wis. Bank. 1,568,575; Jan. 5.

Speidel, Charles F., assignor to Eastman Kodak Company, Rochester, N. Y. Self-erecting-front camera. 1,568,636; Jan. 5.

Spencer, Walter J., Dallas, Tex. Automatic air-hose coupling. 1,568,860; Jan. 5.

Spiers, William, Leicester, England. Jack or slider for use in circular-knitting machines. 1,568,480; Jan. 5.

Spotz, Chester A., Greenwich, Conn. Closure for paste tubes and the like. 1,568,781; Jan. 5.

Spreen, Charles C., assignor, by mesne assignments, to Kelvinator Corporation, Detroit, Mich. Compressor. 1,568,195; Jan. 5.

Springer, Roy D., Portland, Oreg. Ironing table. Re16,245; Jan. 5.

Stafford, Alfred E., assignor to Draper Corporation, Hopedale, Mass. Filling-end controller. 1,568,481; Jan. 5.

Stafford Company, The. (See Amsden, Eugene C., assignor.)

Standard Steel and Bearings Incorporated. (See Rockwell, Hugh M., assignor.)

Stanton, Lenthel, Spokane, Wash. Sprinkler. 1,568,250; Jan. 5.

Starck, William A., Milwaukee, Wis., assignor, by mesne assignments, to G. A. Lyon, Philadelphia, Pa. Bumper attacher. 1,568,949; Jan. 5.

Steffens, John A., Baltimore, Md., assignor to U. S. Industrial Alcohol Co. Obtaining absolute propyl alcohol. 1,568,349; Jan. 5.

Stevens, Burt D., Evanston, assignor to Miehle Printing Press & Manufacturing Company, Chicago, Ill. Inking fountain. 1,568,299; Jan. 5.

Stewart-Warner Speedometer Corporation. (See Whittington, Frederick G., assignor.)

Stickney, Burnham C., Rutherford, N. J., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,568,426; Jan. 5.

Stiner, Otto, and A. Hauswirth, Bern, and A. Gams, assignors to Society of Chemical Industry in Basle, Basel, Switzerland. Vitamine preparation and processes of making same. 1,568,196; Jan. 5.

Stoff, George, Canton, Ohio. Valve lifter. 1,568,251; Jan. 5.

Stoll, Berry V., Louisville, Ky. Release vale. 1,568,926; Jan. 5.

Stone, Loren V., and W. E. Bailey, Theresa, N. Y. Radio-plate battery box. 1,568,927; Jan. 5.

Stone, Melvin L., Lawrence, Mass., assignor to Draper Corporation, Hopedale, Mass. Feeler mechanism for looms. 1,568,637; Jan. 5.

Story, Le Roy G. (See Bennett, H. T., Murphy, and Story.)

Stout, Earle B., Gary, Ind. Game apparatus. 1,568,576; Jan. 5.

Strachan, Christopher, South Orange, N. J., and D. J. Irish, assignors to Morse Drydock & Repair Co., New York, N. Y. Atomizer. 1,568,427; Jan. 5.

Straker, Hiram C. (See Chalmers, S., and Foley, assignor.)

Strauss, Joseph. B., Chicago, Ill Building construction. 1,568,099; Jan. 5.

Strub, Otto H., assignor to the Firm F. Ad. Richter & Cie. A. G., Baukastenfabrik, Rudolstadt, Thuringia, Germany. Building blocks for toy structures. 1,568,252; Jan. 5.

Struthers, William G., Oakland, Calif. Shock absorber. 1,568,697; Jan. 5.

Stuhr, Frank, Rhodes, Mich. Bean separator. 1,568,253; Jan. 5.

Stumpf, Johann, Berlin, Germany. Locomotive with combined drive. 1,568,197; Jan. 5.

Sturgis, Herbert M., Kansas City, Mo. Mop head. 1,568,100; Jan. 5.

Sturtevant, B. F., Company. (See Bergstrom, Carl O., assignor.)

Summers, Caleb E., assignor to General Motors Research Corporation, Dayton, Ohio. Internal-combustion engine. 1,568,638; Jan. 5.

Sundstrand, Oscar J., assignor to Rockford Milling Machine Company, Rockford, Ill. Cash register. 1,568,300; Jan. 5.

Superheater Company, The. (See Ostermann, Rudolf M., assignor.)

Swanson, Arthur A., Jamestown, N. Y. Signal. 1,568,928; Jan. 5.

Swart, William B., Johannesburg, Transvaal, assignor of one-half to E. S. Ratcliffe, Capetown, South Africa. Variable-velocity-ratio gearing. 1,568,639; Jan. 5.

Swayne, Patrick F., Jacksonville, Oreg. Knuckle bearing. 1,568,782; Jan. 5.

Sweeney, Francis B., Rochester, N. Y. Stroke counter. 1,568,640; Jan. 5.

Sykes, Charles J., Chicago, Ill. Savings bank. 1,568,577; Jan. 5.

Symmes, Whitman, assignor to Thomas Day Company, San Francisco, Calif. Electric-lighting fixture. 1,568,929; Jan. 5.

Symmes, Whitman, and W. Hanschen, assignors to Thomas Day Company, San Francisco, Calif. Bed lamp. 1,568,930; Jan. 5.

Taft, Edward A., trustee. (See Barker, Robert W., assignor.)

Tatge, George H., et al. (See Tull, W. C., and Bristol, assignor.)

Taylor, Daniel, Lawrence, Mass. Machine for straightening drop wires. 1,568,254; Jan. 5.

Taylor, David, Denver, Colo. Paint. 1,568,350; Jan. 5.

Taylor, Edward C., New York, N. Y. Clamp. 1,568,101; Jan. 5.

Taylor, Huston, assignor to Brennan-Taylor Corporation, Detroit, Mich. Tire carrier. 1,568,351; Jan. 5.

Taylor Instrument Companies. (See Brown, Henry B., assignor.)

Techno-Chemical Laboratories, Limited. (See Söderlund, O., Boberg, and Testrup, assignors.)

Teichman, Albert F. (See Butler, H. G., Teichman, and Carr.)

Testrup, Nils. (See Söderlund, O., Boberg, and Testrup.)

Thacher, John J., Wethersfield, Conn., assignor to Pratt & Whitney Company, New York, N. Y. Attachment for automatic lathes. 1,568,641; Jan. 5.

Thanos, Andrew L. (See Dahne, N. F., and Thanos.)

Thermal Industrial and Chemical (T. I. C.) Research Company. (See Duckham, A. M., and Morgan, assignors.)

Thermokept Corporation. (See Bach, Niels P., assignor.)

Thomas Cusack Company. (See Ehnborn, Charles B., assignor.)

Thomas, Davis E., Tampa, Fla. Siphon-tube holder. 1,568,931; Jan. 5.

Thomas Day Company. (See Symmes, W., and Hanschen, assignors.)

Thomas Day Company. (See Symmes, Whitman, assignor.)

Thomas, George J., South Bend, Ind., assignor to Bendix Brake Company, Chicago, Ill. Brake-applying mechanism. 1,568,391; Jan. 5.

Thompson, Henry R., Falls Church, Va., assignor of one-half to H. F. Lowe, Washington, D. C. Automobile intake heater. 1,568,642; Jan. 5.

Thompson, James, Greeley, Colo. Potato harvester. 1,568,482; Jan. 5.

Thompson, Ralph D., Toledo, assignor of one-half to P. B. Clark, Columbus, Ohio. Loom lock. 1,568,783; Jan. 5.

Thomson, Elihu, Swampscott, assignor of one-third to J. A. McManus, Lynn, and one-third to J. E. Graham, Newtonville, Mass. Refrigerating apparatus. 1,568,102; Jan. 5.

Thornycroft, John I., Bembridge, Isle of Wight, England. Juice-extracting apparatus. 1,568,255; Jan. 5.

Tibbetts, Raymond W., Boston, Mass., and M. S. Curtis, Pawtucket, R. I. Refrigerating apparatus. 1,568,103; Jan. 5.

Tibbetts, Raymond W., West Roxbury, Mass., and M. S. Curtis, Pawtucket, R. I. Gas pump for refrigerating apparatus, etc. 1,568,104; Jan. 5.

Tiffany, Humphrey C., Detroit, Mich. Printing posters. 1,568,105; Jan. 5.

Tobacco Treating Co., The. (See Buensod, Alfred C., assignor.)

Toennes, Richard, Boonville, Mo. Concrete post 1,568,352; Jan. 5.

Toftteen, Olof A., Chicago, Ill. Fuel-saving device. 1,568,302; Jan. 5.

Tolbert, James J., Los Angeles, Calif. Permutation switch lock. 1,568,483; Jan. 5.

Tolman, George, Sheldon, Iowa. Cultivator shovel. 1,568,484; Jan. 5.

Torrent, John, Muskegon, Mich. Electric lamp. 1,568,256; Jan. 5.

Towers & Sullivan Manufacturing Co. (See McKay, Augusta P., assignor.)

Treiber, Theodore R., assignor to W. H. McWhorter, Chicago, Ill. Game table. 1,568,106; Jan. 5.

Trescott, Stephen O., Battle Mountain, Nev. Rupture pad. 1,568,932; Jan. 5.

Trimming, George A. R., Lucknow, British India. Transition coupling device. 1,568,933; Jan. 5.

Trumbull Electric Manufacturing Company, The. (See Broadwell, Harry M., assignor.)

Trumbull Electric Manufacturing Company, The. (See Leppert, Henry E., assignor.)

Tschappat, Sheridan P., Tulsa, Okla., assignor of one-half to H. Callahan, Independence, Kans. Combination tubing spider and support. 1,568,198; Jan. 5.

Tucker, Zoe S., South Bend, Ind. Burial garment. 1,568,107; Jan. 5.

Tull, William C., and R. J. Bristol, Stanton, assignors to V. Biedinger, J. Lampe, G. B. Butterfield, and G. H. Tatge, Norfolk, Nebr. Wrench. 1,568,934; Jan. 5.

Tullis, Roland L., Monrovia, Calif. Automobile door latch. 1,568,353; Jan. 5.

Turner, Marshall A., assignor to W. Hall, Peterborough, Ontario, Canada. Producing impressionalistic ornamental surfaces. 1,568,108; Jan. 5.

Turney, Lee L., Milwaukee, Wis. Golf club. 1,568,485; Jan. 5.

Tuttle & Bailey Manufacturing Company. (See Colgan, Leonard J., assignor.)

Tuttle, Joseph B. and M. H., Cleburne, Tex. Display and clothes line. 1,568,428; Jan. 5.

Tuttle, Michael H. (See Tuttle, Joseph B. and M. H.)

Tyler, Bert E., South Gate Gardens, Calif. Rotary piston apparatus. 1,568,429; Jan. 5.

Udall, Phillip A., Stockton, Calif., assignor, by mesne assignments, to Caterpillar Tractor Co. Multiple-spindle screw machine. 1,568,935; Jan. 5.

Uhl, Clyde, Bartlesville, Okla. Apparatus for spudding, drilling, and cleaning out water and oil wells. 1,568,430; Jan. 5.

Underwood Typewriter Company. (See Crews, Clarence M., assignor.)

Underwood Typewriter Company. (See Kurowski, Alfred G. F., assignor.)

Underwood Typewriter Company. (See Robitoy, L. P., and Velander, assignors.)

Underwood Typewriter Company. (See Stickney, Burnham C., assignor.)

Union Metals Extraction Company. (See Mendenhall, Walter E., assignor.)

United Products Corporation of America. (See Bassett, H. P., and Isaacs, assignors.)

United Shoe Machinery Corporation. (See Bean, George L., assignor.)

United Shoe Machinery Corporation. (See Bertrand, Frederic E., assignor.)

United Shoe Machinery Corporation. (See Winkley, Erastus E., assignor.)

U. S. Industrial Alcohol Co. (See Steffens, John A., assignor.)

Universal Oil Products Company. (See Dubbs, Carbon P., assignors.)

Universal Oil Products Company. (See Morrell, Jacque C., assignor.)

Universal Shock Eliminator, Inc. (See Shaw, Samuel H., assignor.)

Up To Date Manufacturing Co. (See Bocchino, Ernest, assignor.)

Urschel, William E., Valparaiso, Ind. Apparatus and process for stemming fruit. 1,568,700; Jan. 5.

Valle, Pembroke A., and F. V. Roy, Chicago, Ill., assignors to E. and T. Fairbanks and Company, St. Johnsbury, Vt. Apparatus for obtaining the leverage weight of athletic implements. 1,568,698; Jan. 5.

Valley, Coburn F., assignor to L. E. Ellsworth, Cuyahoga Falls, Ohio. Carrier for braiding machines. 1,568,354; Jan. 5.

Van Houweling, Arthur C., assignor to Garden City Feeder Company, Pella, Iowa. Belt-adjusting apparatus for grain elevators. 1,568,355; Jan. 5.

Varder, Holger, New York, N. Y. Tire-chain tool. 1,568,643; Jan. 5.

Velander, Charles L. (See Robitoy, L. P., and Velander.)

Venzie, Frederick M., Philadelphia, Pa. Partition and like building construction. 1,568,110; Jan. 5.

Venzlaff, Richard, assignor of two-thirds to A. and W. Von Mumm, Berlin, Germany. Stepper. 1,568,109; Jan. 5.

Vermillion, Helen M., assignor to Order of Job's Daughters, Omaha, Nebr. Lodge pin. Des. 69,191; Jan. 5.

Vester, Alfred, Sons, Inc. (See McFadden, Glenn E., assignor.)

Victory-Kidder Printing Machine Company Limited, The. (See Ratcliff, W., and Wallace, assignor.)

Vidos, Mike, Renton, Wash. Scythe. 1,568,111; Jan. 5.

Villaret, Gustave E., Leonia, N. J., assignor to William R. Noe & Sons, New York, N. Y. Base for portable electric lamps. Des. 69,192; Jan. 5.

Vitrolite Company, The. (See Beebe, Daniel S., assignor.)

Voge, Charles J., Chicago, Ill. Ignition device. 1,568,112; Jan. 5.

Voices Incorporated. (See Grubman, Leo J., assignor.)

Von Mehren, Erick, assignor to Hoar Shovel Company, Duluth, Minn. Mechanical shovel. 1,568,699; Jan. 5.

Von Mumm, Arthur, et al. (See Venzlaff, Richard, assignor.)

Von Mumm, Walter, et al. (See Venzlaff, Richard, assignor.)

Von Waldy, Julius, New York, N. Y. Boat. 1,568,486; Jan. 5.

Vumbaca, Anthony, South Bend, Ind. Protective device for desks. 1,568,356; Jan. 5.

Vurpillat, Albert F., Fargo, N. Dak. Retaining device for rim lugs. 1,568,487; Jan. 5.

Wadsworth Watch Case Company, The. (See Conant, Arthur P., assignor.)

Walborn, Joseph E. (See Clark, J., and Walborn.)

Walker, Arthur W., Malden, Mass. Counterpoise for stove doors. 1,568,357; Jan. 5.

Walker, Harold M. (See Elliott G., and Walker.)

Walker, Willis F., Siesholtzville, Pa. Rail joint. 1,568,257; Jan. 5.

Wallace, Hugh. (See Ratcliff, W., and Wallace.)

Waller, Elnar, assignor to General Motors Corporation, Detroit, Mich. Terminal connecter. 1,568,644; Jan. 5.

Walsh, James M., Milwaukee, Wis. Breeching lead-up attachment. 1,568,113; Jan. 5.

Walsh, James M., Milwaukee, Wis. Bridle. 1,568,114; Jan. 5.

Warner, John C., Schenectady, N. Y., assignor to General Electric Company. Electron-discharge apparatus. 1,568,701; Jan. 5.

Warnock, Robert, West Chester, Pa. Cream separator. 1,568,645; Jan. 5.

Warren, Henry E., Ashland, Mass., assignor to General Electric Company. Graphic integrating recorder. 1,568,702; Jan. 5.

Warren, Henry E., Ashland, Mass., assignor to General Electric Company. Demand recorder. 1,568,703; Jan. 5.

Warren, Henry E., Ashland, Mass., assignor to General Electric Company. Demand recorder. 1,568,704; Jan. 5.

Waschatz, Otto A. (See Harrison, J. A., and Waschatz.)

Waterbury Farrel Foundry and Machine Co., The. (See Atkins, Clarence E., assignor.)

Waterstone, Henry, Montgomery, W. Va. Fuel-feed system. 1,568,936; Jan. 5.

Watson, Guy, Canastota, N. Y. Cutter mounting. 1,568,199; Jan. 5.

Weaver, Gallard E., assignor to Weaver Manufacturing Company, Springfield, Ill. Automobile elevating runway. 1,568,387; Jan. 5.

Weaver, John D., Woodriver, Ill. Implement for marking roof-rafter cuts and braces. 1,568,115; Jan. 5.

Weaver Manufacturing Company. (See Weaver, Gallard E., assignor.)

Webb, Jean F., jr., New York, N. Y., assignor to The International Signal Co. Forestalling apparatus. 1,568,646; Jan. 5.

Webb, Jervis B., Royal Oak, Mich. Sprocket chain. 1,568,116; Jan. 5.

Webster, William E., Birmingham, Ala. Freight skid. 1,568,303; Jan. 5.

Weeks, Francis H., New York, N. Y. Hoisting bucket. 1,568,488; Jan. 5.

Weeks, Walter L., Paterson, N. J., assignor to Wright Aeronautical Corporation. Reverse gear and clutch-operating mechanism. 1,568,578; Jan. 5.

Weger, Charles J., Cleveland, Ohio. Internal-combustion engine. 1,568,431; Jan. 5.

Weinfield, Charles, et al., executors. (See Herskovitz, Max.)

Weise, Willy, Berlin-Malchow, Germany. Stretcher for boots and shoes. 1,568,432; Jan. 5.

Weissenborn, Oscar A., et al. (See Kolling, C. H., and Prietz, assignors.)

Welsh, George L., Dixon, Ill. Differential drive mechanism. 1,568,358; Jan. 5.

Wertheimer, Leo, Buffalo, N. Y. Faucet. 1,568,647; Jan. 5.

Weslake, Henry, assignor of one-half to H. J. Weslake, Exeter, England. Carburetor for internal-combustion engines. 1,568,784; Jan. 5.

Weslake, Henry J. (See Weslake, Henry, assignor.)

Westbury, William, Canastota, N. Y. Pot and kiln construction. 1,568,785; Jan. 5.

Western Electric Company. (See Hocker, Carl D., assignor.)

Western Electric Company. (See Smythe, Edwin H., assignor.)

Western Electric Company. (See Williams, S. B., and Gibson, assignors.)

Wheeler, Louis B., Memphis, Tenn. Burning-in stand. 1,568,489; Jan. 5.

Wheeler, William H., Glen Ridge, and J. C. Logan, Jersey City, N. J., assignors to Fecco Number Plate Corporation, New York, N. Y. Anchorage. 1,568,433; Jan. 5.

Wheten, James K. (See Olsson, Zacharias, assignor.)

White, John W., assignor to General Motors Corporation, Detroit, Mich. Manufacture of gears. 1,568,648; Jan. 5.

White Pine Sash Company. (See Edmond, Oscar G., assignor.)

Whitehead, Richard H., assignor to The New Haven Clock Co., New Haven, Conn. Dial glass for clocks. Des. 69,193; Jan. 5.

Whitehead, Richard H., assignor to The New Haven Clock Co., New Haven, Conn. Clock case. Des. 69,194; Jan. 5.

Whitehead, Richard H., assignor to The New Haven Clock Co., New Haven, Conn. Clock case. Des. 69,195; Jan. 5.

Whiting, Victor H., assignor to Sargent & Company, New Haven, Conn. Lock. 1,568,579; Jan. 5.

Whitman, John F., Brooklyn, N. Y. Apparatus for the standardization of solutions. 1,568,117; Jan. 5.

Whittington, Frederik G., Evanston, assignor to Stewart-Warner Speedometer Corporation, Chicago, Ill. Thermostatic switch for temperature indicators. 1,568,388; Jan. 5.

Wickop, Robert, Leuthen, Germany. Machine for cutting fruit into cubes. 1,568,786; Jan. 5.

Wilder, Harry C., et al. (See Fenlason, Charles F., jr., assignor.)

Wilderman, Meyer, London, England. Apparatus for production of hypochlorites and chlorates. 1,568,787; Jan. 5.

Williams, Elmer R., assignor of one-eighth to G. A. Messick, one-eighth to C. Gault, and one-eighth to T. H. Browns, Springfield, Mo. Water-heating system. 1,568,788; Jan. 5.

Williams, Elmer R., Springfield, assignor of three-sixteenths to A. E. Morelock, three-sixteenths to S. B. Campbell, St. Louis, and two-sixteenths to G. A. Messick, Springfield, Mo. Washing apparatus. 1,568,789; Jan. 5.

Williams, Edward T., assignor of one-half to W. O. Smith, Brooklyn, N. Y. Magnetic coupling. 1,568,304; Jan. 5.

Williams, Edward T., New York, N. Y. Magnetic clutch. 1,568,305; Jan. 5.

Williams, Patrick M., North Wilkesboro, N. C., assignor to Moore Dry Kiln Company, Jacksonville, Fla. Veneer kiln. 1,568,258; Jan. 5.

Williams, Samuel B., Brooklyn, N. Y., and E. S. Gibson, Ridgewood, N. J., assignors, by mesne assignments, to Western Electric Company, Incorporated. Telephone-exchange system. 1,568,306; Jan. 5.

Wilson, Ezekiel J., East Greenbush, assignor to F. C. Huyck & Sons, Rensselaer, N. Y. Method and apparatus for cleaning felts. 1,568,259; Jan. 5.

Wilson, Ross M., Cleveland, Ohio. Display device. 1,568,388; Jan. 5.

Wilson, Samuel S., Meyerton, Transvaal, South Africa. Apparatus for manufacturing sheets and other articles from plastic materials. Re16,241; Jan. 5.

Wilson, Henry A. (See Conklin, Vernon A., assignor.)

Wilson, William H. (See Land, Charles H., jr., assignor.)

Winkley, Erastus E., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Heel-building machine. 1,568,118; Jan. 5.

Winsor, Roy J., Bucyrus, Ohio. Road-working machine. 1,568,490; Jan. 5.

Winterson, Patrick H., San Francisco, Calif. Window lock. 1,568,434; Jan. 5.

Winzer, Charles B., London, England. Receptacle for eggs and other fragile articles. 1,568,435; Jan. 5.

Wolf, Davis L., Archer County, Tex. Combined buffer and snubber. 1,568,119; Jan. 5.

Wolf, Sayer & Heller. (See Hellerman, Adolph C., assignor.)

Wollensak, Andrew. (See Magin, J. G., and Wollensak.)

Wollensak Optical Company. (See Magin, J. G., and Wollensak, assignors.)

Woodrow, Oliver B., Newton, Iowa. Washing-machine clutch mechanism. 1,568,390; Jan. 5.

Woodruff, Leonidas D., St. Louis, Mo. Ball joint. 1,568,649; Jan. 5.

Woodstock Typewriter Company. (See Hokanson, Otto A., assignor.)
Workman, Harold, Glasgow, Scotland. Projection lamp. 1,568,491; Jan. 5.
Wright Aeronautical Corporation. (See Weeks, Walter L., assignor.)
Wright, Sam A., et al. (See Dargue, Walter, assignor.)
Wright, Samuel P., Franklin, Ky. Plant setter. 1,568,580; Jan. 5.
Wright, Wilbur L., assignor to Oswego Falls Corporation, Fulton, N. Y. Paper and like material container. 1,568,790; Jan. 5.
Wunthal, Morris, New York, N. Y. Pocketbook. 1,568,120; Jan. 5.
Yanez, Jose B., Davenport, Iowa. Cravat frame. 1,568,121; Jan. 5.
Yolton, Robert E., Birmingham, Ala., assignor to Kilby Frog & Switch Sompany. Switch-throw mechanism. 1,568,650; Jan. 5.
Young, Arthur P. (See Butcher, J. H., and Young.)
Young, L. A., Industries, Inc. (See Smith, Stanley G., assignor.)
Young, Walter T., Weiser, Idaho. Rotary internal-combustion engine. 1,568,391; Jan. 5.
Zabel, Bruno, Feura Bush, N. Y. Loop-the-loop toy. 1,568,492; Jan. 5.
Zahn, Hans. (See Hirsch, L., and Zahn.)
Zawistowski, Martin, Brooklyn, N. Y. Cloth-cutting machine. 1,568,705; Jan. 5.
Zifferer, Lothar R., Columbia, Pa. Clamp. 1,568,122; Jan. 5.
Zwalsh, John J., Cleveland, Ohio. Auxiliary vehicle wheel. 1,568,937; Jan. 5.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 5TH DAY OF JANUARY, 1926.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Abrasives, Manufacturing artificial. C. J. Brockbank. 1,568,873; Jan. 5.
Acid sludge and making the same, Product derived from. H. T. Bennett, G. B. Murphy, and L. G. Story. 1,568,261; Jan. 5.
Adjustable clamp. J. H. Kortes. 1,568,225; Jan. 5.
Advertising device. O. J. Craig. 1,568,060; Jan. 5.
Aeroplane fuselages, Longéron and station brace for. H. S. Kwasigroch. 1,568,510; Jan. 5.
Air brake. E. C. Shaw. 1,568,189; Jan. 5.
Air-brake system. T. James, jr. 1,568,336; Jan. 5.

Fishing-line holder and reel therefor, Spare-. F. H. Auld. 1,568,309; Jan. 5.
Fishing reel. W. A. Foss. 1,568,149; Jan. 5.
Fishing tool. W. E. Davison and W. B. Marshall. 1,568,808; Jan. 5.
Flash light. J. L. Shannon. 1,568,093; Jan. 5.
Flow device, Proportional-. E. B. Phelps. 1,568,619; Jan. 5.
Flower, Artificial. G. Rosas. 1,568,859; Jan. 5.
Fluid control, Automatic. G. Buelna. 1,568,720; Jan. 5.
Fluids from wells, Machine for pumping. A. H. Low. 1,568,516; Jan. 5.
Flying machine. F. S. Bliss. 1,568,205; Jan. 5.
Flying machines, Maintaining the equilibrium of. F. W. Dufwa. 1,568,887; Jan. 5.
Folding chair. M. Borisof. 1,568,715; Jan. 5.
Folding chair. W. Rosenkranz. 1,568,244; Jan. 5.
Foot-measuring device. L. C. Krueger and L. J. Brecht 1,568,072; Jan. 5.
Football-cleat-applying tool. W. H. Albee. 1,568,308; Jan. 5.
Footwear construction, Pneumatic. J. C. Keller. 1,568,405; Jan. 5.
Forestalling apparatus. J. F. Webb, jr. 1,568,646; Jan. 5.
Fountain: *See*—
Inking fountain.
Frame: *See*—
Cravat frame. Dolly-stretcher frame.
Frame parts, Machine for producing. D. Karron. 1,568,739; Jan. 5.
Freight skid. W. E. Webster. 1,568,303; Jan. 5.
Friction-top can. D. P. Robinson. 1,568,625; Jan. 5.
Fruit and cereal product and producing same. G. F. Humphrey. 1,568,162; Jan. 5.
Fruit into cubes, Machine for cutting. R. Wickop. 1,568,786; Jan. 5.
Fuel-burner control. C. C. Cushman. 1,568,588; Jan. 5.
Fuel-feed system. H. Waterstone. 1,568,936; Jan. 5.
Fuel-saving device. O. A. Tofteen. 1,568,302; Jan. 5.
Fungicide and insecticide composition. O. F. Hedenburg. 1,568,455; Jan. 5.
Funnel. G. R. Duggan. 1,568,504; Jan. 5.
Furnace: *See*—
Oil furnace.
Furnace or oven. H. B. Cannon. 1,568,817; Jan. 5.
Furnaces, Apparatus for pulverizing and feeding fuel to. L. H. Bergmann. 1,568,945; Jan. 5.
Furniture tops, Edge construction for. F. A. Schmits. 1,568,247; Jan. 5.
Game apparatus. P. H. and E. N. Kohler. 1,568,852; Jan. 5.
Game apparatus. P. J. McGrath. 1,568,340; Jan. 5.
Game apparatus. E. B. Stout. 1,568,576; Jan. 5.
Game card. L. Edelson. 1,568,548; Jan. 5.
Game table. T. R. Treiber. 1,568,106; Jan. 5.
Garage. W. A. Pungs. 1,568,384; Jan. 5.
Garden implement. W. A. Crump. 1,568,136; Jan. 5.
Garment. S. E. Gallemore. 1,568,826; Jan. 5.
Garment, Child's. F. Gardner. 1,568,449; Jan. 5.
Garment-hanger support. M. L. Argo. 1,568,538; Jan. 5.
Garter package. H. B. Heyman. 1,568,838; Jan. 5.
Gas burners, Automatic ignition device for. W. E. Potteiger. 1,568,620; Jan. 5.
Gas burners, Grid for. J. Roy. 1,568,771; Jan. 5.
Gas heater. F. M. Miner. 1,568,610; Jan. 5.
Gas range. F. E. Seeley. 1,568,188; Jan. 5.
Gasoline-supply device, Auxiliary. W. L. Mitchell. 1,568,380; Jan. 5.
Gathering machine. C. A. Richards. 1,568,293; Jan. 5.
Gauge: *See*—
Compression gauge. Weight and depth gauge.
Pressure gauge.
Gauge cock. W. Mitterreiter. 1,568,522; Jan. 5.
Gear and clutch operating mechanism, Reverse-. W. L. Weeks. 1,568,578; Jan. 5.
Gears, Manufacture of. J. W. White. 1,568,648; Jan. 5.
Gearing, Variable-velocity ratio. W. B. Swart. 1,568,639; Jan. 5.
Gem setting. A. Shatkin. 1,568,924; Jan. 5.
Generator. L. M. Perkins. 1,568,237; Jan. 5.
Generator. E. D. Smith. 1,568,478; Jan. 5.
Generators, Trouble detector for. A. D. Ramsey. 1,568,285; Jan. 5.
Glb, Adjusting and clamping. N. Marcalus. 1,568,681; Jan. 5.
Glass goblet or similar article. W. H. Magee. Des. 69,184; Jan. 5.
Glove former. C. W. Mabey. 1,568,078; Jan. 5.
Golf club. W. Dunn. 1,568,888; Jan. 5.
Golf club. L. L. Turney. 1,568,485; Jan. 5.
Golf-hole cup and tool for inserting and extracting said cup. H. T. Coldwell. 1,568,321; Jan. 5.
Golf-hole-cup flag holder, base, and flag. H. T. Coldwell. 1,568,320; Jan. 5.
Graders, Grass-cutting attachment for. H. M. Baxter. 1,568,439; Jan. 5.
Gradometer. M. Brooks. 1,568,133; Jan. 5.
Grain cleaner. H. E. Pforr. 1,568,618; Jan. 5.
Grain elevators, Belt-adjusting apparatus for. A. C. Van Blowenling. 1,568,355; Jan. 5.
Graphic-instrument holder. E. Shaw. 1,568,347; Jan. 5.
Grapple. G. E. Boulton. 1,568,716; Jan. 5.
Grass cutter, Bermuda-. L. Fey. 1,568,549; Jan. 5.
Gravity register. F. G. Diago. 1,568,272; Jan. 2.
Grease, Compound for. A. B. Hutton. 1,568,606; Jan. 5.
Grill, Electric. M. F. Fitzgerald. 1,568,593; Jan. 5.
Grinders, Spring back rest for automatic. C. Knowles. 1,568,673; Jan. 5.
Grinding machine. W. S. Rogers. 1,568,184–5; Jan. 5.
Grinding wheel, Balance. M. O. Reeves. 1,568,920; Jan. 5.
Grizzly, Rotary. H. Littlewood. 1,568,561; Jan. 5.
Guns, Mount for flexible synchronized. H. O. Russell and C. L. Paulus. 1,568,089; Jan. 5.
Handle: *See*—
Brush handle.
Handsaw and grooving machine, Electric. E. S. French. 1,568,328; Jan. 5.
Hanger: *See*—
Door hanger. Shoe hanger.
Harrow, Disk. A. P. McKay. 1,568,806; Jan. 5.

Oil pan.
Paper and like material container. W. L. Wright. 1,568,790; Jan. 5.
Paper-bag rack. W. M. Ligon. 1,568,515; Jan. 5.
Paper-making machine. J. M. Cathcart. 1,568,363; Jan. 5.
Paper-making machines, Roll for carrying fabric conveyer belts of. C. R. Griffith. 1,568,401; Jan. 5.
Paper-making machines, Slice for. C. W. Morden. 1,568,903; Jan. 5.
Paper, Safety. W. R. Hotchkiss. Des. 69,180; Jan. 5.
Partition and like building construction. F. M. Venzie. 1,568,110; Jan. 5.
Passenger compartment. A. W. Lawson. 1,568,855; Jan. 5.
Pavement-breaking device. W. W. Shoe. 1,568,190; Jan. 5.
Pencil, Mechanically-operated lead. D. M. Ballou. 1,568,951; Jan. 5.
Pencil clip. D. M. Ballou. 1,568,950; Jan. 5.
Penholder. O. H. Burdette. 1,568,496; Jan. 5.
Permutation switch lock. J. J. Tolbert. 1,568,483; Jan. 5.
Phonograph, Multidisk. H. Blackwell. 1,568,130; Jan. 5.
Photo-electric device. W. A. Ruggles. 1,568,694; Jan. 5.
Photographic-film magazine. A. S. Howell. 1,568,067; Jan. 5.
Photographic films, Apparatus for making. C. S. Moody and W. Oepts. 1,568,344; Jan. 5.
Pianos, Action for player. G. Freund. 1,568,824; Jan. 5.
Pictorial reproduction. H. Bahr. 1,568,864; Jan. 5.
Picture films, Compensating the copying intensity of cinematographic. E. Lehmann. 1,568,511; Jan. 5.
Picture films, Preservative for motion-. J. I. Crabtree. 1,568,658; Jan. 5.
Picture machines, Framing device for motion-. M. M. Gruber. 1,568,598; Jan. 5.
Pie plate. R. M. Smythe. 1,568,696; Jan. 5.
Pin: *See*—
Bowling pin. Piston pin.
Pipe, Apparatus for rolling sheet-metal. M. J. Munro. 1,568,905; Jan. 5.
Pipe cleaner. S. F. Abernathy. 1,568,392–3; Jan. 5.
Pipe-cleaning tool. J. W. Shelburne. 1,568,094; Jan. 5.
Pipe lines, Wrought-metal repair device for. J. Clark and J. E. Walborn. 1,568,268; Jan. 5.
Pipe, Machine for cutting off. C. F. Schmelz. 1,568,473; Jan. 5.
Pipe-making apparatus. M. J. Munro. 1,568,906; Jan. 5.
Piston. W. R. Day. 1,568,547; Jan. 5.
Piston apparatus, Rotary. B. E. Tyler. 1,568,429; Jan. 5.
Piston pin. V. J. Harris. 1,568,833; Jan. 5.
Plant setter. S. P. Wright. 1,568,580; Jan. 5.
Plant where heat-consuming apparatus cooperates with a number of feed conduits. J. Ruths, K. Ingerö, and H. Schrenk. 1,568,420; Jan. 5.
Plastic material, Method and apparatus for shaping. F. J. MacDonald. 1,568,562; Jan. 5.
Plastic materials, Apparatus for manufacturing sheets and other articles from. S. S. Wilson. Re16,241; Jan. 5.
Playing ball. T. A. Lewis. 1,568,514; Jan. 5.
Plow. J. F. Perry. 1,568,383; Jan. 5.
Plug, Attachment. J. C. Blankenship. 1,568,584 Jan. 5.
Plug receptacle, Multiple-. A. Herskovitz. 1,568,156; Jan. 5.
Plug, Sash. L. A. Macklanburg. 1,568,173; Jan. 5.
Pneumatic-dispatch apparatus. J. G. Maclaren. 1,568,680; Jan. 5.
Pocketbook. M. Wunthal. 1,568,120; Jan. 5.
Poles, Device for setting and replacing. J. G. Smith. 1,568,777; Jan. 5.
Post: *See*—
Concrete post. Fencepost.
Post or stake puller. W. E. Joslin. 1,568,741; Jan. 5.
Posters, Printing. H. C. Tiffany. 1,568,105; Jan. 5.
Pot and kiln construction. W. Westbury. 1,568,785; Jan. 5.
Potato digger. J. Moreau. 1,568,235; Jan. 5.
Power-control apparatus. J. T. Cowley. 1,568,806; Jan. 5.
Power-control device. J. T. Cowley. 1,568,805; Jan. 5.
Power-driven implement. E. A. Johnston, B. R. Benjamin, and C. Pearson. 1,568,163; Jan. 5.
Power transmission, Hydraulic. V. Arkin. 1,568,394; Jan. 5.
Power-transmitting mechanism. L. Melanowski. 1,568,287–9; Jan. 5.
Press: *See*—
Printing press.
Presses, Stop mechanism for die. H. Osswald. 1,568,088; Jan. 5.
Pressure gauge. D. Edge and J. A. Hunter. 1,568,140; Jan. 5.
Printer's clamp. J. Kyle. 1,568,745; Jan. 5.
Printing machine. W. Ratcliff and H. Wallace. 1,568,919; Jan. 5.
Printing machines and the like, Tandem arrangement for. J. Niemes and H. B. Engbersen. 1,568,881; Jan. 5.
Printing press. F. W. Huempfner. 1,568,161; Jan. 5.
Propulsion device. E. Gelly. 1,568,665; Jan. 5.
Protractor, Cylindrical. N. I. Campbell and A. M. Herbsman. 1,568,876; Jan. 5.
Puller: *See*—
Post or stake puller.
Pulp beater, Continuous. K. B. Howell. 1,568,068; Jan. 5.
Pump. L. le Bret. 1,568,170; Jan. 5.
Pump. P. T. Lindhard. 1,568,751; Jan. 5.
Pump and boiler feeder, Automatic. V. P. McVoy. 1,568,077; Jan. 5.
Pump, Circulating plunger. W. M. McGee. 1,568,857; Jan. 5.
Pump-controlling mechanism. R. Conrader. 1,568,499–500; Jan. 5.
Pump, Deep-well. V. L. Forsyth. 1,568,447; Jan. 5.
Pump for refrigerating apparatus, etc., Gas. R. W. Tibbetts and M. S. Curtis. 1,568,104; Jan. 5.

Pumping machine, Well. J. B. Hawley, jr. 1,568,836; Jan. 5.
Quality gauge for leather. M. H. Raymond. 1,568,183; Jan. 5.
Rack: *See*—
Bag rack. Paper-bag rack.
Radiator. C. W. Owston. 1,568,520; Jan. 5.
Radioamplifier and support. E. J. Packer. 1,568,467; Jan. 5.
Radio broadcast distribution, System of. E. E. Clement. 1,568,938; Jan. 5.
Radio broadcast distribution, System for. E. E. Clement. 1,568,939; Jan. 5.
Radioplate battery box. L. V. Stone and W. E. Bailey. 1,568,927; Jan. 5.
Radio receiving apparatus. L. Q. Slocumb. 1,568,632; Jan. 5.
Radio sets, Telephone switch for. E. A. Smalenberger. 1,568,297; Jan. 5.
Rail anchor. R. A Blair. 1,568,713; Jan. 5.
Rail anchor. W. Delaney. 1,568,213; Jan. 5.
Rail-elevating jack. F. Hackmann. 1,568,600; Jan. 5.
Rail joint. W. F. Walker. 1,568,257; Jan. 5.
Rail steel. H. J. Force. 1,568,822; Jan. 5.
Railway and like vehicles, Brake shaft adjuster for. J. Mitchell and J. C. G. Cossey. 1,568,902; Jan. 5.
Railway brake, Air-pressure. J. Rihosek and R. L. Leuchter. 1,568,533; Jan. 5.
Railway construction, Street-. W. F. McCanless. 1,568,677; Jan. 5.
Railway signal. C. Gillespie. 1,568,152; Jan. 5.
Railway-tie composition and process. H. G. Jaeger 1,568,507; Jan. 5.
Railway-track-weeding machine. A. Scheuchzer. 1,568,472; Jan. 5.
Ranges, Hood for cooking. B. Riesner. 1,568,532; Jan. 5.
Razor, hair trimmer, and comb, Convertible safety. S. S. Baer. 1,568,794; Jan. 5.
Reading machine. B. A. Fiske. 1,568,148; Jan. 5.
Receiver. E. M. Mickey. 1,568,901; Jan. 5.
Receptacle for eggs and other fragile articles. C. B. Winzer. 1,568,435; Jan. 5.
Recorder. M. Hoerner. 1,568,220; Jan. 5.
Recorder, Demand. H. E. Warren. 1,568,703–4; Jan. 5.
Recorder, Graphic integrating. H. E. Warren. 1,568,702; Jan. 5.
Records, Device for transferring. W. H. Day. 1,568,809; Jan. 5.
Reed articles, Producing woven-. M. B. Lloyd. 1,568,075; Jan. 5.
Reel: *See*—
Fishing reel. Hose-winding reel.
Reflectors, Making. E. A. Kuen. 1,568,283; Jan. 5.
Refrigerating apparatus. P. Fischbacher. 1,568,147; Jan. 5.
Refrigerating apparatus. C. McNair. 1,568,898; Jan. 5.
Refrigerating apparatus. E. Thomson. 1,568,102; Jan. 5.
Refrigerating apparatus. R. W. Tibbetts and M. S. Curtis. 1,568,103; Jan. 5.
Refrigerating machine. I. Lundgaard. 1,568,230; Jan. 5.
Refrigerator, Ammonia-absorption. C. Senssenbrenner 1,568,476; Jan. 5.
Register: *See*—
Cash register. Gravity register.
Register constant-lock-operating attachment. L. J. Colgan. 1,568,545; Jan. 5.
Regulator: *See*—
Feed regulator.
Repeater circuit. H. A. Affel. 1,568,861; Jan. 5.
Repeater circuits. L. Espenschied. 1,568,891; Jan. 5.
Retainer clip. A. S. Eliasson. 1,568,889; Jan. 5.
Retort sliding device. J. Bradley. 1,568,263; Jan. 5.
Ribbing and perforating machine. H. C. Smith. 1,568,537; Jan. 5.
Rifle, Straight-pull bolt-action. W. C. Speer. 1,568,635; Jan. 5.
Rim lugs, Retaining device for. A. F. Vurpillat. 1,568,487; Jan. 5.
Road-working machine. R. J. Winsor. 1,568,490; Jan. 5.
Rod assemblies, Tester for connecting. D. A. Anderson 1,568,583; Jan. 5.
Roller eccentric. G. S. Morison. 1,568,290; Jan. 5.
Roller mill. C. T. Howson. 1,568,223; Jan. 5.
Rolls, Method and apparatus for heating. G. Fox. 1,568,892; Jan. 5.
Roof and laying the same. P. J. Dahm. 1,568,807; Jan. 5.
Roof-rafter cuts and braces, Implement for marking. J. D. Weaver. 1,568,115; Jan. 5.
Roof structure. H. E. Marks. Re16,243; Jan. 5.
Roofing. F. P. Leonard. 1,568,227; Jan. 5.
Roofing construction. F. E. Lietz. 1,568,750; Jan. 5.
Ropes, cables, and the like, Holding device for. P. E. Bagge. 1,568,310; Jan. 5.
Rotary engine, Divided-charge. F. A. Bullington. 1,568,051; Jan. 5.
Rotary engine, Multicylinder. F. A. Bullington. 1,568,053; Jan. 5.
Rotary motor. F. Rochefort. 1,568,242; Jan. 5.
Rubber articles, Apparatus for operating on. G. L. Bean. 1,568,541; Jan. 5.
Rubber tubes, Apparatus for forming annular blanks for the manufacture of. C. F. Fenlason, jr. 1,568,620; Jan. 5.
Rule, Slide. R. Schwanda. 1,568,475; Jan. 5.
Rupture pad. S. O. Trescott. 1,568,932; Jan. 5.
Safety clutch mechanism. C. H. Pearson. 1,568,527; Jan. 5.
Sales books, Combined pad or leaf holding and locking device for manifolding. G. C. Clement. 1,568,059; Jan. 5.
Salt and pepper shaker, Combined. W. Hibbert. 1,568,160; Jan. 5.
Sandal, Spike. L. Parr. 1,568,616; Jan. 5.
Sausage casings, Making. A. C. Hellerman. 1,568,734; Jan. 5.
Savings bank. C. J. Sykes. 1,568,577; Jan. 5.
Scaffolds, Safety device for swinging. R. J. Lackner. 1,568,285; Jan. 5.
Scalding machine, Carcass-. J. W. Kohlhepp. 1,568,282; Jan. 5.
Scale, Weighing. A. Bousfield. Des. 69,171; Jan. 5.
Scaling and encrustation, Prevention of. C. E. Bouine. 1,568,714; Jan. 5.
Scalper. C. W. Carter. 1,568,267; Jan. 5.
Scooter. R. W. Parkes. 1,568,412; Jan. 5.
Scraper. A. S. Howard. 1,568,842; Jan. 5.
Screen: *See*—
Window screen.
Screen. R. P. Akins, J. W. Bucher, and F. D. Gross. 1,568,792; Jan. 6.
Scythe. M. Vidos. 1,568,111; Jan. 5.
Seat: *See*—
Ventilated seat.
Seat and desk, Combined. S. W. Conwell. 1,568,211; Jan. 5.
Seating accommodation, Support for. F. Small. 1,568,477; Jan. 5.
Self-induction coil. E. Schürer. 1,568,422; Jan. 5.
Semitrailer. C. H. Land, jr. 1,568,560; Jan. 5.
Separator: *See*—
Bean separator. Cream separator.
Separator. D. D. Peebles. 1,568,413; Jan. 5.
Service apparatus, Coin-control. F. J. Rowse. 1,568,770; Jan. 5.
Service meter. W. Kaisling. 1,568,164; Jan. 5.
Sewage and other mixtures of liquids and solids, Apparatus for screening. D. J. Shaw. 1,568,572; Jan. 5.
Sewing machines, Feeding mechanism for. A. H. De Voe. 1,568,399; Jan. 5.
Sewing machines, Looper-actuating mechanism for. A. B. Clayton 1,568,397; Jan. 5.
Shade-roller-operating mechanism. L. A. Bernard. 1,568,203; Jan. 5.
Shade-roller winding and holding device. F. P. Hartley. 1,568,379; Jan. 5.
Shafting, Flexible hide. H. A. Cook. 1,568,546; Jan. 5.
Sheave, Automatic. J. E. Le Bus. 1,568,406; Jan. 5.
Sheet-feed guide mechanism. H. M. Barber. 1,568,540; Jan. 5.
Sheet-metal casing, Corrugated. J. J. Frank. 1,568,727; Jan. 5.
Sheet-metal container. F. M. Assmann. 1,568,359; Jan. 5.
Shipping or storage receptacle of the vacuum type. E. A. Robe. 1,568,948; Jan. 5.
Shock absorber. W. G. Struthers. 1,568,697; Jan. 5.
Shock-absorbing mechanism, Friction. J. F. O'Connor. 1,568,292; Jan. 5.
Shock-absorbing mechanism, Friction. J. F. O'Connor. 1,568,614; Jan. 5.
Shocker. H. P. Olsen. 1,568,179; Jan. 5.
Shocking machine. W. J. Cockburn. 1,568,365; Jan. 5.
Shoe. M. F. Gallagher. 1,568,893; Jan. 5.
Shoe hanger. J. S. Harding. 1,568,330; Jan. 5.
Shoes, Machine for use in making. F. E. Bertrand. 1,568,045; Jan. 5.
Shoulder pad. G. L. Pierce. 1,568,238; Jan. 5.
Shovel: *See*—
Cultivator shovel. Mechanical shovel.
Shuttle check. S. Chalmers and F. J. Foley. 1,568,654; Jan. 5.
Skillet. W. H. Cater. 1,568,798; Jan. 5.
Sign. J. and E. Mercer. 1,568,899; Jan. 5.
Sign, Electrically-illuminated. H. A. Griesinger. 1,568,273; Jan. 5.

Thermionic tube. F. S. McCullough. 1,568,172; Jan. 5.
Thermometer mounting. H. B. Brown. 1,568,315; Jan. 5.
Thrashing machines, Feeding attachment for. F. Osmera. 1,568,525; Jan. 5.
Thread-counting apparatus. G. H. Rosenstein. 1,568,088; Jan. 5.
Thumb-sucking preventer. A. L. Harrison. 1,568,668; Jan. 5.
Tire. W. E. Kelly. 1,568,559; Jan. 5.
Tire armor. J. A. Albert. 1,568,581; Jan. 5.
Tire carrier. H. Taylor. 1,568,351; Jan. 5.
Tire-chain tool. H. Varder. 1,568,643; Jan. 5.
Tire, Resilient. A. Hargraves. Des. 69,178; Jan. 5.
Tire, Resilient. R. Iredell. Des. 69,181; Jan. 5.
Tobacco, Artificially curing green. A. C. Buensod. 1,568,316; Jan. 5.
Toboggan and sled, Combined. G. Allen. 1,568,493; Jan. 5.
Protector, Toe. R. H. Anderson. 1,568,706; Jan. 5.
Tooth-paste ejector. T. H. and H. Roberts. 1,568,921; Jan. 5.
Tooth wedge. G. O. Burlew. 1,568,054; Jan. 5.
Torch. E. M. Evieth. 1,568,726; Jan. 5.
Torsion meter. R. Chilton and F. A. Hayes. 1,568,544; Jan. 5.
Toy aeroplane. W. W. Cogswell. 1,568,319; Jan. 5.
Toy, Figure. H. D. Rapson. 1,568,469; Jan. 9.
Toy, Loop-the-loop. B. Zabel. 1,568,492; Jan. 5.
Toy vehicle. F. Kacirek. 1,568,459; Jan. 5.
Track device with pneumatic suspension, Traveling. E. Rimailho. 1,568,241; Jan. 5.
Traction trend, Endless. J. D. Festary. 1,568,371; Jan. 5.
Tractor fuel systems, Clean-air lead for. R. P. Campbell. 1,568,722; Jan. 5.
Tractor hitch. C. A. Barry. 1,568,867; Jan. 5.
Tractor hitch. F. L. Blade. 1,568,204; Jan. 5.
Tractor hitch for headers. E. F. Anderson. 1,568,124; Jan. 5.
Traffic signal. W. A. Lee. 1,568,407; Jan. 5.
Trailer. C. H. Land, jr. 1,568,168; Jan. 5.
Trailer, Bungalow. F. P. Lyons. 1,568,895; Jan. 5.
Train-control system, Automatic. W. Kaser. 1,568,847; Jan. 5.
Trains, Automatic means for indicating the condition of air-brake mechanism on. C. J. Besbears. 1,568,041; Jan. 5.
Transition coupling device. G. A. R. Trimming. 1,568,933; Jan. 5.
Transmission band. F. A. Miller. 1,568,565–6; Jan. 5.
Trap. O. A. Nord. 1,568,688; Jan. 5.
Trays with cans, Apparatus for loading. W. E. Mitton. 1,568,082; Jan. 5.
Tree holder. J. D. Malcolm. 1,568,758; Jan. 5.
Trousers, Altering waistline of. J. Greenberg. 1,568,329; Jan. 5.
Truck, Railway-car. C. L. Charles and P. R. Drenning. 1,568,058; Jan. 5.
Trunk, Wardrobe. A. L. Duff and J. W. Matheson. 1,568,814; Jan. 5.
Truss. A. C. Cooke. 1,568,501; Jan. 5.
Tube: *See*—
Thermionic tube.
Tube-frame spools, Supporting means for. W. Bixby. 1,568,396; Jan. 5.
Tubes and the like, Closure for paste. C. A. Spotz. 1,568,781; Jan. 5.
Tubes, Support for collapsible container. B. C. Blackmon. 1,568,868; Jan. 5.
Tubing spider and support, Combination. S. P. Tschappat. 1,568,198; Jan. 5.
Tuft frames, Spool-retarding means for. E. F. Hathaway. 1,568,402; Jan. 5.
Tumbler. D. Fisher. Des. 69,175; Jan. 5.
Turbine engine. B. F. Singer. 1,568,191; Jan. 5.
Turbines, pumps, and other centrifugal machines, Producing blade faces for water. F. Lawaczeck. 1,568,746; Jan. 5.
Typewriter. O. A. Hokanson. 1,568,736; Jan. 5.
Typewriting machine. C. M. Crews. 1,568,725; Jan. 5.
Typewriting machine. A. G. F. Kurowski. 1,568,388; Jan. 5.
Typewriting machine. L. P. Robitoy and C. L. Velander. 1,568,386; Jan. 5.
Typewriting machine. B. C. Stickney. 1,568,426; Jan. 5.
Typographical casting machine. S. A. Bisey. 1,568,047; Jan. 5.

Undergarment. A. C. Peterson. 1,568,917; Jan. 5.
Undergarment. H. L. Redmond. 1,568,416; Jan. 5.
Unit tray. E. H. Pratt. 1,568,468; Jan. 5.
Universal joint. D. P. Owens. 1,568,914; Jan. 5.
Vacuum container, Sealed. N. P. Bach. 1,568,437; Jan. 5.
Valve. B. F. Dooley. 1,568,940; Jan. 5.
Valve. F. Y. Pearne. 1,568,236; Jan. 5.
Valve cut-off, Automatic. O. Falkenwalde. 1,568,817; Jan. 5.
Valve, Dry-pipe. W. K., and W. K. Hodgman, jr. 1,568,839; Jan. 5.
Valve gear, Overhead cam shaft and. V. C. Parker. 1,568,615; Jan. 5.
Valve, High-pressure. C. F. Heywood. 1,568,159; Jan. 5.
Valve lifter. G. Stoff. 1,568,251; Jan. 5.
Valve mechanism for compressed-air brakes. I. Drolshammer. 1,568,368; Jan. 5.
Valve mechanism for fluid-containing tanks, Slow-closing. T. W. Ryan. 1,568,346; Jan. 5.
Valve, Release. B. V. Stoll. 1,568,926; Jan. 5.
Valves, Push lever for operating closet-tank. R. S. Morgan. 1,568,611; Jan. 5.
Vanity case. T. W. Foster. 1,568,151; Jan. 5.
Vanity case. T. J. Lewis. Des. 69,183; Jan. 5.
Vehicle control, Automatic moving-. P. J. Simmen. 1,568,775; Jan. 5.
Vehicle, Endless-track. L. Salves. 1,568,090; Jan. 5.
Vehicle jack. J. Grossman. 1,568,452; Jan. 5.
Vehicle light. J. L. May. 1,568,079; Jan. 5.
Vehicle wheel. C. B. Howard. 1,568,456; Jan. 5.
Vehicle wheel. E. E. Kellogg. 1,568,672; Jan. 5.
Vehicle wheel, Auxiliary. J. J. Zwalsh. 1,568,937; Jan. 5.
Vehicles, Combination signal device for. J. G. Frieman and W. A. Rankin. 1,568,662; Jan. 5.
Vehicles, Demountable rim for. B. E. Braucht. 1,568,207; Jan. 5.
Vehicles, Direction indicator for motor. G. E. Bates. 1,568,495; Jan. 5.
Vehicles, Saw attachment for. C. F. Ernst. 1,568,146; Jan. 5.
Vehicles, Saw attachment for. F. C. Hubbard. 1,568,843; Jan. 5.
Vehicles, Spring system for. W. E. Goyne. 1,568,551; Jan. 5.
Vehicles, Traffic signal for motor. D. L. Albright. 1,568,862; Jan. 5.
Vending machine, Coin-controlled. E. P. Nizamis. 1,568,764; Jan. 5.
Ventilated seat. M. Roemer. 1,568,471; Jan. 5.
Ventilator of the ejector type. E. L. Ford. 1,568,373; Jan. 5.
Vise. A. Mader. 1,568,563; Jan. 5.
Vision shield. E. O. and G. W. Aegerter. 1,568,200; Jan. 5.
Vitamine preparation and making same. O. Stiner, A. Hauswirth, and A. Gama. 1,568,196; Jan. 5.
Vitreous slabs arranged at an angle to each other, Anchor between. D. S. Beebe. 1,568,944; Jan. 5.
Voltage-regulating system. T. F. Barton. 1,568,710; Jan. 5.
Voting machines, Interlocking mechanism for. J. S. Baker. 1,568,709; Jan. 5.
Vulcanizable material, Making articles of. E. Nelson. 1,568,411; Jan. 5.
Vulcanizing apparatus. R. W. Sohl. 1,568,778; Jan. 5.
Wall construction, Fireproof hollow. F. Heath. 1,568,155; Jan. 5.
Washing apparatus. E. R. Williams. 1,568,789; Jan. 5.
Washing machine. C. W. Gormley. 1,568,597; Jan. 5.
Washing machine. E. Lindmueller. 1,568,074; Jan. 5.
Washing machine. J. R. Rice. 1,568,240; Jan. 5.
Washing-machine clutch mechanism. O. B. Woodrow. 1,568,390; Jan. 5.
Washtubs, Operating attachment for. H. A. Smith. 1,568,633; Jan. 5.
Watchcase bow. A. P. Conant. Des. 69,172; Jan. 5.
Water heater, Combination. E. Behringer. 1,568,440; Jan. 5.
Water-heating system. E. R. Williams. 1,568,788; Jan. 5.
Water-level control, Boiler. F. Munzinger. 1,568,762; Jan. 5.
Water mixer, with filter and delivery nozzle, for sinks, etc., Adjustable hot and cold. H. Rubin. 1,568,772; Jan. 5.
Water-tube boiler, I. Harter, jr. 1,568,555; Jan. 5.
Watering areas of land, Apparatus for. D. Elder. 1,568,214; Jan. 5.
Waxer and polisher, Floor. F. J. Scheeh. 1,568,773; Jan. 5.
Waxing and polishing brush, Floor. E. E. Harris. 1,568,602; Jan. 5.
Weather strip. D. Kulage and R. O. Oakley. 1,568,284; Jan. 5.
Weeder. G. F. Green. 1,568,377; Jan. 5.
Weight and depth gauge, Combination. A. P. McKay. 1,568,897; Jan. 5.
Weight of athletic implements, Apparatus for obtaining the leverage. P. A. Valle and F. V. Roy. 1,568,698; Jan. 5.
Welding, Electric. J. W. Meadowcroft. 1,568,080; Jan. 5.
Welding, Method of and apparatus for. H. E. Snodgrass and T. M. Hunter. 1,568,193; Jan. 5.
Well drill, Rotary. N. S. Burton. 1,568,055; Jan. 5.
Wells, Apparatus for spudding, drilling, and cleaning out water and oil. C. Uhl. 1,568,430; Jan. 5.
Wheel: *See*—
Ferris wheel.
Grinding wheel.
Vehicle wheel.
Wheel-dressing device. H. M. Rockwell. 1,568,243; Jan. 5.
Wheel-locking dog. E. W. Morris. 1,568,523; Jan. 5.
Whistle. E. R. Petrie. 1,568,528; Jan. 5.
Winding-drum mechanism. C. L. C. Magee. 1,568,175; Jan. 5.
Window, Casement. S. U. Barr. 1,568,865; Jan. 5.
Window construction. R. Cabaniss. 1,568,874; Jan. 5.
Window construction. W. Eutin. 1,568,327; Jan. 5.
Window, Curtain. W. J. Decker. 1,568,138; Jan. 5.
Window lock. P. H. Winterson. 1,568,434; Jan. 5.
Window locks, Clamp for. A. T. Gibson. 1,568,374; Jan. 5.
Window-regulating device. D. Miller. 1,568,343; Jan. 5.
Window screen. G. Anastas. 1,568,494; Jan. 5.
Windshield cleaner and heater. B. J. Loague. 1,568,229; Jan. 5.
Windshield wiper. C. N. Colstead. 1,568,210; Jan. 5.
Wiper. J. A. Somerville. 1,568,298; Jan. 5.
Wire-drawing machine. C. E. Atkins. 1,568,793; Jan. 5.
Wire-spring-making machine. S. G. Smith. 1,568,573; Jan. 5.
Wires, Machine for straightening drop. D. Taylor. 1,568,254; Jan. 5.
Wireless receiving tuner. I. P. Rodman. 1,568,470; Jan. 5.
Wood strips, Color striping. A. C. Hough. 1,568,605; Jan. 5.
Woodworking machine. O. G. Edmond. 1,568,062; Jan. 5.
Wrench: *See*—
Angle wrench.
Wrench. G. W. Bradley. 1,568,132; Jan. 5.
Wrench. W. C. Tull and R. J. Bristol. 1,568,934; Jan. 5.
Yarn cleaner. L. B. Hasbrouck. 1,568,277–8; Jan. 5.

CLASSIFICATION OF PATENTS

ISSUED JANUARY 5, 1926.

NOTE.—First number=class, second number=subclass, third number=patent number.

1— 47: 1,568,308
48: 1,568,260
2— 2: 1,568,238
14: 1,568,900
26: 1,568,909
38: 1,568,894
42: 1,568,457
51: 1,568,826
64: 1,568,107
73: 1,568,917
113: 1,568,416
131: 1,568,158
156: 1,568,454
178: 1,568,626
185: 1,568,097
236: 1,568,329
4— 62: 1,568,346
67: 1,568,611
5— 31: 1,568,348
99: 1,568,063
114: 1,568,409
8— 2: 1,568,664
9— 2: 1,568,486
10— 171: 1,568,719
12— 27: 1,568,045
50: 1,568,118
88: 1,568,541
128.2: 1,568,432
14— 7: 1,568,631
72: 1,568,303
15— 28: 1,568,408
40: 1,568,634
167: 1,568,569
175: 1,568,418
229: 1,568,100
253: 1,568,298
16— 49: 1,568,856
105: 1,568,270
17— 16: 1,568,282
45: 1,568,734
18— 8: 1,568,687
9: 1,568,920
45: 1,568,778
48.8: 1,568,070
53: 1,568,411
55: 1,568,562
57: 1,568,463
59: 1,568,629
19— 141: 1,568,334
20— 11: 1,568,327
35: 1,568,395
40.5: 1,568,200
1,568,229
46: 1,568,874
69: 1,568,281
22— 1: 1,568,746
73: 1,568,854
85: 1,568,246
110: 1,568,601
131: 1,568,096
189: 1,568,234
23— 95: 1,568,171
•: 1,568,181

Coal. M. J. Hornberger. 207,844; Jan. 12; Serial No. 212,686; published Oct. 27, 1925.
Coal, Soft. Woodworth Elevator Company. 207,808; Jan. 12; Serial No. 218,679; published Oct. 13, 1925.
Fire-kindling preparation. J. Dutton. 207,787; Jan. 12; Serial No. 213,626; published Oct. 13, 1925.
Foundry cores, Coating for. United States Graphite Co. 207,786; Jan. 12; Serial No. 213,412; published Oct. 27, 1925.
Grape vines, cuttings, scions, etc. Stark Bro's. Nurseries & Orchards Company. 52,113; renewed May 1, 1926.
Grape vines, cuttings, scions, grafts, etc. Stark Bro's. Nurseries & Orchards Company. 52,124; renewed May 1, 1926.
Leather. A. C. Lawrence Leather Company. 207,772; Oct. 6; Serial No. 218,363; published Oct. 6, 1925.
Leather. General Leather Company. 207,830; Jan. 12; Serial No. 201,807; published Oct. 27, 1925.
Leather. A. C. Lawrence Leather Company. 207,811; Jan. 12; Serial No. 219,126; published Oct. 27, 1925.
Leather. North American Anolin Corporation. 207,804; Jan. 12; Serial No. 215,702; published Oct. 27, 1925.
Moss, Vegetable Spanish. Vego-Hair Manufacturing Co. 207,780; Jan. 12; Serial No. 217,648; published Oct. 6, 1925.
Seed, Grass. L. Carrier. 207,755; Jan. 12; Serial No. 216,146; published Oct. 20, 1925.
Seeds. H. E. Conklin. 52,905; renewed May 22, 1926.
Sheepskins. Richard Young Company. 52,818; renewed May 15, 1926.
Sponges, Soap. B. L. Henry. 207,831; Jan. 12; Serial No. 202,013; published Oct. 27, 1925.

CLASS 4.

Chemicals for cleaning clothing. Laadt Corporation. 207,781; Jan. 12; Serial No. 217,567; published Oct. 27, 1925.
Detergent preparation. Holzapfel's Compositions Company. 49,859; renewed Feb. 20, 1926.
Dressing, Shoe. Geo. E. Keith Company. 53,001; renewed May 22, 1926.
Soap. Monahan Antiseptic Co. 52,933; renewed May 22, 1926.
Soaps. Mott Mfg. Co. 207,776; Jan. 12; Serial No. 218,132; published Oct. 27, 1925.

CLASS 5.

Gums, sizings, and pastes. Huron Milling Company. 207,960; Jan. 12; Serial No. 198,746; published Dec. 9, 1924.

CLASS 6.

Aspirin. Rigo Manufacturing Company. 208,010; Jan. 12.
Chemical composition for cleaning drainpipes, etc. Hooker Electrochemical Company. 207,806; Jan. 12; Serial No. 218,640; published Oct. 27, 1925.
Chemical compositions for cleaning drainpipes, sewers, etc. Hooker Electrochemical Company. 207,870; Jan. 12; Serial No. 218,640; published Oct. 27, 1925.
Compound for exterminating vermin. E. A. Murray. 52,157; renewed May 1, 1926.
Compounds, Boiler. Arrow Boiler Compound Company. 48,410; renewed Dec. 26, 1925.
Creams, almond lotion, hair shampoo, etc., Vanishing and cleansing. National Toilet Company. 207,819; Jan. 12; Serial No. 219,404; published Oct. 27, 1925.
Depilatory. Lucille Buhl, Inc. 207,814; Jan. 12; Serial No. 219,223; published Oct. 27, 1925.
Disinfectant. Corona Chemical Company. 207,850; Jan. 12; Serial No. 202,244; published Dec. 16, 1924.
Fire-extinguishing compound. H. A. Draun. 208,000; Jan. 12.
Headache remedy. Stanback Medicine Co. 208,001; Jan. 12.
Liniment. P. L. Hoover & Bros. 50,788; renewed Mar. 27, 1926.
Liniments. S. E. Griffin. 207,992; Jan. 12.
Medicinal preparation. Ehro-Sulfur Laboratories Inc. 207,760; Jan. 12; Serial No. 216,670; published Oct. 6, 1925.
Medicine for colds and stomach troubles. Giesecke & Son Co. 207,999; Jan. 12.
Medicine for venereal diseases. T. I. Hurst & Sons. 207,994; Jan. 12.
Ointment. Nep Products Company. 207,852; Jan. 12; Serial No. 213,028; published July 21, 1925.
Pills for liver and bowel complaints. B. T. Davis. 53,068; renewed May 22, 1926.
Powders, creams, and packs, toilet waters, rouzhes, etc., Face. Betty Faye Co. 207,993; Jan. 12.
Remedy for catarrh, hay fever, and cold in the head. Home Remedy Co. 51,350; renewed Apr. 10, 1926.
Remedy, Liver. A. C. Simmons Jr. Medicine Co. 51,490; renewed Apr. 17, 1926.
Rodent exterminator. Hygienic Sanitation Company. 207,990; Jan. 12.
Salt. Remington Salt Company. 207,807; Jan. 12; Serial No. 218,661; published Oct. 27, 1925.
Salves. O. H. C. Frisch. 208,011; Jan. 12.
Scalp and in the treatment of the hair, Greaselike substances used in the treatment of and as nourishment for the. E. V. Powell. 208,007; Jan. 12.
Toilet water. Eugene Berninghaus Company. 207,813; Jan. 12; Serial No. 219,218; published Oct. 27, 1925.
Tonics. Katharman Chemical Co. 49,525; renewed Feb. 6, 1926.

CLASS 7.

Cords, linea, twines, and ropes. Silver Lake Company. 52,375–6; renewed May 8, 1926.
Ropes, Wire. A. Leschen & Sons Rope Co. 49,139; renewed Jan. 28, 1926.
Warps, Carpet. J. E. Reynolds. 52,373; renewed May 8, 1926.

CLASS 8.

Cigar holders, pipes, ash receivers, etc. Otto Eisenlohr & Bros. Incorporated. 207,964; Jan. 12; Serial No. 194,986; published Oct. 27, 1925.

CLASS 9.

Dynamite, dynamite cartridges, blasting gelatin, and low powder. Aetna Powder Co. 51,706; renewed Apr. 24, 1926.
Matches. General Match Company. 207,906; Jan. 12; Serial No. 218,698; published Oct. 27, 1925.
Revolvers and pistols. Smith and Wesson, Inc. 207,951; Jan. 12; Serial No. 214,828; published Oct. 27, 1925.
Squibs, Miners'. J. Powell. 207,946; Jan. 12; Serial No. 220,295; published Oct. 27, 1925.

CLASS 10.

Fertilizer, Bone. F. S. Royster Guano Co. 52,845; renewed May 22, 1926.

CLASS 12.

Brick, Fire. Savage Mountain Fire Brick Company. 207,965; Jan. 12; Serial No. 191,587; published Jan. 27, 1925.
Cement, Portland. San Antonio Portland Cement Co. 207,805; Jan. 12; Serial No. 215,755; published Oct. 20, 1925.
Doors, Veneered, laminated, or built-up. Wheeler, Osgood Company. 207,798; Jan. 12; Serial No. 215,493; published Oct. 20, 1925.
Doors, windows, and moldings, Interior trim for. Frederick J. Bruce, Inc. 207,770; Jan. 12; Serial No. 218,466; published Oct. 13, 1925.
Ironing boards, Cabinet. National Mill & Lumber Company. 207,838; Jan. 12; Serial No. 211,117; published Oct. 20, 1925.
Lumber, Artificial. Compo-Board Co. 207,779; Jan. 12; Serial No. 217,758; published Oct. 20, 1925.
Plastic preparation. Harrison White, Inc. 207,843; Jan. 12; Serial No. 212,435; published Oct. 20, 1925.
Ply-wood panels and dimension veneer. Atlas Plywood Corporation. 208,004; Jan. 12.
Shingles, Wooden. C. A. Mauk Lumber Co. 207,995; Jan. 12.
Stairways, Sliding-. Farley & Loetscher Mfg. Co. 207,766; Jan. 12; Serial No. 217,077; published Oct. 27, 1925.

CLASS 13.

Bottle opener and nozzle, Combined. R. P. Pickering. 207,889; Jan. 12; Serial No. 211,290; published Oct. 27, 1925.
Screw-threaded brass fittings. Wolverine Brass Works. 207,826; Jan. 12; Serial No. 220,381; published Oct. 27, 1925.
Securing expansions and anchors, nails, etc. Diamond Expansion Bolt Co. 207,763; Jan. 12; Serial No. 216,889; published Oct. 27, 1925.
Strainers and valves. J. S. & J. F. String Incorporated. 207,869; Jan. 12; Serial No. 218,507; published Oct. 27, 1925.
Tubs, lavatories, sinks, etc., Bath and laundry. S. S. Spencer Co. 207,828; Jan. 12; Serial No. 200,531; published Oct. 27, 1925.

CLASS 14.

Metals and metal castings and forgings. Nobel Industries, Limited. 207,816; Jan. 12; Serial No. 219,299; published Oct. 27, 1925.
Steel and steel bars, rods, and sheets, Tool. Hawkridge Brothers. 51,349; renewed Apr. 10, 1926.

CLASS 15.

Gasoline. Carbide & Carbon Chemicals Corporation. 207,894; Jan. 12; Serial No. 219,227; published Oct. 20, 1925.
Gasoline. Johnson High Test Oil Company. 207,910; Jan. 12; Serial No. 218,361; published Oct. 27, 1925.
Gasoline. Ozark Oil Corporation. 207,883; Jan. 12; Serial No. 218,520; published Oct. 27, 1925.
Gasoline. Westbrook Tank Line Co. 207,873; Jan. 2; Serial No. 217,000; published Oct. 20, 1925.
Gasoline, kerosene, and lubricating oils. Martin County Co-Op. Oil Company. 207,916; Jan. 12; Serial No. 217,939; published Oct. 27, 1925.
Gasoline, kerosene, benzol, lubricating oils and greases. Cardinal Petroleum Company. 207,986; Jan. 12; Serial No. 215,892; published Oct. 20, 1925.
Gasoline, kerosene, lubricating oils and greases. Sherrill Oil Company. 207,885; Jan. 12; Serial No. 218,931; published Oct. 27, 1925.
Oil compound. Damascus Manufacturing Corporation. 207,875; Jan. 12; Serial No. 217,136; published Oct. 20, 1925.
Oil, Lubricating. Columbia Oil Company. 207,890; Jan. 12; Serial No. 219,028; published Oct. 27, 1925.
Oil, Lubricating. F. S. Lyndall. 207,887; Jan. 12; Serial No. 218,979; published Oct. 20, 1925.
Oils and greases, Lubricating. Brownell Corporation. 207,921; Jan. 12; Serial No. 197,358; published Mar. 3, 1925.
Oils and machine lubricants, Motor. White & Bagley Company. 207,878; Jan. 12; Serial No. 217,691; published Oct. 20, 1925.
Petroleum products. W. H. Barber Company. 207,884; Jan. 12; Serial No. 218,786; published Oct. 27, 1925.

CLASS 16.

Art materials. Feldmann Fine Arts Co. 207,956; Jan. 12; Serial No. 203,804; published Oct. 27, 1925.
Auto renewer. L. G. Zachos. 207,889; Jan. 12; Serial No. 219,021; published Oct. 20, 1925.
Carbon black. Binney & Smith Company. 207,879; Jan. 12; Serial No. 217,856; published Oct. 20, 1925.
Enameling compound. Metal & Thermit Corporation. 207,959; Jan. 12; Serial No. 201,503; published Oct. 27, 1925.
Paint, Enamel. McDougall-Butler Co. 207,905; Jan. 12; Serial No. 218,711; published Oct. 27, 1925.
Paint enamel. J. L. Prescott Company. 207,855; Jan. 12; Serial No. 213,858; published Oct. 20, 1925.
Paint, Red. F. O. Pierce Company. 51,967; renewed May 1, 1920.
Paints. Baker Paint & Varnish Co. 207,856; Jan. 12; Serial No. 213,886; published Oct. 20, 1925.
Paints, House. Pimbley Paint & Glass Co. 52,338; renewed May 8, 1926.
Paints, Mixed. John W. Masury & Son. 52,699; renewed May 15, 1926.
Paints, paint enamels, wood stains, etc. Patterson-Sargent Company, The. 207,915; Jan. 12; Serial No. 218,018; published Oct. 27, 1925.
Paints, varnish stains, prepared shellacs, etc., Ready-mixed house. Scott-Sullivan Paint Co. 207,880; Jan. 12; Serial No. 217,901; published Oct. 20, 1925.
Polish. Willesen Manufacturing Company. 207,911; Jan. 12; Serial No. 218,347; published Oct. 27, 1925.
Polish and refinisher, Auto and furniture. Young & Sullivan. 207,979; Jan. 12; Serial No. 211,732; published Oct. 20, 1925.

Anderson, Alfred L., Seattle, Wash. Cooker for food in containers. 1,569,601; Jan. 12.
Anderson, Amelia E., Cincinnati, Ohio. Window. 1,569,602; Jan. 12.
Anderson, Evald, Alhambra, assignor to International Precipitation Company, Los Angeles, Calif. Apparatus for electrical separation of suspended material from gases. 1,569,529; Jan. 12.
Anderson, Randolph, sr., St. Louis, Mo. Shoe-shining machine. 1,569,167; Jan. 12.
Anderson, Walker G., assignor of one-half to C. D. C. Huestis, Seattle, Wash. Smoker's stand. 1,569,603; Jan. 12.
Andrews, Edward F., Chicago, Ill. Inductance. 1,569,604; Jan. 12.
Andrews, Isaac, Spartanburg, S. C. Harness device. 1,569,248; Jan. 12.
Anthony, Anton A., Memphis, Tenn. Swing chair and bed. 1,569,249; Jan. 12.
Anthracite Separator Company. (See Pardee, Frank, jr., assignor.)
Archbald, Charles E., New Brunswick, N. J. Web-treating machine. 1,569,064; Jan. 12.
Archer, William H., assignor to The Commercial Savings Bank & Trust Co., trustee, Toledo, Ohio. Combination apparatus. 1,569,250; Jan. 12.
Armstrong Cork Company. (See Humphreys, Charles F., assignor.)
Arundel, Thomas E., assignor of thirty-seven and one-half per cent to G. D. Shipherd and twenty-five per cent to W. H. Metcalfe, Omaha, Nebr. Radio reception apparatus. 1,569,446; Jan. 12.
Ash, Horace W., Winchester, Mass. Tank-car heater. 1,569,605; Jan. 12.
Ashcroft, Edgar A., London, England. Apparatus for electrolyzing fused salts of metals and recovering the metals and acid radicles. 1,569,606; Jan. 12.
Aspinwall, Louis M., Pittsburgh, and K. A. Simmon, Edgewood Park, Pa., assignors to Westinghouse Electric & Manufacturing Company. Axle power brake. 1,569,349; Jan. 12.
Austin, Arthur O., Barberton, assignor, by mesne assignments, to The Ohio Brass Company, Mansfield, Ohio. Preparing clay or body composition for ceramic articles. 1,569,251; Jan. 12.
Auto Rim Company Limited. (See Graham, Robert, assignor.)
Automatic Electric Company. (See Lomax, Clarence E., assignor.)
Automatic Transportation Company, The. (See Carr, William C., assignor.)
Ayres, Andrus D., Kalamazoo, Mich. Automatic means for manipulating and controlling the catches of umbrellas. 1,569,447; Jan. 12.
Badische-Anilin- & Soda-Fabrik. (See Mattasch, A., and Pier, assignors.)
Baer, Samuel S., Baltimore, Md. Razor-blade sharpener. 1,569,213; Jan. 12.
Baldwin, Van V. (See Conrad, David E., assignor.)
Banner, Otto A., assignor to The Falk Corporation, Milwaukee, Wis. Fuel-injection nozzle for oil engines. 1,569,448; Jan. 12.
Barbey, Francis A., et al. (See McManama, John W., assignor.)
Barclay, Gustaf I., assignor to Detroit Steel Products Company, Detroit, Mich. Window latch. 1,569,697; Jan. 12.
Barlow, Paul A. (See Allbright, Charles H., assignor.)
Barnes, John. (See Shanaberger, Charles W., assignor.)
Barnes, John A., Burkburnett, Tex. Stopcock. 1,569,252; Jan. 12.
Barnes, Nathaniel C., Des Moines, Iowa. Automobile crank holder. 1,569,530; Jan. 12.
Barnhart, George E. (See Elton, M. S., and Barnhart.)
Barrow, John T. (See Mullins, Charles E., assignor.)
Barry, John, Marcus, Iowa. Snowplow. 1,569,531; Jan. 12.
Barstow, Lawrence M., Index, Wash. Adjustable stub axle joint. 1,569,311; Jan. 12.
Bashaw, Harley A. (See Shelters, H. H., and Bashaw.)
Bates, Albert H., Elgin, Ill., assignor, by mesne assignments, to The Hoover Company, North Canton, Ohio. Switch. 1,569,416; Jan. 12.
Bauer, Walter C., Linden, N. J., assignor to Upperes Cadillac Corporation. Piston. 1,569,253; Jan. 12.
Baxter, Kenneth S., and C. H. Cannon, assignors to Sheet Metal Products Company, Michigan City, Ind. Automobile cab. 1,569,168; Jan. 12.
Bay State Tap & Die Company. (See Williams, Charles B., assignor.)
Bechman, Henry F., assignor to Duplex Printing Press Company, Battle Creek, Mich. Web-printing press. 1,569,065; Jan. 12.
Bechman, Henry F., assignor to Duplex Printing Press Company, Battle Creek, Mich. Tubular-stereotype-plate-casting machine. 1,569,698; Jan. 12.
Beck, Michael, Minneapolis, Minn. Combined explosive motor and propeller. 1,569,607; Jan. 12.
Becker, Ray, assignor to Chas. Ermerich & Co., Chicago, Ill. Box. Des. 69,196; Jan. 12.
Beesley, Harvey A. (See Byrne, W. L., and Beesley.)
Beet Machinery Company. (See Cain, Jesse A., assignor.)
Beidelstein, Frank, Milwaukee, Wis. Merchandising wheel. Des. 69,197; Jan. 12.
Belger, John W., assignor to The Carrom Company, Ludington, Mich. Knockdown toy building. 1,569,066; Jan. 12.
Belcher, J. E. (See Brown, James F., assignor.)
Belknap, Charles, Burlington, Wash. Bricklayer's jointer. 1,569,067; Jan. 12.
Bell, William L., Oakland, Calif. Operating table. 1,569,350; Jan. 12.
Bemis Bro. Bag Company. (See Pierce, Robert E., assignor.)
Bendix Brake Company. (See Dodge, Adiel Y., assignor.)
Benjamin Electric Manufacturing Company. (See Benjamin, Reuben B., assignor.)
Benjamin Electric Manufacturing Company. (See Hopkins, C. L., and Warner, assignors.)
Benjamin, Reuben B., assignor to Benjamin Electric Manufacturing Company, Chicago, Ill. Attachment plug. 1,568,995; Jan. 12.
Bensa, Felice. (See Zinke, A., and Schoepfer, assignors.)
Berbecker & Rowland Manufacturing Company. (See Horton, Clement E., assignor.)
Bergen, Harry S., assignor to Toledo Scale Company, Toledo, Ohio. Pivot bearing. 1,569,608; Jan. 12.
Bergen, Harry S., assignor to Toledo Scale Company, Toledo, Ohio. Weighing scale. 1,569,609; Jan. 12.
Bergström, John F. O., Ange, and B. J. Brunsell, Arbra, Sweden. Apparatus for retaining parcels or the like on vehicles. 1,569,699; Jan. 12.
Bernabé, Fernando S., Malaski, P. I. Combination cane and gun. 1,569,700; Jan. 12.

Bernstein, William, New York, N. Y. Headgear. 1,569,112; Jan. 12.
Berry, Harold R., Brooklyn, assignor to The Dynamics Corporation of America, New York, N. Y. Heat treatment of hydrocarbons. 1,569,532; Jan. 12.
Best, Fred H., Westfield, N. J., assignor to American Telephone and Telegraph Company. Electrical measuring apparatus. 1,568,996; Jan. 12.
Bethlehem Steel Company. (See Kinney, James A., assignor.)
Bilgery, Constantin and A. Reutlinger, Frankfort-on-the-Main, Germany. Wooden tool handle. 1,569,533; Jan. 12.
Bishop, George E., Cleveland, Ohio. Automobile enclosure. 1,569,254; Jan. 12.
Blackman, James B. (See Carter, Albert, assignor.)
Blackburn, Jasper, Webster Groves, Mo. Earth anchor. 1,569,068; Jan. 12.
Blackman, Mabel, assignor of one-half to E. McKee and one-half to L. K. Hosier, New York, N. Y. Talking-machine needle. 1,569,351; Jan. 12.
Blaisdell, Sidney B., Providence, R. I. Carrier for braiding machines. 1,569,449; Jan. 12.
Blechspielwarenfabrik Johann Distler. (See Keppner, Ernst, assignor.)
Bliss, E. W., Company. (See Kruse, Peter, assignor.)
Block, Abraham, San Francisco, Calif., assignor to The National Cash Register Company, Dayton, Ohio. Indicating device. 1,569,255; Jan. 12.
Blount, Ivey T., Miami, Fla. Concrete structure for housing. 1,568,997; Jan. 12.
Blumlein, Albert, New York, N. Y., assignor to Parker Ventilation Company, Inc. Damper mechanism. 1,569,113; Jan. 12.
Bobst, Henri, Lausanne, Switzerland, assignor to Société Anonymé Marinoni Machines et Materiel pour l'Imprimerie et les Industries Annexes, Paris, France. Receiving device for cutting machines of the rotary type for paper or pasteboard and like machines. 1,569,256; Jan. 12.
Boehmer, William J. (See Rancier, Charles A., assignor.)
Boedtcher, Franz A., Bergenfield, N. J. Illuminated directional signal for elevators. 1,568,954; Jan. 12.
Boes, George F., La Fayette, Ind. Tile-making machine. 1,569,257; Jan. 12.
Bohlman, Ernest A., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Automatic switch. 1,569,450; Jan. 12.
Bohnhardt, Charles F. H., assignor to H. D. Harvey, Baltimore, Md. Thermostatic control device. 1,569,312; Jan. 12.
Bollinger, George T., Lockport, La. Valve. 1,569,417; Jan. 12.
Bond, Edgar A., Ramah, N. Mex. Reserve-fuel-supply tank. 1,569,114; Jan. 12.
Bonine, Charles E., Melrose Park, Pa. Concentrator. 1,569,451; Jan. 12.
Border, William N., Kansas City, Mo. Shock absorber. 1,569,169; Jan. 12.
Bostrom, Richard E., San Diego, Calif. Game tile holder. 1,569,701; Jan. 12.
Bosworth Electric Manufacturing Company. (See Desjardins, Gregory, assignor.)
Boulicault, Peter L. (See Thelen, J. B., and Boulicault.)
Boyd, Thompson H. (See Hilke, H. C., and Boyd.)
Boyer, Edwin S., Plainfield, N. J., assignor to American Hard Rubber Company, Hempstead, N. Y. Storage-battery jar. Des. 69,198; Jan. 12.
Brace, Porter H., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Wire-testing extensometer. 1,569,352; Jan. 12.
Brackett, Quincy A., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Wireless receiving system. 1,569,353; Jan. 12.
Bradley Knitting Co. (See Johnson, Arthur W., assignor.)
Bradley, William T., Linn, Mo. Hair-cutting guide. 1,569,452; Jan. 12.
Brandes Laboratories, Inc. (See Moss, David, assignor.)
Brandt, Kunibert P., Oriska, N. Dak. Railway spike. 1,569,115; Jan. 12.
Braun, Aquila R., assignor, by mesne assignments, to Liberty National Bank, trustee, Syracuse, N. Y. Pressing machine. 1,569,418; Jan. 12.
Braun, Maurice and G. Gelencser, New York, N. Y. Insect trap. 1,569,170; Jan. 12.
Breer, Louis, Los Angeles, Calif. Caddy-bag display rack and stand. 1,569,313; Jan. 12.
Brennan, J. M. (See Stocker, Charles S., assignor.)
Brent, George E., Nashville, Tenn. Casing for a candy machine. Des. 69,199; Jan. 12.
Brewer Titchener Corporation, The. (See Slocum, Leslie G. S., assignor.)
Bricq, Robert. (See Vernes, A., Bricq, Jobin, and Yoon.)
Bried, Julien A. (See Rogers, Samuel L., assignor.)
Brody, William, New York, N. Y. Needle. 1,569,453; Jan. 12.
Broecker, Louis C. (See Rand, J. H., jr., and Broecker.)
Brown & Bigelow. (See Fischer, H. L., and Kristofek, assignors.)
Brown, James F., assignor of one-half to J. E. Belcher, Lockout, Ky. Rail bond. 1,569,069; Jan. 12.
Brown, Mortimer J., Niagara Falls, N. Y., assignor to The Pacific R. & H. Chemical Corporation, El Monte, Calif. Apparatus for producing and recovering reaction gases. 1,569,171; Jan. 12.
Brown, Thomas W., and W. W. Wolary, Centerville, Iowa. Road construction. 1,569,702; Jan. 12.
Bruce, George W., Childress, Tex. Shoe hanger. 1,568,998; Jan. 12.
Brunler, Oscar A., Glasgow, Scotland. Apparatus for steam-generating and solution-heating purposes. 1,569,703; Jan. 12.
Brunzell, Bror J. (See Bergström, J. F. O., and Brunzell.)
Brush, Alanson P., Detroit, Mich. Method and apparatus for equalizing explosive charges in the different cylinders of multicylinder engines. 1,569,610; Jan. 12.
Brush, Frederick F., Los Angeles, Calif., assignor to Elevator Safety Appliance Company. Interlock system for elevator doors. 1,569,454; Jan. 12.
Buchanan, James D., Iola, Kans. Saw-filing attachment for button-sawing machines. 1,569,704; Jan. 12.
Buchholz, Hermann, Berlin, Germany. Molding material. 1,568,955; Jan. 12.
Buescher, Oswald, and R. G. Goebel, Smithville, Tex. Plowing attachment for tractors. 1,569,705; Jan. 12.
Bugbee, Lucian W., jr., Indianapolis, Ind., assignor, by mesne assignments, to Continental Optical Corporation, New York, N. Y. Trifocal lens blank and lens made therefrom. 1,569,258; Jan. 12.
Bulger, Cyril, St. Paul, Minn. Rolling toy. 1,569,172; Jan. 12.
Bullinger, Frederic H., Yonkers, N. Y., assignor to Ward Leonard Electric Company. Electric controller. 1,569,611; Jan. 12.
Bulwinkle, John E., Charleston, S. C. Receptacle. 1,569,706; Jan. 12.
Bunnell, Gussie M., Miami, Fla. Dumping truck. 1,569,707; Jan. 12.
Bunten, Claude L., Rawlins, Wyo. Feed and trigger mechanism for toy pistols. 1,568,999; Jan. 12.
Burlin Co. (See Burlin, Leslie H., assignor.)
Burlin, Leslie H., assignor to Burlin Co., Chicago, Ill. Base for a smoker's stand or similar article. Des. 69,200; Jan. 12.
Burlin, Leslie H., assignor to Burlin Co., Chicago, Ill. Base for a smoker's stand or similar article. Des. 69,201; Jan. 12.
Burlin, Leslie H., assignor to Burlin Co., Chicago, Ill. Tray top for a smoker's stand or similar article. Des. 69,202; Jan. 12.
Burlock, Sophie, Chicago, Ill. Fountain hairbrush. 1,569,259; Jan. 12.
Burns, Oscar, Troy, and P. Gischlar, assignors of one-third to M. E. Newhouse, Hamilton, Ohio. Shade-roller and curtain-pole bracket. 1,569,708; Jan. 12.
Burrage, Enoch H., Winston-Salem, N. C. Washing machine. 1,569,709; Jan. 12.
Burrows, Allen, Los Angeles, Calif. Throttle control for automobiles. 1,569,612; Jan. 12.
Burt, Arthur G., Baltimore, Md. Dog mat. 1,569,710; Jan. 12.
Burwell, James B., Canton, Ohio. Valve. 1,569,455; Jan. 12.
Bushy, Junius E., Jackson, assignor of one-half to B. R. Cooper, Covington, Ky. Rail anchor. 1,569,116; Jan. 12.
Byrne, William L., and H. A. Beesley, Los Angeles, Calif. Knockdown cabinet. 1,569,832; Jan. 12.
Byron Jackson Pump Mfg. Co. (See Keating, John B., assignor.)
Byron, Thomas F., Chicago, Ill. Curtain rod. 1,569,456; Jan. 12.
Cadoret, Louis A., Pawtucket, R. I. All-metal bobbin. 1,569,711; Jan. 12.
Cadoret, Louis A., Pawtucket, R. I. Shuttle threader. 1,569,712; Jan. 12.
Cahill, George F., New York, N. Y. Bowling alley and bowling apparatus. 1,569,260; Jan. 12.
Cain, Jesse A., Bend, Oreg., assignor to Beet Machinery Company, Walla Walla, Wash. Automatic blocking hoe. 1,569,070; Jan. 12.
Calahan, John, Lebanon, Ind. Adjustable drilling bit. 1,569,262; Jan. 12.
Calkins, James M., Peoria, Ill., assignor to Scott Head Lamp Control, Miami, Fla. Dirigible headlight for vehicles. 1,569,261; Jan. 12.
Cameron Can Machinery Company. (See Cameron, William, assignor.)
Cameron, Harry S. (See Abercrombie, J. S., and Cameron.)
Cameron, William, assignor to Cameron Can Machinery Company, Chicago, Ill. Can-testing machine. 1,568,956; Jan. 12.
Camp, Ervin M., Chicago, Ill. Molding form for concrete vessels. 1,568,957; Jan. 12.
Cannon, Charles H. (See Baxter, K. S., and Cannon.)
Caplan, I. J., et al. (See Long, John E., assignor.)
Caplan, Samuel, et al. (See Long, John E., assignor.)
Carey, James S., et al. (See Sease, Chester A., assignor.)
Carl, Albert S. (See Carl, Louie T. and A. S.)
Carl, Louie T. and A. S., Winona, Mass. Radio receiving set. 1,569,354; Jan. 12.

Carlson, Hjalmar G., assignor to Rockwood Sprinkler Company of Massachusetts, Worcester, Mass. Flier. 1,569,534; Jan. 12.
Carpenter, Eugene R., Ansonville, N. C. Wrench. 1,569,117; Jan. 12.
Carr Fastener Company. (See Carr, Fred S., assignor.)
Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Lubricating apparatus. 1,569,263; Jan. 12.
Carr, William C., assignor to The Automatic Transportation Company, Buffalo, N. Y. Controller. 1,569,713; Jan. 12.
Carrier Engineering Corporation. (See Carrier, Willis H., assignor.)
Carrier, Willis H., Essex Fells, assignor to Carrier Engineering Corporation, Newark, N. J. Refrigerating system. 1,569,214; Jan. 12.
Carrom Company, The. (See Beiger, John W., assignor.)
Carstens, Henry M., Oak Park, Ill. Syringe. 1,569,457; Jan. 12.
Carter, Albert, Chicago, Ill., assignor of one-half to J. B. Blackman, Harrisburg, Ill. Steel-cleaning machine. 1,568,958; Jan. 12.
Carter, Benjamin B., et al. (See Hutchinson, Louie C., assignor.)
Carter, Chester C., Perryton, Tex. Pump. 1,569,714; Jan. 12.
Caspar, Charles J. (See Young, C. B., and Caspar.)
Castle, Egbert H., assignor to Comstock-Castle Stove Company, Quincy, Ill. Gas-cock-locking device. 1,569,458; Jan. 12.
Cater, William H., Chicago, Ill. Weight for sinking well casings. 1,569,000; Jan. 12.
Catlin, Robert M., Franklin, N. J., assignor to Catlin Shale Products Company, New York, N. Y. Method and apparatus for distillation of carbonaceous material. Re16,252; Jan. 12.
Catlin Shale Products Company. (See Catlin, Robert M., assignor.)
Celite Company, The. (See Irvin, Webb T., assignor.)
Celite Company, The. (See Zoul, Charles V., assignor.)
Chalker, Albert R. (See Lower, N. M., Chalker, and Osborne.)
Chase Companies, The. (See Goetz, Henry F., assignor.)
Chase, Harold M., and G. W. Robertson, assignors to Riverside and Dan River Cotton Mills, Danville, Va. Treating warp in long chain or rope form. 1,568,959; Jan. 12.
Chase, Newton D., assignor of one-third to R. S. Stryker, Hornbrook, Calif. Fishway. 1,569,419; Jan. 12.
Chenowith, William H., and G. C. Schimpf, assignors to H. D. Harvey, Baltimore, Md. Melting furnace. 1,569,314; Jan. 12.
Chisam, Ray C., The Dalles, Oreg. Convertible stock car. 1,569,071; Jan. 12.
Chocolat Tobler Holing Co., Aktiengesellschaft. (See Egli, Arnold A., assignor.)
Chriswell, Frederick W., assignor to Pacific Car and Foundry Company, Seattle, Wash. Filler for log bunks. 1,569,613; Jan. 12.
Clark, Alva B., Brooklyn, N. Y., and G. Crisson, Hackensack, N. J., assignors to American Telephone and Telegraph Company. Electrical measuring apparatus. 1,569,001; Jan. 12.
Clark Equipment Company. (See Mogford, Edmund C., assignor.)
Clark, Ernest W., Hartford, and C. Schramm, West Hartford, assignors to The Smyth Manufacturing Company, Hartford, Conn. Bookbinding machine. 1,569,265; Jan. 12.
Clark, Ernestine S., San Antonio, Tex. Kitchen utensil. 1,569,264; Jan. 12.
Clark, Ezra E., Newtonville, Mass. Retarding device for alarm check valves. 1,568,960; Jan. 12.
Clark, William H., Whittier, Calif. Puller for pump liners and valve seats. 1,569,614; Jan. 12.
Clarke, Harry R., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone apparatus. 1,569,615; Jan. 12.
Clausing, George, assignor to The Vulcan Last Company, Portsmouth, Ohio. Last. 1,568,961; Jan. 12.
Clausing, George, assignor to The Vulcan Last Company, Portsmouth, Ohio. Last. 1,568,962; Jan. 12.
Clay, James R., Blundellsands, and J. S. V. Harrison, Waterloo, England. Construction of ships' davits. 1,569,715; Jan. 12.
Clayton, Charles F., Balkan, Ky. Drawbar for mine cars. 1,569,716; Jan. 12.
Clayton & Lambert Manufacturing Company. (See Groehn, Otto J., assignor.)
Clayton Mark & Company. (See Mark, Harry R., assignor.)
Clement, Frederick C., Philadelphia, Pa. Closure for receptacles. 1,569,072; Jan. 12.
Clements, W. I., et al. (See Maxwell, Erastus M., assignor.)
Cleveland Rock Drill Company, The. (See Nell, Gustave M., assignor.)
Cleveland Trust Company, The, trustee. (See Hazelett, C. W., and Goldrick, assignors.)
Clisson, Albert B., Geddes, assignor, by mesne assignments, to Liberty National Bank, trustee, Syracuse, N. Y. Clutch mechanism. 1,569,420; Jan. 12.
Coelho, Manuel T., Redwood City, Calif. Lawn-dressing implement. 1,569,421; Jan. 12.
Colbert, George F. and W. H., Pittsburgh, Pa. Combined mirror and towel holder. 1,569,459; Jan. 12.
Colbert, William H. (See Colbert, George F. and W. H.)
Coldwell, John S., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Mechanism for feeding material from rolls. 1,569,650; Jan. 12.
Cole, Guerney H., Forest Hills Borough, Pa., assignor to Westinghouse Electric & Manufacturing Company. Annealing sheet steel. 1,569,355; Jan. 12.
Cole, Guerney H., Forest Hills, Pa., assignor to Westinghouse Electric & Manufacturing Company. Annealing furnace. 1,569,356; Jan. 12.
Cole, William P., Coalinga, Calif. Shock absorber. 1,569,535; Jan. 12.
Colgan, John P., Waycross, Ga. Glareshield for motor vehicles. 1,569,717; Jan. 12.
Colgrove, Charles E., Toronto, Ontario, Canada. Applying silicate to corrugated strawpaper. 1,569,073; Jan. 12.
Colley, George F., assignor to J. Q. Roberts, Memphis, Tenn. Bolt lock. 1,569,718; Jan. 12.
Colley, Reginald C., Houston, Tex. Continuous automatic latitude and longitude indicator. 1,569,173; Jan. 12.
Collier, Benjamin P., Albany, Ala. Plow tractor. 1,569,266; Jan. 12.
Collins, Alfred F., Portland, and C. McGinley, Oswego, Oreg. Shuttle. 1,569,074; Jan. 12.
Columbia Phonograph Company. (See Crudginton, R. F., and Kilbride, assignors.)
Commercial Savings Bank & Trust Co., trustee. (See Archer, William H., assignor.)
Comstock-Castle Stove Company. (See Castle, Egbert H., assignor.)
Connecticut Telephone & Electric Company, The. (See Donle, Harold P., assignor.)
Conrad, David E., assignor of one-half to V. V. Baldwin, Eldon, Iowa. Car door. 1,569,799; Jan. 12.
Constantinesco, George, Weybridge, England. Power transmission. 1,569,719; Jan. 12.)
Continental Optical Corporation. (See Bugbee, Lucian W., jr., assignor.)
Conway, Roy D., Basking Ridge, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Electric signaling system. 1,569,616; Jan. 12.
Cooper, Benton R. (See Busby, Junius E., assignor.)
Coose, Forrest R., Waterville, Me. Safety device for buttonhole-sewing machines. 1,569,833; Jan. 12.
Coram, Roy E., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Translating apparatus. 1,568,963; Jan. 12.
Corthell, Robert N., Auburn, Me. Sewing-machine shuttle. 1,569,617; Jan. 12.
Corthell, Robert N., Auburn, Me. Bobbin-controlling adjunct for sewing-machine bobbin cases. 1,569,618; Jan. 12.
Costello, William H., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Governing device. 1,569,651; Jan. 12.
Courtaulds Limited. (See Van Weyenbergh, Emile, assignor.)
Cowdrey, Henry E., Fitchburg, Mass. Woodworking machine. 1,569,357; Jan. 12.
Cox and Sons Company, The. (See Glaspey, W. E., and Cox, assignors.)
Cox, Frederic W. (See Glaspey, W. E., and Cox.)
Cransler, Jacob, New York, N. Y. Hinge. 1,569,619; Jan. 12.
Creason, James M., Weed, Calif. Dirigible headlight. 1,569,720; Jan. 12.
Cressman, Russell B., Philadelphia, Pa. Electric-lamp indicator. 1,569,460; Jan. 12.
Criner, Harry J., Clarinda, Iowa. Wringer-controlling device. 1,569,267; Jan. 12.
Crispin, Frank J. (See Stoddard, Harry B., assignor.)
Crisson, George. (See Clark, A. B., and Crisson.)
Cronwall, Carl G., Chicago, Ill. Sheet-metal bending and forming machine. 1,569,461; Jan. 12.
Crosby Steam Gage & Valve Company. (See Pigott, Reginald J. S., assignor.)
Cross, Charles C., Brooklyn, assignor to Universal Fixture Corporation, New York, N. Y. Garment rack. 1,569,358; Jan. 12.
Cross, Henry J. S., Toronto, Ontario, Canada. Brush. 1,569,620; Jan. 12.
Crowell, Frank S., assignor to The Edward N. Riddle Company, Toledo, Ohio. Shelf for lighting fixtures. Des. 69,203; Jan. 12.
Crowell, Frank S., assignor to The Edward N. Riddle Company, Toledo, Ohio. Shelf for lighting fixtures. Des. 69,204; Jan. 12.
Crown Electrical Manufacturing Company. (See Snow, Wilmer S., assignor.)
Crowther, Edmond C., Philadelphia, Pa., assignor to de Sanno & Hoskins, Inc. Hypodermic needle. 1,569,174; Jan. 12.
Crudginton, Robert F., and J. T. Kilbride, assignors to Columbia Phonograph Company, Inc., Bridgeport, Conn. Pressing molded articles. 1,569,002; Jan. 12.
Crysler, H. Stanley, Lowell, assignor of fifty one-hundredths to R. J. Wilkie, Newton, Mass. Sectional roll for wringing machines. 1,569,536; Jan. 12.
Culp, John W., Johnstown, Pa. Game device. Re16,246; Jan. 12.

Culver, Fred A., assignor to Culver Stearns Manufacturing Company, Worcester, Mass. Combination signal and tail lamp. Des. 69,205; Jan. 12.
Culver Stearns Manufacturing Company. (See Culver, Fred, A., assignor.)
Curtis, Austen M., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Signaling system. 1,569,603; Jan. 12.
Curtis, Harry A., assignor of one-half to A. Wensing, Manitowoc, Wis. Automobile window screen. 1,569,118; Jan. 12.
Curtis, Lewis B., Bridgeport, Conn. Machine for cutting screw threads. 1,569,315; Jan. 12.
Curtis, Lewis B., Bridgeport, Conn. Thead-cutting dies. 1,569,316; Jan. 12.
Cutler-Hammer Mfg. Co., The. (See Coldwell, John S., assignor.)
Cutler-Hammer Mfg. Co. (See Costello, William H. assignor.)
Cutler-Hammer Mfg. Co., The. (See Schmidt, E. X., and Hutton, assignors.)
Dadswell, George, Ulverston, England. Signaling device for motor road vehicles. 1,569,537; Jan. 12.
Dake, Charles W., Chicago, Ill. Electric light. 1,569,216; Jan. 12
Dake, Charles W., Chicago, Ill. Lens for headlights. 1,569,217; Jan. 12.
Dake, Charles W., Chicago, Ill. Electric machine. 1,569,218; Jan. 12.
Dake, Charles W., assignor to The Pyle-National Company, Chicago, Ill. Headlight casing. 1,569,215; Jan. 12.
Dalferes, Anthony W., Lafayette, La. Automobile lock. 1,569,721; Jan. 12.
Daniloff, Serge, and C. F. Dupee, assignors to Saco-Lowell Shops, Lowell, Mass. Knock-off motion for twisting machines. 1,569,538; Jan. 12.
Danley, Drayton H., La Fayette, Ind. Acetylene-gas generator. 1,569,722; Jan. 12.
Daub, Philip H., Helena, Ohio. Safety device. 1,569,004; Jan. 12.
Dawson, Elma N. (See Dawson, James C., assignor.)
Dawson, James C., assignor to E. N. Dawson, Webster Groves, Mo. Loose-leaf binder. 1,569,005; Jan. 12.
Dayton Rubber Manufacturing Company, The. (See Mooradian, Harry S., assignor.)
Deakin, Gerald, Antwerp, Belgium, assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone system. 1,569,006; Jan. 12.
Dean, William E., Wilkinsburg, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Fluid-pressure brake. 1,569,075; Jan. 12.
De Bataafsche Petroleum Maatschappij. (See Mackenzie, H. J., and Stoenbergh, assignors.)
Delmel, Olive. (See Tormo, Manel G., assignor.)
Dekum, Adolph A. (See Kirkland, Hugh A., assignor.)
De Lacy, Thomas H., Trenton, N. J. Pressing and finishing machine. 1,569,621; Jan. 12.
Delaney, James W. (See Hays, Thomas F., assignor.)
Deltox Rug Company. (See Koeck, Martin, jr., assignor.)
De Sanno & Hoskins, Inc. (See Crowther, Edmond C., assignor.)
Desjardins, Gregory, Cincinnati, assignor to Bosworth Electric Manufacturing Company, Norwood, Ohio. Radio adjustment dial. 1,569,539; Jan. 12.
De Sosa, Warren. (See Hobbs, Grace P., assignor.)
Detroit Lubricator Company. (See Machesney, Andrew G., assignor.)
Detroit Steel Products Company. (See Barclay, Gustaf I., assignor.)
Deutsche Telephonwerke Gesellschaft mit beschrankter Haftung. (See Habann, Wilhelm E. E., assignor.)
Dickinson, Wilbur K., Lynn, Mass., assignor to General Electric Company. Instrument transformer. 1,569,723; Jan. 12.
Dicks, Thomas A., assignor to Standard Steel Propeller Company, Pittsburgh, Pa. Propeller for aeroplanes. 1,569,800; Jan. 12.
Dickson, Earcle, Kittanning, Pa. Chest. 1,569,422; Jan. 12.
Dimond, Harry, Brookline, Mass. Rolling device for cotton samples. 1,569,724; Jan. 12.
Di Silvestro, Joseph, assignor to American Wood Turning Co., Philadelphia, Pa. Spindle for lamps. Des. 69,206; Jan. 12.
Di Silvestro, Joseph, assignor to American Wood Turning Co., Philadelphia, Pa. Spindle for lamps. Des. 69,207; Jan. 12.
Di Silvestro, Joseph, assignor to American Wood Turning Co., Philadelphia, Pa. Spindle for lamps. Des. 69,208; Jan. 12.
Di Silvestro, Joseph, assignor to American Wood Turning Co., Philadelphia, Pa. Lamp base. Des. 69,209; Jan. 12.
Di Silvestro, Joseph, assignor to American Wood Turning Co., Philadelphia, Pa. Lamp base. Des. 69,210; Jan. 12.
Di Silvestro, Joseph, assignor to American Wood Turning Co., Philadelphia, Pa. Spindle for lamps. Des. 69,211; Jan. 12.
Divine, Richard D., Chicago, Ill. Apparatus for and process of reclaiming and converting asphaltum and other materials from waste material. 1,569,462; Jan. 12.
Dixon, Joseph L., New York, N. Y., assignor, by mesne assignments, to Pittsburgh Research Corporation, Pittsburgh, Pa. Electric-fire furnace. 1,569,463; Jan. 12.
Dixon, Joseph L., New York, N. Y., assignor, by mesne assignments, to Pittsburgh Research Corporation, Pittsburgh, Pa. Electrothermic refining of metals. 1,569,464; Jan. 12.
Dobson, William A., Bridgeport, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,569,076; Jan. 12.
Dodds, Ethan I., Central Valley, N. Y., assignor to Flannery Bolt Company, Pittsburgh, Pa. Stay-bolt structures for boilers. 1,569,007; Jan. 12.
Dodge, Adiel Y., South Bend, Ind., assignor to Bendix Brake Company, Chicago, Ill. Brake and meter construction. 1,569,219; Jan. 12.
Dodge, Harry B., assignor to Four Wheel Drive Auto Company, Clintonville, Wis. Gearing. 1,569,008; Jan. 12.
Doehler Die-Casting Co. (See Doehler, H. H., and Stern, assignors.)
Doehler, Herman H., New Rochelle, and M. Stern, Brooklyn, N. Y., assignors to Doehler Die-Casting Co. Vehicle door. 1,569,725; Jan. 12.
Doerr, Harry E., assignor to Scullin Steel Co., St. Louis, Mo. Side frame construction for car trucks. 1,569,175; Jan. 12.
Doherty, Helen, and J. Le Blanc, Providence, R. I. Garment-pattern-designing scroll and square. 1,569,726; Dolson, Albert O., Imperial, Calif. Concrete construction. 1,569,622; Jan. 12.
Donato, Pasquale, New York, N. Y. Game device. 1,569,727; Jan. 12.
Donle, Harold P., assignor to The Connecticut Telephone & Electric Company, Incorporated, Meriden, Conn. Inductive coupler. 1,569,801; Jan. 12.
Douglas, Donald Q. (See Douglas, William W., W. R., M., W. H., and D. Q.)
Douglas, Harry A., Bronson, Mich. Internal-combustion engine. 1,568,964; Jan. 12.
Douglas, Marcella. (See Douglas, William W., W. R., M., W. H., and D. Q.)
Douglas, Wallace R. (See Douglas, William W., W. R., M., W. H., and D. Q.)
Douglas, William H. (See Douglas, William W., W. R., M., W. H., and D. Q.)
Douglas, William W., W. R., M., W. H., and D. Q., Crete, Nebr. All-steel camp cot. 1,569,728; Jan. 12.
Douras, John D., Detroit, Mich. License-plate housing. 1,566,965; Jan. 12.
Downe, Edward R., Larchmont, N. Y., assignor to The Fox Furnace Company, Elyria, Ohio. Heating apparatus. 1,569,220; Jan. 12.
Drake, John L., assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio. Sheet-glass apparatus. 1,569,465; Jan. 12.
Drake, John L., assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio. Sheet-glass-rolling apparatus. 1,569,466; Jan. 12.
Draper Corporation. (See Stone, Melvin L., assignor.)
Dredge, William, Manchester, England. Baker's oven. 1,569,009; Jan. 12.
Duda, Oswald, assignor to Reed Roller Bit Company, Houston, Tex. Tool for straightening well casings. 1,569,729; Jan. 12.
Dunham, Bert G., Hawthorne, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Pay-station telephone system. 1,569,623; Jan. 12.
Dunham, Forrest T., Oakville, Wash. Cable hoisting and conveying apparatus. 1,569,176; Jan. 12.
Dunn, Samuel J., Windsor, Victoria, Australia. Box-hoop-strapping mechanism. 1,569,359; Jan. 12.
Dupee, Charles F. (See Daniloff, S., and Dupee.)
Duplex Printing Press Company. (See Bechman, Henry F., assignor.)
Dupré, William H., Vicksburg, Miss. Force filler for grease cups. 1,569,268; Jan. 12.
Durham, Joseph, Sydney, New South Wales, Australia. Sound box of talking machines. 1,569,317; Jan. 12.
Durrant, George, Fairfield, Manchester, England. Guiding fabrics into stentering and other machines. 1,569,077; Jan. 12.
Dynamics Corporation of America, The. (See Berry, Harold R., assignor.)
Eagle Pencil Company. (See Pearson, Eric G., assignor.)
Eagelston, Frank W., Berkeley, Calif. Traveling bridge crane. 1,569,269; Jan. 12.
Eanes, Hugh P., assignor to Paramount Machine Co., Inc., Asheville, N. C. Tying-in machine. 1,569,730; Earhart, Wilbur F. (See Smith, G. D., and Earhart.)
Edwards, Charles R., Houston, Tex. Pump. 1,569,731; Jan. 12.
Edwards, Henry, North Finchley, London, England. Surgical device for use with the feet. 1,569,467; Jan. 12.
Edwards, Zanzie, Clarksville, Tenn. Pipe cleaner. 1,569,360; Jan. 12.
Eggers, Harold E., Omaha, Nebr. Humidifier. 1,569,177; Jan. 12.
Egli, Arnold A., Bern, assignor, by mesne assignments, to Chocolat Tobler Holding Co., Aktiengesellschaft, Schaffhausen, Switzerland. Canceling device. 1,569,540; Jan. 12.

Einfeldt, Ernest E., assignor to G. W. French, J. L. Hecht, and W. H. Stackhouse, Davenport, Iowa. Making metal wheels. 1,568,966; Jan. 12.
Electric Auto-Lite Company, The. (See Sippel, E. H., and Hancox, assignors.)
Electron Relay Company, The. (See Laise, Clemens A., assignor.)
Elevator Safety Appliance Company. (See Brush, Frederick F., assignor.)
Elliott Company. (See West, Perry, assignor.)
Elliott, Edward O., Philadelphia, Pa. Crank-axle counterbalance. 1,569,732; Jan. 12.
Elliott, Frank W. (See Evins, Dossa D., assignor.)
Ellis, Lewis M., Connersville, Ind., assignor to Winslow Safety High Pressure Boiler Company, Chicago, Ill. Heating system. 1,568,967; Jan. 12.
Elton, Murray S. and G. E. Barnhart, Pasadena, Calif. Maintaining a reserve in fuel tanks. 1,569,078; Jan. 12.
Elzey, Edgar P., Parkersburg, W. Va. Motor-car-elevating cradle or skid. 1,569,469; Jan. 12.
Ely, Bernard M., assignor to Lambert Machine Co., Marshall, Mich. Chaff remover. 1,569,468; Jan. 12.
Emerson Electric Mfg. Co., The. (See Janco, Joseph J., assignor.)
Emmerich, Chas., & Co. (See Becker, Ray, assignor.)
Endsley, Gilbert F., Somerset, Pa. Leveler. 1,569,270; Jan. 12.
Enterprise Aluminum Company, The. (See Jamison, Charles R., assignor.)
Erickson, Peter, Ogema, Saskatchewan, Canada. Poisoned-food corral. 1,569,624; Jan. 12.
Eureka Furnace Coal & Oil Economy Company. (See Rowley, John T., assignor.)
Evans, Albert E., Pittsburgh, Pa., assignor to Pittsburgh Plate Glass Company. Apparatus for cracking off and handling continuously-formed sheet glass. 1,569,079; Jan. 12.
Evins, Dossa D., assignor of one-half to F. W. Elliott, Davenport, Iowa. Posture-adjusting table. 1,568,968; Jan. 12.
Ewasen, John, Moscow, Idaho. Plow. 1,569,271; Jan. 12.
Fafnir Bearing Company, The. (See Searles, Raymond R., assignor.)
Fagerlund, Erik A., Stocksund, Sweden. Light sign. 1,569,080; Jan. 12.
Fairchild, Sherman M., Oneonta, N. Y. Camera. 1,568,969; Jan. 12.
Faithfull, Stanley E., Boston, Mass. Manufacture of lactic acid. 1,569,221; Jan. 12.
Falder, Simon N., Los Angeles, Calif. Inking pad. 1,569,470; Jan. 12.
Falk Corporation, The. (See Banner, Otto A., assignor.)
Fansler, Frederick E., Acton, Ind. Steering mechanism for automobiles. 1,569,733; Jan. 12.
Farnsworth, John, Philadelphia, Pa. Galley side lock. 1,569,361; Jan. 12.
Fassett, George R., assignor to W. J. Sanborn, Lakewood, Ohio. Insulated vessel for cooking, holding, and serving food. 1,569,734; Jan. 12.
Fayfield Knoll Company. (See Miller, J. C. and Fayfield, assignors.)
Fayfield, Robert H. (See Miller, J. C., and Fayfield.)
Feagins, James, Frisco, Tex. Cotton thinner. 1,569,802; Jan. 12.
Federal Telephone Manufacturing Corporation. (See Horle, Lawrence C. F., assignor.)
Felder, Mathias A., Madison, Ind. Lining jig. 1,569 119; Jan. 12.
Ferguson, Alexander D., Oldham, England, assignor to Westinghouse Electric & Manufacturing Company. Control system. 1,569,362; Jan. 12.
Ferrell, Dent and A. W. Helmholtz, Harrisburg, Ill. Combination blasting method and means. 1,569,222; Jan. 12.
Ferrell, Dent. (See Helmholtz, A. W., and Ferrell.)
Firestone Tire and Rubber Company, The. (See Hargraves, Albert, assignor.)
Fischer, Franz J., Dresden, Germany. Current-converting means. 1,569,541; Jan. 12.
Fischer, Howard L. and F. J. Kristofek, assignors to Brown & Bigelow, St. Paul, Minn. Pencil. Re16,253; Jan. 12.
Flannery Bolt Company. (See Dodds, Ethan I., assignor.)
Flannery Bolt Company. (See Landgraf, Frederick K., assignor.)
Fletcher, John M., et al. (See Sease, Chester A., assignor.)
Florsheim, Mordecai B., Richmond, Va. Coat. 1,569,735; Jan. 12.
Foppiano, Umbert, Valparaiso, Chile. Paintbrush guard. 1,569,736; Jan. 12.
Ford, Henry, Dearborn, Mich. Pulley for tractors. 1,569,081; Jan. 12.
Fording, William G., Lakewood, Ohio. Tire stand. 1,569,737; Jan. 12.
Forshee, Ernest L., Akron, Mich. Poultry drinking fountain. 1,569,738; Jan. 12.
Förster, Adolf, Kullehund, near Christiania, Norway. Manufacture of artificial wood. 1,569,272; Jan. 12.
Foster, Cassius M., Toledo, Ohio. Fluid-pressure indicator. 1,569,178; Jan. 12.

Four Wheel Drive Auto Company. (See Dodge, Harry B., assignor.)
Fowle, Arthur E., assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio. Sheet-glass-drawing apparatus. 1,569,471; Jan. 12.
Fox Furnace Company, The. (See Downe, Edward R., assignor.)
Fox, John H., Pittsburgh, Pa., assignor to Pittsburgh Plate Glass Company. Apron for plate-glass machines. 1,569,082; Jan. 12.
Frederick Snare Corporation. (See Lockwood, Willard D., assignor.)
Freeman, Ernest H., Wilmette, Ill. Integrating meter. 1,568,970; Jan. 12.
French, G. Watson, et al. (See Einfeldt, Ernest E., assignor.)
Freund, Conrad, St. Paul, Minn. Toe weight. 1,569,739; Jan. 12.
Frey, Anna E., Philadelphia, Pa. Manicuring implement. 1,569,083; Jan. 12.
Fried, Michael. (See Gaven, W. J., and Fried.)
Froney, Maynard A., Racine, Wis. Machine for preparing food products. 1,569,472; Jan. 12.
Fuller, Bert, Newark, Calif. Car door. 1,569,834; Jan. 12.
Fuller Brush Company, The. (See Lucia, Louis V., assignor.)
Galbraith, John M., Minneapolis, and L. N. Jensen; said Galbraith assignor of one-fourth to Mrs. K. Jensen, St. Paul, Minn. Locked dust cap for tire valves. 1,569,273; Jan. 12.
Galbaed, Max, St. Louis, Mo. Combination coat and overcoat. 1,568,971; Jan. 12.
Gallon Iron Works & Mfg. Co., The. (See Keeler, Raymond W., assignor.)
Garcia, Andrés, Brooklyn, N. Y. Propeller. 1,569,473 Jan. 12.
Garden City Plating and Manufacturing Company. (See Kurtzon, George B., assignor.)
Gardner, Frank, Dallas, Tex. Pump jack. 1,569,318; Jan. 12.
Garrett, Charles A., Philadelphia, Pa. Printing attachment for cap-forming machines. 1,569,363; Jan. 12.
Garrett, Garfield A., Dorrance, Kans. End gate. 1,569,274; Jan. 12.
Gartin, Elmer G., Claremont, N. H., assignor to Sullivan Machinery Company. Rock-drilling mechanism. 1,569,542; Jan. 12.
Gates, John W., Montreal, Quebec, Canada. Furnace arch. Re16,249; Jan. 12.
Gauger, Frank A., Milwaukee, Wis. Oven regulator. 1,569,474; Jan. 12.
Gauthier, Paul, Courbevoie, France. Automatic lifting windlass. 1,569,626; Jan. 12.
Gaven, Mary E., administratrix. (See Gaven, W. J., and Fried.)
Gaven, William J., deceased, Wilkes-Barre, Pa., and M. Fried, Mount Vernon, N. Y.; M. E. Gaven, administratrix. Molding plastic materials. 1,569,625; Jan. 12.
Gebhard, Carl, Los Angeles, Calif. Furniture support. 1,569,319; Jan. 12.
Geimer, Anthony P., assignor to Hamilton Manufacturing Company, Two Rivers, Wis. Cabinet. 1,569,010; Jan. 12.
Gelencser, Geza. (See Braun, M., and Gelencser.)
General Electric Company. (See Dickinson, Wilbur K., assignor.)
General Electric Company. (See Kellogg, Edward W., assignor.)
General Electric Company. (See Murphy, Edwin J., assignor.)
General Electric Company. (See Schwennker, Charles F., assignor.)
General Motors Corporation. (See Hannum, George H., assignor.)
Gesellschaft für Drahtlose Telegraphie m. b. H. (See Leib, August, assignor.)
Getchell, Benjamin E., assignor to Trumbull Electric Manufacturing Company, Plainville, Conn. Electric relay. 1,569,364; Jan. 12.
Getchell, Benjamin E., assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Relay. 1,569,803; Jan. 12.
Getchell, Benjamin E., assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Relay construction. 1,569,804; Jan. 12.
Gilbert, Clarence E., Aberdeen, S. Dak. Implement attachment for tractors. 1,569,011; Jan. 12.
Gildersleeve, Benjamin E., Lynchburg, Va. Automatic mine-car coupler. 1,569,012; Jan. 12.
Gill, Thomas H. (See Myers, William M., assignor.)
Gilson, James H., Chicago, Ill. Bathing cap. 1,569,475; Jan. 12.
Gischlar, Peter. (See Burns, O., and Gischlar.)
Glaspey, Warren E., and F. W. Cox, assignors to The Cox and Sons Company, Bridgeton, N. J. Pipe-threading die. 1,569,740; Jan. 12.
Gleason, Andrew and C. E., Hamilton, Ohio. Auxiliary air supply means for explosive engines. 1,569,476; Jan. 12.
Gleason, Cornelius E. (See Gleason, Andrew and C. E.)
Glidden, Alfred A., assignor to Hood Rubber Company, Watertown, Mass. Paving block. 1,569,741; Jan. 12.
Glover, William S. C., Oxford, England. Device for fastening doors, windows, and the like. 1,569,120; Jan. 12.

Goebel, Rhyne G. (See Buescher, O., and Goebel.)
Goerling, Joseph B., Wausau, Wis. Pencil attachment. 1,569,742; Jan. 12.
Goetschius, Dalton M., Canonsburg, and L. F. Vogt, Washington, assignors to Standard Chemical Company, Pittsburgh, Pa. Filter. 1,569,627; Jan. 12.
Goetschius, Dalton M., Canonsburg, and L. F. Vogt, Washington, assignors to Standard Chemical Company, Pittsburgh, Pa. Filter. 1,569,628; Jan. 12.
Goetz, Henry F., assignor to The Chase Companies Inc., Waterbury, Conn. Spoon or similar article. Des 69,212; Jan. 12.
Goldberg, Samuel, assignor to Universal Fixture Corporation, New York, N. Y. Display fixture. 1,569,365; Jan. 12.
Goldberg, Samuel, assignor to Universal Fixture Corporation, New York, N. Y. Display rack. 1,569,366; Jan. 12.
Goldrick, Albert R. (See Hazelett, C. W., and Goldrick.)
Goldsworthy, William J., San Francisco, Calif. Golf practicing and training device. 1,569,084; Jan. 12.
Gomila, John G., assignor to World Bottling Co., Ltd., New Orleans, La. Bottle. Des. 69,213; Jan. 12.
Good, John D., Hoboken, N. J. Adjustable shade-roller support. 1,569,629; Jan. 12.
Goodrich, B. F., Company, The. (See Merrill, Allan B., assignor.)
Goodwin, Ernest, assignor to The Edwin M., Knowles China Co., East Liverpool, Ohio. Plate or similar article. Des. 69,214; Jan. 12.
Goodwin, Leon E., Portsmouth, N. H. Automobile fender. 1,569,743; Jan. 12.
Goolthrite, James C. (See Urie, James W., assignor.)
Gore, Charles, Los Angeles, Calif. Vehicle speed indicator. 1,569,223; Jan. 12.
Gowran, Harry C., assignor to The Hamilton Manufacturing Company, Two Rivers, Wis. Cabinet. 1,569,013; Jan. 12.
Graham & Norton Company. (See Norton, Clifford, assignor.)
Graham, Robert, assignor to Auto Rim Company Limited, Toronto, Ontario, Canada. Demountable rim. 1,569,477; Jan. 12.
Grant, Wheadon M., Birmingham, Ala., assignor to Illinois Anthracite Corporation, New York, N. Y. Combined spreading and scraping mechanism for distillation apparatus. 1,569,478; Jan. 12.
Green, Jack, Norfolk, Va. Clamp for cylindrical containers. 1,569,275; Jan. 12.
Green, William, Newton, Mass. Refrigerating system and process. 1,569,744; Jan. 12.
Greenland, Lloyd D., Des Moines, Iowa. File holder. 1,569,276; Jan. 12.
Greenland, Reese D. (See McMenamin, M. J., Nixon, and Greenland.)
Griffin, George A., Oakland, Calif. Illuminated sign. 1,569,423; Jan. 12.
Griffin, Maurice F., Los Angeles, Calif. Trunk. 1,569,320; Jan. 12.
Griffith, Thomas R., Dover, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Electron-discharge device. 1,569,630; Jan. 12.
Groehn, Otto J., assignor to Clayton & Lambert Manufacturing Company, Detroit, Mich. Burner construction. 1,569,479; Jan. 12.
Grogan, Michael, Savannah, Ga. Lubricator for saw blades. 1,569,631; Jan. 12.
Grubman Engineering & Manufacturing Co. (See Grubman, Leo J., assignor.)
Grubman, Leo J., Belle Harbor, Long Island, assignor to Grubman Engineering & Manufacturing Co. Inc., Long Island City, N. Y. Device for applying eyelashes to doll eyes. 1,569,480; Jan. 12.
Gruendler, Gustav J., Clayton, Mo. Refrigerator. 1,569,179; Jan. 12.
Guarantee Liquid Measure Company. (See MacKenzie, George W., assignor.)
Guilhem, Victor E., Bordeaux, France. Pickle jar. Des. 69,215; Jan. 12.
Guilhem, Victor E., Bordeaux, France. Pickle jar. Des. 69,216; Jan. 12.
Gunderman, Lester S., Pittsburgh, Pa. Mechanical toy. 1,569,225; Jan. 12.
Gunzelman, Charles A. and W. J., Abilene, Kans. Card shuffler. 1,569,277; Jan. 12.
Gunzelman, William J. (See Gunzelman, Charles A. and W. J.)
Gygar, Joseph A., Brisbane, Queensland, Australia. Apparatus for the engagement and disengagement of multiple-disk clutches of motor vehicles. 1,569,321; Jan. 12.
Habann, Wilhelm E. E., assignor to the Firm of Deutsche Telephonwerke Gesellschaft mit beschrankter Haftung, Berlin, Germany. High-frequency generating system. 1,569,481; Jan. 12.
Häberle, Friedrich, Fschieren, near Dresden, assignor to Sachsenwerk, Licht- und Kraft-Aktiengesellschaft, Niedersedlitz, near Dresden, Saxony, Germany. Bobbin for transformer windings and the like. 1,569,482; Jan. 12.
Hagberg, Bernard, Muskegon, Mich. Gas-cock lock. 1,569,180; Jan. 12.
Haglund, Ture R., Stockholm, Sweden. Treatment of oxidic raw materials. 1,569,483; Jan. 12.
Hale, Arthur B., Tampa, Fla., assignor, by mesne assignments, to F. J. Sérigné Machine Company, Nashua, N. H. Fruit-marking machine. 1,569,224; Jan. 12.
Hall, Everett J., Passaic, N. J., assignor to Metals Disintegrating Company, Inc., New York, N. Y. Disintegrating metals in a ball mill or the like. 1,569,484; Jan. 12.
Hall, Newton L., Salt Lake City, Utah. Sausage sandwich and roll therefor. 1,569,121; Jan. 12.
Halversen, Hans N., Vineland, N. J., assignor to Kimble Glass Company, Chicago, Ill. Glass-body-forming machine. 1,569,652; Jan. 12.
Halvorsen, Axel I. S., Albany, Ind. Receptacle for flour and the like. 1,569,122; Jan. 12.
Halvorsen, Halbert B., Michigan City, Ind., assignor to Sullivan Machinery Company. Core drill. 1,569,653; Jan. 12.
Hamblet, Boyd, Florence, Colo. Automobile steering wheel and electric headlight switch. 1,569,123; Jan. 12.
Hamilton Manufacturing Company. (See Geimer, Anthony P., assignor.)
Hamilton Manufacturing Company, The. (See Gowran, Harry C., assignor.)
Hammond, John H., jr., Gloucester, Mass. Dirigible device. 1,568,973; Jan. 12.
Hammond, John H., jr., Gloucester, Mass. Dirigible device. 1,568,974; Jan. 12.
Hammond, John H., jr., Gloucester, Mass. System of aeroplane control. 1,568,972; Jan. 12.
Hancox, Harold A. (See Sippel, E. H., and Hancox.)
Hand, Edline R., Toledo, Ohio. Radiocompass reading device for ships. 1,569,745; Jan. 12.
Hankey, John H., assignor to The W. H. Reisner Mfg. Company, Hagerstown, Md. Soldering apparatus. 1,569,746; Jan. 12.
Hannum, George H., Pontiac, assignor to General Motors Corporation, Detroit, Mich. Steering mechanism for motor vehicles. Re16,247; Jan. 12.
Hanson, Anton F. E., Amsterdam, assignor to N. V. Fabriek van Instrumenten en Electrische Apparaten Inventum, Bilthoven, Netherlands. Cock provided with electric liquid-heating means. 1,569,485; Jan. 12.
Hardin, Glenn S., assignor of one-half to C. E. Johnson, Spokane, Wash. Desk attachment. 1,569,486; Jan. 12.
Hargraves, Albert, assignor to The Firestone Tire and Rubber Company, Akron, Ohio. Resilient tire. Des. 69,217; Jan. 12.
Harris, Thomas, Woonsocket, R. I. Artificial-filament-spinning frame. 1,569,487; Jan. 12.
Harrison, John S. V. (See Clay, J. R., and Harrison.)
Harter, Lloyd E., Richmond, Ind. Furnace carburetor. 1,569,488; Jan. 12.
Hartman, Harry F., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Brush-holder contact finger. 1,569,367; Jan. 12.
Hartman, Thomas J., Chicago, Ill. Football helmet. 1,569,181; Jan. 12.
Hartwell, Fred G., assignor to A. C. Johnston, Chicago, Ill. Stop for bridge towers. 1,568,975; Jan. 12.
Harvey, Corbon L. (See Hermann, Otto L., assignor.)
Harvey, Harry D. (See Bohnhardt, Charles F. H., assignor.)
Harvey, Harry D. (See Chenowith, W. H., and Schimpf, assignors.)
Hatt, Joseph A. H., New York, N. Y. Making photomechanical printing plates. 1,569,124; Jan. 12.
Haubroe, Werner C. L., Copenhagen, Denmark. Machine-gun support. 1,569,014; Jan. 12.
Haug, Charles F., Brooklyn, N. Y. Candy confection. 1,569,747; Jan. 12.
Haviland, George, Limoges, France. Covered dish or similar article. Des. 69,218; Jan. 12.
Haviland, George, Limoges, France. Cup or similar article. Des. 69,219; Jan. 12.
Hawkins, Frederick L., assignor to Mishawaka Novelty Company, Mishawaka, Ind. Curtain rod. 1,569,748; Jan. 12.
Hays, Thomas F., North Little Rock, assignor of one-fourth to J. W. Delaney, Little Rock, Ark. Boiler and tank stud fitting. 1,569,015; Jan. 12.
Hazelett, Clarence W., Lakewood, and A. R. Goldrick, assignors, by mesne assignments, to The Cleveland Trust Company, trustee, Cleveland, Ohio. Storage-battery container. 1,569,125; Jan. 12.
Headley, Irving T., Washington, D. C. Combination library table and vanity table. 1,569,489; Jan. 12.
Headson, Frank A., Milwaukee, Wis. Packing. 1,569,182; Jan. 12.
Hearns, I. K., et al. (See Maxwell, Erastus M., assignor.)
Hebert, Joseph A., Freeport, Tex. Oil burner. 1,569,805; Jan. 12.
Hecht, Joseph L., et al. (See Einfeldt, Ernest E., assignor.)
Heilman, Ross V. (See Van Orman, B. L., and Heilman.)
Heise, Otto W., Bridgeport, Conn., assignor to Manning, Maxwell & Moore, Incorporated, New York, N. Y. Retard device for Bourdon gauges. 1,569,749; Jan. 12.
Heisey, A. H., & Company. (See Heisey, T. Clarence, assignor.)

Heisey, T. Clarence, assignor to A. H. Heisey &, Company, Newark, Ohio. Jug. Des. 69,220; Jan. 12.
Hellmund, Rudolf E., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Rectified-current commutator motor. 1,569,368; Jan. 12.
Helmholtz, Arthur W., and D. Ferrell, Harrisburg, Ill. Mechanical pressure device. 1,569,226; Jan. 12.
Helmholtz, Arthur W. (See Ferrell, D., and Helmholtz.)
Helmond, William F., Hartford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,569,016; Jan. 12.
Helwig, Eugene C., Hackensack, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone-exchange system. 1,569,654; Jan. 12.
Hem, Halvor O., assignor to Toledo Scale Company, Toledo, Ohio. Dynamometer. 1,569,543; Jan. 12.
Herman, Charles H., and F. G. Schroer, Kansas City, Mo.; said Schroer assignor to said Herman. Well-drilling apparatus. 1,569,183; Jan. 12.
Hermann, Otto L., St. Louis, Mo., assignor to C. L. Harvey, Detroit, Mich. Ledger rack. 1,569,750; Jan. 12.
Herring, John H. (See Lindsey, Ernest E., assignor.)
Herring, Max, Waukegan, Ill. Detachable handle. 1,569,184; Jan. 12.
Hettinger, Henry T., Pittsburgh, Pa. Clothes hanger. 1,569,369; Jan. 12.
Hetzel, A. H., et al. (See Ross, George W., assignor.)
Hetzel, F. L., et al. (See Ross, George W., assignor.)
Heyne, William H., jr., Passaic, N. J. Ticket-printing machine. 1,569,085; Jan. 12.
Hickman, Clifford M., Newark, N. J. Electric-fixture support. 1,569,278; Jan. 12.
Higgins, Howard R., Glenellyn, Ill., assignor, by mesne assignments, to Marlin-Rockwell Corporation, Jamestown, N. Y. Dustproof bearing. 1,569,751; Jan. 12.
Higgins, John J., East Orange, N. J., assignor to Westinghouse Lamp Company. Machine and method for sealing incandescent lamps. 1,569,185; Jan. 12.
Hilfman, Harry. (See Roettges, Frederick, assignor.)
Hilfman, Harry. (See Villaret, Gustave E., assignor.)
Hilke, Henry C., and T. H. Boyd, Seattle, Wash. Automatic check for trimmer saws. 1,569,186; Jan. 12.
Hill Compressor & Pump Company, The. (See Hill, Ebenezer, assignor.)
Hill, Ebenezer, South Norwalk, Conn., assignor to The Hill Compressor & Pump Company, New York, N. Y. Rotary compressor. 1,569,370; Jan. 12.
Hill, Guy B., Oneida, Wis. Lifter for ice-cream cans. 1,569,126; Jan. 12.
Hine, Charles F. (See Rees, C., and Hine.)
Hirakawa, Harue, San Diego, Calif. Prize game apparatus. 1,569,752; Jan. 12.
Hiscock, Joseph H., Minneapolis, Minn. Guiding radial routers. 1,569,490; Jan. 12.
Hitchcock Experiment Company. (See Hitchcock, Halbert K., assignor.)
Hitchcock, Halbert K., Pittsburgh, Pa., assignor of one-half to Hitchcock Experiment Company. Apparatus for making sheet glass. 1,569,086; Jan. 12.
Hnatuk, David. (See Johnson, F., and Hnatuk.)
Hobbs, Orace P., Winder, assignor to Warren De Sosa, Atlanta, Ga. Cotton duster. 1,569,017; Jan. 12.
Hoberecht, Frederick A., Oakland, Calif. Valve-steam-packing washer. 1,569,322; Jan. 12.
Hodgkins, Charles H., Pittsburgh, Pa., assignor to Westinghouse Electric Manufacturing Company. Starting mechanism for automobiles. 1,569,371; Jan. 12.
Hoffer, Le Roy H., assignor to T. E. Murray, Brooklyn, N. Y. Press and similar machine. 1,569,323; Jan. 12.
Hoffmann, William R., Oregon, Mo. Pipe-supporting attachment. 1,569,279; Jan. 12.
Holdaway, William S., Los Angeles, Calif. Disk bit. 1,569,280; Jan. 12.
Holland, William W., Wood River, Ill. Anticreeper. 1,569,806; Jan. 12.
Hollup, C. H., Corporation. (See Pennington, Harry R.)
Holt, John W., Cleveland, Ohio. Electric welding mechanism. 1,569,127; Jan. 12.
Hood Rubber Company. (See Glidden, Alfred A., assignor.)
Hooven & Allison Company, The. (See Regan, Albert L., assignor.)
Hoover Company, The. (See Bates, Albert H., assignor.)
Hoover Company, The. (See Richardson, Max C., assignor.)
Hopkins, Charles E., deceased, Plainfield, N. J.; The Plainfield Trust Company, administrator. Stereotype apparatus. 1,569,491; Jan. 12.
Hopkins, Charles L., River Forest, and C. E. Warner, Berwyn, assignors to Benjamin Electric Manufacturing Company, Chicago, Ill. Attachment plug. 1,569,018; Jan. 12.
Hopwood, John G., et al. (See Sease, Chester A., assignor.)
Horle, Lawrence C. F., Newark, N. J., assignor, by mesne assignments, to Federal Telephone Manufacturing Corporation, Buffalo, N. Y. Current-controlling means. 1,569,372; Jan. 12.
Horne, George H., Glendale, assignor to International Precipitation Company, Los Angeles, Calif. Apparatus for electrical precipitation of suspended material from gases. 1,569,492; Jan. 12.
Horton, Clement E., Waterbury, assignor to Berbecker & Rowland Manufacturing Company, Waterville, Conn. Support for curtains. 1,569,324; Jan. 12.
Hosler, Lillian K., et al. (See Blackman, Mabel, assignor.)
Hotchkin, Paul M., Chicago, Ill. Cove reflector and holder therefor. 1,569,498; Jan. 12.
Hotchkiss, Thomas, Gillespie, Ill. Car coupler. 1,569,281; Jan. 12.
Hueseman, William M., Dillsboro, Ind. Combined slide and button loop for overalls. 1,569,019; Jan. 12.
Huestis, Charles D. C. (See Anderson, Walker G., assignor.)
Hughes, Edward E., Wallace, Idaho. Headlight. 1,569,282; Jan. 12.
Hull, Matthew R., assignor to Rex Manufacturing Company, Connersville, Ind. Hinge support for automobile tops. 1,569,807; Jan. 12.
Hume, John, Houston, Tex., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Fluid-pressure brake device. 1,569,087; Jan. 12.
Humphrey, Ernest N., New Britain, Conn. Buckle. 1,569,088; Jan. 12.
Humphreys, Charles F., Lancaster, Pa., assignor to Armstrong Cork Company. Surface covering and decorating the same. Re16,250; Jan. 12.
Hunt, Andrew M., New York, N. Y., assignor to Standard Stoker Company, Incorporated, Wilmington, Del. Locomotive-stoker manganese-steel universal joint. 1,569,055; Jan. 12.
Hunter, Frank M., et al. (See Sease, Chester A., assignor.)
Hurd, Benjamin W., San Francisco, Calif. Container used for charging fluids or gases with the emanations evolved from radioactive substances. 1,569,494; Jan. 12.
Hurd, Norman B., assignor to The American Hardware Corporation, New Britain, Conn. Lock. 1,569,227; Jan. 12.
Hurd, Norman B., assignor to The American Hardware Corporation, New Britain, Conn. Lock. 1,569,228; Jan. 12.
Hussong Dyeing Machine Company. (See Thompson, James H., assignor.)
Hutchinson, Louie C., Montgomery, Ala., assignor of twenty one-hundredths to B. B. Carter and thirty-five one-hundredths to T. C. Underwood, Gardena, Calif. Electric switch lock. 1,569,753; Jan. 12.
Hutchinson Manufacturing Co. (See Park, Richard G., jr., assignor.)
Hutchison, Alfred W., Chicago, Ill. Control for an oil-burner feed. 1,569,020; Jan. 12.
Hutt, Albert E., Ardmore, Pa. Combination passenger, day, and sleeping coach. 1,569,754; Jan. 12.
Hutton, Ulric O. (See Schmidt, E. N., and Hutton.)
Illinois Anthracite Corporation. (See Grant, Wheadon M., assignor.)
Immel, George F., Willard, Ohio. Reel. 1,569,495; Jan. 12.
Indiana Cash Drawer Company. (See Showers, Joseph R., assignor.)
Ingersoll-Rand Company. (See Parsons, Frederick W., assignor.)
Ingersoll-Rand Company. (See Slater, Fred M., assignor.)
International Precipitation Company. (See Anderson, Evald, assignor.)
International Precipitation Company. (See Horne, George H., assignor.)
International Precipitation Company. (See Viets, Floyd H., assignor.)
International Precipitation Company. (See Weiskopf, Charles H., assignor.)
Irvin, Webb T., Lompoc, assignor to The Celite Company, Los Angeles, Calif. Heat-insulating material and making molded bodies thereof. 1,569,755; Jan. 12.
J. I. Case Threshing Machine Company. (See MacGregor, Wallace F., assignor.)
Jacobus, George R., Hawthorne, N. J. Tee marker. 1,569,424; Jan. 12.
James, Henry D., Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company. Control system. 1,569,373; Jan. 12.
James, William F. (See Law, John D., assignor.)
Jamison, Charles R., Canton, assignor to The Enterprise Aluminum Company, Massillon, Ohio. Frying basket. 1,569,544; Jan. 12.
Janca, Joseph J., assignor to The Emerson Electric Mfg. Co., St. Louis, Mo. Friction hinge. 1,569,089; Jan. 12.
Jenkins, James E., Highland Park, Mich. Motor vehicle. 1,569,808; Jan. 12.
Jensen, Louis N. (See Galbraith, J. M., and Jensen.)
Jensen, Mrs. Karen. (See Galbraith, J. M., and Jensen, assignors.)
Jewell, Jesse R., assignor to National Manufacturing Company, Lincoln, Nebr. Relief means for pressure cookers. 1,569,187; Jan. 12.
Jobin, Marie L. A. (See Vernes A., Bricq, Jobin, and Yvon.)
Johantgen, Oliver D., Oak Park, assignor to Victor Adding Machine Co., Chicago, Ill. Calculating machine. 1,569,188; Jan. 12.

Johnson, Arthur W., Milwaukee, assignor to Bradley Knitting Co., Delevan, Wis. Shaping and drying fabric articles. 1,569,283; Jan. 12.
Johnson, Charles E. (See Hardin, Glenn S., assignor.)
Johnson, Edward C., Ireton, Iowa. Hog holder. 1,569,496; Jan. 12.
Johnson, Fred D., Moline, Ill. Drafting board. 1,569,090; Jan. 12.
Johnson, Fred and D. Huntuk, district of Algoma, Ontario, Canada. Cutter. 1,569,809; Jan. 12.
Johnson, John A., Los Angeles, Calif. Marine propulsion. 1,569,497; Jan. 12.
Johnson, Robert H., Washington, D. C. Gasoline heater. 1,569,810; Jan. 12.
Johnson Service Company. (See Otto, Arthur J. and C. A., assignors.)
Johnston, Arthur C. (See Hartwell, Fred G., assignor.)
Johnston, Howard H., Edgwood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company. Control apparatus. 1,569,374; Jan. 12.
Jones, Evan, Pittaburgh, and W. R. McKrell, Avalon, Pa. Regulating valve. 1,568,976; Jan. 12.
Jones, Francis H., Cicero, Ill. Shock absorber. 1,569,229; Jan. 12.
Jones, Walter C., Evanston, Ill. Steel lumber. Re16,248; Jan. 12.
Jordan, Ernest, New York, N. Y. Air heater for furnaces. 1,569,811; Jan. 12.
Jorgensen, Emil, Stillwater, British Columbia, Canada. Wire-rope connection. 1,569,021; Jan. 12.
Joslin, Edwin E., Portland, Oreg. Automatic liquid control. 1,569,375; Jan. 12.
Jousset, Albert D., and H. D. Malone, Paterson, N. J. Trailer truck. 1,569,498; Jan. 12.
Junghans, Oskar, Schramberg, Germany. Mechanical time fuse. 1,569,545; Jan. 12.
Kadel, Byers W., Baltimore, Md., assignor, by mesne assignments, to The Symington Company. Draft rigging. 1,569,812; Jan. 12.
Kägi, Emil, assignor to Sulzer Frères Société Anonyme, Winterthur, Switzerland. Condenser for use with refrigerators. 1,569,49; Jan. 12.
Kahle, Walter, Erfurt, assignor to A E G Deutsche Werke Aktiengeseellschaft, Berlin, Germany. Typewriter. 1,569,546; Jan. 12.
Kalamazoo Loose Leaf Binder Co. (See Wigginton, George P., assignor.)
Kasarnowski, Leo. (See Osnos, M., and Kasarnowski.)
Kastler, William, St. Louis, Mo. Platen return. 1,569,284; Jan. 12.
Katona, Louis F., Los Angeles, Calif. Shut-off valve. 1,569,285; Jan. 12.
Kauffmann, John W., Chicago, Ill. Hop-package cutter. 1,569,547; Jan. 12.
Kean, William P., Detroit, Mich. Digging machine. 1,569,091; Jan. 12.
Keating, John B., Piedmont, Calif, assignor to Byron Jackson Pump Mfg. Co., Berkeley, Calif. Compression-sleeve seal. 1,569,092; Jan. 12.
Keeler, Raymond W., assignor to The Gallon Iron Works & Mfg. Co., Galion, Ohio. Scarifier for tractors. 1,569,813; Jan. 12.
Keene, Alvin D., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Furnace resistor mounting. 1,569,376; Jan. 12.
Kehse, Walter, Dresden-Kemnitz, Germany. Winding apparatus for the manufacture of insulating tubes consisting of paper and resin. 1,569,656; Jan. 12.
Kelleher, Thomas J., Chicago, Ill. Bending brake. 1,569,022; Jan. 12.
Kellog, George, New York, N. Y. Button. 1,569,548; Jan. 12.
Kellogg, Edward W., Schenectady, N. Y., assignor to General Electric Company. Radio transmission system. 1,569,835; Jan. 12.
Kellogg Switchboard and Supply Company. (See Bohlman, Ernest A., assignor.)
Kennedy, David S., Brooklyn, N. Y., assignor to Mergenthaler Linotype Company. Typographical composing and distributing machine. 1,568,977; Jan. 12.
Kennedy, William & Sons, Limited, The. (See Keon, James J., assignor.)
Kennon, Charles W., Tampa, Fla. Washboard. 1,569,814; Jan. 12.
Kent, Arthur A., Ardmore, Pa. Ignition coil. 1,569,756; Jan. 12.
Keon, James J., assignor to The William Kennedy & Sons, Limited, Owen Sound, Ontario, Canada. Stoplog winch. 1,569,500; Jan. 12.
Kenppner, Ernst, assignor to the Firm Blechspielwarenfabrik Johann Distler, Nuremberg, Germany. Aerial-navigation toy. 1,569,549; Jan. 12.
Kilbride, John T. (See Crudginton, R. F., and Kilbride.)
Kimble Glass Company. (See Halversen, Hans N., assignor.)
Kimmelstiel, Samuel A., New York, N. Y. Base for display stand. Des. 69,221; Jan. 12.
King, Joseph H., San Diego, Calif. Grindstone. 1,569,757; Jan. 12.
Kinney, James A., Lebanon, assignor to Bethlehem Steel Company, Bethlehem, Pa. Bucket-dumping apparatus. 1,569,501; Jan. 12.
Kirkland, Hugh A., assignor to A. A. Dekum, Portland, Oreg. Automatic cut-off for heating devices. 1,569,815; Jan. 12.
Kline, Harold B., assignor to National Automatic Teller Corporation, Utica, N. Y. Auxiliary banking means. 1,568,978; Jan. 12.
Knauss, Francis J., administrator. (See Slocum, Leslie G. S.)
Knowles, Edwin M., China Co., The. (See Goodwin, Ernest, assignor.)
Knudsen, Knud, Danbury, Conn. Multiple push button. Des. 69,222; Jan. 12.
Knudsen, Vern O., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Oscillation generator. 1,568,979; Jan. 12.
Koch, Fritz and R. Pohlmann, Cronenberg, Germany. Saw-setting machine. 1,569,023; Jan. 12.
Koeck, Martin, jr., Fond du Lac, assignor to Deltox Rug Company, Oshkosh, Wis. Grass-twine machine. 1,569,758; Jan. 12.
Koenig, George, Lawler, Iowa. End gate. 1,569,128; Jan. 12.
Kohn, Sigmund F., New York, N. Y. Ironing board. 1,568,980; Jan. 12.
Kohnle, Frederick, Dayton, Ohio. Type chase. 1,569,189; Jan. 12.
Koppers, Heinrich. (See Onderbeck, Emil, assignor.)
Kosken, Wilho A., New York, N. Y. assignor, by mesne assignments, to B. F. Smith, Concord, Mass. Twister ring. 1,569,377; Jan. 12.
Krahl, Emil C., Fairview Village, Ohio. Furniture structure. 1,569,550; Jan. 12.
Kranz, Isidore, New York, N. Y. Bracket element for an electric-lighting fixture. Des. 69,223; Jan. 12.
Kranz, Isidore, New York, N. Y. Lighting fixture. Des. 69,224; Jan. 12.
Kranz, Isidore, New York, N. Y. Electric-lighting fixture. Des. 69,225; Jan. 12.
Kranz, Isidore, New York, N. Y. Lighting fixture. Des. 69,226; Jan. 12.
Krause, Norman R., Racine, Wis., assignor of one-half to J. A. Walsh, Indianapolis, Ind. Shock absorber. 1,569,425; Jan. 12.
Krauthoff, Charles R., Washington, D. C. Massaging device. 1,569,426; Jan. 12.
Krichbaum, Ora, Delaware, Ohio. Hot-water bottle. Des. 69,227; Jan. 12.
Kristofek, Frank J. (See Fischer, H. L., and Kristofek.)
Kronman, Edward, New York, N. Y. Sterilizing and water-heating device. 1,569,836; Jan. 12.
Krupp, Oscar, Nashville, Tenn. Fire-control apparatus. 1,569,190; Jan. 12.
Kruse, Peter, assignor to E. W. Bliss Company, Brooklyn N. Y. Machine for making can bodies. 1,569,093; Jan. 12.
Kuhlke Machine Company, The. (See Kuhlke, Otto J. assignor.)
Kuhlke, Otto J., assignor to The Kuhlke Machine Company, Akron, Ohio. Vulcanizer. 1,569,551; Jan. 12.
Kurowski, Alfred G. F., Brooklyn, assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,569,378; Jan. 12.
Kurtis, Angelos, Brooklyn, N. Y. Automatic braking device for vehicles. 1,569,502; Jan. 12.
Kurtz, Raymond L., Denver, Colo. Device for sectional construction. 1,569,427; Jan. 12.
Kurtz, Samuel E., Sac City, Iowa, Governor. 1,569,503; Jan. 12.
Kurtzon, George B., assignor to Garden City Plating and Manufacturing Company, Chicago, Ill. Drawer pull and window lift. 1,569,094; Jan. 12.
La Force, Burdette D., Ottumwa, Iowa. Mouth gag or retractor. 1,569,504; Jan. 12.
Laherty, Edward, Nenana, Alaska. Artificial hand. 1,569,286; Jan. 12.
Lahr Motor Sales Company. (See Sandin, Arthur L., assignor.)
Laise, Clemens A., Toledo, assignor to The Electron Relay Company, Lucas County, Ohio. Body of high electron and light emission and making the same. 1,569,095; Jan. 12.
Lambert Machine Co. (See Ely, Bernard M., assignor.)
Landers, Frary & Clark. (See Smart, Joseph F., assignor.)
Landers, Frary & Clark. (See Warner, Alonzo A., assignor.)
Landgraf, Frederick K., assignor to Flannery Bolt Company, Pittsburgh, Pa. Stay bolt for boilers. 1,568,981; Jan. 12.
Langer, Harry, Milwaukee, Wis. Door fixture. 1,569,505; Jan. 12.
Larabee, Edward J., Chicago, Ill. Street signal device. 1,569,428; Jan. 12.
Larkin, Ernest M., South Bend, Ind., assignor to Westinghouse Electric & Manufacturing Company. Holding clip for lanterns. 1,569,379; Jan. 12.
Larsen, Andreas R., Minneapolis, Minn. Scarecrow. 1,569,129; Jan. 12.
Larsen, Peter M., South Bend, Ind. Reflector. 1,569,816; Jan. 12.
Lathrop, Harry D., and W. H. Paulson, Chicago, Ill.; said Paulson assignor to said Lathrop. Cooling apparatus. 1,569,191; Jan. 12.
Law, James L., Punxsutawney, Pa. Receptacle for explosives. 1,569,506; Jan. 12.
Law, John D., assignor of one-half to W. F. James, Dunedin, New Zealand. Motion-picture-projecting machine. 1,569,287; Jan. 12.

Leazer, William G., Kerrville, Tex. Riveting apparatus. 1,569,759; Jan. 12.
Leblanc, Charles L. A. M., assignor to Société Anonyme pour l'Exploitation des Procédé Maurice Leblanc-Vickers, Paris, France. Air ejector. 1,569,760; Jan. 12.
Le Blanc, Josephine. (See Doherty, H., and Le Blanc.)
Lederer, Irving R., Providence, R. I. Buckle. 1,569,507; Jan. 12.
Lee, Frank W., Janesville, Wis. Knife case. 1,569,508; Jan. 12.
Lee, George W., Willow Spring, N. C. Plow attachment. 1,569,817; Jan. 12.
Lee, John E., Buffalo, N. Y. Figure-wheeled toy. 1,569,761; Jan. 12.
Leedy, Estelle M., Bronx, N. Y. Radio toy. 1,569,509; Jan. 12.
Leib, August, assignor to Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Radio direction finder. 1,569,325; Jan. 12.
Leicester, Jordan. (See Adams, S. A., and Leicester.)
Leins, Oscar J., assignor to Milwaukee Gas Specialty Co., Milwaukee, Wis. Flash igniter. 1,569,288; Jan. 12.
Leman, Frederick D., Raton, N. Mex. Railway tie. 1,569,192; Jan. 12.
Lengsfield, Byron H., New Orleans, La. Candy box. 1,568,982; Jan. 12.
Leonard, Everett P., Chattanooga, Tenn. Take-up mechanism for knitting machines. 1,569,552; Jan. 12.
Leonard, Martha N., Washington, D. C. Lamp shade. Des. 69,228; Jan. 12.
Leonard, Samuel E., jr., East Cleveland, Ohio. Geometrical location finder for navigators. 1,569,380; Jan. 12.
Levine, Abraham, Elizabeth, N. J. Name plate for brief cases and similar articles. 1,569,057; Jan. 12.
Levinson, David, assignor to Wilson-Western Sporting Goods Co., Chicago, Ill. Cap. 1,569,658; Jan. 12.
Lewis, Andrew L., Petersburg, Va. Pump. 1,569,193; Jan. 12.
Lewis, Fred, Lejunior, Ky. Miner's lamp holder. 1,569,762; Jan. 12.
Lewis, Fred E., and T. J. Williams, Utica, N. Y. Safety attachment for firearms. 1,569,553; Jan. 12.
Lewis, Leo R., Somerville, Mass. Binder. 1,569,381; Jan. 12.
Lewis, Leo R., Somerville, Mass. Bookbinding. 1,569,382; Jan. 12.
Lewis, Leroy M., Merion, Pa. Dry-pipe valve. 1,569,326; Jan. 12.
Libbey-Owens Sheet Glass Company, The. (See Drake, John L., assignor.)
Libbey-Owens Sheet Glass Company, The. (See Fowle, Arthur E., assignor.)
Liberty National Bank, trustee. (See Braun, Aquila R., assignor.)
Liberty National Bank, trustee. (See Clisson, Albert B., assignor.)
Lidke, Frederick C., New York, N. Y. Tunneling machine. 1,569,510; Jan. 12.
Ligon, Bert L., assignor to Ligon Tool Company, Electra, Tex. Fishing tool for wells. 1,569,818; Jan. 12.
Ligon Tool Company. (See Ligon, Bert L., assignor.)
Lindsay, Carolyn P., executrix. (See Lindsay, C. E., and Ogbin.)
Lindsay, Charles E., deceased, Albany, and C. V. Ogbin, New York, N. Y.; C. P. Lindsay, executrix. Loading and unloading cars. 1,569,819; Jan. 12.
Lindsey, Ernest E., San Francisco, assignor of one-half to J. H. Herring, Piedmont, Calif. Automatic doughnut cooker. 1,569,383; Jan. 12.
Linn, John A., Sioux City, Iowa. Can opener. 1,569,289; Jan. 12.
Linthwaite, Owen C., Los Angeles, Calif. Polish-rod clamp. 1,569,327; Jan. 12.
Lippert, Samuel, Garfield Heights, assignor to The Outlook Company, Cleveland, Ohio. Rotary engine. 1,569,429; Jan. 12.
Lipscomb, Clayo P. (See Lipscomb, Henry C. and C. P.)
Lipscomb, Gaston J., New York, N. Y. Gassing hood. 1,568,983; Jan. 12.
Lipscomb, Henry C. and C. P., Oaknolia, La. Convertible seat for vehicles. 1,569,820; Jan. 12.
Lissner, Herman, New York, N. Y. Tag for clothing. 1,569,554; Jan. 12.
Litter, Ferdinant J., New York, N. Y., assignor to McKiernan-Terry Drill Company, Dover, N. J. Method of and apparatus for driving piles. 1,569,763; Jan. 12.
Little, A. E., Company. (See Turner, Gerald E., assignor.)
Little, Philip, jr., assignor to Strong-Scott Manufacturing Company, Minneapolis, Minn. Conveyer-belt tripper. 1,569,511; Jan. 12.
Lockwood, Alfred A., London, England. Concentration or separation of minerals. 1,569,512; Jan. 12.
Lockwood, Willard D., Philadelphia, Pa., assignor to Frederick Snare Corporation, New York, N. Y. Apparatus for laying pipe. 1,569,764; Jan. 12.
Locomotive Stoker Company. (See Lower, N. M., Chalker, and Osborne, assignors.)
Lofstrand, Albin P., Chicago, Ill. Automatic grain shocker. 1,569,230; Jan. 12.
Logan, Charles, Rockdale, near Sydney, New South Wales, Australia. Musical signature indicator for tuition purposes. 1,569,328; Jan. 12.
Lomax, Clarence E., assignor to Automatic Electric Company, Chicago, Ill. Automatic telephone system. 1,569,430; Jan. 12.
Long, Eli M., assignor, by mesne assignments, to The Standard Optical Company, Geneva, N. Y. Lens grinding and polishing machine. 1,569,194; Jan. 12.
Long, Henry P., King City, Mo. Ornament for automobile radiators. 1,569,096; Jan. 12.
Long, John E., Marysville, assignor of one-third to I. J. Caplan and one-third to S. Caplan, Fresno, Calif. Automatic retaining valve. 1,569,329; Jan. 12.
Lovell Manufacturing Company. (See Rathers, John J., assignor.)
Lowell, William, Maplewood, N. J. Golf putter. 1,569,765; Jan. 12.
Lower, Nathan M., A. R. Chalker, and L. E. Osborne, Pittsburgh, Pa., assignors to Locomotive Stoker Company. Grate shaker. 1,569,195; Jan. 12.
Lowy, Adolph, New York, N. Y. Tool box. 1,569,659; Jan. 12.
Lucas, Noah E., Norwich, Conn. Under clearer roll. 1,569,555; Jan. 12.
Lucia, Louis V., assignor to The Fuller Brush Company, Hartford, Conn. Comb-cleaning brush. 1,569,431; Jan. 12.
Maccallum, Norman E., Phoenixville, Pa. Furnace wall and lining construction. 1,569,197; Jan. 12.
Maccarone, Fred, Brooklyn, N. Y. Shoe structure. 1,569,823; Jan. 12.
Macdonald, Angus S., Great Neck, N. Y., assignor, by mesne assignments, to Spicer Manufacturing Corporation, South Plainfield, N. J. Flexible joint. 1,569,840; Jan. 12.
Macdonald, Harry P., Montclair, assignor, by mesne assignments, to Spicer Manufacturing Corporation, South Plainfield, N. J. Determining tension on bolts. 1,569,837; Jan. 12.
Macdonald, Harry P., Montclair, assignor, by mesne assignments to Spicer Manufacturing Corporation, South Plainfield, N. J. Propeller-shaft assembly. 1,569,838; Jan. 12.
Macdonald, Harry P., Montclair, assignor, by mesne assignments to Spicer Manufacturing Corporation, South Plainfield, N. J. Flexible joint. 1,569,839; Jan. 12.
MacGregor, Wallace F., assignor to J. I. Case Threshing Machine Company, Racine, Wis. Combination harvester thresher. 1,569,432; Jan. 12.
Machesney, Andrew G., assignor to Detroit Lubricator Company, Detroit, Mich. Locomotive-exhaust-nozzle covering. 1,569,515; Jan. 12.
MacKenzie, George W., Beaver, assignor to Guarantee Liquid Measure Company, Rochester, Pa. Liquid-measuring apparatus. 1,569,290; Jan. 12.
MacKenzie, George W., Beaver, assignor to Guarantee Liquid Measure Company, Rochester, Pa. Liquid storage and supply system. 1,569,769; Jan. 12.
Mackenzie, Herman J., and A. W. Steenbergh, Tjepoe, Java, Dutch East Endies, assignors to De Bataafsche Petroleum Maatschappij, The Hague, Netherlands. Obtaining commercial gasoline from natural-gas gasoline. 1,569,433; Jan. 12.
MacKenzie, Luther B., New York, N. Y. Sphygmomanometer. 1,569,097; Jan. 12.
Magness, Henry, Colton, S. Dak. Attachment for corn pickers. 1,569,824; Jan. 12.
Magoon, George B., Worcester, Mass. Cutter head for molding machines. 1,568,985; Jan. 12.
Major, Alfred, Holland, N. Y. Can holder. 1,569,825; Jan. 12.
Malan, Gordon T., Philadelphia, Pa. Means for computation. 1,569,770; Jan. 12.
Malone, Harry D. (See Jousset, A. D., and Malone.)
Mangham, John F., El Paso, Tex. Transmission mechanism. 1,569,516; Jan. 12.
Mann, Pliny C., Greeley, Colo. Ball-lacing device. 1,569,841; Jan. 12.
Manning, Maxwell & Moore, Incorporated. (See Heise, Otto W., assignor.)
Manson, George J., Hawkesbury, Ontario, Canada. Distributing device for moving fluids and gases. 1,569,558; Jan. 12.
Marbury, Ralph E., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Condenser. 1,569,384; Jan. 12.
Marbury, Ralph E., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Condenser casing. 1,569,385; Jan. 12.
Marcelin, André J., Paris, France. Direction finder. 1,569,291; Jan. 12.
Mark, Harry R., assignor to Clayton Mark & Company, Chicago, Ill. Drive-well point. 1,569,098; Jan. 12.
Marland Refining Company. (See Rice, W. P., Mertz, W. P., and Moore, assignors.)
Marlin-Rockwell Corporation. (See Higgins, Howard R., assignor.)
Marquardt, Reinhold G. (See Stuewe, O. H., and Marquardt.)
Mason, Howard, Amsterdam, N. Y., assignor to Shawmut Engineering Company, Boston, Mass. Axminster tube frame. 1,569,559; Jan. 12.

Mason, Max, New London, Conn., assignor to Submarine Signal Company, Portland, Me. Determination of wave-energy direction. 1,569,292; Jan. 12.
Massey, Thomas G., Montecito, Calif. Pipe plug and removing the same. 1,569,660; Jan. 12.
Mats, George, New York, N. Y. Self-railing wheel. 1,569,517; Jan. 12.
Maxwell, Erastus M., Cardinal, assignor of one-third to I. K. Hearn and one-third to W. I. Clements, Norfolk, Va. Automobile top. 1,569,771; Jan. 12.
Mayne, Richard W., Globe, Ariz. Automobile bed. 1,569,772; Jan. 12.
Mayo, Benjamin F., deceased; E. Mayo, executrix, Salem, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Shoemaking. 1,569,231; Jan. 12.
Mayo, Benjamin F., Salem, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for operating on pieces of sheet material. 1,569,232; Jan. 12.
Mayo, Etta, executrix. (See Mayo, Benjamin F., assignor.)
McArdle, John, Detroit, Mich. Golf practice apparatus and head-movement detector. 1,569,766; Jan. 12.
McClain, Harry A. and W., Canton, Ohio. Mold for concrete burial vaults. 1,569,513; Jan. 12.
McClain, Waite. (See McClain, Harry A., and W.)
McClellan, George, Toronto, Ontario, Canada. Shocking and stooking machine for attachment to binders. 1,569,514; Jan. 12.
McCollum, Albert, Atkins, Ark. Grapple. 1,568,984; Jan. 12.
McDaniel, James A., Shawnee, Okla. Insect exterminator. 1,569,196; Jan. 12.
McDonald, Charles D., Los Angeles, Calif. Combined table, bed, and back rest. 1,569,556; Jan. 12.
McDonnell, Henry J., Mount Waverley, Victoria, Australia. Vehicle side curtain. 1,569,821; Jan. 12.
McGhee, Saint Paul, Laurinburg, N. C. Road map and case. 1,569,822; Jan. 12.
McGinley, Charles. (See Collins, A. F., and McGinley.)
McKee, Estelle, et al. (See Blackman, Mabel, assignor.)
McKiernan-Terry Drill Company. (See Litter, Ferdinand J., assignor.)
McKrell, William R. (See Jones, E., and McKrell.)
McManama, John W., Waltham, assignor of one-third to S. W. Simonds, Brookline, and one-third to F. A. Barbey, Cambridge, Mass. Railroad-track curve. 1,569,557; Jan. 12.
McMenamin, Michael J., C. Nixon, Philadelphia, and R. D. Greenland, Bedford, Pa. Track lifter. 1,569,767; Jan. 12.
McMullen, John E., Council Bluffs, Iowa. Letter belt. 1,569,330; Jan. 12.
McMullen, John E., Council Bluffs, Iowa. Door latch. 1,569,331; Jan. 12.
McNamara, James, jr., Portland, Oreg. Plasterer's mitering plane. 1,569,768; Jan. 12.
Mead, Richard R., Brooklyn, N. Y., assignor to Mergenthaler Linotype Company. Slug-casting mold. 1,569,386; Jan. 12.
Melling, Herman W., Jackson, Mich. Milling machine. 1,569,518; Jan. 12.
Mercer, Henry H., Claremont, N. H., assignor to Sullivan Machinery Company. Valve mechanism for channeling machines. 1,569,661; Jan. 12.
Mergenthaler Linotype Company. (See Kennedy, David S., assignor.)
Mergenthaler Linotype Company. (See Mead, Richard R., assignor.)
Mergenthaler Linotype Company. (See Paersch, Otto, assignor.)
Merrill, Allan B., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Rubber-covered Spinning roller. 1,569,826; Jan. 12.
Merrow, Joseph M., assignor to The Merrow Machine Company, Hartford, Conn. Sewing machine. 1,568,986; Jan. 12.
Merrow Machine Company, The. (See Merrow, Joseph M., assignor.)
Mertz, Howard A. (See Rice, W. P., Mertz, and Moore.)
Mers, Ernest J., Cranston, R. I. Shuttle winder. 1,569,387; Jan. 12.
Metals Disintegrating Company. (See Hall, Everett J., assignor.)
Metcalfe, William H., et al. (See Arundel, Thomas E., assignor.)
Meyers, Frederick W., Chicago, Ill. Chain link. 1,568,987; Jan. 12.
Meylach, Louis. (See Page, L. M., and Meylach.)
Middaugh, Elmer H., Kalamazoo, Mich. Fuel mixer for internal-combustion engines. 1,569,519; Jan. 12.
Mike, Jan, Dawson, N. Mex. Variable power-transmission means for combination air withdrawing and delivery apparatus. 1,569,198; Jan. 12.
Milam, Delbert A., Charleston, W. Va. Acetylene generator. 1,568,988; Jan. 12.
Miller, Anna, Chicago, Ill. Soap holder for pails. 1,569,773; Jan. 12.
Miller, Carlton E., San Francisco, Calif. Device for introducing cement in wells. 1,569,293; Jan. 12.
Miller, Erwin E., Fullerton, Calif. Expansible packing for plungers. 1,569,560; Jan. 12.
Miller, Gustaf E., Stratton, Nebr. Machine for grinding grain. 1,569,564; Jan. 12.
Miller, John C., and R. H. Fayfield, assignors to Fayfield Knoll Company, Buffalo, N. Y. Snow skate. 1,569,520; Jan. 12.
Miller, Royal R., Chicago, Ill., assignor to Miller Traction Tread Company. Converter attachment for drive wheels. 1,569,099; Jan. 12.
Miller Rubber Company, The. (See Robertson, Isaac W., assignor.)
Miller, Thomas W., Ashland, Ohio. Manufacturing rubber articles and vulcanizing the same. 1,569,662; Jan. 12.
Miller Traction Tread Company. (See Miller, Royal R., assignor.)
Miller, William J., Columbus, Ohio. Freight-car seal. 1,569,294; Jan. 12.
Milton, Thomas W., East St. Louis, Ill. Stack poling and guy-painting device. 1,569,521; Jan. 12.
Milwaukee Gas Specialty Co. (See Leins, Oscar J., assignor.)
Minerd, Levi S., Howard, Kans. Haystacker. 1,569,199; Jan. 12.
Mishawaka Novelty Company. (See Hawkins, Frederick L., assignor.)
Misner, Edgar D., Detroit, Mich. Shock absorber. 1,569,663; Jan. 12.
Mitchell, Robert J., Richmond, Mo. Automatic hose holder. 1,569,774; Jan. 12.
Mittasch, Alwin, Ludwigshafen-on-the-Rhine, and M. Pier, Heidelberg, assignors to Badische-Anilin- & Soda-Fabrik, Ludwigshafen-on-the-Rhine, Germany. Synthetic manufacture of methanol. 1,569,775; Jan. 12.
Mogford, Edmund C., assignor to Clark Equipment Company, Buchanan, Mich. Differential carrier for motor vehicles. 1,569,664; Jan. 12.
Mohr, Jacob J. (See White, A., and Mohr.)
Molins, Walter E., London, England. Apparatus for feeding and arranging oval cigarettes. 1,568,989; Jan. 12.
Moog, Willy, Arzheim, near Landau, Germany. Apparatus and process for the production of colored designs on leather. 1,569,562; Jan. 12.
Mooradian, Harry S., assignor to The Dayton Rubber Manufacturing Company, Dayton, Ohio. Tread for tires. Des. 69,229; Jan. 12.
Moore, Chester E. (See Rice, W. P., Mertz, and Moore.)
Moore, Joseph A., Palmer, assignor of one-half to A. L. Ticer, Boyce, Tex. Child's vehicle. 1,568,990; Jan. 12.
Morahan, Joseph L., Jackson, Miss. Hat blocking, flanging, and finishing apparatus. 1,569,842; Jan. 12.
Morehouse, Lyman F., Montclair, N. J., assignor to American Telephone and Telegraph Company. Ciphering and deciphering device. 1,568,991; Jan. 12.
Morton, Harry E., Hyde Park, Mass. Toy electric railway. 1,569,233; Jan. 12.
Moss, David, assignor, by mesne assignments, to Brandes Laboratories, Inc., Newark, N. J. Terminal for telephone receivers. 1,569,776; Jan. 12.
Moxie Company, The. (See Thompson, Harry A., assignor.)
Mudge, Ralph L., Detroit, Mich. Master link for conveyer chains. 1,568,992; Jan. 12.
Muehleisen, Gottlieb, assignor to National Soil Conservation Company, Alma, Wis. Flume. 1,569,777; Jan. 12.
Müller, Friederich, Elizabeth, N. J., assignor to The Whitney Mfg. Co., Hartford, Conn. Chain and parts therefor. 1,569,234; Jan. 12.
Müller, Heinrich, Nuremberg, Germany. Eye for plush toy figures. 1,569,563; Jan. 12.
Müller, Wilhelm, Flix, assignor to Sociedad Electro-Quimica de Flix, Tarragona, Flix Province, Spain. Apparatus for pulverization and projection of molten metal. 1,569,564; Jan. 12.
Mullin, Donald S., Pittsburgh, Pa. Handling material. 1,569,100; Jan. 12.
Mullins, Charles E., Roanoke, assignor to J. T. Barrow, Chicago, Ill. Scoring device for tile-forming dies. 1,569,665; Jan. 12.
Munson, Edmund L., Mount Kisco, N. Y. Golf-club head. 1,569,295; Jan. 12.
Murphey, James A., Germantown, Pa. Tiltable steering wheel. 1,569,666; Jan. 12.
Murphy, Edward S., Central Miranda, Cuba. Continuous automatic separator. 1,569,778; Jan. 12.
Murphy, Edwin J., Schenectady, N. Y., assignor to General Electric Company. Ventilating apparatus. 1,569,845; Jan. 12.
Murray, John B., Lansing, Mich. File-cleaning machine. 1,569,434; Jan. 12.
Murray, Thomas E. (See Hoffer, Le Roy H., assignor.)
Murray, Thomas E., jr., Broklyn, N. Y. Manufacture of housings and the like. 1,569,332; Jan. 12.
Myers, Alfred B., Portland, Oreg. Valve. 1,569,843; Jan. 12.
Myers, Edgar J., Salt Lake City, Utah. Rug-handling machine. 1,569,522; Jan. 12.
Myers, Hubert A., assignor to Toledo Scale Company, Toledo, Ohio. Coin-controlled mechanism for weighing scales. 1,569,565; Jan. 12.
Myers, William M., St. Joseph, Mo., assignor to T. H. Gill, Milwaukee, Wis. Air compressor. 1,569,435; Jan. 12.
N. V. Fabriek van Instrumenten en electrische Apparaten Inventum. (See Hanson, Anton F. E., assignor.)

Nachemov, Charles, New York, N. Y. Vanity case. 1,569,779; Jan. 12.
Nashua Manufacturing Company. (See Thomas, Norman T., assignor.)
Nasmith, John W., assignor to Nasmith's Patents Limited, Manchester, England. Combing machine. 1,569,566; Jan. 12.
Nasmith's Patents Limited. (See Nasmith, John W., assignor.)
National Automatic Teller Corporation. (See Kline, Harold B., assignor.)
National Cash Register Company, The. (See Block, Abraham, assignor.)
National Manufacturing Company. (See Jewell, Jesse R., assignor.)
National Soil Conservation Company. (See Muehleisen, Gottlieb, assignor.)
National Trust Company Limited. (See Peck, R. L. and Torell, assignors.)
Neilson, Thomas, Glasgow, Scotland, Air-directing device. 1,569,667; Jan. 12.
Nell, Gustave M., assignor to The Cleveland Rock Drill Company, Cleveland, Ohio. Rotative device for rock drills. 1,569,436; Jan. 12.
Nemitof, Louies, Kansas City, Mo. Hardening copper. 1,569,130; Jan. 12.
Newbauer, Valentine, Minneapolis, Minn. Vertically-rising aeroplane. 1,569,668; Jan. 12.
Newhouse, Marshall E. (See Burns O., and Gischlar, assignors.)
Newson, Reeves J., Lynn, Mass. Pipe fitting. 1,568,993; Jan. 12.
Nicholson, Frank H., Lewistown, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,569,388; Jan. 12.
Niclausse, Albert L. (See Niclausse, Elie P. J. and A. L.)
Niclausse, Elie P. J. and A. L., Paris, France. Boiler. 1,569,523; Jan. 12.
Nixon, Charles. (See McMenamin, M. J., Nixon, and Greenland.)
Nock, Harold E., assignor to Towle Manufacturing Company, Newburyport, Mass. Coffeepot or analogous article. Des. 69,230; Jan. 12.
Nock, Thomas R., Wachapreague, Va. Amusement apparatus. 1,569,780; Jan. 12.
Noll, Edward A., Lakewood, Ohio. Channel-milling cutter. 1,569,524; Jan. 12.
Norbork, Christen, Copenhagen, Denmark. Flushing tank. 1,568,994; Jan. 12.
Nord, Julius, The Hague, Netherlands. Tourniquet. 1,569,131; Jan. 12.
Norton, Clifford, assignor to Graham & Norton Company, New York, N. Y. Bar-lock switch. 1,569,669; Jan. 12.
O'Brien, John R., Marrickville, near Sydney, New South Wales, Australia. Pneumatic or air-cushion tire. 1,569,844; Jan. 12.
O'Connell, Thomas, sr. (See Swatrz, Henry A., jr., assignor.)
Odell, Horace P., Passaic, N. J. Method of and apparatus for use in printing. 1,569,296; Jan. 12.
Odenkirk, Harry C., Cleveland, Ohio. Switch stand for operating switches and signals. 1,569,333; Jan. 12.
Ogbin, Clinton V. (See Lindsay, C. E., and Ogbin.)
Ohio Brass Company, The. (See Austin, Arthur O., assignor.)
Ohio Steam Shovel Company, The. (See Rauch, John D., assignor.)
Oliphant, Laurence, Trenton, N. J., assignor to Oxweld Acetylene Company. Blowpipe. 1,569,024; Jan. 12.
Opderbeck, Emil, Gelsenkirchen, assignor to Heinrich Koppers, Essen-Ruhr, Germany. Burner for gas furnaces. 1,569,567; Jan. 12.
Optische Anstalt C. P. Goerz Aktiengesellschaft. (See Wöhrle, Silvester, assignor.)
Orr, Robert P., Schenectady, N. Y. Picture and object target. 1,569,781; Jan. 12.
Osborne, Lonnie E. (See Lower, N. M., Chalker, and Osborne.)
Osnos, Mendel, and L. Kasarnowski, Berlin, Germany, assignors to Radio Corporation of America. Method of and arrangement for starting frequency-transforming installations. 1,569,132; Jan. 12.
Ostrander, Allen E., Ridgewood, N. J., assignor to Westinghouse Air Brake Company, New York, N. Y. Air brake. 1,569,133; Jan. 12.
Otto, Arthur J. and C. A., assignors to Johnson Service Company, Milwaukee, Wis. Mount for thermostats. 1,569,782; Jan. 12.
Otto, Carl A. (See Otto, Arthur J. and C. A.)
Outlook Company, The. (See Lippert, Samuel, assignor.)
Owen, William, Pittsburgh, Pa., assignor to Pittsburgh Plate Glass Company. Gate for glass tanks. 1,569,134; Jan. 12.
Owens, Ivan L., Wytheville, Va. Rotary engine. 1,569,525; Jan. 12.
Oxweld Acetylene Company. (See Oliphant, Laurence, assignor.)
Pacific Car and Foundry Company. (See Chriswell, Frederick W., assignor.)
Pacific, R. & H. Chemical Corporation, The. (See Brown, Mortimer J., assignor.)
Paersch, Otto, Berlin, Germany, assignor to Mergenthaler Linotype Company, Brooklyn, N. Y. Matrix-composing and line-casting machine. 1,569,389; Jan. 12.
Page, Albert E. (See Scott, R. W., and Page.)
Page, Leslie M., Maplewood, N. J., and L. Meylach, Brooklyn, N. Y. Pressing block. 1,569,135; Jan. 12.
Pagoda Tea Company, The. (See Raynor, Louis L., assignor.)
Palmer, Charles H., Milwaukee, Wis. Spring suspension. 1,569,670; Jan. 12.
Paramount Machine Co. (See Eanes, Hugh P., assignor.)
Pardee, Frank, jr., assignor to Anthracite Separator Company, Hazleton, Pa. Tool holder. 1,569,136; Jan. 12.
Park, Richard G., jr., Washington, D. C., assignor to Hutchinson Manufacturing Co., Norristown, Pa. Woodworking machine. 1,569,526; Jan. 12.
Parker, Ralph E., Birmingham, Ala. Book index. 1,569,290; Jan. 12.
Parker Ventilation Company. (See Blumlein, Albert, assignor.)
Parkhurst, Douglas L., Washington, D. C. Time switch. 1,569,200; Jan. 12.
Parsons, Frederick W., Elmira, N. Y., assignor to Ingersoll-Rand Company, Jersey City, N. J. Compressor-valve lifter. 1,569,671; Jan. 12.
Patterson, Robert L., Long Beach, Calif. Bulb mounting. 1,569,527; Jan. 12.
Paulson, Walter H. (See Lathrop, H. D., and Paulson.)
Peabody, Elmer C., and W. Rouse, Dillon, Colo. Shock absorber for hand cranks. 1,569,672; Jan. 12.
Pearl, Rubin, and J. Susana, Philadelphia, Pa. Safety device for flying machines. 1,569,391; Jan. 12.
Pearson, Eric G., assignor to Eagle Pencil Company, New York, N. Y. Fountain pen. 1,569,783; Jan. 12.
Pederson, Hayes N., Racine, Wis. Confection cone. 1,569,568; Jan. 12.
Peek, Robert L., Ottawa, Ontario, and T. F. Torell, Aylmer, Quebec, assignors, by mesne assignments, to National Trust Company Limited, Toronto, Canada. Refining of copper-nickel matte. 1,569,137; Jan. 12.
Pels, Henry, Berlin-Charlottenburg, Germany. Metal-cutting machine. 1,569,569; Jan. 12.
Pennington, Harry R., Chicago, Ill., assignor to C. H. Hollup Corporation. Joining metals by fusion welding. 1,569,025; Jan. 12.
Peterson, Charles A., Chicago, Ill. Refrigerating device. 1,569,026; Jan. 12.
Peterson, John, Faribault, Minn. Phonograph cabinet. 1,569,570; Jan. 12.
Pew, Franklin J., St. Catharines, Ontario, Canada. Toilet convenience for automobiles. 1,569,571; Jan. 12.
Pew, Franklin J., St. Catharines, Ontario, Canada. Automobile body. 1,569,572; Jan. 12.
Phillips, Ted H., Gould, Okla. Cattle yoke. 1,569,297; Jan. 12.
Piccaluga, Angelo, Leghorn, Italy. Apparatus for fitting caps to vessels. 1,569,573; Jan. 12.
Piccioni, Igino, Tivoli, Italy. Method and apparatus for the accurate reproduction of paintings, drawings, or prints of all kinds with colored elements of any description. 1,569,027; Jan. 12.
Pickup, George E., assignor to The Wehrle Company, Newark, Ohio. Fireback or similar article. Des. 69,231; Jan. 12.
Pier, Mathias. (See Mittasch, A., and Pier.)
Pierce, Lee D., Fulton, N. Y. Vehicle signal faceplate. Des. 69,232; Jan. 12.
Pierce, Robert E., assignor to Remis Bro. Bag Company, St. Louis, Mo. Tie for closing the mouths of bags. 1,569,138; Jan. 12.
Piersall, Scebron M., Abilene, Kans. Grain conditioner. 1,569,201; Jan. 12.
Pietsch, Oscar C., Hancock, Mich. Wrench. 1,569,673; Jan. 12.
Pigeon, Ernest A., Beverly, Mass. Camera. 1,569,139; Jan. 12.
Pigott, Reginald J. S., Brookline, assignor to Crosby Steam Gage & Valve Company, Boston, Mass. Valve. 1,569,674; Jan. 12.
Pittsburgh Plate Glass Company. (Evans, Albert E., assignor.)
Pittsburgh Plate Glass Company. (See Fox, John H., assignor.)
Pittsburgh Plate Glass Company. (See Owen, William, assignor.)
Pittsburgh Plate Glass Company. (See Swartzlander, Thomas H., assignor.)
Pittsburgh Plate Glass Company. (See Young, C. B., and Caspar, assignors.)
Pittsburgh Research Corporation. (See Dixon, Joseph L., assignor.)
Plack, Henry E., Towson, Md. Toy golf game. 1,569,334; Jan. 12.
Plainfield Trust Company, The, administrator. (See Hopkins, Charles E.)
Plaunché, Léda H., New Orleans, La. Combination undergarment. 1,569,675; Jan. 12.
Plimpton, H. E., Manufacturing Co. (See Plimpton, Howard E., assignor.)
Plimpton, Howard E., assignor to H. E. Plimpton Manufacturing Co. Inc., Norwood, Mass. Laundry case. 1,569,784; Jan. 12.
Plunkett, Willis B., Clayton, N. Mex. Cattle guard. 1,569,235; Jan. 12.
Poetzsch, Max, Ridgewood, N. J. Combined finishing machine for pile fabrics. 1,569,785; Jan. 12.
Pohlmann, Richard. (See Koch, F., and Pohlmann.)

Popoff, Jacob E., Cambridge, Mass. Target. 1,569,786; Jan. 12.
Post, Edward C., assignor to Vapor Car Heating Company, Inc., Chicago, Ill. Coupler. 1,569,028; Jan. 12.
Potter & Buffinton Company. (See Weed, Edward L., assignor.)
Powell, Winfred T., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y. Automatic telephone system. 1,569,676; Jan. 12.
Powell, Winfred T., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y. Telephone system. 1,569,677; Jan. 12.
Powell, Winfred T., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y. Automatic telephone system. 1,569,678; Jan. 12.
Power, Henry L., Brandon, Manitoba, Canada. Grain door for railway cars. 1,569,029; Jan. 12.
Powers, Samuel P., Wooster, Ohio. Well-drilling derrick. 1,569,298; Jan. 12.
Preston, Elias F., Mason City, Iowa. Open-potential-circuit detector. 1,569,299; Jan. 12.
Pridgen, John B. (See Wentz, H. B., and Pridgen.)
Prochnow, Julius R., San Antonio, Tex. Medicinal preparation. 1,569,202; Jan. 12.
Purvis, John, jr., Chicago, Ill. Filling machine. 1,569,300; Jan. 12.
Puterbaugh, Jack, Cincinnati, Ohio. Bench vise. 1,569,236; Jan. 12.
Pyle-National Company, The. (See Dake, Charles W., assignor.)
Querns, Harry G. G., Philadelphia, Pa. Knitted fabric. 1,569,140; Jan. 12.
Radio Corporation of America. (See Osnos, M., and Kasarnowski, assignors.)
Raffaelli, Ferruccio, New York, N. Y. Sea car. 1,569,392; Jan. 12.
Rancier, Charles A., Brooklyn, N. Y., assignor of one-half to W. J. Boehmer. Animal trap. 1,569,827; Jan. 12.
Rand, James H., assignor to Rand Kardex Company, Inc., North Tonawanda, N. Y. Index device. 1,569,574; Jan. 12.
Rand, James H., jr., Tonawanda, and L. C. Broecker, Buffalo, N. Y.; said Broecker, assignor to said Rand, jr. Record tray or container. 1,569,575; Jan. 12.
Rand Kardex Company, Inc. (See Rand, James H., assignor.)
Randall, Myron R., Waupace, Wis. Air gun or rifle plunger. 1,569,030; Jan. 12.
Rathers, John J., assignor to Lovell Manufacturing Company, Erie, Pa. Rubber roll. 1,569,393; Jan. 12.
Rauch, John D., assignor to The Ohio Steam Shovel Company, Lima, Ohio. Power shovel. 1,569,031; Jan. 12.
Ravier, Léopold, Paris, France. Lock nut. 1,569,237; Jan. 12.
Ray, Eugene J., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Buttonhole-sewing machine. 1,569,394; Jan. 12.
Raymond, Ralph L., Auburn, Me. Shoe. 1,569,576; Jan. 12.
Raynor, Louis L., New York N. Y., assignor to The Pagoda Tea Company, Inc. Container for tea. Des. 69,233; Jan. 12.
Reach, William F., Springfield, Mass., assignor to A. G. Spalding & Bros., New York, N. Y. Javelin. 1,569,395; Jan. 12.
Rece, Frank E., Dallas, Tex. Cover for cribs. 1,569,335.
Rectifier Manufacturing Company. (See Wall, William G., assignor.)
Reed, Leonard M., Dexter, Iowa. Power handsaw. 1,569,301; Jan. 12.
Reed Roller Bit Company. (See Duda, Oswald, assignor.)
Rees, Claude, and C. F. Hine, San Francisco, Calif. Drying apparatus. 1,569,302; Jan. 12.
Regan, Albert L., assignor to The Hooven & Allison Company, Xenia, Ohio. Towrope. 1,569,303; Jan. 12.
Reichel, Hugo, Chicago, Ill. Shingle cutter. 1,569,032; Jan. 12.
Reichel, Hugo, Chicago, Ill. Shingle stacker. 1,569,033; Jan. 12.
Reisner, W. H. Mfg. Company, The. (See Hankey, John H., assignor.)
Reutlinger, Alexander. (See Bilgery, C., and Reutlinger.)
Rex Manufacturing Company. (See Hull, Matthew R., assignor.)
Reynolds, Dwight, E., Liverpool, N. Y. Clothesrack. 1,569,238; Jan. 12.
Rhodes, William A., Kansas City, Mo., assignor to American Telephone and Telegraph Company. Machine-switching telephone-exchange system. 1,569,034; Jan. 12.
Rice, John A., Berkeley, Calif. Producing artificial snow. 1,569,396; Jan. 12.
Rice, Wayne P., H. A. Mertz, and C. E. Moore, assignors to Marland Refining Company, Ponca City, Okla. Scraping device. 1,569,203; Jan. 12.
Richardson, Max C., Canton, assignor, by mesne assignments, to The Hoover Company, North Canton, Ohio. Dust-bag support. 1,569,304; Jan. 12.
Ricks, Absalom W., Rexburg, Idaho. Pneumatic shock absorber. 1,569,035; Jan. 12.
Riddle, Edward N., The. (See Crowell, Frank S., assignor.)
Rife, William H., La Junta, Colo. Swinging-rail switch frog. 1,569,141; Jan. 12.
Rippetoe, Homer, Jersey City, N. J., assignor to Saks & Company, New York, N. Y. Combination luggage. 1,569,142; Jan. 12.
Riverside and Dan River Cotton Mills. (See Chase, H. M., and Robertson, assignors.)
Roberts, John Q. (See Colley, George F., assignor.)
Robertson, George A., Youngstown, Ohio. Sand-removing device. 1,569,787; Jan. 12.
Robertson, George W. (See Chase, H. M., and Robertson.)
Robertson, Isaac W., assignor to The Miller Rubber Company, Akron, Ohio. Removing metallic straps from bales. 1,569,397; Jan. 12.
Robinson, Alfred P., Auckland, New Zealand. Holder for wool and like thread materials. 1,569,577; Jan. 12.
Robinson, Anson, Los Angeles, Calif. Orifice fitting. 1,569,305; Jan. 12.
Robinson, Henry J., East McKeesport, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Automobile brake. 1,569,143; Jan. 12.
Rockwell, Robert L. (See Wilson M. L., and Rockwell.)
Rockwood Sprinkler Company of Massachusetts. (See Carlson, Hjalmar G., assignor.)
Roesch, Alfred, deceased, by E. Roesch, executrix, assignor to Charles J. Taglianbue Mfg. Co., Brooklyn, N. Y. Stuffing box for automatic regulators and the like. 1,569,336; Jan. 12.
Roesch, Emma, executrix. (See Roesch, Alfred.)
Roettges, Frederick, assignor to H. Hilfman, New York, N. Y. Lighting fixture or the like. Des. 69,234; Jan. 12.
Rogers, Everett L., jr., Providence, R. I. Bottle opener. Des. 69,235; Jan. 12.
Rogers, Samuel L., San Francisco, assignor to J. A. Bried, Oakland, Calif. Velocipede. 1,569,204; Jan. 12.
Röhm, Otto, Darmstadt, Germany. Manufacture of tanning substances. 1,569,578; Jan. 12.
Rolle, Edward F., Forest Hills, assignor to Rolle Rubber Company, Inc., New York, N. Y. Ink pad for rubber stamps, etc. 1,569,337; Jan. 12.
Rolle Rubber Company. (See Rolle, Edward F., assignor.)
Rosenthal, Max G., Chicago, Ill. Rotary explosion engine. 1,569,306; Jan. 12.
Ross, George W., Huntington Park, assignor to F. L. Hetzel and A. H. Hetzel, Los Angeles, Calif. Brake mechanism. 1,569,338; Jan. 12.
Rossi, Pietro, Eastbourne, England. Combined ornament and temperature indicator for radiator caps. Des. 69,236; Jan. 12.
Rouse, William. (See Peabody, E. C., and Rouse.)
Rowley, John T., assignor to Eureka Furnace Coal & Oil Economy Company, Inc., New York, N. Y. Furnace. 1,569,829; Jan. 12.
Rundgren, Edward M., assignor to Western Architectural Iron Company, Chicago, Ill. Window structure. 1,569,239; Jan. 12.
Runge, Robert F., Forest Hills, N. Y. Grinding machine. 1,569,036; Jan. 12.
Russell Mfg. Co. (See Russell, Thomas M., assignor.)
Russell, Thomas M., assignor to The Russell Mfg. Co., Middletown, Conn. Friction lining. 1,569,579; Jan. 12.
Sachsenwerk, Licht- und Kraft-Aktiengesellschaft. (See Häberle, Friedrich, assignor.)
Saco-Lowell Shops. (See Danilloff, S., and Dupee, assignors.)
Saks & Company. (See Rippetoe, Homer, assignor.)
Sanborn, John B., Evanston, Ill. Display container for separable devices. 1,569,679; Jan. 12.
Sanborn, William J., Cleveland, Ohio. Culinary utensil. 1,569,788; Jan. 12.
Sanborn, William J. (See Fassett, George R., assignor.)
Sandin, Arthur L., assignor of one-half to Lahr Motor Sales Company, Bismarck, N. Dak. Ignition distributor mounting and pump for oiling the bearings thereof. 1,569,205; Jan. 12.
Sanford, Hugh W., Knoxville, Tenn. Railway car. 1,569,037; Jan. 12.
Sarkisian, Dickran M., Forest Hills, N. Y. Traverse rod for drapery. 1,569,680; Jan. 12.
Scammell, Charles H., assignor to Charles H. Scammell Co., Inc., New York, N. Y. Metallic lathing. 1,569,144; Jan. 12.
Scammell, Charles H., Co. (See Scammell, Charles H., assignor.)
Schellberg Manufacturing Corporation. (See Schellberg, Oscar B., assignor.)
Schellberg, Oscar B., assignor to Schellberg Manufacturing Corporation, New York, N. Y. Medical apparatus for use in proctotherapy. Re16,251; Jan. 12.
Scheminger, John, jr., Providence, R. I., assignor to Aetna Automatic Oil Burner, Incorporated, New York, N. Y. Oil-distributing head for rotary oil burners. 1,569,580; Jan. 12.
Schenk, Henry H., Memphis, Mo. Flytrap. 1,569,681; Jan. 12.
Scher, Louis S., assignor to Telephone Auxiliary Co., Inc., New York, N. Y. Telephonic reception apparatus. 1,569,398; Jan. 12.
Schimpf, George C. (See Chenowith, W. H., and Schimpf.)
Schindler, Joseph, Burney, Calif. Grating or slicing machine. 1,569,399; Jan. 12.

Schmechel, Arno, and G. Schubert, Thiensville, Wis. Potato-harvester attachment. 1,569,038; Jan. 12.
Schmidt, Edwin X., and U. O. Hutton, assignors to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Method of and apparatus for ascertaining the proportion of a constituent in a fluid. 1,569,682; Jan. 12.
Schoepfer, Hermann. (See Zinke, A., and Schoepfer.)
Schramm, Carl. (See Clark, E. W., and Schramm.)
Schroer, Frank G. (See Herman, C. H., and Schroer.)
Schubert, Franz J., Nashville, Tenn. Child's riding toy. 1,569,400; Jan. 12.
Schubert, George. (See Schmechel, A., and Schubert.)
Schüfftan, Eugen, Berlin-Wilmersdorf, Germany. Making moving pictures. 1,569,789; Jan. 12.
Schwennker, Charles F., Schenectady, N. Y., assignor to General Electric Company. Electric switch. 1,569,683; Jan. 12.
Schwerin, Paul, assignor to Western Electric Company, Incorporated, New York, N. Y. Electron-discharge device. 1,569,684; Jan. 12.
Scoggan, Richard R., Jeffersonville, Ind. Trolley contactor. 1,569,039; Jan. 12.
Scott, Charlie W., Lincolnton, Ga. Pliers. 1,569,581; Jan. 12.
Scott, Charlie W., Lincolnton, Ga. Internal-combustion engine. 1,569,582; Jan. 12.
Scott Head Lamp Control. (See Calkins, James M., assignor.)
Scott, Robert W., Babylon, and A. E. Page, Brooklyn, assignors to Scott & Williams, Inc., New York, N. Y. Stitch-regulating means for knitting machines. 1,569,632; Jan. 12.
Scott & Williams, Inc. (See Scott, R. W., and Page, assignors.)
Scrannage, Lawrence E., Philadelphia, Pa. Arch supporter. 1,569,206; Jan. 12.
Scullin Steel Co. (See Doerr, Harry E., assignor.)
Searles, Raymond R., assignor to The Fafnir Bearing Company, New Britain, Conn. Vehicle spring bearing. 1,569,240; Jan. 12.
Sears, Samuel V., Falls City, Nebr. Phonograph-record ejector. 1,569,207; Jan. 12.
Sease, Chester A., assignor of one-fifth to J. G. Hopwood, one-fifth to J. M. Fletcher, one-fifth to J. S. Carey, Harrisburg, and one-fifth to F. M. Hunter, Lower Paxton Township, Dauphin County, Pa. Corrosive-preventing liquid composition. 1,569,040; Jan. 12.
Seeger Chain Company. (See Seeger, John W., assignor.)
Seeger, John W., assignor to Seeger Chain Company, Incorporated, Washington, D. C. Antiskid device for autos. 1,569,790; Jan. 12.
Sévigné, F. J., Machine Company. (See Hale, Arthur B., assignor.)
Sévigné, Frederick J., Milford, N. H. Fruit-marking machine. 1,569,208; Jan. 12.
Shanaberger, Charles W., Indiana, assignor of two-thirds to J. Barnes, Philadelphia, Pa. Conveyer. 1,569,209; Jan. 12.
Sharp, Wilbur C., Camarillo, Calif. Apparatus for aiding in the forming and nailing of boxes. 1,569,145; Jan. 12.
Shawmut Engineering Company. (See Mason, Howard, assignor.)
Shay, William C., Jamestown, N. Y. Trouble light. 1,569,041; Jan. 12.
Sheer, Henry M., Quincy, Ill. Oil control for burners. 1,569,633; Jan. 12.
Sheet Metal Products Company. (See Baxter, K. S., and Cannon, assignors.)
Shelters, Hiram H., and H. A. Bashaw, Burlington, Vt.; said Bashaw assignor to said Shelters. Leaf-spring oiler. 1,569,583; Jan. 12.
Shepard, John W., Tucson, Ariz. Rotary engine. 1,569,791; Jan. 12.
Sheriff, David H., jr., Kansas City, Mo. Potentiometer. 1,569,042; Jan. 12.
Shipherd, Guy D., et al. (See Arundel, Thomas E., assignor.)
Shover, Lamar H., Milwaukee, Wis. Display jar stand. 1,569,584; Jan. 12.
Shover, Lamar H., Milwaukee, Wis. Display jar stand. 1,569,585; Jan. 12.
Showers, Joseph R., assignor to Indiana Cash Drawer Company, Shelbyville, Ind. Combination machine stand and drawer. 1,569,043; Jan. 12.
Sibley, Edwin J., Westbury, N. Y. Casement-window friction adjuster. 1,569,634; Jan. 12.
Silverstein, Oscar. (See Van Valkenberg, Eber H., assignor.)
Simmon, Karl A. (See Aspinwall, L. M., and Simmon.)
Simmons Company. (See Stuart, Charles A., assignor.)
Simon, Maurice, St. Louis, Mo. Antirattler device. 1,569,146; Jan. 12.
Simonds, Samuel W., et al. (See McNanama, John W., assignor.)
Sims, Lowell M., Eugene, Oreg. Collapsible stove. 1,569,401; Jan. 12.
Sinclair, William M., Strathfield, near Sydney, New South Wales, Australia. Manufacture of aldehydes, oils, and organic acids from cacti. 1,569,339; Jan. 12.
Sippel, Ernest H., and H. A. Hancox, assignors, by mesne assignments, to The Electric Auto-Lite Company, Toledo, Ohio. Igniter-testing device. 1,569,586; Jan. 12.
Slater, Fred M., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Double-drum hoist. 1,569,635; Jan. 12.
Slocum, Leslie G. S., deceased, San Francisco, Calif.; F. J. Knauss, administrator, assignor to The Brewer Titchener Corporation. Auto top window frame. 1,569,307; Jan. 12.
Slye, John Q., Washington, D. C., assignor to Standard Appliance and Souvenir Company. Stylus-sharpening device. 1,569,402; Jan. 12.
Slye, John Q., assignor to Standard Appliance and Souvenir Company, Washington, D. C. Fiber-needle sharpener for talking-machine records. 1,569,403; Jan. 12.
Smart, Joseph F., assignor to Landers, Frary & Clark, New Britain, Conn. Electrically-heated device. 1,569,241; Jan. 12.
Smith, Alva T., Winsted, Conn. Preventing overheating of electrically-heated appliances. 1,569,147; Jan. 12.
Smith, Alvin T., Los Angeles, Calif. Trousers creaser. 1,569,792; Jan. 12.
Smith, Benjamin F. (See Kosken, Wilho A., assignor.)
Smith, Clair, Council Bluffs, Iowa. Oil regulator for gas engines. 1,569,404; Jan. 12.
Smith, Glenn D., and W. F. Earhart, Pontiac, Mich. Positive drive. 1,569,044; Jan. 12.
Smith, Jesse A. B., Stamford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,569,587; Jan. 12.
Smith, Jesse A. B., Stamford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,569,636; Jan. 12.
Smith, Julius W., Seattle, Wash. Scoring device. 1,569,242; Jan. 12.
Smith, Louis J., Torrance, Calif. Piston for pumps. 1,569,308; Jan. 12.
Smyth Manufacturing Company, The. (See Clark, E. W., and Schramm, assignors.)
Snow, Barton S., Batavia, Ill. assignor to T. W. Snow Construction Company. Hoisting mechanism. 1,569,437; Jan. 12.
Snow, T. W., Construction Company. (See Snow, Barton S., assignor.)
Snow, Wilmer S., Oak Park, assignor to Crown Electrical Manufacturing Company, St. Charles, Ill. Wall bracket. Des. 69,237; Jan. 12.
Snyder, Blaine E., Watkins, N. Y. Dispensing device. 1,569,637; Jan. 12.
Snyder, Otto G., Dayton, Ohio. Reel-controlling means for casting rods. 1,569,210; Jan. 12.
Snyder Welch Process Corporation. (See Welch, William C., assignor.)
Sociedad Electro-Quimica De Flix. (See Müller, Wilhelm, assignor.)
Société Anonyme Marinoni Machines et Materiel pour l'Imprimerie et les Industries Annexes. (See Bobst, Henri, assignor.)
Société Anonyme pour l'Exploitation des Procédés Maurice Leblanc-Vickers. (See Leblanc, Charles L. A. M., assignor.)
Sommer, Ella H., Sioux City, Iowa. Child carrier. 1,569,045; Jan. 12.
Sommer, J. L., Manufacturing Co. (See Sommer, John L., assignor.)
Sommer, John L., Newark, N. J., assignor to J. L. Sommer Manufacturing Co. Lifter for fruit jars and the like. 1,569,405; Jan. 12.
Sonntag, Edwin C., Bartlett, Tex. Portable and collapsible wardrobe. 1,569,406; Jan. 12.
Spalding, A. G., & Bros. (See Reach, William F., assignor.)
Spartivento, William, Buffalo, N. Y. Hack saw. 1,569,407; Jan. 12.
Spartivento, William, Buffalo, N. Y. Hack saw. 1,569,408; Jan. 12.
Spencer, Elmer W., Hemple, Mo. Variable condenser. 1,569,211; Jan. 12.
Spicer Manufacturing Company. (See Macdonald, Angus S., assignor.)
Spicer Manufacturing Corporation. (See Macdonald, Harry P., assignor.)
Sprinkel, James M., Aurora, Ill. Steam boiler. 1,569,588; Jan. 12.
Stack, Maurice J., Cohoes, N. Y. Upholstery piping bat and making the same. 1,569,685; Jan. 12.
Stackhouse, W. H., et al. (See Einfeldt, Ernest E., assignor.)
Staege, Stephen A., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. System of control. 1,569,409; Jan. 12.
Stahle, John A., assignor to Stahle Mechanical Tire Co. Ltd., Boston, Mass. Resilient wheel. 1,569,046; Jan. 12.
Stahle Mechanical Tire Co. (See Stahle, John A., assignor.)
Stainbrook, Donald M., Orland, Ohio. Pipe wrench. 1,569,148; Jan. 12.
Standard Appliance and Souvenir Company. (See Slye, John Q., assignor.)
Standard Chemical Company. (See Goetschius, D. M., and Vogt, assignors.)
Standard Oil Company. (See Taylor, Lynn M., assignor.)
Standard Optical Company, The. (See Long, Ell M., assignor.)

Standard Steel Propeller Company. (See Dicks, Thomas A., assignor.)
Standard Stoker Company. (See Hunt, Andrew M., assignor.)
Stanton, Sandford F., Lockland, Ohio. Rail joint. 1,569,047; Jan. 12.
Stearns, Henry M., Richmond, Calif. Cement wall construction. 1,569,309; Jan. 12.
Steele, Thomas F., Minneapolis, Minn. Valve-operating tool. 1,569,638; Jan. 12.
Steenbergh, Alexander W. (See Mackenzie, H. J., and Steenbergh.)
Steiner, George A., assignor to Steiner Sales Company, Salt Lake City, Utah. Towel cabinet. 1,569,438; Jan. 12.
Steiner Sales Company. (See Steiner, George A., assignor.)
Stember, Bernard, New York, N. Y. Fastener for bags or the like. 1,569,149; Jan. 12.
Stern, Marc. (See Doehler, H. H., and Stern.)
Stevens, Jesse E., Lebanon, Ind. Automobile spring control and repair device. 1,569,150; Jan. 12.
Stevens, Leslie, Glen Ridge, N. J. Sound amplifier. Des. 69,238; Jan. 12.
Stevenson, George H., Rye, assignor to Western Electric Company, Incorporated, New York, N. Y. Vacuum-tube socket. 1,569,639; Jan. 12.
Stewart, Victor A., New York, N. Y. Waterproofing motion-picture films and other gelatinous surfaces. 1,569,151; Jan. 12.
Stewart-Warner Speedometer Corporation. (See West, Frank W., assignor.)
Stock, Friedrich J. J., Munich, Germany. Apparatus for regenerating cinematographic films. 1,569,048; Jan. 12.
Stocker, Charles S., assignor to J. M. Brennan, Los Angeles, Calif. Hydraulic jack. 1,569,589; Jan. 12.
Stoddard, Harry B., assignor of one-tenth to F. J. Crispin, Syracuse, N. Y. Water-cooling system for internal-combustion engines. 1,569,243; Jan. 12.
Stone, Melvin L., Lawrence, assignor to Draper Corporation, Hopedale, Mass. Warp stop mechanism for looms. 1,569,828; Jan. 12.
Streich, Paul B., Joliet, Ill. Oil burner. 1,569,640; Jan. 12.
Stromberg-Carlson Telephone Manufacturing Company, The. (See Powell, Winfred T., assignor.)
Strong-Scott Manufacturing Company. (See Little, Philip, jr., assignor.)
Stryker, R. S. (See Chase, Newton D., assignor.)
Stuart, Charles A., assignor to Simmons Company, Kenosha, Wis. Child's crib. Des. 69,239; Jan. 12.
Stuart, Charles A., Kenosha, Wis., assignor to Simmons Company, New York, N. Y. Bedstead end frame. Des. 69,240; Jan. 12.
Stuart, Charles A., Kenosha, Wis., assignor to Simmons Company, New York, N. Y. Bedstead end frame. Des. 69,241; Jan. 12.
Stuart, Charles A., Kenosha, Wis., assignor to Simmons Company, New York, N. Y. Bedstead end frame. Des. 69,242; Jan. 12.
Stuckert, John F., Philadelphia, Pa. Roofing joint. 1,569,641; Jan. 12.
Stuewe, Oscar H., and R. G. Marquardt, Milwaukee, Wis. Spring bed bottom. 1,569,430; Jan. 12.
Stufflebeam, Albert, Paris, Ark. Drink mixer. 1,569,049; Jan. 12.
Submarine Signal Company. (See Mason, Max, assignor.)
Sullivan Machinery Company. (See Gartin, Elmer G., assignor.)
Sullivan Machinery Company. (See Halvorsen, Halbert B., assignor.)
Sullivan Machinery Company. (See Mercer, Henry H., assignor.)
Sulzer Frères Société Anonyme. See Kägi, Emil, assignor.)
Sundee, John R., assignor to Warner Jewelry Case Company, Buffalo, N. Y. Making Jewerly cases. 1,569,642; Jan. 12.
Sunderland, Katherine B., Danbury, Conn. Attachment for shoes. 1,569,440; Jan. 12.
Susana, Joseph. (See Pearl, R., and Susana.)
Swartz, Henry A., jr., Minneapolis, assignor to T. O'Connell, sr., St. Paul, Minn. Radiator hanger. 1,569,050; Jan. 12.
Swartzlander, Thomas H., Aspinwall, Pa., assignor to Pittsburgh Plate Glass Company. Glass tank construction. 1,569,152; Jan. 12.
Swift, William E. (See Valle, Pembroke A., assignor.)
Symington Company, The. (See Kadel, Byers, W., assignor.)

Tagliabue Mfg. Co. (See Roesch, Alfred, assignor.)
Tate, Edward H., Malden, Mass. Mop holder. 1,569,643; Jan. 12.
Taylor Instrument Companies. (See Winn, Herbert J., assignor.)
Taylor, Lynn M., Peoria, Ill., assignor to Standard Oil Company, Whiting, Ind., and Chicago, Ill. Valve-operating tool. 1,569,644; Jan. 12.
Telephone Auxiliary Co. (See Scher, Louis S., assignor.)
Temple, James, Portland, Oreg. Metal-cutting machine. 1,569,154; Jan. 12.
Temple, Robert, Bromley, England. Captive bolt or like projectile device. 1,569,153; Jan. 12.
Thaler, Gustav, Oakland, Calif. Faucet. 1,569,645; Jan. 12.
Thelen, John B., and P. L. Boulicault, Milwaukee, Wis. Safety device for aeroplanes. 1,569,590; Jan. 12.
Thomas, Dan, England, Ark. Sheet-metal railway crossing. 1,569,410; Jan. 12.
Thomas, Normal T., assignor to Nashua Manufacturing Company, Nashua, N. H. Cloth-inspecting machine. 1,569,646; Jan. 12.
Thomas, Phillips, Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company. Dynamic transmitter. 1,569,411; Jan. 12.
Thomas, Thomas H., Edgewood, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Train-control device. 1,569,155; Jan. 12.
Thompson, Fredrick B., Los Angeles, Calif. Photographic-film drier. 1,569,156; Jan. 12.
Thompson, Harry A., Lowell, assignor to The Moxie Company, Boston, Mass. Beverage-vending device. 1,569,157; Jan. 12.
Thompson, James H., Trenton, assignor to Hussong Dyeing Machine Company, Groveville, N. J. Apparatus for dyeing raw stock. 1,569,647; Jan. 12.
Ticer, Amos L. (See Moore, Joseph A., assignor.)
Tirrell, Edward L., Phillipsburg, N. J. Derrick. 1,569,686; Jan. 12.
Tobey, Fred W., Grand Rapids, Mich. Filing cabinet. 1,569,158; Jan. 12.
Toledo Scale Company. (See Bergen, Harry S., assignor.)
Toledo Scale Company. (See Hem, Halvor O., assignor.)
Toledo Scale Company. (See Myers, Hubert A., assignor.)
Tomhave, Louis, Fergus Falls, Minn. Cream cooler. 1,569,793; Jan. 12.
Torell, Forgny F. (See Peek, R. L., and Torell.)
Tormo, Manel G., assignor to O. Deimel, New York, N. Y. Closure for containers. 1,569,648; Jan. 12.
Towle Manufacturing Company. (See Nock, Harold E., assignor.)
Trarara, Petro, Benton Harbor, Mich. Child's barber chair. Des. 69,243; Jan. 12.
Trevorrow, John F., South Melbourne, Victoria, Australia. Tire lever. 1,569,310; Jan. 12.
Trumbull Electric Manufacturing Company, The. (See Getchell, Benjamin E., assignor.)
Tullgren, Bernard G., Brooklyn, N. Y. Chuck. 1,569,591; Jan. 12.
Turner, Gerald E., assignor to A. E. Little Company, Lynn, Mass. Gauge for boot and shoe machines. 1,569,592; Jan. 12.
Underwood, Thomas C., et al. (See Hutchinson, Louie C., assignor.)
Underwood Typewriter Company. (See Dobson, William A., assignor.)
Underwood Typewriter Company. (See Helmond, William F., assignor.)
Underwood Typewriter Company. (See Kurowski, Alfred G. F., assignor.)
Underwood Typewriter Company. (See Smith, Jesse A. B., assignor.)
Underwood Typewriter Company. (See Waldheim, John, assignor.)
Union Switch & Signal Company, The. (See Nicholson, Frank H., assignor.)
United Shoe Machinery Corporation. (See Mayo, Benjamin F., assignor.)
United Shoe Machinery Corporation. (See Ray, Eugene J., assignor.)
Universal Fixture Corporation. (See Cross, Charles C., assignor.)
Universal Fixture Corporation. (See Goldberg, Samuel, assignor.)
Upperco Cadillac Corporation. (See Bauer, Walter C., assignor.)
Urie, James W., assignor of one-half to J. C. Goolthrite, Carson City, Mich. Nonskid device. 1,569,687; Jan. 12.
Utter, Gill, Tacoma, Wash. Game board. 1,569,688; Jan. 12.
Valle, Pembroke A., assignor of one-half to W. E. Swift, Chicago, Ill. Ferrule for golf clubs. 1,569,340; Jan. 12.
Van der Sterr, Petrus K., Frankfort-on-the-Main, Germany, assignor, by mesne assignments, to Westinghouse Electric & Manufacturing Company. Relay. 1,569,593; Jan. 12.
Van Doorn, Anthonius M., Utrecht, Netherlands. Fountain drawing pen. 1,569,594; Jan. 12.
Vannoni, Gino, Mishawaka, Ind. Sole molding and trimming device. 1,569,689; Jan. 12.
Van Orman, Bert L., Highland Park, assignor to L. A. Young Industries, Inc., Detroit, Mich. Wire-springballing machine. 1,569,159; Jan. 12.
Van Orman, Bert L., Highland Park, and R. V. Hellman, assignors to L. A. Young Industries, Inc., Detroit, Mich. Wire-spring nesting or assembling machine. 1,569,160; Jan. 12.
Van Valkenberg, Eber H., Monroe, assignor of one-half to Silverstein, Spokane, Wash. Airship. 1,569,161; Jan. 12.
Van Valkenberg, Eber H., Monroe, assignor of one-half to O. Silverstein, Spokane, Wash. Ballasting means. 1,569,162; Jan. 12.

Van Weyenbergh, Emile, Clapham, London, assignor to Courtaulds Limited, London, England. Preparation of alkali celluloses. 1,569,692; Jan. 12.
Vapor Car Heating Company. (See Post, Edward C., assignor.)
Varell, Anna D., New York, N. Y. Stake. 1,569,341; Jan. 12.
Vaughn, John P., St. Petersburg, Fla. Protector for distributor wires. 1,569,101; Jan. 12
Vernes, Arthur, R. Bricq, M. L. A. Jobin, and G. G. J. Yvon, Paris, France. Absorption and diffusion photometer. 1,569,342; Jan. 12.
Vernet, Sergius, Brooklyn, N. Y. Automobile bumper. 1,569,441; Jan. 12.
Victor Adding Machine Co. (See Johantgen, Oliver D., assignor.)
Viets, Floyd H., Alhambra, assignor to International Precipitation Company, Los Angeles, Calif. Apparatus for electrical precipitation of suspended material from gases. 1,569,595; Jan. 12.
Villaret, Gustave E., Leonia, N. J., assignor to H. Hilfman, New York, N. Y. Lighting fixture or the like. Des. 69,244; Jan. 12.
Villaret, Gustave E., Leonia, N. J., assignor to H. Hilfman, New York, N. Y. Lighting fixture or the like. Des. 69,245; Jan. 12.
Voegeli, Frederick B., Easton, Pa. Cloth expander. 1,569,343; Jan. 12.
Vogt, Louis F. (See Goetschius, D. M., and Vogt.)
Vulcan Last Company, The. (See Clausing, George, assignor.)
Wadsworth, David T., Cold Springs, assignor to The Wadsworth Electric Manufacturing Company, Covington, Ky. Safety switch box. 1,569,051; Jan. 12.
Wadsworth Electric Manufacturing Company, The. (See Wadsworth, David T., assignor.)
Wainio, Wester, Watton, Mich. Self-cleaning berry picker. 1,569,690; Jan. 12.
Waldheim, John, Elizabeth, N. J., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,569,052; Jan. 12.
Waldheim, John, Elizabeth, N. J., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,569,244; Jan. 12.
Waldron, Benjamin F., Duncan, Okla. Burner. 1,569,163; Jan. 12.
Wall, William G., assignor to Rectifier Manufacturing Company, Indianapolis, Ind. Oil rectifier. 1,569,795; Jan. 12.
Walsh, James A. (See Krause, Norman R., assignor.)
Walsh, James M., Milwaukee, Wis. Strap holder. 1,569,442; Jan. 12.
Walsh, William J., Hamilton, Ontario, Canada. Bookrest. 1,569,596; Jan. 12.
Walstad, Otto A., Minneapolis, Minn. Detachable window. 1,569,691; Jan. 12.
Walz, Charles J. (See Walz, Frederick M. and C. J.)
Walz, Frederick M. and C. J., Buffalo, N. Y. Automobile signal. 1,569,053; Jan. 12.
Ward Leonard Electric Company. (See Bullinger, Frederic H., assignor.)
Warner, Alonzo A., assignor to Landers, Frary & Clark, New Britain, Conn. Immersion heater. 1,569,102; Jan. 12.
Warner, Chester E. (See Hopkins, C. L., and Warner.)
Warner Jewelry Case Company. (See Sundee, John R., assignor.)
Warner, William G., Pittsburgh, Pa. Rodding machine. 1,569,054; Jan. 12.
Waters, Lawrence W., Los Angeles, Calif. Windshield wiper. 1,459,412; Jan. 12.
Watson, Charles P., New York, N. Y. Moving-picture camera. 1,569,103; Jan. 12.
Watson, Edward L., Bode, Iowa. Electric soldering tool. 1,569,796; Jan. 12.
Watters, John H., Anniston, Ala. Track sander. 1,569,830; Jan. 12.
Way, Eugene W., Seattle, Wash. Automatic stop for punching machines. 1,569,649; Jan. 12.
Weaver, Allan, Brooklyn, N. Y., assignor to American Telephone and Telegraph Company. Telegraph circuit. 1,569,055; Jan. 12.
Weed, Edward L., assignor to Potter & Buffinton Company, Providence, R. I. Badge. 1,569,443; Jan. 12.
Wehrle Company, The. (See Pickup, George E., assignor.)
Weil, Lehman, New York, N. Y. Flying machine. 1,569,794; Jan. 12.
Weingaertner, Albert, St. Louis, Mo. Weather strip for windows. 1,569,413; Jan. 12.
Weiskopf, Charles H., Hawthorne, assignor to International Precipitation Company, Los Angeles, Calif. Apparatus for electrical precipitation of suspended material from gases. 1,569,597; Jan. 12.
Welch, William C., Newton, assignor to Snyder Welch Process Corporation, Boston, Mass. Colored patent leather and making the same. 1,569,056; Jan. 12.
Wensing, Arthur. (See Curtis, Harry A., assignor.)
Wentz, Howard B., and J. B. Pridgen, Charlotte, N. C. Traffic-lines street-painting machine. 1,569,104; Jan. 12.
Werber, Fred C., Kingston, Pa. Textile spinner and twister. 1,569,831; Jan. 12.
Wesley, James W., Happy, Tex. Attachment for listers. 1,569,598; Jan. 12.
West, Frank W., New Rochelle, N. Y., assignor, by mesne assignments, to Stewart-Warner Speedometer Corporation. Speedometer drive. 1,569,344; Jan. 12.
West, Perry, Newark, N. J., assignor, by mesne assignments, to Elliott Company, Pittsburgh, Pa. Deactivator. 1,569,105; Jan. 12.
Western Architectural Iron Company. (See Rundgren, Edward M., assignor.)
Western Electric Company. (See Clarke, Harry R., assignor.)
Western Electric Company. (See Conway, Roy D., assignor.)
Western Electric Company. (See Coram, Roy E., assignor.)
Western Electric Company. (See Curtis, Austen M., assignor.)
Western Electric Company. (See Deakin, Gerald, assignor.)
Western Electric Company. (See Dunham, Bert G., assignor.)
Western Electric Company. (See Griffith, Thomas R., assignor.)
Western Electric Company. (See Helwig, Eugene C., assignor.)
Western Electric Company. (See Knudsen, Vern O., assignor.)
Western Electric Company. (See Schwerin, Paul, assignor.)
Western Electric Company. (See Stevenson, George H., assignor.)
Western Wire Products Company. (See Young, Harry M., assignor.)
Westinghouse Air Brake Company, The. (See Dean, William E., assignor.)
Westinghouse Air Brake Company, The. (See Hume, John, assignor.)
Westinghouse Air Brake Company. (See Ostrander, Allen E., assignor.)
Westinghouse Air Brake Company, The. (See Robinson, Henry J., assignor.)
Westinghouse Air Brake Company, The. (See Thomas, Thomas H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Aspinwall, L. M., and Simmon, assignors.)
Westinghouse Electric & Manufacturing Company. (See Brace, Porter H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Brackett, Quincy A., assignor.)
Westinghouse Electric & Manufacturing Company. (See Cole, Guerney H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Ferguson, Alexander D., assignor.)
Westinghouse Electric & Manufacturing Company. (See Hartman, Harry F., assignor.)
Westinghouse Electric & Manufacturing Company. (See Hellmund, Rudolf E., assignor.)
Westinghouse Electric & Manufacturing Company. (See Hodgkins, Charles H., assignor.)
Westinghouse Electric & Manufacturing Company. (See James, Henry D., assignor.)
Westinghouse Electric & Manufacturing Company. (See Johnston, Howard H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Keene, Alvin D., assignor.)
Westinghouse Electric & Manufacturing Company. (See Larkin, Ernest M., assignor.)
Westinghouse Electric & Manufacturing Company. (See Marbury, Ralph E., assignor.)
Westinghouse Electric & Manufacturing Company. (See Staege, Stephen A., assignor.)
Westinghouse Electric & Manufacturing Company. (See Thomas, Phillips, assignor.)
Westinghouse Electric & Manufacturing Company. (See van der Sterr, Petrus K., assignor.)
Westinghouse Electric & Manufacturing Company. (See Woodson, James C., assignor.)
Westinghouse Lamp Company. (See Higgins, John J., assignor.)
White, Arthur, and J. J. Mohr, Sheboygan Falls, Wis. Concrete-molding machine. 1,569,057; Jan. 12.
White, Edwin J., Seattle, Wash. Resilient wheel. 1,569,106; Jan. 12.
White, John F., assignor to White Products Company, Chicago, Ill. Waterproof panel board. 1,569,107; Jan. 12.
White Products Company. (See White, John F., assignor.)
Whitney Mfg. Co., The. (See Müller, Friederich, assignor.)
Widmer, Edward J., Denver, Colo. Chisel handle. 1,569,164; Jan. 12.
Wigginton, George P., assignor to Kalamazoo Loose Leaf Binder Co., Kalamazoo, Mich. Sheet binder. 1,569,058; Jan. 12.
Wilkie, Robert J. (See Crysler, H. Stanley, assignor.)
Willgoos, Andrew V. D., Upper Montclair, N. J., assignor to Wright Aeronautical Corporation. Internal-combustion engine. 1,569,245; Jan. 12.
Williams, Charles E., assignor to Bay State Tap & Die Company, Mansfield, Mass. Tap. 1,569,108; Jan. 12.
Williams, Thomas J. (See Lewis, F. E., and Williams.)
Willmarth, Charles A., Tecumseh, Mich. Peat-drying machine. 1,569,345; Jan. 12.

Wilson, Mary L., and R. L. Rockwell, Seattle, Wash.; said Rockwell assignor of one-sixth of the entire right to said Wilson. Flooring jack. 1,569,346; Jan. 12.
Wilson-Western Sporting Goods Co. (See Levinson, David, assignor.)
Winn, Herbert J., assignor to Taylor Instrument Companies, Rochester, N. Y. Thermometer. Des. 69,246; Jan. 12.
Winslow Safety High Pressure Boiler Company. (See Ellis, Lewis M., assignor.)
Wirz, Ernst, assignor to Aktiengesellschaft Brown Boveri & Cie., Baden, Switzerland. Annealing furnace. 1,569,444; Jan. 12.
Wöhrle, Silvester, Steglitz, near Berlin, assignor to the Firm of Optische Anstalt C. P. Goerz Aktiengesellschaft, Friedenau, near Berlin, Germany. Temperature-controlling system for rail way cars. 1,569,797; Jan. 12.
Wolary, Wilbur W. (See Brown, T. W., and Wolary.)
Wolf, Melanie, New York, N. Y. Toot-cleansing and gum-massaging device. 1,569,165; Jan. 12.
Wolff, Oscar M., Chicago, Ill. Reel. 1,569,798; Jan. 12.
Wood, David C. (See Wood, John R., and D. C.)
Wood, John R., Wichita, and D. C. Wood, Liberal, Kans. Crate-lid remover. 1,569,059; Jan. 12.
Woodford, Edwin S., Salem, Oreg. Monoplane. 1,669,414; Jan. 12.
Woodson, James C., East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electric-furnace heating unit. 1,569,415; Jan. 12.
Workman, Ross O., Chewelah, Wash. Coffeepot. 1,569,445; Jan. 12.
World Bottling Co. (See Gomila, John G., assignor.)
Wright Aeronautical Corporation. (See Willgoos, Andrew V. D., assignor.)
Wright, William F., Lisbon, Ohio. Track hanger. 1,569,060; Jan. 12.
Yager, Leslie D., Fort Wayne, Ind. Attachment plug. 1,569,528; Jan. 12.
Young, Charles B., and C. J. Caspar, Pittsburgh, Pa., assignors to Pittsburgh Plate Glass Company. Metal sash construction. 1,569,109; Jan. 12.
Young, Charles L., Richmond, Ind. Sanitary toothpick dispenser. 1,569,061; Jan. 12.
Young, Harry M., assignor to Western Wire Products Company, St. Louis, Mo. Spring mattress. 1,569,246; Jan. 12.
Young, L. A., Industries, Inc. (See Van Orman, B. L., and Heilman, assignors.)
Young, L. A., Industries, Inc. (See Van Orman, Bert L., assignor.)
Young, Llewellyn C., Toledo, Ohio. Nursing nipple. 1,569,693; Jan. 12.
Yoxall, William, Manchester, England. Device for the production of creases in trousers. 1,569,110; Jan. 12.
Yvon, Gustave G. J. (See Vernes A., Bricq, Jobin, and Yvon.)
Zehnder, Walter, Granichen, Switzerland. Electromagnetic chuck. 1,569,599; Jan. 12.
Ziler, Corban H., Detroit, Mich. Record-manipulating mechanism for phonographs. 1,569,062; Jan. 12.
Zinke, Alois, and H. Schoepfer, Graz, Austria, assignors, by mesne assignments, to F. Bensa, Genoa, Italy. Manufacturing a perylene vat dye. 1,569,111; Jan. 12.
Zipperer, Otis E., Coleman, Fla. Railway switch. 1,569,694; Jan. 12.
Zolla, Ralph A., Revere, Mass. Automobile control-lever attachment. 1,569,063; Jan. 12.
Zoul, Charles V., Santa Monica, Calif., assignor, by mesne assignments, to The Celite Company. Apparatus for deemulsification of oils, etc. 1,569,695; Jan. 12.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 12TH DAY OF JANUARY, 1926.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Acetylene-gas generator. D. H. Danley. 1,569,722; Jan. 12.
Acetylene generator. D. A. Milam. 1,568,988; Jan. 12.
Acid, Manufacture of lactic. S. E. Faithfull. 1,569,221; Jan. 12.
Aeroplane control, System of. J. H. Hammond, jr. 1,568,972; Jan. 12.
Aeroplane, Vertically-rising. V. Newbauer. 1,569,668; Jan. 12.
Aeroplanes, Propeller for. T. A. Dicks. 1,569,800; Jan. 12.
Aeroplanes, Safety device for. J. B. Thelen and P. L. Boulicault. 1,569,590; Jan. 12.
Air brake. A. E. Ostrander. 1,569,133; Jan. 12.
Air compressor. W. M. Myers. 1,569,435; Jan. 12.
Air-directing device. T. Neilson. 1,569,667; Jan. 12.
Air ejector. C. L. A. M. Leblanc. 1,569,760; Jan. 12.
Airship. E. H. Van Valkenberg. 1,569,161; Jan. 12.
Aldehydes, oils, and organic acids from cacti, Manufacture of. W. M. Sinclair. 1,569,339; Jan. 12.
Alkali celluloses, Preparation of. E. Van Weyenbergh. 1,569,692; Jan. 12.
Amusement apparatus. T. R. Nock. 1,569,780; Jan. 12.
Anchor, Earth. J. Blackburn. 1,569,068; Jan. 12.
Animal trap. C. A. Rancier. 1,569,827; Jan. 12.
Annealing furnace. G. H. Cole. 1,569,356; Jan. 12.
Annealing furnace. E. Wirz. 1,569,444; Jan. 12.
Anticreeper. W. W. Holland. 1,569,806; Jan. 12.
Antirattler device. M. Simon. 1,569,146; Jan. 12.
Antiskid device for autos. J. W. Seeger. 1,569,790; Jan. 12.
Arch supporter. L. E. Scrannage. 1,569,206; Jan. 12.
Asphaltum and other materials from waste material, Apparatus for and process of reclaiming and converting. R. D. Divine. 1,569,462; Jan. 12.
Auto top window frame. L. G. S. Slocum. 1,569,307; Jan. 12.
Automatic separator, Continuous. E. S. Murphy. 1,569,778; Jan. 12.
Automatic switch. E. A. Bohlman. 1,569,450; Jan. 12.
Automobile body. F. J. Pew. 1,569,572; Jan. 12.
Automobile brake. H. J. Robinson. 1,569,143; Jan. 12.
Automobile bumper. F. Amato. 1,569,166; Jan. 12.
Automobile bumper. S. Vernet. 1,569,441; Jan. 12.
Automobile cab. K. S. Baxter and C. H. Cannon. 1,569,168; Jan. 12.
Automobile control-lever attachment. A. A. Zolla. 1,569,063; Jan. 12.
Automobile crank holder. N. C. Barnes. 1,569,530; Jan. 12.
Automobile fender. L. E. Goodwin. 1,569,743; Jan. 12.
Automobile inclosure. G. E. Bishop. 1,569,254; Jan. 12.
Automobile lock. A. W. Daiferes. 1,569,721; Jan. 12.
Automobile radiators, Ornament for. H. P. Long. 1,569,096; Jan. 12.
Automobile signal. F. M., and C. J. Walz. 1,569,053; Jan. 12.
Automobile spring control and repair device. J. E. Stevens. 1,569,150; Jan. 12.
Automobile steering wheel and electric headlight switch. B. Hamblet. 1,569,123; Jan. 12.
Automobile top. E. M. Maxwell. 1,569,771; Jan. 12.
Automobile tops, Hinge support for. M. R. Hull. 1,569,807; Jan. 12.
Automobile window screen. H. A. Curtis. 1,569,118; Jan. 12.
Automobiles, Starting mechanism for. G. H. Hodgkins. 1,569,371; Jan. 12.
Automobiles, Steering mechanism for. F. E. Fanaler. 1,569,733; Jan. 12.
Automobiles, Throttle control for. A. Burrows. 1,569,612; Jan. 12.
Automobiles, Toilet convenience for. F. J. Pew. 1,569,571; Jan. 12.
Axle joint, Adjustable stub. L. M. Barstow. 1,569,311; Jan. 12.
Axle power brake. L. M. Aspinwall and K. A. Simmon. 1,569,349; Jan. 12.
Axminster tube frame. H. Mason. 1,569,559; Jan. 12.
Badge. E. L. Weed. 1,569,443; Jan. 12.
Bags or the like, Fastener for. B. Stember. 1,569,149; Jan. 12.
Bags, Tie for closing the mouths of. R. E. Pierce. 1,569,138; Jan. 12.
Baling machine, Wire-spring. B. L. Van Orman. 1,569,159; Jan. 12.
Ball-lacing device. P. C. Mann. 1,569,841; Jan. 12.
Ballasting means. E. H. Van Valkenberg. 1,569,162; Jan. 12.
Banking means, Auxiliary. H. B. Kline. 1,568,978; Jan. 12.
Bar-lock switch. C. Norton. 1,569,669; Jan. 12.
Barber chair, Child's. P. Trarara. Des. 69,243; Jan. 12.
Bathing cap. J. H. Gilson. 1,569,475; Jan. 12.
Bearing, Dustproof. H. R. Higgins. 1,569,751; Jan. 12.
Bearing, Pivot. H. S. Bergen. 1,569,608; Jan. 12.
Bearing, Vehicle spring. R. R. Searles. 1,569,240; Jan. 12.
Bed, Automobile. R. W. Mayne. 1,569,772; Jan. 12.
Bed bottom, Spring. O. H. Stuewe and R. G. Marquardt. 1,569,439; Jan. 12.
Bedstead and frame. C. A. Stuart. Des. 69,240–2; Jan. 12.
Bench vise. J. Puterbaugh. 1,569,236; Jan. 12.
Bending brake. T. J. Kelleher. 1,569,022; Jan. 12.
Berry picker, Self-cleaning. W. Wainio. 1,569,690; Jan. 12.
Beverage-vending device. H. A. Thompson. 1,569,157; Jan. 12.
Binder. L. R. Lewis. 1,569,381; Jan. 12.
Binder, Loose-leaf. J. C. Dawson. 1,569,005; Jan. 12.
Binders, Shocking and stooking machine for attachment to. G. McClellan. 1,569,514; Jan. 12.
Bit: *See*—
  Disk bit. Drilling bit.
Blasting method and means, Combination. D. Ferrell and A. W. Helmholtz. 1,569,222; Jan. 12.
Block: *See*—
  Paving block. Pressing block.
Blocking hoe, Automatic. J. A. Cain. 1,569,070; Jan. 12.
Blow-out preventer. J. S. Abercrombie and H. S. Cameron. 1,569,247; Jan. 12.
Blowpipe. L. Oliphant. 1,569,024; Jan. 12.
Board: *See*—
  Drafting board. Ironing board.
  Game board. Panel board.
Bobbin, All-metal. L. A. Cadoret. 1,569,711; Jan. 12.
Bobbin for transformer windings and the like. F. Häberle. 1,569,482; Jan. 12.
Body of high electron and light emission and making the same. C. A. Laise. 1,569,095; Jan. 12.
Boiler: *See*—
  Steam boiler.
Boiler. E. P. J. and A. L. Niclausse. 1,569,523; Jan. 12.
Boiler and tank stud fitting. T. F. Hays. 1,569,015; Jan. 12.
Bolt lock. G. F. Colley. 1,569,718; Jan. 12.
Bolt or like projectile device, Captive. R. Temple. 1,569,153; Jan. 12.
Bolts, Determining tension on. H. P. Macdonnld. 1,569,837; Jan. 12.
Bookbinding. L. R. Lewis. 1,569,382; Jan. 12.
Bookbinding machine. E. W. Clark and C. Schramm. 1,569,265; Jan. 12.
Bookrest. W. J. Walsh. 1,569,596; Jan. 12.
Boot and shoe machines, Gauge for. G. E. Turner. 1,569,592; Jan. 12.
Bottle. J. G. Gomila. Des. 69,213; Jan. 12.
Bottle opener. E. I. Rogers, jr. Des. 69,235; Jan. 12.
Bourdon gauges, Retard device for. O. W. Heise. 1,569,749; Jan. 12.
Bowling alley and bowling apparatus. G. F. Cahill. 1,569,260; Jan. 12.
Box: *See*—
  Candy box. Tool box.
  Switch box.
Box. R. Becker. Des. 69,196; Jan. 12.
Box-hook-strapping mechanism. S. J. Dunn. 1,569,359; Jan. 12.
Boxes, Apparatus for aiding in the forming and nailing of. W. C. Sharp. 1,569,145; Jan. 12.
Braiding machines, Carrier for. S. B. Blaisdell. 1,569,449; Jan. 12.
Brake: *See*—
  Air brake. Bending brake.
  Automobile brake. Fluid-pressure brake.
  Axle power brake.
Brake and meter construction. A. Y. Dodge. 1,569,219; Jan. 12.
Brake mechanism. G. W. Ross. 1,569,338; Jan. 12.
Bricklayer's jointer. C. Belknap. 1,569,067; Jan. 12.

Bridge towers, Stop for. F. G. Hartwell. 1,568,975; Jan. 12.
Brush. H. J. S. Cross. 1,569,620; Jan. 12.
Brush, Comb-cleaning. L. V. Lucia. 1,569,431; Jan. 12.
Brushholder contact finger. H. F. Hartman. 1,569,367; Jan. 12.
Bucket-dumping apparatus. J. A. Kinney. 1,569,501; Jan. 12.
Buckle. E. N. Humphrey. 1,569,088; Jan. 12.
Buckle. I. R. Lederer. 1,569,507; Jan. 12.
Bulb mounting. R. L. Patterson. 1,569,527; Jan. 12.
Bunks, Filler for log. F. W. Chriswell. 1,569,613; Jan. 12.
Burner: *See*—
Oil burner.
Burner. B. F. Waldron. 1,569,163; Jan. 12.
Burner construction. O. J. Groehn. 1,569,479; Jan. 12.
Burners, Oil control for. H. M. Sheer. 1,569,633; Jan. 12.
Burners, Oil-distributing head for rotary oil. J. Schemlinger, jr. 1,569,580; Jan. 12.
Button. G. Kellog. 1,569,548; Jan. 12.
Button-sawing machines, Saw-filing attachment for. J. D. Buchanan. 1,569,704; Jan. 12.
Cabinet. A. P. Geimer. 1,569,010; Jan. 12.
Cabinet. H. C. Gowran. 1,569,013; Jan. 12.
Cabinet, Knockdown. W. L. Byrne and H. A. Beesley. 1,569,832; Jan. 12.
Cabinet, Towel. G. A. Steiner. 1,569,438; Jan. 12.
Calculating machine. O. D. Johantgen. 1,569,188; Jan. 12.
Camera. S. M. Fairchild. 1,568,969; Jan. 12.
Camera. E. A. Pigeon. 1,569,139; Jan. 12.
Camera, Moving-picture. C. P. Watson. 1,569,103; Jan. 12.
Can bodies, Machine for making. P. Kruse. 1,569,093; Jan. 12.
Can holder. A. Major. 1,569,825; Jan. 12.
Can opener. J. A. Linn. 1,569,289; Jan. 12.
Can-testing machine. W. Cameron. 1,568,956; Jan. 12.
Canceling device. A. A. Egli. 1,569,540; Jan. 12.
Candy box. B. H. Lengsfield. 1,568,982; Jan. 12.
Candy confection. C. F. Haug. 1,569,747; Jan. 12.
Candy-machine casing. G. E. Brent. Des. 69,199; Jan. 12.
Cane and gun, Combination. F. S. Bernabé. 1,569,700; Jan. 12.
Cap. D. Levinson. 1,569,658; Jan. 12.
Cap-forming machines, Printing attachment for. C. A. Garrett. 1,569,363; Jan. 12.
Car, Convertible stock. R. C. Chisam. 1,569,071; Jan. 12.
Car coupler. T. Hotchkiss. 1,569,281; Jan. 12.
Car coupler, Automatic mine-. B. E. Glidersleeve. 1,569,012; Jan. 12.
Car door. D. E. Conrad. 1,569,799; Jan. 12.
Car door. B. Fuller. 1,569,834; Jan. 12.
Car-elevating cradle or skid, Motor-. E. P. Elzey. 1,569,469; Jan. 12.
Car heater, Tank-. H. W. Ash. 1,569,605; Jan. 12.
Car, Railway. H. W. Sanford. 1,569,037; Jan. 12.
Car seal, Freight-. W. J. Miller. 1,569,294; Jan. 12.
Cars, Drawbar for mine. C. F. Clayton. 1,569,716; Jan. 12.
Cars, Grain door for railway. H. L. Power. 1,569,029; Jan. 12.
Cars, Loading and unloading. C. E. Lindsay and C. V. Ogbin. 1,569,819; Jan. 12.
Carbonaceous material, Method and apparatus for distillation of. R. M. Catlin. Re16,252; Jan. 12.
Card shuffler. C. A. and W. J. Gunzelman. 1,569,277; Jan. 12.
Cars, Temperature-controlling system for railway. S. Wöhrle. 1,569,797; Jan. 12.
Carrier: *See*—
Child carrier.
Case: *See*—
Knife case. Vanity case.
Laundry case.
Casting mold, Slug-. R. R. Mead. 1,569,386; Jan. 12.
Casting rods, Reel-controlling means for. O. G. Snyder. 1,569,210; Jan. 12.
Cattle guard. W. B. Plunkett. 1,569,235; Jan. 12.
Cement wall construction. H. M. Stearns. 1,569,309; Jan. 12.
Chaff remover. B. M. Ely. 1,569,468; Jan. 12.
Chain and parts therefor. F. Müller. 1,569,234; Jan. 12.
Chain link. F. W. Meyers. 1,568,987; Jan. 12.
Chains, Master link for conveyer. R. L. Mudge. 1,568,992; Jan. 12.
Chest. E. Dickson. 1,569,422; Jan. 12.
Child carrier. E. H. Sommer. 1,569,045; Jan. 12.
Chisel handle. E. J. Widmer. 1,569,164; Jan. 12.
Chuck. B. G. Tuligren. 1,569,591; Jan. 12.
Chuck, Electromagnetic. W. Zehnder. 1,569,599; Jan. 12.
Cigarettes, Apparatus for feeding and arranging oval. W. E. Molins. 1,568,989; Jan. 12.
Cinematographic films, Apparatus for regenerating. F. J. J. Stock. 1,569,048; Jan. 12.
Ciphering and deciphering device. L. F. Morehouse. 1,568,991; Jan. 12.
Circuit detector, Open-potential-. E. F. Preston. 1,569,299; Jan. 12.
Clamp: *See*—
Rod clamp.
Clay or body composition for ceramic articles, Preparing. A. O. Austin. 1,569,251; Jan. 12.
Cleaner: *See*—
Pipe cleaner.
Closure for containers. M. G. Tormo. 1,569,648; Jan. 12.
Cloth expander. F. B. Voegeli. 1,569,343; Jan. 12.
Cloth-inspecting machine. N. T. Thomas. 1,569,646; Jan. 12.
Clothes hanger. H. T. Hettinger. 1,569,369; Jan. 12.
Clothesrack. D. E. Reynolds. 1,569,238; Jan. 12.
Clutch mechanism. A. B. Clisson. 1,569,420; Jan. 12.
Coach, Combination passenger, day, and sleeping. A. E. Hutt. 1,569,754; Jan. 12.
Coat. M. B. Florsheim. 1,569,735; Jan. 12.
Coat and overcoat, Combination. M. Gaidhaed. 1,568,971; Jan. 12.
Cock provided with electric liquid heating means. A. F. E. Hanson. 1,569,485; Jan. 12.
Coffeepot. R. O. Workman. 1,569,445; Jan. 12.
Coffeepot or analogous article. H. E. Nock. Des. 69,230; Jan. 12.
Combing machine. J. W. Nasmith. 1,569,566; Jan. 12.
Combustion apparatus. W. H. Archer. 1,569,250; Jan. 12.
Computation, Means of. G. T. Malan. 1,569,770; Jan. 12.
Concentrator. C. E. Bonine. 1,569,451; Jan. 12.
Concrete construction. A. O. Dolson. 1,569,622; Jan. 12.
Concrete-molding machine. A. White and J. J. Mohr. 1,569,057; Jan. 12.
Concrete structure for housing. I. T. Blount. 1,568,997; Jan. 12.
Concrete vessels, Molding form for. E. M. Camp. 1,568,957; Jan. 12.
Condenser. R. E. Marbury. 1,569,384; Jan. 12.
Condenser casing. R. E. Marbury. 1,569,385; Jan. 12.
Condenser, Variable. E. W. Spencer. 1,569,211; Jan. 12.
Confection cone. H. N. Pederson. 1,569,568; Jan. 12.
Containers, Clamp for cylindrical. J. Green. 1,569,275; Jan. 12.
Control apparatus. H. H. Johnston. 1,569,374; Jan. 12.
Control system. A. D. Ferguson. 1,569,362; Jan. 12.
Control system. H. D. James. 1,569,373; Jan. 12.
Control system. S. A. Staege. 1,569,409; Jan. 12.
Controller. W. C. Carr. 1,569,713; Jan. 12.
Conveyer. C. W. Shanaberger. 1,569,209; Jan. 12.
Conveyer-belt tripper. P. Little, jr. 1,569,511; Jan. 12.
Cooker for food in containers. A. L. Anderson. 1,569,601; Jan. 12.
Cookers, Relief means for pressure. J. R. Jewell. 1,569,187; Jan. 12.
Cooler: *See*—
Cream cooler.
Cooling apparatus. H. D. Lathrop and W. H. Paulson. 1,569,191; Jan. 12.
Copper, Hardening. L. Nemitof. 1,569,130; Jan. 12.
Copper-nickel matte, Refining of. R. L. Peck and T. F. Torell. 1,569,137; Jan. 12.
Core drill. H. B. Halvorsen. 1,569,653; Jan. 12.
Corn pickers, Attachment for. H. Magness. 1,569,824; Jan. 12.
Corrosive-preventing liquid composition. C. A. Sense. 1,569,040; Jan. 12.
Cot, All-steel camp. W. W., W. R., M., W. H., and D. Q. Douglas. 1,569,728; Jan. 12.
Cotton duster. O. P. Hobbs. 1,569,017; Jan. 12.
Cotton samples, Rolling device for. H. Dimond. 1,569,724; Jan. 12.
Cotton thinner. J. Feagins. 1,569,802; Jan. 12.
Coupler. E. C. Post. 1,569,028; Jan. 12.
Cove reflector and holder therefor. P. M. Hotchkin. 1,569,493; Jan. 12.
Crane, Traveling bridge. F. W. Eagelston. 1,569,269; Jan. 12.
Crank-axle counterbalance. E. O. Elliott. 1,569,732; Jan. 12.
Crate-lid remover. J. R. and D. C. Wood. 1,569,059; Jan. 12.
Crate shaker. N. M. Lower, A. R. Chalker, and L. E. Osborne. 1,569,195; Jan. 12.
Cream cooler. L. Tomhave. 1,569,793; Jan. 12.
Crib, Child's. C. A. Stuart. Des. 69,239; Jan. 12.
Crib cover. F. S. Rece. 1,569,335; Jan. 12.
Culinary utensil. W. J. Sanborn. 1,569,788; Jan. 12.
Cup or similar article. G. Haviland. Des. 69,219; Jan. 12.
Current-converting means. F. J. Fischer. 1,569,541; Jan. 12.
Current commutator motor, Rectified-. R. E. Hellmund. 1,569,368; Jan. 12.
Current-controlling means. L. C. F. Horle. 1,569,372; Jan. 12.
Curtain rod. T. F. Byron. 1,569,456; Jan. 12.
Curtain rod. F. L. Hawkins. 1,569,748; Jan. 12.
Curtain support. C. E. Horton. 1,569,324; Jan. 12.
Cutter: *See*—
Hop-package cutter. Shingle cutter.
Milling cutter.
Cutter. F. Johnson and D. Hnatuk. 1,569,809; Jan. 12.

Cutting machines of the rotary type for paper or pasteboard and like machines, Receiving device for. H. Bobst. 1,569,256; Jan. 12.
Damper mechanism. A. Blumlein. 1,569,113; Jan. 12.
Deactivator. P. West. 1,569,105; Jan. 12.

Inking pad.
Pails, Soap holder for. A. Miller. 1,569,773; Jan. 12.
Paintbrush guard. U. Foppiano. 1,569,736; Jan. 12.
Painting machines, Traffic-lines street. H. B. Wentz and J. B. Pridgen. 1,569,104; Jan. 12.
Paintings, drawings, or prints of all kinds with colored elements of any description, Method and apparatus for the accurate reproduction of. I. Piccioni. 1,569,027; Jan. 12.
Panel board, Waterproof. J. F. White. 1,569,107; Jan. 12.
Pattern-designing scroll and square, Garment-. H. Doherty and J. Le Blanc. 1,569,726; Jan. 12.
Paving block. A. A. Glidden. 1,569,741; Jan. 12.
Peat-drying machine. C. A. Willmarth. 1,569,345; Jan. 12.
Pen, Fountain. E. G. Pearson. 1,569,783; Jan. 12.
Pen, Fountain drawing. A. M. Van Doorn. 1,569,594; Jan. 12.
Pencil. H. L. Fischer and F. J. Kristofek. Re16,253; Jan. 12.
Pencil attachment. J. B. Goerling. 1,569,742; Jan. 12.
Phonograph cabinet. J. Peterson. 1,569,570; Jan. 12.
Phonograph-record ejector. S. V. Sears. 1,569,207; Jan. 12.
Phonographs, Record-manipulating mechanism for. C. H. Ziler. 1,569,062; Jan. 12.
Photographic-film drier. F. B. Thompson. 1,569,156; Jan. 12.
Photomechanical printing plates, Making. J. A. H. Hatt. 1,569,124; Jan. 12.
Photometer, Absorption and diffusion. A. Varnes, R. Bricq, M. L. A. Jobin, and G. G. J. Yvon. 1,569,342; Jan. 12.
Picker: *See*—
Berry picker.
Pickle jar. V. E. Guilhem. Des. 69,215–16; Jan. 12.
Picture films and other gelatinous surfaces, Waterproofing motion-. V. A. Stewart. 1,569,151; Jan. 12.
Picture-projecting machine, Motion-. J. D. Law. 1,569,287; Jan. 12.
Pictures, Making moving. E. Schüfftan. 1,569,789; Jan. 12.
Pile fabrics, Combined finishing machine for. M. Poetzsch. 1,569,785; Jan. 12.
Piles, Method of and apparatus for driving. F. J. Litter. 1,569,763; Jan. 12.
Pipe, Apparatus for laying. W. D. Lockwood. 1,569,764; Jan. 12.
Pipe cleaner. Z. Edwards. 1,569,360; Jan. 12.
Pipe fitting. R. J. Newson. 1,568,993; Jan. 12.
Pipe plug and removing the same. T. G. Massey. 1,569,660; Jan. 12.
Pipe-supporting attachment. W. R. Hoffmann. 1,569,279; Jan. 12.
Pipe-threading die. W. E. Glaspey and F. W. Cox. 1,569,740; Jan. 12.
Pipe wrench. D. M. Stainbrook. 1,569,148; Jan. 12.
Piston. W. C. Bauer. 1,569,258; Jan. 12.
Plastic materials, Molding. W. J. Gaven and M. Fried. 1,569,625; Jan. 12.
Plate-glass machines, Apron for. J. H. Fox. 1,569,082; Jan. 12.
Plate or similar article. E. Goodwin. Des. 69,214; Jan. 12.
Platen return. W. Kastler. 1,569,284; Jan. 12.
Pliers. C. W. Scott. 1,569,581; Jan. 12.
Plow. J. Ewasen. 1,569,271; Jan. 12.
Plow attachment. G. W. Lee. 1,569,817; Jan. 12.

Plow tractor. B. P. Collier. 1,569,266; Jan. 12.
Plug, Attachment. R. B. Benjamin. 1,568,995; Jan. 12.
Plug, Attachment. C. L. Hopkins and C. E. Warner. 1,569,018; Jan. 12.
Plug, Attachment. L. D. Yager. 1,569,528; Jan. 12.
Poisoned-food corral. P. Erickson. 1,569,624; Jan. 12.
Polish-rod clamp. O. C. Linthwaite. 1,569,327; Jan. 12.
Positive drive. G. D. Smith and W. F. Earhart. 1,569,044; Jan. 12.
Posture-adjusting table. D. D. Evins. 1,568,968; Jan. 12.
Potentiometer. D. H. Sheriff, jr. 1,569,042; Jan. 12.
Power shovel. J. D. Rauch. 1,569,031; Jan. 12.
Power transmission. G. Constantinesco. 1,569,719; Jan. 12.
Power-transmission means for combination air withdrawing and delivery apparatus, Variable. J. Mike. 1,569,198; Jan. 12.
Press: *See*—
Printing press.
Press and similar machine. L. H. Hoffer. 1,569,323; Jan. 12.
Pressing and finishing machine. T. H. De Lacy. 1,569,621; Jan. 12.
Pressing block. L. M. Page and L. Meylach. 1,569,135; Jan. 12.
Pressing machine. A. R. Braun. 1,569,418; Jan. 12.
Pressure device, Mechanical. A. W. Helmholtz and D. Ferrell. 1,569,226; Jan. 12.
Printing, Method of and apparatus for use in. H. P. Odell. 1,569,296; Jan. 12.
Printing press, Web-. H. F. Bechman. 1,569,065; Jan. 12.
Proctotherapy, Medical apparatus for use in. O. B. Schellberg. Re16,251; Jan. 12.
Propeller. A. Garcia. 1,569,473; Jan. 12.
Propeller-shaft assembly. H. P. Macdonald. 1,569,838; Jan. 12.
Pump. C. C. Carter. 1,569,714; Jan. 12.
Pump. C. R. Edwards. 1,569,731; Jan. 12.
Pump. A. L. Lewis. 1,569,193; Jan. 12.
Pump jack. F. Gardner. 1,569,318; Jan. 12.
Pump liners and valve seats, Puller for. W. H. Clark. 1,569,614; Jan. 12.
Pumps, Piston for. L. J. Smith. 1,569,308; Jan. 12.
Punching machines, Automatic stop for. E. W. Way. 1,569,649; Jan. 12.
Push button, Multiple. K. Knudsen. Des. 69,222; Jan. 12.
Rack: *See*—
Display rack. Ledger rack.
Garment rack.
Radial routers, Guiding. J. H. Hiscock. 1,569,490; Jan. 12.
Radiator caps, Combined ornament and temperature indicator for. P. Rossi. Des. 69,236; Jan. 12.
Radiator hanger. H. A. Swartz, jr. 1,569,050; Jan. 12.
Radio adjustment dial. G. Desjardins. 1,569,539; Jan. 12.
Radiocompass reading device for ships. E. R. Hard. 1,569,745; Jan. 12.
Radio direction finder. A. Leib. 1,569,325; Jan. 12.
Radio receiving set. L. T. and A. S. Carl. 1,569,354; Jan. 12.
Radio reception apparatus. T. E. Arundel. 1,569,446; Jan. 12.
Radio transmission system. E. W. Kellogg. 1,569,835; Jan. 12.
Rail anchor. J. E. Busby. 1,569,116; Jan. 12.
Rail bond. J. F. Brown. 1,569,069; Jan. 12.
Rail joint. S. F. Stanton. 1,569,047; Jan. 12.
Rail switch frog, Swinging-. W. H. Rife. 1,569,141. Jan. 12.
Railway crossing, Sheet-metal. D. Thomas. 1,569,410; Jan. 12.
Railway spike. K. P. Brandt. 1,569,115; Jan. 12.
Railway switch. O. E. Zipperer. 1,569,694; Jan. 12.
Railway tie. F. D. Leman. 1,569,192; Jan. 12.
Railway-track curve. J. W. McManama. 1,569,557; Jan. 12.
Railway-traffic-controlling apparatus. F. H. Nicholson 1,569,388; Jan. 12.
Razor-blade sharpener. S. S. Baer. 1,569,213; Jan. 12.
Receptacle. J. E. Bulwinkle. 1,569,796; Jan. 12.
Receptacle for flour and the like. A. I. S. Halvorsen. 1,569,122; Jan. 12.
Receptacles, Closure for. F. C. Clement. 1,569,072; Jan. 12.
Record tray or container. J. H. Rand, jr., and L. C. Broecker. 1,569,575; Jan. 12.
Reel. G. F. Immel. 1,569,495; Jan. 12.
Reel. O. M. Wolff. 1,569,798; Jan. 12.
Reflector. P. M. Larsen. 1,569,816; Jan. 12.
Refrigerating device. C. A. Peterson. 1,569,026; Jan. 12.
Refrigerating system. W. H. Carrier. 1,569,214; Jan. 12.
Refrigerating system and process. W. Green. 1,569,744; Jan. 12.
Refrigerator. G. J. Grundler. 1,569,179; Jan. 12.
Refrigerators, Condenser for use with. E. Kägi. 1,569,499; Jan. 12.
Regulator: *See*—
Oven regulator.
Relay. B. E. Getchell. 1,569,803; Jan. 12.
Relay. P. K. Van der Sterr. 1,459,593; Jan. 12.
Relay construction. B. E. Getchell. 1,569,804; Jan. 12.
Resilient wheel. J. A. Stahle. 1,569,046; Jan. 12.
Resilient wheel. E. J. White. 1,569,106; Jan. 12.
Rim, Demountable. R. Graham. 1,569,477; Jan. 12.
Ring: *See*—
Twister ring.
Riveting apparatus. W. G. Leasar. 1,569,759; Jan. 12.
Road construction. T. W. Brown and W. W. Wolary. 1,569,702; Jan. 12.
Rock-drilling mechanism. E. G. Gartin. 1,569,542; Jan. 12.
Rock drills, Rotative device for. G. M. Nell. 1,569,436; Jan. 12.
Rod: *See*—
Curtain rod.
Rodding machine. W. G. Warner. 1,569,054; Jan. 12.
Roller: *See*—
Spinning roller.
Rolls, Mechanism for feeding material from. J. S. Coldwell. 1,569,650; Jan. 12.
Roofing joint. J. F. Stuckert. 1,569,641; Jan. 12.
Rotary compressor. E. Hill. 1,569,370; Jan. 12.

Railway tie.
Tile-forming dies, Scoring device for. C. E. Mullins. 1,569,665; Jan. 12.
Tile-making machine. G. F. Boes. 1,569,257; Jan. 12.
Time switch. D. L. Parkhurst. 1,569,200; Jan. 12.
Tire lever. J. F. Trevorrow. 1,569,310; Jan. 12.
Tire, Pneumatic or air-cushion. J. R. O'Brien. 1,569,844; Jan. 12.
Tire, Resilient. A. Hargraves. Des. 69,217; Jan. 12.
Tire stand. W. G. Fording. 1,569,737; Jan. 12.
Tire valves, Locked dust cap for. J. M. Galbraith and L. N. Jensen. 1,569,273; Jan. 12.
Tires, Tread for. H. S. Mooradian. Des. 69,229; Jan. 12.
Toe weight. C. Freund. 1,569,739; Jan. 12.
Tool box. A. Lowy. 1,569,659; Jan. 12.
Tool handle, Wooden. C. Bilgery and A. Reutlinger. 1,569,533; Jan. 12.
Tool holder. F. Pardee, jr. 1,569,136; Jan. 12.
Tooth-cleansing and gum-massaging device. M. Wolf. 1,569,165; Jan. 12.
Toothpick dispenser, Sanitary. C. L. Young. 1,569,061; Jan. 12.
Tourniquet. J. Nord. 1,569,131; Jan. 12.
Towrope. A. L. Regan. 1,569,303; Jan. 12.
Toy, Aerial-navigation. E. Keppner. 1,569,549; Jan. 12.
Toy building, Knockdown. J. W. Beiger. 1,569,066; Jan. 12.
Toy, Child's riding. F. J. Schubert. 1,569,400; Jan. 12.
Toy electric railway. H. E. Morton. 1,569,233; Jan. 12.
Toy, Figure wheeled. J. E. Lee. 1,569,761; Jan. 12.
Toy figures, Eye for plush. H. Müller. 1,569,563; Jan. 12.
Toy golf game. H. E. Plack. 1,569,334; Jan. 12.
Toy, Mechanical. L. S. Gunderman. 1,569,225; Jan. 12.
Toy pistols, Feed and trigger mechanism for. C. L. Bunten. 1,568,999; Jan. 12.
Toy, Radio. E. M. Leedy. 1,569,509; Jan. 12.
Toy, Rolling. C. Bulger. 1,569,172; Jan. 12.
Track hanger. W. F. Wright. 1,569,060; Jan. 12.
Track lifter. M. J. McMenamin, C. Nixon, and R. D. Greenland. 1,569,767; Jan. 12.
Track sander. J. H. Watters. 1,569,880; Jan. 12.
Tractors, Implement attachment for. C. E. Gilbert. 1,569,011; Jan. 12.
Tractors, Plowing attachment for. O. Buescher and R. G. Goebel. 1,569,705; Jan. 12.
Tractors, Pulley for. H. Ford. 1,569,081; Jan. 12.
Tractors, Scarifier for. R. W. Keeler. 1,569,813; Jan. 12.
Train-control device. T. H. Thomas. 1,569,155; Jan. 12.
Translating apparatus. R. E. Coram. 1,568,963; Jan. 12.

Transmission mechanism. J. F. Maugham. 1,569,516; Jan. 12.
Transmitter, Dynamic. P. Thomas. 1,569,411; Jan. 12.
Trap: *See*—
Animal trap. Insect trap.
Trolley contactor. R. R. Scoggan. 1,569,039; Jan. 12.
Trouble light. W. C. Shay. 1,569,041; Jan. 12.
Trousers creaser. A. T. Smith. 1,569,792; Jan. 12.
Trousers, Device for the production of creases in. W. Yoxall. 1,569,110; Jan. 12.
Truck, Dumping. G. M. Bunnell. 1,569,707; Jan. 12.
Truck, Trailer. A. D. Jousset and H. D. Malone. 1,569,498; Jan. 12.
Trucks, Side frame construction for car. H. E. Doerr. 1,569,175; Jan. 12.
Trunk. M. F. Griffin. 1,569,320; Jan. 12.
Tunneling machine. F. C. Lidke. 1,569,510; Jan. 12.
Twister ring. W. A. Kosken. 1,569,377; Jan. 12.
Twisting machines, Knock-off motion for. S. Danilloff and C. F. Dupee. 1,569,538; Jan. 12.
Tying-in machine. H. P. Eanes. 1,569,730; Jan. 12.
Type chase. F. Kohule. 1,569,189; Jan. 12.
Typewriter. W. Kahle. 1,569,546; Jan. 12.
Typewriting machine. W. A. Dobson. 1,569,076; Jan. 12
Typewriting machine. W. F. Helmond. 1,569,016; Jan. 12.
Typewriting machine. A. G. F. Kurowski. 1,569,378; Jan. 12.
Typewriting machine. J. A. B. Smith. 1,569,587; Jan. 12.
Typewriting machine. J. A. B. Smith. 1,569,636; Jan. 12.
Typewriting machine. J. Waldheim. 1,569,052; Jan. 12.
Typewriting machine. J. Waldheim. 1,569,244; Jan. 12.
Typographical composing and distributing machine. D. S. Kennedy. 1,568,977; Jan. 12.
Umbrellas, Automatic means for manipulating and controlling the catches of. A. D. Ayres. 1,569,447; Jan. 12.
Under clearer roll. N. E. Lucas. 1,569,555; Jan. 12.
Undergarment, Combination. L. H. Plauché. 1,569,675; Jan. 12.
Upholstery piping bat and making the same. M. J. Stack. 1,569,685; Jan. 12.
Vacuum-tube socket. G. H. Stevenson. 1,569,639; Jan. 12.
Valve. G. T. Bollinger. 1,569,417; Jan. 12.
Valve. J. B. Burwell. 1,569,455; Jan. 12.
Valve. A. B. Myers. 1,569,843; Jan. 12.
Valve. R. J. S. Pigott. 1,569,674; Jan. 12.
Valve, Automatically retaining. J. E. Long. 1,569,229; Jan. 12.
Valve, Dry-pipe. Ia M. Lewis. 1,569,326; Jan. 12.
Valve lifter, Compressor. F. W. Parsons. 1,569,671; Jan. 12.
Valve mechanism for channeling machines. H. H.Mercer. 1,569,661; Jan. 12.
Valve-operating tool. T. F. Steele. 1,569,638; Jan. 12.
Valve-operating tool. L. M. Taylor. 1,569,644; Jan. 12.
Valve, Regulating. E. Jones and W. R. McKreil. 1,568,976; Jan. 12.
Valve, Shut-off. D. F. Katona. 1,569,285; Jan. 12.
Valves, Retarding device for alarm check. E. E. Clark. 1,568,960; Jan. 12.
Vanity case. C. Nachemov. 1,569,779; Jan. 12.
Vaults, Mold for concrete burial. H. A. and W. McClain. 1,569,513; Jan. 12.
Vehicle, Child's. J. A. Moore. 1,568,990; Jan. 12.
Vehicle door. H. H. Doehler and M. Stern. 1,569,725; Jan. 12.
Vehicle, Motor. J. E. Jenkins. 1,569,808; Jan. 12.
Vehicle side curtain. H. J. McDonnell. 1,569,821; Jan. 12.
Vehicle signal faceplate. L. D. Pierce. Des. 69,232; Jan. 12.
Vehicles, Apparatus for the engagement and disengagement of multiple-disk clutches of motor. J. A. Gygar. 1,569,321; Jan. 12.
Vehicles, Apparatus for retaining parcels or the like on. J. F. O. Bergström and B. J. Brunzéll. 1,569,699; Jan. 12.
Vehicles, Automatic braking device for. A. Kurtis. 1,569,502; Jan. 12.
Vehicles, Convertible seat for. H. C. and C. P. Lipscomb. 1,569,820; Jan. 12.
Vehicles, Differential carrier for motor. E. C. Mogford. 1,569,664; Jan. 12.
Vehicles, Glareshield for motor. J. P. Colgan. 1,569,717; Jan. 12.
Vehicles, Signaling device for motor road. G. Dadswell. 1,569,537; Jan. 12.
Vehicles, Steering mechanism for motor. G. H. Hannum. Re16,247; Jan. 12.
Velocipede. S. L. Rogers. 1,569,204; Jan. 12.
Ventilating apparatus. E. J. Murphy. 1,569,845; Jan. 12.
Vessels, Apparatus for fitting caps to. A. Piccaluga. 1,569,573; Jan. 12.
Vulcanizer. O. J. Kuhlke. 1,569,551; Jan. 12.
Wall bracket. W. S. Snow. Des. 69,237; Jan. 12.
Wardrobe, Portable and collapsible. E. C. Sonntag. 1,569,406; Jan. 12.
Warp in long chain or rope form, Treating. H. M. Chase and G. W. Robertson. 1,568,959; Jan. 12.
Washboard. C. W. Kennon. 1,569,814; Jan. 12.
Washer: *See*—
Packing washer.
Washing machine. E. H. Burrage. 1,569,709; Jan. 12.
Wave-energy direction, Determination of. M. Mason. 1,569,292; Jan. 12.
Web-treating machine. C. E. Archbald. 1,569,064; Jan. 12.
Well casings, Tool for straightening. O. Duda. 1,569,729; Jan. 12.
Well casings, Weight for sinking. W. H. Cater. 1,569,000; Jan. 12.
Well-drilling apparatus. C. H. Herman and F. G. Schroer. 1,569,183; Jan. 12.
Wells, Device for introducing cement in. C. E. Miller. 1,569,293; Jan. 12.
Wells, Fishing tool for. B. L. Ligon. 1,569,818; Jan. 12.
Wheel: *See*—
Resilient wheel. Steering wheel.
Self-railing wheel.
Wheels, Making metal. E. E. Einfeldt. 1,568,966; Jan. 12.
Winch, Stoplog. J. J. Keon. 1,569,500; Jan. 12.
Windlass, Automatic lifting. P. Gauthier. 1,569,626; Jan. 12.
Window. A. E. Anderson. 1,569,602; Jan. 12.
Window, Detachable. O. A. Walstad. 1,569,691; Jan. 12.
Window friction adjuster, Casement-. E. J. Sibley. 1,569,634; Jan. 12.
Window structure. E. M. Rundgren. 1,569,239; Jan. 12.
Windows, Weather strip for. A. Weingaertner. 1,569,413; Jan. 12.
Windshield wiper. L. W. Waters. 1,569,412; Jan. 12.
Wire-rope connection. E. Jorgensen. 1,569,020; Jan. 12.
Wire-testing extensometer. P. H. Brace. 1,569,352; Jan. 12.
Wires, Protector for distributor. J. P. Vaughn. 1,569,101; Jan. 12.
Wireless receiving system. Q. A. Brackett. 1,569,353; Jan. 12.
Wood, Manufacture of artificial. A. Förster. 1,569,272; Jan. 12.
Woodworking machine. H. E. Cowdrey. 1,569,357; Jan. 12.
Woodworking machine. R. G. Park, jr. 1,569,526; Jan. 12.
Wool and like thread materials, Holder for. A. P. Robinson. 1,569,577; Jan. 12.
Wrench: *See*—
Pipe wrench.
Wrench. E. R. Carpenter. 1,569,117; Jan. 12.
Wrench. O. C. Pietsch. 1,569,673; Jan. 12.
Wringer-controlling device. H. J. Criner. 1,569,267; Jan. 12.
Wringing machines, Sectional roll for. H. S. Crysler. 1,569,536; Jan. 12.
Yoke, Cattle. T. H. Phillips. 1,569,297; Jan. 12.

CLASSIFICATION OF PATENTS

ISSUED JANUARY 12, 1926.

NOTE.—First number—class, second number—subclass, third number—patent number.

1— 19: 1,569,592
2— 3: 1,569,181
68: 1,569,475
73: 1,569,675
85: 1,568,971
93: 1,569,735
105: 1,569,658
204: 1,569,112
3— 12: 1,569,286
4— 19: 1,568,994
42: 1,569,375
114: 1,569,571
5— 97: 1,569,335
113: 1,569,556
116: 1,569,728
119: 1,569,600
1,569,772
186: 1,569,439
213: 1,569,246
7— 1: 1,569,809
8— 5: 1,568,959
1,569,562
19: 1,569,647
9— 22: 1,569,715
10— 96: 1,569,315
1,569,740
141: 1,569,108
11— 1: 1,569,265
12— 136: 1,569,981
1,568,982
142: 1,569,231
15— 23: 1,569,167
104.04: 1,569,360
104.13: 1,569,203
133: 1,569,259
159: 1,569,620
167: 1,569,165
229: 1,569,643
251: 1,569,412
16— 42: 1,569,319
124: 1,569,094
140: 1,569,089
191: 1,569,619
198: 1,569,347
17— 1: 1,569,153
18— 5: 1,569,242
16: 1,569,002
1,569,689
17: 1,569,551
47.5: 1,569,272
1,569,755
53: 1,569,662
55: 1,569,625
19— 120: 1,569,566
140: 1,569,555
143: 1,569,825
145: 1,569,685
162: 1,569,724
20— 22: 1,569,799
23: 1,569,834
52.2: 1,569,691
56.4: 1,569,109
69: 1,569,413
22— 2: 1,569,491
1,569,698
23— 286: 1,569,171
24— 19: 1,569,841
30.5: 1,569,138
75: 1,569,088
105: 1,569,548
123: 1,569,021
129: 1,569,303
178: 1,569,507
187: 1,569,442
191: 1,569,330
245: 1,569,019
248: 1,569,327
25— 20: 1,569,665
121: 1,569,057
1,569,257
130: 1,568,957
1,569,513
156: 1,569,251
248: 1,569,736
26— 29: 1,569,785
63: 1,569,343
66: 1,569,077
26— 70: 1,569,646
28— 43: 1,569,730
29— 80: 1,569,276
88.2: 1,569,614
105: 1,569,316
1,569,524
174: 1,568,966
30— 3: 1,569,289
31— 4: 1,569,825
55: 1,569,793
33— 12: 1,569,726
67: 1,569,380
76: 1,569,090

Coffee, pancake and pastry flour, cereal breakfast food, evaporated milk, flavoring extracts, etc. Durand-McNeil-Horner Co. 191,822; Jan. 19.
Corn meal, corn and oats feed, self-rising pancake flour, etc. White & Sons. 211,314; Jan. 19.
Flour, Wheat. Saxony Mills. 220,922; Jan. 19.
Grapes, Fresh. Wright & Hughson. 221,652; Jan. 19.
Gum, Chewing. American Chicle Company. 223,073; Jan. 19.
Meal, Chick. B. K. Feed Mills. 216,770; Jan. 19.
Milk, Sweetened condensed. D. L. Sterling & Sons, Inc. 223,810; Jan. 19.
Peaches, plums, nectarines, and grapes, Fresh. Thomas & Horn. 220,096; Jan. 19.
Sirup, Food. W. B. Roddenbery. 223,414; Jan. 19.
Sirup, Malt. Bay City Milling Company. 222,813; Jan. 19.
Sirup, Malt. Elco Distributing Co. 223,697; Jan. 19.

CLASS 50.

Flags and banners. De Grauw, Aymar & Company. 222,785; Jan. 19.
Leather or coated cotton fabric, Artificial. C. R. Whiting Co. 221,863; Jan. 19.
Tents, cap stakes, tent poles, etc., Umbrella and wall. J. K. Porter. 223,743; Jan. 19.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 19TH DAY OF JANUARY, 1926.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

A. W. Cash Company. (See Terry, Charles M., assignor.)
Abbema, John F. (See Crawford, P. H., and Abbema.)
Abel, Walter T., assignor to The Patent Button Company, Waterbury, Conn. Making one-piece metal buttons. 1,570,324; Jan. 19.
Abraham, Adolf, Charlottenberg, Germany. Water-power engine for utilizing low-grade water powers. 1,570,421; Jan. 19.
Acheson, George W., Caldwell, N. J. Treating bituminous substances. 1,570,193; Jan. 19.
Adams, Arthur H., Lakeville, Conn. Indoor golf game. 1,570,422; Jan. 19.
Adamson, Frank E., Greenville, Ill. Fountain pen. 1,570,026; Jan. 19.
Aeromarine Plane & Motor Company. (See Chilton, Roland, assignor.)
Affel, Herman A., Brooklyn, N. Y., and L. M. Ilgenfritz, Orange, N. J., assignors to American Telephone and Telegraph Company. Method and apparatus for neutralizing radiointerference on wire lines. 1,569,905; Jan. 19.
Aktiebolaget Bofors. (See Svensson, S. H., and Engkvist, assignors.)
Aktiebolaget Pharmacia. (See Flodquist, L., and Blomquist, assignors.)
Allen, John M., Toronto, Ontario, Canada. Making hosiery. 1,570,027; Jan. 19.
Allen, Victor M., Waverly, N. Y. Automatic window ventilator. 1,569,847; Jan. 19.
Allendorf, Friedrich, Frankfort-on-the-Main, Germany, assignor to J. Rosenberg, New York, N. Y. Fuel gasifier for kitchen ranges and the like. 1,570,325; Jan. 19.
Altorfer Bros. Company. (See Altorfer, Alpheus W., Company, East Peoria, Ill. Wringer. 1,570,545; Jan. 19.
Altorfer Bros. Company. (See Altorfer, Alpheus W., assignor.)
Aluminum Company of America. (See Salisbury, Robert F., assignor.)
Ambler, George B., assignor to F. A. Whitney Carriage Company, Leominster, Mass. Automatic stop for looms. 1,570,454; Jan. 19.
American Radiator Company. (See Mallory, Harry C., assignor.)
American Steel and Wire Company, The. (See Farb, Carl A., assignor.)
American Telephone and Telegraph Company. (See Affel, H. A., and Ilgenfritz, assignors.)
American Telephone and Telegraph Company. (See Land, Edmund, assignor.)
American Telephone and Telegraph Company. (See Newby, Neal D., assignor.)
American Telephone and Telegraph Company. (See Toomey, John F., assignor.)
American Telephone and Telegraph Company. (See Vernam, G. S., and Watson, assignors.)
Amies, Joseph H., Philadelphia, Pa. Paving composition. 1,570,028; Jan. 19.
Andel, Frank J., Cleveland, Ohio. Brake-equalizing attachment for automobiles. 1,570,221; Jan. 19.
Anderberg, William A. (See Ljungberg, L. R., and Anderberg.)
Andresen, John H., Glen Rock, N. J. Washing machine. 1,570,423; Jan. 19.
Angell, Robert H., et al. (See Hacker, Owen E., assignor.)
Anthony, Thomas P., Edgewater Park, assignor to United States Cast Iron Pipe & Foundry Company, Burlington, N. J. Grinding and polishing machine. 1,569,940; Jan. 19.
Appleby, William H., assignor of one-fourth to R. Rodd, Windsor, Ontario, Canada. Vehicular toy. 1,570,546; Jan. 19.
Art Metal Construction Company. (See Ljungeberg, L. A., and Anderberg, assignors.)
Atkin, Samuel T., Georgetown, Tex. Wick trimmer. 1,570,194; Jan. 19.
Atkin, William R. (See McCandlish, D., and Atkin.)
Ausdal, George, Marshalltown, Iowa. Door latch. 1,570,195; Jan. 19.
Automatic Electric Company. (See Wicks, John, assignor.)
Aveling, Christiaan W., assignor to J. Aveling, Lockport, Ill. Hoisting machinery. 1,569,846; Jan. 19.
Aveling, Julia. (See Aveling, Christiaan W., assignor.)
Avera, Arch U., Florence, Ala. Tractor. 1,570,547; Jan. 19.
Baehr, Charles, Le Locle, Switzerland. Tin-can opener. 1,569,906; Jan. 19.
Baird, James W., Beeville, Tex. Cotton blocker or chopper. 1,570,118; Jan. 19.
Bakalyar, Stephen A., Des Moines, Iowa. Pen and pencil holder. 1,570,425; Jan. 19.
Baker-Perkins Company. (See Gase, Eugene, assignor.)
Baker-Perkins Company. (See Gase, Eugene J., assignor.)
Balch, Samuel W., Montclair, N. J. Sundial. 1,570,029; Jan. 19.
Balch, Samuel W., Montclair, N. J. Automatic telephone calling transmitter. 1,570,030; Jan. 19.
Baldner, Jacob, Xenia, Ohio. Grease-dispensing device. 1,570,031; Jan. 19.
Baldner, Jacob, Xenia, Ohio. Grease-dispensing apparatus. 1,570,032; Jan. 19.
Baldwin Locomotive Works, The. (See Elliott, Edward O., assignor.)
Baldwin Locomotive Works, The. (See Glaenzer, H., and Keen, assignors.)
Baltrusch, Wilhelm, Elberfeld, Germany. Pocket lighter. 1,569,941; Jan. 19.
Bangs, Ralph C., Providence, R. I. Combined hand-bag frame and vanity case. 1,570,326; Jan. 19.
Banks, John N., assignor to Linotype and Machinery Limited, London, England. Means for use in the photographic production of typographical printing surfaces. 1,570,424; Jan. 19.
Banner, Robert J., Youngstown, Ohio. Bearing or bearing liner. 1,570,033; Jan. 19.
Barascud, Louis A. M., Paris, France. Railway-air-brake control valve. 1,570,426; Jan. 19.
Barber, Howard M., Stonington, Conn., assignor to C. B. Cottrell & Sons Company, New York, N. Y. Inking mechanism for printing presses. 1,570,293; Jan. 19.
Barley, Joseph C., York, Pa. Storm-type shingle clamp. 1,570,222; Jan. 19.
Barnhill, Josephine M., assignor to F. A. Brinkman, San Francisco, Calif. Reversible hat. 1,569,942; Jan. 19.
Barrett Blue Blaze Burner Co. (See Barrett, James J., assignor.)
Barrett, James J., White Plains, N. Y., assignor to Barrett Blue Blaze Burner Co., Inc. Oil-burning apparatus. 1,570,327; Jan. 19.
Barron, Louis, Port Chester, N. Y. Folding garment hanger. 1,570,196; Jan. 19.
Bartram, George C., Freeport, assignor to George C. Bartram, Inc., Buffalo, N. Y. Pipe joint. 1,570,223; Jan. 19.
Bartram, George C., Inc. (See Bartram, George C., assignor.)
Bassett, Harry H., Flint, Mich. Instrument-case bezel. Des. 69,247; Jan. 19.
Bauchert, Mahlon F., El Paso, Tex. Hypodermic syringe. 1,569,961; Jan. 19.
Baumgart, Emil, Falkenberg, Germany. Sterile preservation of dosed medicaments and of their solvents. 1,570,328; Jan. 19.
Bayardi Bros. Inc. (See Bayardi, Ettore E., assignor.)
Bayardi, Ettore E., assignor to Bayardi Bros. Inc., Chicago, Ill. Finger ring. Des. 69,248; Jan. 19.
Bayersdorfer, H., & Co. (See Walsh, John W.)
Bayersdorfer, Harry, et al. (See Walsh, John W., assignor.)
Bayersdorfer, Sydney H., et al. (See Walsh, John W., assignor.)
Bayler, Louis H., Los Angeles, Calif. Valve-spring lifter. 1,570,224; Jan. 19.
Baxter, William M., assignor to Ideal Removable Body Company, Chicago, Ill. Removable-body truck. 1,570,119; Jan. 19.
Beard, William E., Buckner, Mo. Safety signal. 1,569,907; Jan. 19.
Beaumont, R. H., Company. (See Hale, William E., assignor.)
Becher, Harold M., Brooklyn, N. Y. Dyed fur. Des. 69,249; Jan. 19.
Becker-Seidel Company, The. (See Seidel, Albin, assignor.)
Beckwith, Edward S., Albion, Nebr. All-around halter. 1,570,225; Jan. 19.
Becvar, John O., Brookfield, Ill. Sash fastener. 1,570,034; Jan. 19.

Beecher, Edward E., Brooklyn, N. Y. Railway crossing gate. 1,569,908; Jan. 19.
Bendelari, Mary É., Paris, France. Ornamentation of Leather. 1,570,329; Jan. 19.
Benjamin Electric Manufacturing Company. (See Sanders, Albert D., jr., assignor.)
Benner, Harry P. (See Egloff, G., and Benner.)
Bennett, Arthur F., Richmond Hill, assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone device. 1,570,120; Jan. 19.
Bennington, Earl T., Cleveland Heights, assignor to The Cleveland Crane & Engineering Company, Wickliffe, Ohio. Drop track section. 1,570,085; Jan. 19.
Berge, David, Trondhjem, Norway. Profilograph. 1,570,548; Jan. 19.
Berkley, Richard H., Plainville, Mass., assignor to Whiting & Davis Company. Machine for making link mesh. 1,570,197; Jan. 19.
Berkley, Richard H., Plainville, Mass., assignor to Whiting and Davis Company. Machine for making staples for mesh fabric. 1,570,198; Jan. 19.
Berliner, Henry A., Washington, D. C. Helicopter. 1,570,121; Jan. 19.
Bertram, Louis H. (See Grover, A. D., and Bertram.)
Beulan, Sarkis H. (See Sumbulian, Sarkis H.)
Beyea, Frank H., assignor to J. R. Gammeter, Akron, Ohio. Process and machine for shaping wire. 1,570,036; Jan. 19.
Beyer, Otto S., assignor to E. W. Bliss Company, Brooklyn, N. Y. Drawing press. 1,570,199; Jan. 19.
Bie, Christian, Brooklyn, N. Y. Door construction. 1,570,427; Jan. 19.
Biggers, Blaine, et al. (See Biggers, Lee P., assignor.)
Biggers, Lee P., Palmersville, assignor of sixteen per cent to H. Buckley, Martin, Tenn., sixteen per cent to B. Biggers, St. Louis, Mo., and sixteen per cent to E. McAuliff, East St. Louis, Ill. Plow. 1,569,962; Jan. 19.
Birnbaum, Charles. (See Eliasoff, A. L., and Birnbaum.)
Bischof, Ulrich, assignor to Gebr. Staubli, Horgen, Switzerland. Feeding mechanism for book-sewing machines. 1,569,909; Jan. 19.
Bishop, Joseph W., Muskegon, Mich., assignor to The Brunswick-Balke-Collender Company, Wilmington, Del. Bowling-alley ball return. 1,570,549; Jan. 19.
Bishop, Joseph W., Muskegon, Mich., assignor to The Brunswick-Balke-Collender Company, Wilmington, Del. Bowling-alley ball return. 1,570,550; Jan. 19.
Bishop, Joseph W., Muskegon, Mich., assignor to The Brunswick-Balke-Collender Company, Wilmington, Del. Bowling-alley ball return. 1,570,551; Jan. 19.
Bisset, David L., assignor to A. R. Whittal Can Company, Limited, Montreal, Quebec, Canada. Can-end drier. 1,570,122; Jan. 19.
Black, Eugene, New York, N. Y. Game-chip rack. 1,569,848; Jan. 19.
Blackburn, Victor E., Bellview, N. Mex. Radiator protector. 1,570,428; Jan. 19.
Bliss, E. W., Company. (See Beyer, Otto S., assignor.)
Blomquist, Inge G. (See Flodquist, L., and Blomquist.)
Blood, Harold L., North Plainfield, and R. C. Deale, Plainfield, N. J., assignors to Niles-Bement-Pond Company, New York, N. Y. Control system. 1,570,369; Jan. 19.
Bluhm, Leo, New York, N. Y. Woven fabric. Des. 69,250; Jan. 19.
Blum, Joseph K., Scarsdale, and D. L. Braine, Brooklyn, assignors to K-B Pulverizer Corporation, New York, N. Y. Pulverized-fuel apparatus. 1,570,037; Jan. 19.
Bohannon, Claude S., assignor of one-half to W. E. Stevens, Nokomis, Fla. Bathing barge. 1,569,910; Jan. 19.
Bold, Frederick W., Chelsea, Mass., assignor to C. H. Pearson, Brookline, Mass. Release lever. 1,569,911; Jan. 19.
Bonnet, Jean, St. Etienne, France. Automatically-operated jack for supporting walls of buildings. 1,570,429; Jan. 19.
Bonney, John C. G., Brooklyn, N. Y. Pad for window-washing apparatus. 1,570,200; Jan. 19.
Bonney, John C. G., Brooklyn, N. Y. Window-washing apparatus. 1,570,201; Jan. 19.
Bonsall, Charles D., Pittsburgh, assignor to P. H. Murphy Company, New Kensington, Pa. Car roof. 1,570,123; Jan. 19.
Borden, William S., Worcester, Mass. Cue tip and making the same. 1,570,294; Jan. 19.
Bosco, George B., Chicago, Ill. Adjustable shore. 1,570,226; Jan. 19.
Bostwick, Rolla B. (See Jacobs, J. J., and Bostwick.)
Bottoms, Robert R., Lakewood, N. J. Extraction of helium from gases containing the same. 1,569,943; Jan. 19.
Bowerbank, John W., Kidderminster, England. Combined boiling, washing, condensing, and drying machine. 1,570,552; Jan. 19.
Bowers, Clyde L., Washington, D. C. Memorandum-pad equipment for telephones. 1,570,430; Jan. 19.
Bowles, Byron E., Council Bluffs, Iowa. Window-sash fastener. 1,569,849; Jan. 19.
Box Board Products, Inc. (See Hill, Ellon S., assignor.)
Boyce, Clara A., et al. (See Johnson, Horace K., assignor.)
Boyce, Ira G., et al. (See Johnson, Horace K., assignor.)
Boyed, Louis L., Toledo, Oreg. Toy. 1,570,330; Jan. 19.
Boylan, Thomas F., sr., assignor to Eversharp Manufacturing Co., New Brunswick, N. J. Manufacturing horseshoe calks. 1,570,455; Jan. 19.
Braine, Daniel L. (See Blum, J. K., and Braine.)
Brainie, Lawrence M., Fellows, Calif. Transformable cover coat and trousers. 1,570,227; Jan. 19.
Brandes Laboratories, Inc. (See Moss, David H., assignor.)
Branham, Walter R., Fort Valley, Ga. Flying jenny. 1,570,124; Jan. 19.
Brauning, Karl A., assignor to The Yale & Towne Manufacturing Company, Stamford, Conn. Lock casing. 1,570,331; Jan. 19.
Briggs, Southwick W., Glenmont, Md. Tractor scoop. 1,569,944; Jan. 19.
Brinkman, Frederick A. (See Barnhill, Josephine M., assignor.)
Brittingham, Vertner D., Denver, Colo. Playing cards. 1,569,945; Jan. 19.
Brodersen, Laust, Jutland, and M. E. Steppinge, Copenhagen, Denmark. Suction apparatus. 1,570,370; Jan. 19.
Brown, Campbell. (See Wilson, J. E., Connell, and Brown.)
Brown, Kinsey, Crisfield, Md. Toy. 1,570,332; Jan. 19.
Brown, Ray M., Yonkers, N. Y. Locomotive. 1,570,228; Jan. 19.
Browne, Jack, Oklahoma City, Okla. Container for automobile registration cards. 1,569,963; Jan. 19.
Browne, Vere B., Brackenrige, Pa. Making magnetic alloys. 1,570,229; Jan. 19.
Bruhn, Herman C. (See Bruhn, William C., and H. C.)
Bruhn, John H., and A. E. Matz, Dubuque, Iowa. Stop cock. 1,570,126; Jan. 19.
Bruhn, William C. and H. C., Spirit Lake, Iowa. Dumping-wagon box. 1,570,125; Jan. 19.
Brunswick-Balke-Collender Company, The. (See Bishop, Joseph W., assignor.)
Brunswick-Balke Collender Company. (See Nystrom, Martin, assignor.)
Bryant, James G., Port Huron, Mich. Grinding mill. 1,570,456; Jan. 19.
Bua, Frank A., Lodi, N. J. Violin-position guide. 1,570,457; Jan. 19.
Buccuto, William, Salem, N. J. Ventilating fan. 1,570,371; Jan. 19.
Buck, Eugene C., New York, N. Y. Vitreous composition and articles made therefrom. 1,570,202; Jan. 19.
Buckingham, Earle, Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y. Lost-motion-compensating means for gear-hobbing machines. 1,570,372; Jan. 19.
Buckley, Homer, et al. (See Biggers, Lee P., assignor.)
Buder, Charles G., assignor to Haynes-Langenberg Mfg. Co., St. Louis, Mo. Hot-air furnace. 1,570,481; Jan. 19.
Buettner, Edward F., E. Ganun, and H. K. Throm, Toledo, Ohio. Route meter. 1,569,946; Jan. 19.
Bumper and Fender Co. (See Ronca, L., and Santoro, assignors.)
Burch, Eugene J., Memphis, Tenn. Floor cleaning and polishing device. 1,570,127; Jan. 19.
Burlin Co. (See Burlin, Leslie H., assignor.)
Burlin, Leslie H., assignor to Burlin Co., Chicago, Ill. Upright member for a lamp or similar article. Des. 69,251; Jan. 19.
Burris, Millard D., Bloomfield, N. J. Combination match and cigarette holder. 1,570,038; Jan. 19.
Burton, John S. (See Reuter, Harry W., assignor.)
Bushnell, John B., assignor to Bushnell Manufacturing Co. Inc., Berkeley, Calif. Die-casting machine. 1,569,851; Jan. 19.
Bushnell Manufacturing Co. (See Bushnell, John B., assignor.)
Bussard, Grover D., Littleton, Colo. Valve-spring compressor. 1,570,039; Jan. 19.
Busse, Reginald W., Sheboygan, Wis. Cushion-stuffing machine. 1,570,432; Jan. 19.
Butler, Charles J. (See Kirby, Clarence E., assignor.)
Butterfield, Fred, & Co. (See Vandergaw, E. B., and Heinrich, assignors.)
Buttress, Joseph A., South Pasadena, Calif. Wall-board lath. 1,569,947; Jan. 19.
Byllesby Engineering and Management Corporation. (See Fisher, H. H., and Rittenhouse, assignors.)
Cade, Arthur R., Pittsburgh, Pa., assignor to Carbide and Carbon Chemicals Corporation. Ethylating amines. 1,570,203; Jan. 19.
Calleson, Amos, Brooklyn, N. Y. Bottle filling and sealing machine. 1,569,948; Jan. 19.
Camp, Percy B., Maywood, Ill., assignor to Universal Draft Gear Attachment Company. Brake mechanism for railway cars. 1,569,949; Jan. 19.
Campbell, George W., Hartford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,569,950; Jan. 19.
Cannon, Frank S. (See Jones, William E., assignor.)
Carbide and Carbon Chemicals Corporation. (See Cade, Arthur R., assignor.)
Cardey, George W., assignor of one-half to J. A. McCoy, Lancaster, Wis. Truss. 1,569,964; Jan. 19.
Carlson, Harry. (See Prouty, M. D., Craig, Rawlings, and Carlson.)

Carter, Howard G., Detroit, Mich. Making water bags. 1,570,128; Jan. 19.
Carver, Fred S., East Orange, N. J. Platen for pot presses. 1,570,433; Jan. 19.
Cavanna, Eugene L., Chicago, Ill. Shoe support and form. 1,570,295; Jan. 19.
Cave, Henry, Hartford, Conn., assignor to G. R. S. Products, Inc., New York N. Y. Dishwashing machine. 1,570,296; Jan. 19.
Cederberg, Ivar W., Berlin-Steglitz, Germany, assignor to Norsk Hydro-Elektrisk Kvaelstofaktieselskab, Christiania, Norway. Production of catalysers for the synthesis of ammonia. 1,570,333; Jan. 19.
Cederlöf, Börge, Stavanger, Norway. Manacles, handcuffs, and the like. 1,570,458; Jan. 19.
Celite Company, The. (See Teitsworth, Clark S., assignor.)
Chadwick, Lee S., Shaker Heights Village, and M. Resek, Cleveland Heights, assignors to The Cleveland Metal Products Company, Cleveland, Ohio. Oil-burner construction. 1,570,434; Jan. 19.
Chambers, Albert W., sr., Hillside, N. J. Lamp shade. 1,570,230; Jan. 19.
Chambers Brothers Company. (See King Howard K., assignor.)
Champion, Warren, Pekin, Ill. Compass. 1,570,459; Jan. 19.
Chandler, Milton E., Chicago, Ill. Air cleaner. 1,570,040; Jan. 19.
Chapin, Chauncey C., Sterling, Colo. Transfer switch. 1,569,965; Jan. 19.
Chapman, Joan, New York, N. Y. Doll. Des. 69,252; Jan. 19.
Chemische Fabrik auf Actien (vorm. E. Schering). (See Freund, E., and Jordan, assignors.)
Chilton, Roland, Keyport, N. J., assignor to Aeromarine Plane & Motor Company. Gasket for pressure containers. 1,570,334; Jan. 19.
Clark, Hiram W. (See Gudmundsen, A., and Clark.)
Clark, Raymond G., assignor, by mesne assignments, to A. W. Gast, Chicago, Ill. Electrode for high-frequency generators. 1,570,041; Jan. 19.
Clarke, Harry R., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Support for head telephone receivers. 1,570,129; Jan. 19.
Clarke, John D. (See Fritsche, W. P., and Clarke.)
Classen, Alexander, Aachen, Germany, assignor to The Commercial Alcohol Company, Limited, London, England. Manufacture of cellulose solutions. 1,570,553; Jan. 19.
Clay, Samuel B., assignor to Heine Boiler Company, St. Louis, Mo. Facing tool for gasket seats. 1,570,042; Jan. 19.
Claypool, Daniel E., Fort Worth, Tex. Piston. 1,569,966; Jan. 19.
Clayton, Andrew B., Union, assignor to The Singer Manufacturing Company, Elizabeth, N. J. Sewing-machine looper mechanism. 1,569,912; Jan. 19.
Clement, Lewis J., Dauphin, Manitoba, Canada. Shocking machine. 1,570,204; Jan. 19.
Cleveland Crane & Engineering Company, The. (See Bennington, Earl T., assignor.)
Cleveland Metal Products Company, The. (See Chadwick, L. S., and Resek, assignors.)
Cleveland Twist Drill Company, The. (See Dillard, James B., assignor.)
Clokey, Allison A., Rutherford, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telegraph system. 1,570,460; Jan. 19.
Cobb, Harry W. (See Cobb, Henry B. and H. W.)
Cobb, Henry B., and H. W., Malden, Mass. Machine for making wall board, etc. 1,570,335; Jan. 19.
Cochrane Corporation. (See Gamble, Joseph W., assignor.)
Cohen, Oscar, New York, N. Y. Cigar lighter. Des. 69,253; Jan. 19.
Cohn, Jacob, assignor to Non-Explosive Corporation of America, New York, N. Y. Safety attachment for tanks. 1,570,461; Jan. 19.
Colby, Harold L., Milton, assignor to C. W. McConnel, Boston, E. MacLeod, Westwood, Mass., and F. B. Look, Los Angeles, Calif., trustees, doing business as Mason Regulator Company, Boston, Mass. Valve mechanism. 1,569,852; Jan. 19.
Coles, Henry L. (See Donaldson, J. G., and Coles.)
Colker, Morris, Pittsburgh, Pa. Display stand for jewelry. Des. 69,254; Jan. 19.
Collier, David C., Santa Fe, N. Mex. Recovering oil from oil-bearing sands. 1,570,205; Jan. 19.
Commercial Alcohol Company, The. (See Classen, Alexander, assignor.)
Compagnie des Forges et Aciéries de la Marine et d' Homécourt. (See Granat, Elie, assignor.)
Conahan, William F., Aurora, Ill. Hook and eye. 1,570,130; Jan. 19.
Condit Electrical Manufacturing Corporation. (See Greene, Austin E., assignor.)
Conley, Gardner L., Chicago, Ill., assignor to Standard Oil Company, Whiting, Ind. Display container. 1,570,336; Jan. 19.
Connell, Samuel. (See Wilson, J. E., Connell, and Brown.)
Connell, Stanley L., assignor to The Girard Model Works, Inc., Girard, Pa. Spinning top. 1,570,206; Jan. 19.
Consolidated Car-Heating Company. (See Hynes, Lee P., assignor.)
Consortium für Elektrochemische Industrie G. m. b. H. (See Meingast, R., and Mugdan, assignors.)
Constantinesco, George, Weybridge, England. Pump. 1,570,554; Jan. 19.
Convertible Door Manufacturing Company. (See Mers, O. H., and Humleker, assignors.)
Cook, Nelson E. (See Peacock, S., and Cook.)
Cook, Palmer J., Southfield, Mass. Diaphragm for telephone receivers. 1,570,337; Jan. 19.
Cooper, Paul E., Somerville, Ohio. Scaffold anchor. 1,569,951; Jan. 19.
Cope, Maurice, Kingsley, Iowa. Automatically-closing door. 1,570,462; Jan. 19.
Corell, Martin. (See Kränzlein, G., and Corell.)
Cormier, Alfred J., assignor to A. W. Warr, Los Angeles, Calif. Pump-packing-expanding device. 1,570,043; Jan. 19.
Cosey, Henry M., Flint, Mich. Aeroplane propelling mechanism. 1,570,044; Jan. 19.
Cothran, Edward E., Wright, Calif. Pneumatic automobile spring. 1,569,850; Jan. 19.
Cottrell, C. B., & Sons Company. (See Barber, Howard M., assignor.)
Coune, Felix, Chicago, Ill. Hair-drying apparatus. 1,570,045; Jan. 19.
Crabtree, Eli F., Baltimore, Md. Direction-signal casing. Des. 69,255; Jan. 19.
Crabtree, Robert, Forbes, N. Dak. Harrow. 1,569,913; Jan. 19.
Craig, Rollie. (See Prouty, M. D., Craig, Rawlings, and Carlson.)
Craw, Frank C., South Norwalk, assignor to Turner Machine Company, Incorporated, Danbury, Conn. Soft-hat-rounding machine. 1,570,373; Jan. 19.
Craw, George R., Fort Wayne, Ind. Service cabinets. 1,570,207; Jan. 19.
Crawford, Paul H., Palo Alto, and J. F. Abbema, Oakland, Calif. Filtering apparatus. 1,570,374; Jan. 19.
Crittall, Richard G. (See Musgrave, J. L., and Crittall.)
Cronin, John H., assignor to The Enro Shirt Company, Louisville, Ky. Shirt. 1,570,208; Jan. 19.
Crossley, Moses L., Somerville, and G. S. Simpson, Plainfield, N. J. Sulphonating beta naphthol. 1,570,046; Jan. 19.
Crowell, Frank S., assignor to The Edward N. Riddle Company, Toledo, Ohio. Ceiling light. Des. 69,256; Jan. 19.
Crowell, Frank S., assignor to The Edward N. Riddle Company, Toledo, Ohio. Ceiling light. Des. 69,256; Jan. 19.
Crowell, Frank S., assignor to The Edward N. Riddle Company, Toledo, Ohio. Ceiling plate. Des. 69,257; Jan. 19.
Curtin, Frank and H. Curtin, assignors to Curtin-Herbert Co. Inc., Gloversville, N. Y. Pinning and nailing machine. 1,569,914; Jan. 19.
Curtin, Henry. (See Curtin, Frank and H.)
Curtin-Herbert Co. (See Curtin, Frank and H., assignors.
Cutler-Hammer Mfg. Co., The. (See Lightfoot, Edwin N., assignor.)
Dalgarn, Talmadge M. (See Harris, J. D., and Dalgarn.)
Damerell, Mark H., assignor to Wyman-Gordon Company, Worcester, Mass. Unloading device for furnaces. 1,570,463; Jan. 19.
Damore, Antonio, Brooklyn, N. Y. Safety device for automobiles. 1,570,464; Jan. 19.
Danielsen, Wilhelm G., Independence, Mo. Oil burner. 1,569,967; Jan. 19.
D'Aprea, Salvatore, Brooklyn, N. Y. Shoe-polishing machine. 1,570,465; Jan. 19.
Darrin, Marc, Wilkinsburg, assignor to The Koppers Company, Pittsburgh, Pa. Recovery of thiocyanates and thiosulphates. 1,570,047; Jan. 19.
David, Albert, Chicago Heights, Ill., assignor, by mesne assignments, to Dip-It Inc., New York, N. Y. Coloring composition. 1,569,915; Jan. 19.
Davidson, William D. (See Goeser, E. W., and Davidson.)
Davis, Bernard H., Fullerton, Calif. Device for removing pump liners and valve seats. 1,570,338; Jan. 19.
Davis, Laurence R., New York, N. Y., assignor to G. & J. Tire Company, Indianapolis, Ind. Tire. 69,258; Jan. 19.
Davis, Leon M., Fairmont, W. Va. Garter, armlet, or like band. 1,569,968; Jan. 19.
Dawson, Robert K., Akron, N. Y. Fitting for chairs or the like. 1,570,435; Jan. 19.
Dawson, Robert K., Akron, N. Y. Chair base. 1,570,436; Jan. 19.
Dawson, Robert K., Akron, N. Y. Hub for chair bases. 1,570,437; Jan. 19.
Day, Roland B., Lansdowne, Pa. Treating petroleum oils. 1,570,131; Jan. 19.
Deale, Robert C. (See Blood, H. L., and Deale.)
Dean Hill Pump Company. (See Schleyer, Victor, assignor.)
De Brey, Jan H. C., assignor to Naamlooze Vennootschap Bataafsche Petroleum Maatschappij, The Hague, Netherlands. Separating the phases of emulsions, particularly of petroleum, by means of an electric current. 1,570,209; Jan. 19.
Decker, Ammiel F., Pelham, N. Y. Padding for ironing rolls. 1,570,231; Jan. 19.
De Coninck, Arthur, Brussels, Belgium. Stabilizing device for automobile underframes. 1,570,210; Jan. 19.

De Minico, Charles, Boston, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Method of and machine for operating upon shoes. 1,569,853; Jan. 19.

Denyes, Harry M., Saginaw, Mich. Combined spark and throttle control. 69,259; Jan. 19.

De Reamer, Frank C., Bridgeport, Conn., assignor to General Electric Company. Lighting fixture. 1,570,597; Jan. 19.

Devenbaugh, Samuel, La Grange, Ind. Cultivator attachment. 1,570,132; Jan. 19.

Dexter Company, The. (See George, William H., assignor.)

Dial, James M., Bogart, Ga. Liquid-fuel burner. 1,570,555; Jan. 19.

Di Bella, Frank, New York, N. Y. Candlesticks. 1,570,133; Jan. 19.

Dick, A. B., Company. (See Green, Charles F., assignor.)

Dickensheet, Earle H., Kansas City, Mo., assignor to Faultless Pneumatic Tire Company, Seattle, Wash. Vehicle tire. 1,570,048; Jan. 19.

Dickinson, William W., jr., Little Rock, Ark. Apparatus for burning bricks. 1,569,952; Jan. 19.

Dickinson, William W., jr., Little Rock, Ark. Apparatus for burning bricks. 1,569,953; Jan. 19.

Dickson, Benjamin A., Indianapolis, Ind. 1,570,557; Jan. 19.

Diemer, Jacob F., Liberty, Mo. Insect container. 1,570,134; Jan. 19.

Diernhofer, Hermann, Grossschoenau, Germany. Producing photographs in natural colors on paper. 1,570,375; Jan. 19.

Dillard, James B., Shaker Heights, assignor to The Cleveland Twist Drill Company, Cleveland, Ohio. Making reamers. 1,570,049; Jan. 19.

Dilley, Charles D., Plymouth, England. Dough-molding machine. 1,570,339; Jan. 19.

Dimmick, Max A. (See McFarland, B. M., and Dimmick.)

Dine, Frank W., Minster, Ohio, assignor, by mesne assignments, to The National Automatic Tool Company, Richmond, Ind. Drilling machine. 1,570,050; Jan. 19.

Dip-It Inc. (See David, Albert, assignor.)

Di Tommaso, Vitandrea, Moody, Oreg. Safety appliance for railway hand cars. 1,570,556; Jan. 19.

Doane, John A., Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y. Wheel feeding and adjusting means for grinding machines. 1,570,376; Jan. 19.

Dodge, Harry H., Buffalo, N. Y. Furnace. 1,570,340; Jan. 19.

Dodman, Alfred C., jr., Summit, N. J., and C. S. Reiber, New York, N. Y.; said Reiber assignor to said Dodman. Wall paper. Des. 69,260; Jan. 19.

Dodman, Alfred C., jr., Summit, N. J., and C. S. Reiber, New York, N. Y.; said Reiber assignor to said Dodman. Wall paper. 69,261; Jan. 19.

Doerr, George W., Orange, N. J. Abrasive mitt. 1,569,854; Jan. 19.

Doerr, Lawrence, Silverton, Oreg. Boiler stand. 1,570,211; Jan. 19.

Dombrowski, Fred, Chicago, Ill. Antiskid attachment for vehicle wheels. 1,570,051; Jan. 19.

Donaldson, Joseph G., and H. L. Coles, assignors to Guardian Metals Company, Hamilton, Ohio. Composite structural unit. 1,569,954; Jan. 19.

Dorris, Henry C. (See Pritner, L. C., and Dorris.)

Dowd, Lewis M., assignor to Scovill Manufacturing Company, Waterbury, Conn. Eyelet button. 1,570,341; Jan. 19.

Draper Corporation. (See Lecomte, Alphonse, assignor.)

Draper Corporation. (See Sorrells, James A., assignor.)

Drees, Andrew A. (See Rolmer, Philip B., assignor.)

Dresser, Robert A., Bradford, Pa., assignor of one-fourth to L. Jones, Miles, Ohio, and one-fourth to J. M. Kelly, Pittsburgh, Pa. Crowbar. 1,570,342; Jan. 19.

Dresser, Robert A., Bradford, Pa. Pumping power for oil wells. 1,570,343; Jan. 19.

Duer, Benjamin F., et al. (See Hacker, Owen E., assignor.)

Duhme, Emil, Berlin-Charlottenburg, assignor to Siemens & Halske, Aktiengesellschaft, Siemensstadt, near Berlin, Germany. Apparatus for the production of electrolytic iron. 1,570,212; Jan. 19.

Dunkle, Edward L., East Brady, Pa. Snow-removing apparatus. 1,570,377; Jan. 19.

Du Pont, E. I., de Nemours & Company. (See Hoffman, Harry J., assignor.)

Du Pont, E. I., de Nemours & Company. (See Pitman, Earle C., assignor.)

Durtsche, Henry E., Galion, Ohio. Gauge. 1,570,558; Jan. 19.

Duvall, William J. (See Smith, A. W., and Duvall.)

Dyer, Frank L., Montclair, N. J. Recording and reproducing sounds. 1,570,297; Jan. 19.

Dyer, Harry, Los Angeles, Calif. Gas-valve-controlled ventilating device. 1,570,232; Jan. 19.

Easy-On Cap Company, The. (See Reid, James S., assignor.)

Edwards, Albert, Bridgeport, Conn. Sanitary receptacle. 1,570,344; Jan. 19.

Egloff, Gustav, and H. P. Benner, Independence, Kans., assignors to Universal Oil Products Company, Chicago, Ill. Treating oil. 1,569,835; Jan. 19.

Eliasoff, Abrahamm L., and C. Birnbaum, New York, N. Y. Electric-light globe. 1,570,345; Jan. 19.

Elliott, Edward O., assignor to The Baldwin Locomotive Works, Philadelphia, Pa. Crosshead guide. 1,570,559; Jan. 19.

Elliott-Fisher Company. (See Foothorap, Harry A., assignor.)

Ellis, Carleton, Montclair, N. J., assignor to Ellis-Foster Co. Cumaron resin composition and making same. 1,570,584; Jan. 19.

Ellis-Foster Co. (See Ellis, Carleton, assignor.)

Emmert, George C., Mount Morris, Ill. Automatic latch. 1,570,135; Jan. 19.

Emond, William H., Syracuse, N. Y. Body construction for vehicles. 1,570,560; Jan. 19.

Engkvist, Karl O. (See Svensson, S. H., and Engkvist.)

Enro Shirt Company, The. (See Cronin, John H., assignor.)

Erie Can Co. (See Pittelkow, August, assignor.)

Eriksen, Johan E., Oslo, Norway. Automatic pistol. 1,569,856; Jan. 19.

Erwin, Orlando R., Forest Hills, N. Y. Fire-extinguishing device. 1,570,052; Jan. 19.

Essex Motors. (See Rumely, Vincent P., assignor.)

Essinger, Edwin C., Chicago, Ill. Display device. 1,570,466; Jan. 19.

Evans, George A., Glendale, Calif. Vehicle brake apparatus. 1,570,378; Jan. 19.

Evans, Guy J. (See Pond, George F., assignor.)

Evans, John. (See Evans, Tracy and J.)

Evans, Samuel M., Essex Fells, N. J. Producing lead oxide. 1,570,438; Jan. 19.

Evans, Tracy and J., Richmond, Ind. Bird house. D. s. 69,262; Jan. 19.

Eversharp Manufacturing Co. (See Boylan, Thomas F., sr., assignor.)

Ewan, Thomas, Glasgow, Scotland. Manufacture of alkali-metal amides. 1,570,467; Jan. 19.

Fairbanks, E. and T., and Company. (See Osgood, L. A., and Wolf, assignors.)

Faiter, Richard, New York, N. Y. Waterproof quilting. 1,569,955; Jan. 19.

Farb, Carl A., De Kalb, Ill., assignor to The American Steel and Wire Company of New Jersey. Fencepost driver. 1,569,857; Jan. 19.

Farbwerke vorm. Meister Lucius & Bruning. (See Kränzlein, G., and Corell, assignors.)

Farrington, Charles E., Phoenixville, Pa. Barrel agitator. 1,569,858; Jan. 19.

Faultless Pneumatic Tire Company. (See Dickensheet, Earle H., assignor.)

Fausse, Joseph, Brockton, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Toe binder. 1,570,053; Jan. 19.

Federal Pressed Steel Company. (See Tinker, Herbert W., assignor.)

Feigenbaum, Joseph, Los Angeles, Calif. Reenforced-concrete hollow tile building block. 1,570,233; Jan. 19.

Feldmar, Adalbert B., Berlin-Schoneberg, Germany. Ping or socket for masonry. 1,570,234; Jan. 19.

Fiedler, Louis, assignor to Benjamin & Edward J. Gross Co., Inc., New York, N. Y. Finger ring or article of similar nature. Des. 69,263; Jan. 19.

Fischer, Andrew, jr., Chicago, Ill. Glazing brick. 1,570,137; Jan. 19.

Fisher, Adam E., St. Louis, Mo. Washboiler. 1,570,136; Jan. 19.

Fisher, Albert H., East Cleveland, Ohio, assignor of one-half to M. R. Forkapa. Repairing tire casings. 1,570,298; Jan. 19.

Fisher, Alva J., Evanston, assignor to Hurley Machine Company, Chicago, Ill. Washing-machine wringer. 1,569,859; Jan. 19.

Fisher, Harry H., and W. B. Rittenhouse, Chicago, Ill., assignors to Byllesby Engineering and Management Corporation, Wilmington, Del. System of water transportation and a boxed boat for use in connection therewith. 1,569,916; Jan. 19.

Fisk Rubber Company, The. (See Hennessy, Daniel E., assignor.)

Fleming, John J., Vineland, N. J. Mold for sash-weight cores. 1,570,054; Jan. 19.

Flintermann, Rudolph F., assignor to Michigan Steel Castings Company, Detroit, Mich. Heat-treating container. 1,570,055; Jan. 19.

Flodquist, Lars, Stockholm, and I. G. Blomquist, Stocksund, assignors to Aktiebolaget Pharmacia, Liljeholmen, Stockholm, Sweden. Producing a pharmaceutical preparation and a pharmaceutical preparation thus produced. 1,569,956; Jan. 19.

Fluto, Martinus, Wyndmere, N. Dak. Road grader. 1,569,957; Jan. 19.

Flynn, Roy I., Wagner, S. Dak. Grapple. 1,569,918; Jan. 19.

Focht, Samuel, Watertown, N. Y. Fishhook book. 1,570,213; Jan. 19.

Folberth, Frederick G. and W. M., Cleveland, Ohio, assignors to Trico Products Corporation, Buffalo, N. Y. Windshield cleaner. 1,570,598; Jan. 19.

Folberth, William M. (See Folberth, Frederick G. and W. M.)

Fooks, Nelson H., Preston, Md. Apparatus for heat treating substances packed in sealed receptacles. 1,570,235; Jan. 19.

Fooks, Nelson H., Preston, Md. Process of cooking and coning. 1,570,236; Jan. 19.

Foothorap, Harry A., Harrisburgh, Pa., assignor to Elliott-Fisher Company. Multibilling platen equipment. 1,569,917; Jan. 19.

Forest Research Corporation. (See Renner, Herbert, assignor.)

Forkapa, Milan R. (See Fisher, Albert H., assignor.)

Fox, Thomas, Liverpool, England. Gas meter. 1,570,214; Jan. 19.

Franklin Railway Supply Company. (See Peters, Frank R., assignor.)

Franklin Simon & Co. (See Siegel, Maude, assignor.)

Freebury, Harvey E., Belfry, Mont. Valve. 1,570,468; Jan. 19.

Freers, George H., Indianapolis, Ind. Faceplate for a tail lamp. Des. 69,264; Jan. 19.

Freezerator Company, The. (See Heideman, Fred J., assignor.)

Freidhoff, Joseph C., Johnstown, Pa. Religious automata. 1,569,958; Jan. 19.

Freund, Erich and H. Jordan, assignors to the Firm: Chemische Fabrik auf Actien (vorm. E. Schering), Berlin, Germany. Resin substitutes produced by Friedel Crafts reaction. 1,570,469; Jan. 19.

Frick, John A. (See Klinkerman, John H., assignor.)

"Frisco" Mfg. Co., The. (See Mortensen, August, assignor.)

Fritsche, Walter P., and J. D. Clarke, New Haven, Conn. Air boat. 1,570,470; Jan. 19.

Fritz, Lewis, Chicago, Ill. Bearing. 1,570,056; Jan. 19.

Fuel Development Corporation. (See Hammond, Grant, assignor.)

Furler, Frederick M., Revere, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Seam rubbing. 1,570,057; Jan. 19.

Fry, Thornton C., Wyoming, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Electrical network. 1,570,215 Jan. 19.

G. & J. Tire Company. (See Davis, Laurence R., assignor.)

G. R. S. Products, Inc. (See Cave, Henry, assignor.)

Galt, Hugh A., Akron, Ohio, assignor to The Pittsburgh Plate Glass Company, Pittsburgh, Pa. Ammonia soda process. 1,570,299; Jan. 19.

Gamble, Joseph W., deceased, by M. Gamble, executrix, assignor to Cochrane Corporation, Philadelphia, Pa. Differential pressure gauge. 1,569,959; Jan. 19.

Gamble, Martha, executrix. (See Gamble, Joseph W.)

Gamewell Company, The. (See Suren, Nathan H., assignor.)

Gammeter, John R. (See Beyea, Frank H., assignor.)

Ganun, Emery. (See Buettner, E. F., Ganun, and Throm.)

Garrett, John E., and G. M. Rogers, Hamilton, Ohio. Music stand. 1,570,216; Jan. 19.

Gase, Eugene, Saginaw, Mich., assignor to Baker-Perkins Company, Incorporated, White Plains, N. Y. Weighing machine for liquids. 1,570,300; Jan. 19.

Gase, Eugene J., Saginaw, Mich., assignor to Baker-Perkins Company, Inc., White Plains, N. Y. Weighing liquids. 1,570,471; Jan. 19.

Gaskill, Henry S., Hastings, Mich. Fireproof vault. 1,570,472; Jan. 19.

Gast, Adolph W. (See Clark, Raymond G., assignor.)

Gat, John D., assignor, by mesne assignments, to The Hoover Company, North Canton, Ohio. Treating filter bags. 1,570,138; Jan. 19.

Gates, George E., Comstock, Mich. Display holder. 1,570,139; Jan. 19.

Gathmann, Emil, Baltimore, Md. Ingot mold. 1,570,473; Jan. 19.

Gebr. Staubli. (See Bischof, Ulrich, assignor.)

Geer, Harry R., Johnstown, Pa. Ingot stripping. 1,570,474; Jan. 19.

Geis, William H., jr., New York, N. Y. Necktie press. 1,570,561; Jan. 19.

Geisler, Walter, New York, N. Y. Raincoat. 1,569,960; Jan. 19.

General Electric Company. (See De Reamer, Frank C. assignor.)

General Electric Company. (See Hobart, Henry M., assignor.)

General Electric Company. (See Moss, Sanford A., assignor.)

George, William H., assignor to The Dexter Company, Fairfield, Iowa. Drain spout for washing machines and the like. 1,570,058; Jan. 19.

Geraci, Frank, jr., and T., Washington, D. C. Playing cards. 1,570,475; Jan. 19.

Geraci, Thomas. (See Geraci, Frank, jr., and T.)

Getchell, Benjamin E., assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Electric switch. 1,570,237 Jan. 19.

Getz, Benjamin E., assignor to Getz Power Washer Co., Morton, Ill. Wringer. 1,570,562; Jan. 19.

Getz Power Washer Co. (See Getz, Benjamin E., assignor.)

Gibford, Edward B., Adrian, Mich. Razor stropper. 1,569,969; Jan. 19.

Gibson, Joseph R., Chicago, Ill. Paste tube. 1,570,238; Jan. 19.

Gilbert, Clarence E., Aberdeen, S. Dak. Road grader. 1,570,140; Jan. 19.

Gillelen, Lute G. (See Mercier, Joseph, assignor.)

Gilliam, Pittman, Cleveland, Ohio. Trunk. 1,569,971; Jan. 19.

Gilman, George H., Boston, Mass. Drilling machine. 1,570,239; Jan. 19.

Gilman, George H., assignor to Sullivan Machinery Company, Boston, Mass. Drilling apparatus. 1,569,970; Jan. 19.

Gilman, George H., Belmont, Mass., assignor to Sullivan Machinery Company. Pressure-fluid motor. 1,570,379; Jan. 19.

Girard Model Works, Inc., The. (See Connell, Stanley L., assignor.)

Giustino, Basso, Baltimore, Md. Ladder. 1,570,240; Jan. 19.

Glaenzer, Harry and J. S. Keen, assignors to The Baldwin Locomotive Works, Philadelphia, Pa. Railway truck. 1,570,563; Jan. 19.

Glantz, Joseph, New York, N. Y. Hair waver. 1,570,141; Jan. 19.

Gleave, James, Galveston, Tex. Sectional water chaft. 1,570,241; Jan. 19.

Gleichmann, Hans, Siemensstadt, near Berlin, and W. Stender, Berlin-Charlottenburg, assignors to Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung, Siemensstadt, near Berlin, Germany. Feeding steam boilers from an unheated tank. 1,569,919; Jan. 19.

Globe Steel Tubes Company. (See Sjobring, N. P., and Swanson, assignors.)

Globe-Wernicke Company, The. (See Ringler, William A., assignor.)

Glowacki, John B., Chicago, Ill. Pull-off plug. 1,569,972; Jan. 19.

Goddu, George, Winchester, and F. L. Mackenzie, Beverly, Mass., assignors to United Shoe Machinery Corporation, Paterson, N. J. Fastening-inserting machine. 1,569,920; Jan. 19.

Godshalk, Clarence A., Philadelphia, Pa. Locked-nut apparatus. 1,570,476; Jan. 19.

Godshalk, Clarence A., Philadelphia, Pa. Locking mechanism for the spare tires of automobiles. 1,570,477; Jan. 19.

Goerz, Paul, Grunewald, near Berlin, and E. Jacobi, assignors to the Firm of Optische Anstalt C. P. Goerz Aktiengesellschaft, Friedenau, near Berlin, Germany. Working curved surfaces. 1,570,242; Jan. 19.

Goeser, Edwin W., and W. D. Davidson, Los Angeles, Calif., assignors to The National Supply Company, Toledo, Ohio. Shaft-drive draw works and rotary drilling machine. 1,570,243; Jan. 19.

Goettert, Fredrich K., San Francisco, Calif. Lens. 1,569,973; Jan. 19.

Goetz, Abraham, Chicago, Ill. Blade holder. 1,570,478; Jan. 19.

Goff, Thomas S., Martin, Tenn. Safety razor. 1,570,599; Jan. 19.

Goldensky, Milton E., and S. S. Harris, Philadelphia, Pa. Shock absorber. 1,570,479; Jan. 19.

Goldsmith Bros. Smelting & Refining Company. (See Goldsmith, Melvin M., assignor.)

Goldsmith, Gary A., Long Beach, Calif. Indicator and safety coupling for rotary drills. 1,570,244; Jan. 19.

Goldsmith, Melvin M., assignor, of one-half by mesne assignments, to Goldsmith Bros. Smelting & Refining Company, Chicago, Ill. Alloy for pen points. 1,569,921; Jan. 19.

Goldstein, Isidore, assignor to Pekett Headwear Co., New York, N. Y. Hat. Des. 69,265; Jan. 19.

Gonzalez, Luis R. (See Romero, A. S., and Gonzalez.)

Goodrich, B. F., Company, The. (See Merrill, Allan B., assignor.)

Goulding, Benjamin J. J., Altrincham, assignor to Linotype and Machinery Limited, London, England. Apparatus for casting curved stereotype printing plates. 1,570,480; Jan. 19.

Grain, Frederick H., and L. F. Maxwell, London, England. Liquid-registering device. 1,570,481; Jan. 19.

Granat, Elie, assignor of one-half to Compagnie des Forges et Aciéries de la Marine et d'Homécourt, Paris, France. Electric control system for all movable elements operating by a very small power, and chiefly for the gyroscopic compass. 1,569,922; Jan. 19.

Grasselli Chemical Company, The. (See Howard, Henry, assignor.)

Green, Charles F., Romford, England, assignor to A. B. Dick Company, Chicago, Ill. Fork for composing and distributing type. 1,570,217; Jan. 19.

Greene, Austin E., Medford Hillside, assignor, by mesne assignments, to Conduit Electrical Manufacturing Corporation, Boston, Mass. Electric switch. 1,570,245; Jan. 19.

Greene, Otto W., Elyria, assignor to The Willys-Overland Company, Toledo, Ohio. Packing ring. 1,569,974; Jan. 19.

Gross, Benjamin, assignor to Benjamin & Edward J. Gross Co. Inc., New York, N. Y. Finger ring. Des. 69,266; Jan. 19.

Gross, Benjamin, assignor to Benjamin & Edward J. Gross Co. Inc., New York, N. Y. Finger ring. Des. 69,267; Jan. 19.

Gross, Benjamin, assignor to Benjamin & Edward J. Gross Co. Inc., New York, N. Y. Finger ring. Des. 69,268; Jan. 19.

Gross, Benjamin & Edward J., Co. (See Fiedler, Louis, assignor.)

Gross, Benjamin & Edward J., Co. (See Gross, Benjamin, assignor.)
Grove, Rene D., assignor to Performo-Toy Company, Middletown, Pa. Wheeled toy. 69,269; Jan. 19.
Grover, Albert D., Long Island City, N. Y. Mute for musical stringed instruments. 1,570,601; Jan. 19.
Grover, Albert D., and L. H. Bertram, Long Island City, N. Y. Tuning peg for stringed musical instruments. 1,570,600; Jan. 19.
Gruber, Harry J., New York, N. Y. Lighting fixture. Des. 69,270; Jan. 19.
Guardian Metals Company. (See Donaldson, J. G., and Coles, assignors.)
Gudmundsen, Austin and H. W. Clark, Salt Lake City, Utah. Device for furnaces. 1,569,923; Jan. 19.
Hachbeney, Frank C., et al. (See Johnson, Horace K., assignor.)
Hacker, Owen E., assignor of one-third to R. H. Angell and one-third to B. F. Duer, Dayton, Ohio. Making metal articles. 1,570,246; Jan. 19.
Hadaway, William S., jr., New Rochelle, N. Y. Electric heating system. 1,570,301; Jan. 19.
Hahn, Martin, Berlin, assignor to M. Woelm A. G., Spangenberg, Germany. Storage receptacle for substances easily decomposable in solutions. 1,570,346; Jan. 19.
Hale, Kitty L., San Francisco, Calif. Furniture guard for carpet sweepers. 1,570,482; Jan. 19.
Hale, William E., Fort Washington, assignor to R. H. Beaumont Company, Philadelphia, Pa. Drag-scraper back-post block. 1,569,924; Jan. 19.
Hale, William E., Fort Washington, assignor to R. H. Beaumont Company, Philadelphia, Pa. Drag scraper. 1,569,925; Jan. 19.
Hale, William E., Fort Washington, assignor to R. H. Beaumont Company, Philadelphia, Pa. Double-dump skip hoist. 1,570,302; Jan. 19.
Hale, William E., Fort Washington, assignor to R. H. Beaumont Co., Philadelphia, Pa. Skip-bucket car-loading apparatus. 1,570,303; Jan. 19.
Hamel, Joseph L., Buffalo, N. Y. Ladder Foot. 1,570,564; Jan. 19.
Hammer, Charles, Hollis Court Boulevard, N. Y. Container snap-on rotatably releasable cap. 1,569,926; Jan. 19.
Hammerl, Jacob, assignor to Packard Motor Car Company, Detroit, Mich. Motor vehicle. 1,570,483; Jan. 19.
Hammond, Grant, New Haven, Conn., assignor to Fuel Development Corporation, Wilmington, Del. Fuel. 1,570,059; Jan. 19.
Hammond, Grant, New Haven, Conn., assignor to Fuel Development Corporation, Wilmington, Del. Fuel. 1,570,060; Jan. 19.
Hammond, John H., jr., Gloucester, Mass. System of and mechanism for controlling moving bodies by radiant energy. 1,569,927; Jan. 19.
Handlem, Irvin J., Green Bay, Wis. Confectionery machine. 1,570,247; Jan. 19.
Handley, George F., Glendale, assignor to Royal Typewriter Company, Inc., New York, N. Y. Automatic ribbon reverse. 1,570,218; Jan. 19.
Hanner, Walter B., Glenwood, N. C. Combined bolt and nut. 1,570,565; Jan. 19.
Hansen, A. L., Mfg. Co. (See Hansen, Augie L., assignor.)
Hansen, Augie L., assignor to A. L. Hansen Mfg. Co., Chicago, Ill. Bank. 1,569,975; Jan. 19.
Hanson, Clinton H., Chicago, Ill., assignor to Motor Player Corporation. Bearing construction. 1,570,566; Jan. 19.
Hanson, Hans M., Mason City, Iowa. Conveyer. 1,570,484; Jan. 19.
Hangood, Clarence H., assignor to Toledo Scale Company, Toledo, Ohio. Scale casing. Des. 69,271; Jan. 19.
Harnischfeger Corporation. (See Henricks, Arthur G., assignor.)
Harris, Joseph D., and T. M. Dalgarn, Detroit, Mich. Radiator for motor vehicles. 1,570,142; Jan. 19.
Harris, Simon S. (See Goldensky, M. E., and Harris.)
Harter, Hans, Wurzburg, Germany, assignor to Albert T. Otto & Sons, New York, N. Y. Synthesis of ammonia by means of catalysts. 1,570,485; Jan. 19.
Hartwig, William G., assignor to Railway Utility Company, Chicago, Ill. Car-heating system. 1,569,928; Jan. 19.
Hasclau, Otto, New York, N. Y. Radiator. 1,569,929; Jan. 19.
Hassler, Robert H., Indianapolis, Ind. Rebound check. 1,569,976; Jan. 19.
Hastings, Walter M., Methuen, Mass. Clearer and slub catcher for textile machines. 1,570,248; Jan. 19.
Hatch, Arthur G., Duluth, Minn. Making concrete tiles. 1,569,977; Jan. 19.
Haughton Elevator & Machine Co., The. (See Thurston, Ernest B., assignor.)
Haviland, George, Limoges, France. Covered dish or similar article. Des. 69,272; Jan. 19.
Haviland, George, Limoges, France. Covered dish or similar article. Des. 69,273; Jan. 19.
Haviland, George, Limoges, France. Plate or similar article. Des. 69,274; Jan. 19.
Haynes-Langenberg Mfg. Co. (See Buder, Charles G., assignor.)
Heide, William A., Detroit, Mich. Carburetor. 1,570,143; Jan. 19.
Heideman, Fred J., assignor to The Freezerator Company, Detroit, Mich. Pressure-controlled temperature regulator for artificial refrigerators. 1,570,144; Jan. 19.
Heine Boiler Company. (See Clay, Samuel B., assignor.)
Heinrich, Jules. (See Vandergaw, E. B., and Heinrich.)
Heller, Hugo, Milwaukee, Wis. Light-reflecting ornament. 1,570,145; Jan. 19.
Helmle, Herman C., assignor of one-half to W. C. Pruitt, Springfield, Ill. Color-blending pavement-crack filler. 1,570,219; Jan. 19.
Hendrickson, Julian P., Chehalis, Wash. Marine propulsion. 1,570,146; Jan. 19.
Henkel, Eugen, assignor to Metallbank und Metallurgische Gesellschaft, Aktiengesellschaft, Frankfort-on-the-Main, Germany. Hardness-testing machine. 1,570,249; Jan. 19.
Hennessy, Daniel E., Milwaukee, Wis., assignor, by mesne assignments, to The Fisk Rubber Company, Chicopee Falls, Mass. Mold. 1,570,147; Jan. 19.
Henricks, Arthur G., Wauwatosa, assignor to Harnischfeger Corporation, Milwaukee, Wis. Hoisting mechanism for excavating cranes. 1,570,061; Jan. 19.
Henry, George I. (See McKeehan, J. W., and Henry.)
Herhat, Peter V. A. A., Holte, Denmark, assignor to F. L. Smidth & Co., New York, N. Y. Tube mill or ball mill. 1,569,930; Jan. 19.
Herr, Charles W., et al. (See Herr, Von H., assignor.)
Herr, Von H., Philadelphia, Pa., assignor of one-third to C. W. Herr, one-third to F. H. Mattingly, and one-third to R. V. Willett. Fastener. 1,570,148; Jan. 19.
Herrington, Raney B., Wolbach, Nebr. Chicken feeder. 1,569,931; Jan. 19.
Herzog, Joseph L., New Rochelle, N. Y. Finger ring or similar article. Des. 69,275; Jan. 19.
Hess, Edward B., New York, and L. C. Myers, Freeport, assignors to Royal Typewriter Company, Inc., New York, N. Y. Ribbon-feeding mechanism for typewriting machines. 1,570,220; Jan. 19.
Hess, Edward B., assignor to Royal Typewriter Company, Inc., New York, N. Y. Typewriting machine. 1,570,250; Jan. 19.
Hongland, Frank O., Bridgeport, Conn., assignor to Reed-Prentice Company, Worcester, Mass. Collet and collet mechanism. 1,570,251; Jan. 19.
Hobart, Henry M., Schenectady, N. Y., assignor to General Electric Company. Converter system. 1,570,347; Jan. 19.
Hobbs, John W., Moline, Ill., assignor, by mesne assignments, to Fyrene Manufacturing Company, Newark, N. J. Apparatus for measuring the temperature of internal-combustion engines. 1,570,602; Jan. 19.
Hochstetter, Frederick W. (See McCurdy, R. P., and Hochstetter.)
Hodge, William B., Charlotte, N. C., assignor to Parks-Cramer Company, Boston, Mass. Humidifier. 1,569,860; Jan. 19.
Hoffman, Harry J., Stamford, Conn., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Making nonstatic film. 1,570,062; Jan. 19.
Hogan, Philip, St. Louis, Mo. Seam anchor. 1,570,439; Jan. 19.
Holda, John M., Chicago, Ill. Lock. 1,570,603; Jan. 19.
Holden, Joseph B., Syracuse, assignor to Remington Typewriter Company, Ilion, N. Y. Typewriting machine. 1,570,348; Jan. 19.
Hollingshead, Harry T., Chicago, Ill. Radiator cap. Des. 69,276; Jan. 19.
Hollinwood, George, Cranford, N. J. Combination time indicator and sighting compass. 1,570,349; Jan. 19.
Holmes, Harleigh R., Littleton, Colo. Spring seat for trucks and automobiles. 1,570,063; Jan. 19.
Holmes, Morris P., Claremont, N. H., assignor to Sullivan Machinery Company. Chain. 1,570,440; Jan. 19.
Holmquist, August, assignor, by mesne assignments, to Sprague-Sells Corporation, Hoopeston, Ill. Can-filling machine. 1,570,151; Jan. 19.
Holycross, Levva R., Columbus, Ohio. Toy balloon. 1,570,567; Jan. 19.
Hooker, James E., Tampa, Fla. Roof covering. 1,570,152; Jan. 19.
Hoover, Charles J., New York, N. Y. Plastic composition. 1,570,585; Jan. 19.
Hoover Company, The. (See Gat, John D., assignor.)
Horowitz, Jacob, Brooklyn, N. Y. Linseed-oil substitute. 1,570,252; Jan. 19.
Horrell, Maurice R., assignor of two-thirds to The Western Drilling Tool & Supply Co., Chanute, Kans. Operating member. 1,570,153; Jan. 19.
Horton, Joseph W., Bloomfield, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Sound-reproducing method and apparatus. 1,570,490; Jan. 19.
Houk, Robert H., Joliet, Ill. Thermostatic switch. 1,569,933; Jan. 19.
Howard, Charles E., Los Angeles, Calif. Sink. 1,569,978; Jan. 19.
Howard, Henry, assignor to The Grasselli Chemical Company, Cleveland, Ohio. Manufacture of sodium thiosulphate. 1,570,253; Jan. 19.
Howell, Edward N., Asheville, N. C. Combined box and table. 1,570,350; Jan. 19.

Howell, Richard, London, England. Valve and cock. 1,570,568; Jan. 19.
Hickok, George F., San Francisco, Calif. Safety hook. 1,570,149; Jan. 19.
Hildebrandt, Julius H., Cleveland, Ohio. Oil burner. 1,570,486; Jan. 19.
Hildebrandt, Julius H., Cleveland, Ohio. Oil burner. 1,570,487; Jan. 19.
Hildebrandt, Julius H., Cleveland, Ohio. Oil burner. 1,570,488; Jan. 19.
Hilger, Adam, Limited. (See Smith, Charles F., assignor.)
Hill, Elion S., New Hampton, N. H., assignor to Box Board Products, Inc., New York, N. Y. Box or carton. 1,569,932; Jan. 19.
Hill, Frank M., Riverside, N. J. Heater. 1,570,489; Jan. 19.
Hinds, Samuel S., Brooklyn, N. Y. T square. 1,570,150; Jan. 19.
Hine, Charles F. (See Rees, C., and Hine.)
Hubbard, Oscar S., Farmland, Ind. Hoisting crane. 1,569,970; Jan. 19.
Hughes, William H. (See Phillips, Bertram T., assignor.)
Hultin, Valter E., Stockholm, Sweden. Method and arrangement for fastening window and door frames. 1,570,351; Jan. 19.
Humes, Harry S., Venice, Calif. Sun-glare eyeshield. 1,570,254; Jan. 19.
Humleker, Peter D. (See Merz, O. H., and Humleker.)
Hunke, Hugo, Taylor, Tex. Fire-larm apparatus. 1,570,255; Jan. 19.
Hunsberger, George A. (See Sweeney, E., and Hunsberger.)
Hunt, Glen M., Saguache, Colo. Loader. 1,570,256; Jan. 19.
Hunter, James Machine Company, The. (See Kevlin, Mathew F., assignor.)
Hurley Machine Company. (See Fisher, Alva J., assignor.)
Hydrola Heater Corporation. (See Richardson, Charles C., assignor.)
Hynes, Lee P., assignor to Consolidated Car-Heating Company, Albany, N. Y. Train door-control system. 1,570,304; Jan. 19.
Hygienic Tube Co. (See Lermer, Herman B., assignor.)
Ideal Removable Body Company. (See Baxter, William M., assignor.)
Ilgenfritz, Lester M. (See Affel, H. A., and Ilgenfritz.)
Incandescent Supply Company. (See Ohm, Albert J. D., assignor.)
International Harvester Company. (See Pearson, Charles, assignor.)
International Harvester Company. (See Reschke, William F., assignor.)
International Motor Company. (See Leipert, August H., assignor.)
Irwin Auger Company, The. (See Waddell, Dean T., assignor.)
Irwin, William A., and E. S. Schwartz, New York, N. Y. Headlight. 1,570,491; Jan. 19.
Isom, Elbert C., Garden City, N. Y. Calculator. 1,570,352; Jan. 19.
Izzo, Bonaventuro, Bronx, N. Y. Sidewalk mat. 1,569,934; Jan. 19.
Jackman, Arthur J., Forest Hills Borough, assignor to Vesuvius Crucible Company, Swissvale, Pa. Making crucibles. 1,570,064; Jan. 19.
Jackson, Marvin J., Youngstown, Ohio. Garment supporter. 1,570,492; Jan. 19.
Jackson, Ovid M., Jackson, Mich. Steering gear. 1,570,493; Jan. 19.
Jacobi, Ernst. (See Goerz, P., and Jacobi.)
Jacobs, James J., and R. B. Bostwick, Duquesne, Pa. Lubricating apparatus. 1,570,305; Jan. 19.
Jacobsson, Rudolf, Kagerod, Sweden. Producing alumina. 1,570,353; Jan. 19.
Jager, Frank, assignor of one-half to S. A. Spry, deceased, Chicago, Ill.; E. J. Spry, administratrix. Car door. Re16,255; Jan. 19.
Jardine, William H., Philadelphia Pa. Ventilator. 1,570,441; Jan. 19.
Jewell, Albert H., assignor to The Perfected Chimney Company, Lawrence, Kans. Depending shield attachment for oil stoves. 1,570,494; Jan. 19.
Jewell, Albert H., assignor to The Perfected Chimney Company, Lawrence, Kans. Insulating attachment for oil-stove chimneys. 1,570,495; Jan. 19.
Johnson, Horace K., assignor of one-third to I. G. Boyce and C. A. Boyce and one-third to F. C. Hacheney, John Day, Oreg. Combined spare-tire carrier and rim contractor and expander. 1,569,980; Jan. 19.
Johnson, Lorenzo, Louisville, Ky. Machine for bending wood. 1,569,935; Jan. 19.
Johnson, Olof H., Duluth, Minn. Harrow. 1,570,154; Jan. 19.
Johnson, Tomlinson F., jr., Atlanta, Ga. Expulsion-type repeating fuse. 1,569,981; Jan. 19.
Johnson, William, Chicago, Ill. Combination bottle-opening tool. 1,570,306; Jan. 19.
Jones, Claude C., Charleston, W. Va. Truss-form system. 1,570,496; Jan. 19.
Jones, Leland, et al. (See Dresser, Robert A., assignor.)
Jones, Monrowe W., Ardmore, Okla. Fishing tool. 1,570,065; Jan. 19.
Jones, William E., White, assignor of one-half to F. S. Cannon, Crossett, Ark. Latch. 1,570,497; Jan. 19.
Jordan, Hans. (See Freund, E., and Jordan.)
Josephsohn, Julius, New York, N. Y. Candy doll. Des. 69,277; Jan. 19.
K-B Pulverizer Corporation. (See Blum, J. K., and Braine, assignors.)
Kalmanovitch, Jacob, Brooklyn, N. Y. Film-printing machine. 1,570,498; Jan. 19.
Kaprielian, Gabriel M., Fresno, Calif. Wardrobe suitcase. 1,569,982; Jan. 19.
Kar Engineering Company. (See McIntosh, Frederick P., assignor.)
Karbowski, Victor, Chicago, Ill., assignor of one-half to C. Laskowski, Baltimore, Md. Pipe connection. 1,570,155; Jan. 19.
Kasch, Henry J., assignor to The Kurz-Kasch Company, Dayton, Ohio. Potater knob for radio apparatus and the like. Des. 69,278; Jan. 19.
Kasley, Alexander T., Essington, Pa., assignor to Westinghouse Electric and Manufacturing Company. Locomotive surface condenser. 1,570,354; Jan. 19.
Kaufmann, Alfred, Philadelphia, Pa. Wheel. 1,570,257; Jan. 19.
Kayser, Paul A., San Francisco, Calif. Kerosene heater. 1,569,983; Jan. 19.
Keane, John F., Bridgeport, Conn. Radio-battery-charging switch means. 1,570,499; Jan. 19.
Kearney, Arthur R., Golders Green, C. W. Taylor, London, England, and T. G. Leith, Oyne, Scotland. Chain belt. 1,570,380; Jan. 19.
Keen, John S. (See Glaenzer, H., and Keen.)
Keil, Hermann, Ettingshausen, Germany, assignor to W. Keil, New York, N. Y. Device for hoisting and lowering loads. 1,570,442; Jan. 19.
Keil, William. (See Keil, Hermann, assignor.)
Kellogg Company. (See Kellogg, John L., assignor.)
Kellogg, John L., assignor, by mesne assignments, to Kellogg Company, Battle Creek, Mich. Preparing cereal food. 1,569,861; Jan. 19.
Kelly, James J. (See Swiderski, Walter, assignor.)
Kelly, John M., et al. (See Dresser, Robert A., assignor.)
Kelsch, Jean C., Levallois-Perret, France. Rear-seat windshield. 1,570,569; Jan. 19.
Kelvinator Corporation. (See Mercer, William D., assignor.)
Kemble, Percy R., West Allis, assignor to The T. L. Smith Company, Milwaukee, Wis. Shaft-rocking mechanism. 1,569,984; Jan. 19.
Kenerson, Joseph E., Cliftondale, assignor to Trimont Manufacturing Company, Roxbury, Mass. Wrench. 1,570,586; Jan. 19.
Kennedy, Bert, Gloversville, N. Y. Golf bag. 1,570,500; Jan. 19.
Kennedy, David S., Brooklyn, N. Y., assignor to Mergenthaler Linotype Company. Typographical composing and distributing machine. 1,570,258; Jan. 19.
Kern, Elmer L. (See O'Neill, E. F., and Kern.)
Kevlin, Mathew F., Springfield, Vt., assignor to The James Hunter Machine Company, North Adams, Mass. Slatted conveyer or apron and the like. 1,570,587; Jan. 19.
Kimball, Frank J., Los Angeles, Calif., assignor to Frank J. Kimball Co. Air booster pump. 1,570,259; Jan. 19.
Kimball, Frank J., Co. (See Kimball, Frank J., assignor.)
King, Howard K., Philadelphia, Pa., assignor to Chambers Brothers Company. Brick machine and operating the same. 1,570,501; Jan. 19.
Kingsbury, Edward J. (See Kingsbury, Harry T. and E. J.)
Kingsbury, Harry T. and E. J., Keene, N. H. Drilling fixture. 1,570,156; Jan. 19.
Kirby, Clarence E., Chestertown, assignor of one-half to C. J. Butler, Easton, Md. Kinesitherapy apparatus. 1,570,307; Jan. 19.
Klinkerman, John H., assignor of one-half to J. A. Frick, Canton, Kans. Radiator attachment for tractors. 1,570,260; Jan. 19.
Kloneck, August J., New York, N. Y. Simultaneous sending and receiving system. 1,570,261; Jan. 19.
Knepper, Christopher B., Akron, Ohio. Valved air bag. 1,570,157; Jan. 19.
Knight, Norman W., Los Angeles, Calif. Direction signal. 1,570,158; Jan. 19.
Koeb, Emil, Tuckahoe, assignor, by mesne assignments, to Perfect Window regulator Corporation, Long Island City, N. Y. Window regulator. 1,570,502; Jan. 19.
Koppers Company, The. (See Darrin, Marc., assignor.)
Kornanek, John, assignor to E. Toman & Co., Chicago, Ill. Regulable tone-arm connecter. 1,570,308; Jan. 19.
Kralicek, Anton F., Baltimore, Md. Headlight. 1,570,503; Jan. 19.
Kränzlein, Georg, Sindlingen, near Hochst-on-the-Main, and M. Corell, assignors to Farbwerke vorm. Meister Lucius & Bruning, Hochst-on-the-Main, Germany. Preparing propylene-thiohydrin or propylene-ethylene-thiohydrin and products obtained thereby. 1,570,262; Jan. 19.
Kunlholm, Eric, assignor to O. W. Siebert Company, Gardner, Mass. Baby carriage. 1,569,985; Jan. 19.
Kurowski, Alfred G. F., Brooklyn, assignor to Underwood Typewriter Company, New York, N. Y. Casing for typewriting machines. 1,570,263; Jan. 19.

Kurowski, Alfred G. F., Brooklyn, assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,570,309; Jan. 19.
Kurtz, Cyrus B., Lakewood, Ohio. Brake-actuating means for motor cars. 1,570,066; Jan. 19.
Kurtzeborn, Louis G., St. Louis, Mo. Holder for check books. 1,569,986; Jan. 19.
Kurz-Kasch Company, The. (See Kasch, Henry J., assignor.)
La Chapelle, Fred N., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Making shoes. 1,570,067; Jan. 19.
Lake, Clair D., Binghamton, assignor to The Tabulating Machine Company, Endicott, N. Y. Automatically-controlled tabulating machine. 1,570,264; Jan. 19.
Lamberti, Vincenzo, Brooklyn, N. Y. Hedge trimmer. 1,569,987; Jan. 19.
Lamoureux, Joseph O., Montreal, Quebec, Canada. Stamp-canceling machine. 1,570,355; Jan. 19.
Land, Albert W., Topeka, Kans. Collar-band attachment. 1,569,988; Jan. 19.
Land, Edmund, Ridgefield Park, N. J., assignor to American Telephone and Telegraph Company. Machine-switching system. 1,569,936; Jan. 19.
Landis, Frank F., Waynesboro, Pa. Shock diffuser 1,570,159; Jan. 19.
Lane, Franklin L., assignor to P. B. Yates Machine Company, Beloit, Wis. Lubricating appliance. 1,570,356; Jan. 19.
Lane, Louis, Habana, Cuba. Roof or building tile. 1,570,504; Jan. 19.
Lapointe, Francis J., Ann Arbor, Mich. Broaching machine. 1,569,862; Jan. 19.
Laskowski, Charles. (See Karbowski, Victor, assignor.)
La Turner, Erben E., Jerome, Idaho. Mattress. 1,569,937; Jan. 19.
Laughlin, Myron P., Bath, Me. Electric telemotor apparatus. 1,570,505; Jan. 19.
Lawless, Christopher J., Ericson, Nebr. Cup hook and support. 1,569,863; Jan. 19.
Lawrence, Franklin, Portland, Me. Controlling device for heaters and the like. 1,570,570; Jan. 19.
Lawrenz, William F., Long Beach, Calif. Dental tooth-pick. 1,570,357; Jan. 19.
Lee, John M., Detroit, Mich. Pump mechanism. 1,570,381; Jan. 19.
Lebbink, Karel A., assignor to Naamlooze Vennootschap Philips' Gloeilampenfabrieken, Eindhoven, Netherlands. Electrode for discharge tubes. 1,570,265; Jan. 19.
Lecomte, Alphonse, Fall River, assignor to Draper Corporation, Hopedale, Mass. Thread-cutting temple for looms. 1,570,588; Jan. 19.
Le Cras, Thomas J., Toronto, Ontario, Canada. Truss pad. 1,570,571; Jan. 19.
Lee, Leif, Youngstown, Ohio. Rolling mill. 1,570,068; Jan. 19.
Leech, Francis B., and E. W. Titus, Washington, D. C., assignors to Rae-Lite Manufacturing Co., Baltimore, Md. Parking light. Re16,254; Jan. 19.
Le Gresley, Stanley G., Flint, Mich. Combined parallel ruie and compass. 1,569,938; Jan. 19.
Leipert, August H., assignor to International Motor Company, New York, N. Y. Universal joint. 1,569,989; Jan. 19.
Leith, Thomas G. (See Kearney, A. R., Taylor, and Leith.)
Leonard, Peter G., West Tulsa, Okla. Pipe-gripping device. 1,570,069; Jan. 19.
Leppert, Henry E., New Gritain, assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Electric switch. 1,569,864; Jan. 19.
Lermer, Herman B., assignor to Hygienic Tube Co., Newark, N. J. Collapsible-tube-closing apparatus. 1,569,865; Jan. 19.
Lesser-Carson Company. (See O'Brien, Thomas S., assignor.)
Levine, Philip, Brooklyn, N. Y. Holder for rolled material. 1,570,358; Jan. 19.
Lewis, Wilfred, Haverford, Pa. Attachment for roll-over pattern-drawing molding machines. 1,570,506; Jan. 19.
Liedtke, Louis C. (See Rispel, A., and Liedtke.)
Lieuwen, Peter, Harrison, S. Dak. Egg tray for incubators. 1,569,866; Jan. 19.
Lightfoot, Edwin N., New York, N. Y., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Electric appliance. 1,570,507; Jan. 19.
Lindhorst, Henry B., Springfield, Mo. Antiskid attachment for automobile wheels. 1,570,359; Jan. 19.
Lindsay, William, Denver, Colo. Illuminated step plate. 1,569,867; Jan. 19.
Linotype and Machinery Limited. (See Banks, John N., assignor.)
Linotype and Machinery Limited. (See Goulding, Benjamin J. J., assignor.)
Lippoldt, George F., Kinsley, Kans. Portable loader. 1,570,360; Jan. 19.
Ljungberg, Lawrence R., and W. A. Anderberg, assignors to Art Metal Construction Company, Jamestown, N. Y. Sheet-metal door and analogous structure. 1,570,310; Jan. 19.
Ljungström, Walfrid, Matfors, Sweden. Machine for packing paper rolls. 1,570,266; Jan. 19.
Loeb, Henry, New York, N. Y. Antitheft device. 1,569,868; Jan. 19.
Look, Fannie B., et al., trustees. (See Colby, Harold L., assignor.)
Lovering, Ersul E., Watford City, N. Dak. Feed box. 1,569,990; Jan. 19.
Lowenstein, Frank E., Atlanta, Ga. Container. 1,570,572; Jan. 19.
Lund, Thomas, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for use in the manufacturing of shoes. 1,569,991; Jan. 19.
Lungstras Dyeing and Cleaning Company. (See Lungstras, Paul, assignor.)
Lungstras, Paul, assignor to Lungstras Dyeing and Cleaning Company, St. Louis, Mo. Clothes-drying apparatus. 1,570,508; Jan. 19.
Lychou, Robert A., Chester, Pa. Window washer. 1,570,509; Jan. 19.
Lyhne, Anker S., Bridgeport, Conn. Vanity box. 1,570,382; Jan. 19.
Lyman, Edgar C., Burbank, Calif. Device for removing tires or wheels from motor trucks. 1,570,070; Jan. 19.
Lynch, Jerry. (See Wallace, Stephen J., assignor.)
M. Woelm A. G. (See Hahn, Martin, assignor.)
MacCarthy, John D., and H. O. Moulton, Ishpeming, Mich. Method and apparatus for conducting mining operations. 1,570,386; Jan. 19.
Mackenzie, Donald G., and M. H. Necker, Montreal, Quebec, Canada. Road-grading machine. 1,570,267; Jan. 19.
Mackenzie, Fred L. (See Goddu, G., and Mackenzie.)
Macleod, Eldon, et al., trustees. (See Colby, Harold L., assignor.)
MacLeod, Sidney B., South Chicago, Ill. Fish lure. 1,569,993; Jan. 19.
Maguire, Joseph T., Chevy Chase, Md. Metallic roof for tanks. 1,570,311; Jan. 19.
Maline Mills Company, The. (See Siewers, Walter L., assignor.)
Mallory, Harry C., Bellport, N. Y., assignor, by mesne assignments, to American Radiator Company, Chicago, Ill. Producing expansible-collapsible elements. 1,570,312; Jan. 19.
Manhattan Electrical Supply Company. (See Yngve, Victor, assignor.)
Manly, Charles M., Richmond Hill, N. Y., assignor to O. & W. Company. Tire and demountable rim. 1,570,590; Jan. 19.
Marchese, Paul, Norristown, Pa. Toy. 1,570,511; Jan. 19.
Martin, Dorr R., Detroit, Mich. Thermostatic control device for fuel burners. 1,569,994; Jan. 19.
Marx, Louis, New York, N. Y. Figure toy. 1,570,268; Jan. 19.
Mason Regulator Company. (See Colby, Harold L.)
Massy, Skiles F., Pittsburgh, Pa. Sanitary cuspidor. 1,570,512; Jan. 19.
Mattingly, Frank H., et al. (See Herr, Von H., assignor.)
Mattingly, Frank H., Washington, D. C., assignor of one-third to A. E. Zintl, Woodbury, N. J., and one-third to R. V. Willett, Washington, D. C. Napkin moistener. 1,570,163; Jan. 19.
Matz, Akacius E. (See Bruhn, J. H., and Matz.)
Mavrogenis, Aristote, Milwaukee, Wis. Wireless apparatus. 1,570,444; Jan. 19.
Maxted-Massey, Edgar, South Ashford, England. Pianoforte. 1,570,513; Jan. 19.
Maxwell, Leslie F. (See Grain, F. H., and Maxwell.)
Mayer, Leo, Chicago, Ill. Temporary cover for bathtubs. 1,570,164; Jan. 19.
McAuliff, Edward, et al. (See Biggers, Lee P., assignor.)
McCandlish, Douglas, Leeds, and W. R. Atkin, Heckmondwike, England. Treatment of hides and skins for manufacture into leather. 1,570,383; Jan. 19.
McCann, Michael, Glenmorris, assignor to Frederick Osann Company, New York, N. Y. Thread puller for automatic-stop sewing machines. 1,569,992; Jan. 19.
McClure, Edward, assignor of one-half to F. P. Smith, Chicago, Ill. Platform structure. 1,570,384; Jan. 19.
McCollum, Fenelon, jr., Mansfield Depot, Conn. Figure wheeled toy. 1,570,160; Jan. 19.
McConnel, Charles W., et al., trustees. (See Colby, Harold L., assignor.)
McCoy, Joseph A. (See Cardey, George W., assignor.)
McCurdy, Robert P., Pittsburgh, Pa., and F. W. Hochstetter, Dayton, Ohio, assignors to J. C. Trees, Pittsburgh, Pa. Headlight. 1,570,589; Jan. 19.
McFarland, Benjamin M. and M. A. Dimmick, El Dorado, Kans. Long-stroke amplifying device. 1,570,385; Jan. 19.
McIntosh, Frederick P., assignor to Kar Engineering Company, Incorporated, New York, N. Y. Connecter switch. 1,569,869; Jan. 19.
McKee, Ralph H., New York, N. Y. Motor fuel. 1,570,161; Jan. 19.
McKeehan, John W., Contra Costa County, and G. J. Henry, San Francisco, Calif. Warming floors. 1,570,162; Jan. 19.
McQuirk, Phil S., Audubon, Iowa. Golf bag. 1,570,510; Jan. 19.
McSorley, Emma R., Woodhaven, N. Y. Food product. 1,570,443; Jan. 19.
Mebane, James A., South Boston, Va. Axle brace and positioner. 1,569,995; Jan. 19.
Mee, James I., Hamilton, Ohio. Alloy. 1,569,996; Jan. 19.

Meingast, Rudolf, and M. Mugdan, assignors to Consortium für elektrochemische Industrie G. m. b. H., Munich, Germany. Manufacturing acetic anhydride. 1,570,514; Jan. 19.
Melancon, Joseph A., Donaldsonville, La. Cane harvester. 1,570,269; Jan. 19.
Melikov, Gregor, Chicago, Ill., assignor to National Advertising Contest Co. Advertising-contest card. Des. 69,279; Jan. 19.
Meltzer, Ellie, New York, N. Y. Hand bag. 1,570,515; Jan. 19.
Mercer, William D., assignor by mesne assignments, to Kelvinator Corporation, Detroit, Mich. Automatic electric machinery. 1,570,591; Jan. 19.
Mercier, Joseph, assignor of one-half to L. G. Gilleleu, Los Angeles, Calif. Jack. 1,570,071; Jan. 19.
Mergenthaler Linotype Company. (See Kennedy, David S., assignor.)
Merrill, Allan B., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Attaching rubber to metal and article produced thereby. 1,570,445; Jan. 19.
Merrill, Ira J., Seattle, Wash. Trailer. 1,570,165; Jan. 19.
Mers, Otto H., West Allis, and P. D. Humleker, Fond du Lac, assignors to Convertible Door Manufacturing Company, West Allis, Wis. Locking means. 1,570,072; Jan. 19.
Metallbank und Metallurgische Gesellschaft, Aktienge sellschaft. (See Henkel, Eugen, assignor.)
Meyer, Daniel F., assignor to R. D. Swisher Mfg. Co., Chicago, Ill. Hand stamp for convex surfaces. 1,570,387; Jan. 19.
Meyers, Leo L. (See Wood, A. C., and Meyers.)
Michigan Steel Castings Company. (See Flintermann, Rudolph F., assignor.)
Mikle, Clinton O., Portland, Oreg. Locomotive. 1,570,313; Jan. 19.
Miller, Frank B., Kansas City, Mo. Class-room wardrobe and blackboard. 1,570,388; Jan. 19.
Miller, Joseph H., Harrisburg, Tex. Dispensing can. 1,570,270; Jan. 19.
Miller, Thomas D., Clarkesville, Md. Shingle. 1,570,516; Jan. 19.
Milwaukee Dairy Supply Mfg. Co. (See Strandt, Gustav, assignor.)
Minnick, Howard B., Chicago, Ill. Game. 1,570,517; Jan. 19.
Minor, Burt S., Los Angeles, assignor to Regan Forge and Engineering Company, Inc., San Pedro, Calif. Sheave block. 1,570,271; Jan. 19.
Mitchell, Joseph S., Chicago, Ill., assignor to Sullivan Machinery Company. Method and apparatus for drilling holes. 1,570,518; Jan. 19.
Mittinger, George E., Cleveland Heights, Ohio. Fastening and clamping ring. 1,570,519; Jan. 19.
Möller, Conrad, Berlin-Charlottenburg, Germany. Discharging device for vehicles. 1,569,997; Jan. 19.
Mombaruzzo, Luigi, New York, N. Y. Thermostatic control. 1,570,446; Jan. 19.
Morgenier, Robert, assignor of one-sixth to G. A. Russell and one-half to H. C. Russell, Oakland, Calif. Treating seed hulls and product. 1,570,389; Jan. 19.
Morrell, Jacque C., assignor to Universal Oil Products Company, Chicago, Ill. Refining oils. 1,569,870; Jan. 19.
Morrell, Jacque C., assignor to The Universal Oil Products Company, Chicago, Ill. Refining hydrocarbon oil. 1,569,871; Jan. 19.
Morrell, Jacque C., assignor to The Universal Oil Products Company, Chicago, Ill. Refining cracked hydrocarbon oil. 1,569,872; Jan. 19.
Morris, Alonzo, Sabina, Ohio. Grinding tool. 1,570,166; Jan. 19.
Mortensen, August, assignor to The "Frisco" Mfg. Co. Inc., San Francisco, Calif. Pedal-operated drum beater and cymbal sounder. 1,570,167; Jan. 19.
Mortensen, August, assignor to The "Frisco" Mfg. Co. Inc., San Francisco, Calif. Musical-instrument support. 1,570,168; Jan. 19.
Moss, David H., assignor to Brandes Laboratories, Inc., Newark, N. J. Casing for a phonograph loud-speaker unit. Des. 69,280; Jan. 19.
Moss, Samuel A., Oakland, Calif. Shock absorber for vehicles. 1,569,873; Jan. 19.
Moss, Sanford A., Lynn, Mass., assignor to General Electric Company. Gas producer. 1,570,314; Jan. 19.
Motor Player Corporation. (See Hanson, Clinton H., assignor.)
Moulton, Henry O. (See MacCarthy, J. D., and Moulton.)
Mugdan, Martin. (See Maingast, R., and Mugdan.)
Müller, Friederich, assignor to The Whitney Mfg. Co., Hartford, Conn. Power-transmission chain. 1,570,272; Jan. 19.
Müller, Friederich, assignor to The Whitney Mfg. Co., Hartford, Conn. Power-transmission chain. 1,570,273; Jan. 19.
Müller, Friederich, assignor to The Whitney Mfg. Co., Hartford, Conn. Power-transmission chain. 1,570,274; Jan. 19.
Muller, George W., Washington, D. C. Railway rail and tie securing device. 1,570,390; Jan. 19.
Murphy, Morton, Rushville, Ind. Electric toaster. 1,570,447; Jan. 19.
Murphy, P. H., Company. (See Bonsall, Charles D., assignor.)
Musgrave, Joseph L., and R. G. Crittall, London, England. Apparatus for constructing reenforced concrete structures which contain embedded means for circulating a heating or cooling medium. 1,570,448; Jan. 19.
Myers, Archie, Sacramento, Calif. Pet-cock-operating device. 1,569,998; Jan. 19.
Myers, Lewis C. (See Hess, E. B., and Myers.)
Naamlooze Vennootschap Bataafsche Petroleum Maatschappij. (See de Brey, Jan H. C., assignor.)
Naamlooze Vennootschap Philips Gloeilampenfabrieken. (See Lebbink, Karel A., assignor.)
Nagel, Carl E. (See Small, F. F., and Nagel.)
Nalle, Ella A., Baltimore, Md. Hat bag. 1,570,275; Jan. 19.
National Advertising Contest Co. (See Melikov, Gregor, assignor.)
National Automatic Tool Company, The. (See Dine, Frank W., assignor.)
National Carbon Company. (See Ocean, Charles, assignor.)
National Supply Company, The. (See Goeser, E. W., and Davidson, assignors.)
Necker, Marius H. (See Mackenzie D. G., and Necker.)
Nelson, Adolph O., Chicago, Ill. Holder for toilet articles. Des. 69,281; Jan. 19.
Nelson, Joseph E., & Sons. (See Tanner, Inos B., assignor.)
Nelson, Mark W., Lincoln, and W. F. Nelson, College View, Nebr. Plastic composition, a putty or a filler cement. 1,570,169; Jan. 19.
Nelson, Victor E., Redford, Mich. Clothes tongs. 1,569,999; Jan. 19.
Nelson, Walter F. (See Nelson, Mark W., and W. F.)
Nevatt, Charles, Glasgow, Scotland. Window-blind fitting. 1,570,573; Jan. 19.
Nevatt, Charles, Glasgow, Scotland. Roller-window-blind fitting. 1,570,574; Jan. 19.
Newby, Neni D., New York, N. Y., assignor to American Telephone and Telegraph Company, Indicating means for calling dials. 1,569,874; Jan. 19.
Newhall, Henry B., Plainfield, N. J. Switch indicator. 1,570,315; Jan. 19.
Newman, Samuel, Cincinnati, Ohio. Necktie presser. 1,570,391; Jan. 19.
Niles-Bement-Pond Company. (See Blood, H. L., and Deale, assignors.)
Niles-Bement-Pond Company. (See Rausch, Roswell H., assignor.)
Nixon, Horace C., Saskatoon, Saskatchewan, Canada. Closure for pipes, valves, and other vessels. 1,569,875; Jan. 19.
Noe, William R., & Sons. (See Villaret, Gustave E., assignor.)
Non-Explosive Corporation of America. (See Cohn, Jacob, assignor.)
Nordberg, Bruno V., deceased, Milwaukee, Wis.; H. C. Nordberg, executrix. Valve for air compressors and the like. 1,570,392; Jan. 19.
Nordberg, Helena C., executrix. (See Nordberg, Bruno V.)
Norman, Francis H., Roann, Ind. Tractor guide. 1,570,276; Jan. 19.
Norsk Hydro-Elektrisk Kvaelstofaktieselskab. (See Cederberg, Ivar W., assignor.)
Noyes, Harold E., Claremont, N. H. Concrete form. 1,569,876; Jan. 19.
Nystrom, Martin, Chicago, Ill., assignor to Brunswick-Balke-Collender Company, Wilmington, Del. Cabinet for a sound-reproducing machine. Des. 69,282; Jan. 19.
O. & W. Company. (See Manly, Charles M., assignor.)
Oberle, Alfred, Oak Park, Ill., assignor of one-half to T. E. Scofield, Kansas City, Mo. Recovering vanadium from petroleum hydrocarbons. 1,570,170; Jan. 19.
O'Brien, Thomas S., Oakland, assignor to Lesser-Carson Company, San Francisco, Calif. Road-working apparatus. 1,570,171; Jan. 19.
Oehrli, Arthur O., Williamsport, Pa. Testing appliance. 1,570,520; Jan. 19.
Ohio Match Company, The. (See Parker, Lucian E., assignor.)
Ohm, Albert J. D., New York, N. Y., assignor to Incandescent Supply Company. Radiocabinet. Des. 69,283; Jan. 19.
Olsen, John K., assignor to Stewart-Warner Speedometer Corporation, Chicago, Ill. Strainer for vacuum tanks. 1,570,073; Jan. 19.
O'Neil, Murt L., Warland, Mont., assignor to R. J. O'Neil, Swissbome, Oreg. Gravel bin. 1,570,172; Jan. 19.
O'Neil, Robert J. (See O'Neil, Murt L., assignor.)
O'Neill, Eugene F. and E. L. Kern, Minneapolis, Minn. Pool-table ball collecting and returning device. 1,570,173; Jan. 19.
Optische Anstalt C. P. Goerz Aktiengesellschaft. (See Goerz, P., and Jacobi, assignors.)
Osann, Frederick, Company. (See McCann, Michael, assignor.)
Ocean, Charles, Woodcliff, N. J., assignor to National Carbon Company, Inc. Flash light. 1,570,393; Jan. 19.

Osgood, Louis A., Hartford, Conn., and E. E. Wolf, Springfield, Ohio, assignors to E. and T. Fairbanks and Company, St. Johnsbury, Vt. Scale. 1,570,074; Jan. 19.

Otto, Albert T., & Sons. (See Harter, Hans, assignor.)

Owens, John B., Oleika, Ky. Boring machine. 1,570,181; Jan. 19.

Owens, Samuel L., Washington, D. C. Apparatus for maintaining constant temperature on a portion of the body. 1,569,877; Jan. 19.

Packard Motor Car Company. (See Hammerl, Jacob, assignor.)

Page, Ralph E., Binghamton, assignor to The Tabulating Machine Company, Endicott, N. Y. Card-delivering device. 1,570,182; Jan. 19.

Paine, George G., Ludlow, Ky. Shuttle casing for sewing machines. 1,570,075; Jan. 19.

Palermiti, Joseph, Detroit, Mich. Radiator. 1,570,316; Jan. 19.

Parker, Lucian E., assignor to The Ohio Match Company, Wadsworth, Ohio. Sheet-feeding mechanism for forming machines. 1,570,592; Jan. 19.

Parliament, Hector H., Henry, S. Dak. Grain-elevator attachment. 1,570,521; Jan. 19.

Parks-Cramer Company. (See Hodge, William B., assignor.)

Parks, Joseph L., Henderson, N. C. Cotton chopper. 1,570,277; Jan. 19.

Patent Button Company, The. (See Abel, Walter T., assignor.)

Patent Button Company, The. (See Purinton, Forrest G., assignor.)

Patent Button Company, The. (See White, Franklin R., assignor.)

Paterson, May H. (See Paterson, William and M. H.)

Paterson, William and M. H., Oakland, Calif. Truck tire traction chain. 1,570,174; Jan. 19.

Patterson, Chester J., Lancaster, Pa. Road equalizer. 1,570,522; Jan. 19.

Pawling and Harmschfeger Company. (See Wehner, Lewis, assignor.)

Payne, Walter B., assignor to The Todd Company, Inc., Rochester, N. Y. Printing machine. 1,570,175; Jan. 19.

Peacock, Samuel, and N. E. Cook, Wheeling, W. Va. Degassing and deoxidizing steel. 1,570,176; Jan. 19.

Pearson, Charles, Chicago, Ill., assignor to International Harvester Company. Power lift for mower bars. 1,569,878; Jan. 19.

Pearson, Charles H. (See Bold, Frederick W., assignor.)

Pease, Isaac M., Cincinnati, Ohio. Arch support. 1,570,000; Jan. 19.

Pease, Isaac M., Cincinnati, Ohio. Arch support. 1,570,001; Jan. 19.

Pekett Headwear Co. (See Goldstein, Isidore, assignor.)

Penn Spring Works Incorporated. (See Robinson, Frederick D., assignor.)

Pennell, Reginald H. L., Cairo, Egypt. Filtration of water or liquid. 1,570,523; Jan. 19.

Pérez, Manuel H., San Pedro Sula, Honduras. Hemstitch machine. 1,570,278; Jan. 19.

Perfected Chimney Company, The. (See Jewell, Albert H., assignor.)

Perfect Window Regulator Corporation. (See Koeb, Emil, assignor.)

Performo-Toy Company. (See Grove, Rene D., assignor.)

Perry, Joseph M., Mayfield, Pa. Nut lock. 1,570,002; Jan. 19.

Peters, Frank R., New York, N. Y., assignor to Franklin Railway Supply Company. Controlling mechanism for locomotive booster motors. 1,570,394; Jan. 19.

Petersen, Frank H., assignor of one-half to C. N. Rose, Denver, Colo. Weight for the horns of cattle. 1,570,524; Jan. 19.

Peterson, William, Brooklyn, N. Y., assignor of one-fourth to C. E. Stewart, St. Paul, Minn. Ejector pawl. 1,570,317; Jan. 19.

Phillips, Bertram T., assignor to W. H. Hughes, Cleveland, Ohio. Shock absorber. 1,570,395; Jan. 19.

Pickering, Albert V., assignor to Townsend Manufacturing Corporation, West Townsend, Mass. Oil burner. 1,570,003; Jan. 19.

Picó, Carlos S., San Juan, P. R. Air brake. 1,570,279; Jan. 19.

Pitman, Earle C., Parlin, N. J., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Nonstatic photographic film. 1,570,076; Jan. 19.

Pitman, Earle C., Parlin, N. J., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Nonstatic photographic film. 1,570,077; Jan. 19.

Pitman, Earle C., Parlin, N. J., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Nonstatic photographic film. 1,570,078; Jan. 19.

Pitman, Earle C., Parlin, N. J., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Nonstatic film and backing solution for use in making same. 1,570,079; Jan. 19.

Pittelkow, August, assignor to Erie Can Company, Chicago, Ill. Lock for box lids and the like. 1,570,449; Jan. 19.

Pittsburgh Plate Glass Company, The. (See Galt, Hugh A., assignor.)

Pointer, James B., Cleveland, Ohio. Sanding block. 1,570,177; Jan. 19.

Pollard, Edson T., Niagara Falls, N. Y. Stone-cutting machine. 1,570,318; Jan. 19.

Pollock, Gordon B., Hollywood, Calif. Bracket. 1,570,396; Jan. 19.

Pond, George F., East Aurora, assignor to G. J. Evans, Buffalo, N. Y. Printing apparatus. 1,570,450; Jan. 19.

Pratt & Whitney Company. (See Buckingham, Earle, assignor.)

Pratt & Whitney Company. (See Doane, John A., assignor.)

Preston, Clarence S., San Diego, Calif. Tire valve. 1,570,397; Jan. 19.

Prevost, Frank, Lead, S. Dak. Code machine. 1,570,178; Jan. 19.

Pritner, Lindsay C., and H. C. Dorris, Johnstown, Pa. Making side frames. 1,569,879; Jan. 19.

Prouty, Morton D., R. Craig, C. Rawlings, and H. Carlson, Galva, Iowa. Device for illuminating oil gauges. 1,570,179; Jan. 19.

Pruitt, Wesley C. (See Helmle, Herman C., assignor.)

Pulliam, William Z., Los Angeles, Calif. Water plug. 1,570,180; Jan. 19.

Purinton, Forrest G., assignor to The Patent Button Company, Waterbury, Conn. Button. 1,570,398; Jan. 19.

Purinton, Forrest G., assignor to The Patent Button Company, Waterbury, Conn. Seal or tag for meats. 1,570,399; Jan. 19.

Purinton, Forrest G., assignor to The Patent Button Company, Waterbury, Conn. Seal or tag for meats. 1,570,400; Jan. 19.

Purvis, Edward R., Shreveport, La. Pump jack. 1,570,280; Jan. 19.

Pyrene Manufacturing Company. (See Hobbs, John W., assignor.)

Rae-Lite Manufacturing Co. (See Leech, F. B., and Titus, assignors.)

Railway Utility Company. (See Hartwig, William G., assignor.)

Ramsburg, Charles J., Edgeworth, Pa. Method and apparatus for conditioning air. 1,570,184; Jan. 19.

Rausch, Roswell H., Plainfield, N. J., assignor to Niles-Bement-Pond Company, New York, N. Y. Saddle-traversing mechanism. 1,570,401; Jan. 19.

Rauschenberg, Sidney, San Diego, Calif. Decorative exfoliated shell and producing the same. 1,570,183; Jan. 19.

Rawlings, Clifford. (See Prouty, M. D., Craig, Rawlings, and Carlson.)

Rayburn, Alden G. (See Sumner, J. W., and Rayburn.)

Raymond, Achille F., Grenoble, France. Two-head rotatable fastening device. 1,570,281; Jan. 19.

Raymond, Lambert L. (See Ripczinske, Lambert L.)

Reach, William F., Chicopee, Mass., assignor to A. G. Spalding & Bros., New York, N. Y. Discus. 1,570,185; Jan. 19.

Reed-Prentice Company. (See Hoagland, Frank O., assignor.)

Reed, Ralph R., Bellingham, Wash. Detective photographing system. 1,570,004; Jan. 19.

Rees, Claude, and C. F. Hine, San Francisco, Calif. Drying apparatus. 1,569,880; Jan. 19.

Regan Forge and Engineering Company, Inc. (See Minor, Burt S., assignor.)

Reiber, Cora S. (See Dodman, A. C., jr., and Reiber.)

Reid, James S., assignor to The Easy-On Cap Company, Cleveland, Ohio. Tank or can closure. 1,569,881; Jan. 19.

Reinbold, Herman and H. R., Omaha, Nebr.; said H. Reinbold assignor to said Herman Reinbold. Medium for bleaching, cracking, and desulphurizing petroleum and other hydrocarbon compounds and preparing same. 1,570,005; Jan. 19.

Reinbold, Herman and H. R., Omaha, Nebr.; said H. Reinbold assignor to said Herman Reinbold. Treating alumino-silicates. 1,570,006; Jan. 19.

Reinbold, Hugo. (See Reinbold, Herman and H.)

Reiter, George, Cincinnati, Ohio. Extension-limiting means for grass shears. 1,570,282; Jan. 19.

Remington Typewriter Company. (See Holden, Joseph B., assignor.)

Renard, Albert. (See Renard, Pierre and A.)

Renard, Pierre and A., Nonancourt, France. Stopping device for looms. 1,570,283; Jan. 19.

Renner, Herbert, assignor to Forest Research Corporation, Philadelphia, Pa. Dyeing wood. 1,570,575; Jan. 19.

Replogle, John R., assignor to The Security Trust Company, trustee, Detroit, Mich. Sealing strip. 1,570,186; Jan. 19.

Reschke, William F., Wichita, Kans., assignor to International Harvester Company, Chicago, Ill. Straw-spreading attachment. 1,569,882; Jan. 19.

Resek, Marc. (See Chadwick, L. S., and Resek.)

Reuter, Harry W., Kankakee, assignor of one-half to J. S. Burton, Chicago, Ill. Combined radiator shield and humidifier. 1,570,402; Jan. 19.

Reynolds, Carrie B. (See Reynolds, Charles T., assignor.)

Reynolds, Charles T., assignor of one-sixth to C. B. Reynolds, Columbia, S. C. Lock-gear disk wheel. 1,570,319; Jan. 19.

Rhodes, Russell I., North Attleboro, Mass. Jewelry-box hinge. 1,570,411; Jan. 19.

Richardson, Charles C., New York, N. Y., by process of law assignor to Hydrola Heater Corporation. Combination burner and generator. 1,569,883; Jan. 19.

Richardson, Nova E., Kansas City, Mo. Automatic cut-off. 1,570,007; Jan. 19.

Richardson, Ralph B., Peoria, Ill. Gas main controller. 1,570,008; Jan. 19.

Riddle, Edward N., Company, The. (See Crowell, Frank S., assignor.)

Ringler, William A., New York, N. Y., assignor to The Globe-Wernicke Company. Visible-index device. 1,569,884; Jan. 19.

Ripczinske, Lambert L., by change of name L. L. Raymond, Robbinsdale, Minn. Christmas-tree support and water container. 1,570,408; Jan. 19.

Rippin, William H., Desford, near Leicester, England. Dough-molding and like machine. 1,570,525; Jan. 19.

Rispel, Alexander and L. C. Liedtke, Chicago, Ill. License-plate holder. Des. 69,284; Jan. 19.

Rittenhouse, Walter B. (See Fisher, H. H., and Rittenhouse.)

Riverview Park Company. (See Wolkenbauer, Gustav, assignor.)

Rivitz, Charles S., Cleveland, Ohio. Ladder shoe. 1,570,576; Jan. 19.

Robbins, Meyer L., assignor to Untermeyer, Robbins & Co., New York, N. Y. Gem-set ring. Des. 69,285; Jan. 19.

Robbins, Meyer L., assignor to Untermeyer, Robbins & Co., New York, N. Y. Finger ring. Des. 69,286; Jan. 19.

Robbins, Meyer L., assignor to Untermeyer, Robbins & Co., New York, N. Y. Gem-set finger ring. Des. 69,287; Jan. 19.

Robblee, Ide L., Southbridge, Mass. Sled. 1,569,885; Jan. 19.

Robinson, Frederick D., assignor to Penn Spring Works Incorporated, Baldwinsville, N. Y. Spring bumper for automobiles. 1,570,526; Jan. 19.

Rodd, Roy. (See Appleby, William H., assignor.)

Rogers, George M., (See Garrett, J. E., and Rogers.)

Rohner, Philip B., assignor of one-half to A. A. Drees, Carroll, Iowa. Air-brake-release valve. 1,570,187; Jan. 19.

Romero, Antonio S., Santurce, and L. R. Gonzalez, San Juan, P. R. Air washing and conditioning apparatus. 1,570,577; Jan. 19.

Ronca, Louis and S. Santoro, assignors to Bumper and Fender Co., Inc., Jersey City, N. J. Combined bumper and fender. 1,570,527; Jan. 19.

Rose, Carl N. (See Petersen, Frank H., assignor.)

Rosenberg, Benjamin, Brooklyn, N. Y. Display receptacle. 1,569,886; Jan. 19.

Rosenberg, Jacob. (See Allendorf, Friedrich, assignor.)

Ross, J. J., Mill Furnishing Company. (See Ross, James J., assignor.)

Ross, James J., assignor to The J. J. Ross Mill Furnishing Company, Portland, Oreg. Grain huller. 1,570,081; Jan. 19.

Rotinoff, Alexander G., London, England. Pile and pile driving. 1,570,404; Jan. 19.

Royal Typewriter Company. (See Handley, George F., assignor.)

Royal Typewriter Company. (See Hess, E. B., and Myers, assignors.)

Royal Typewriter Company. (See Hess, Edward B., assignor.)

Royce, Howard W., Chicago, Ill. Time-controlled regulator for heating systems. 1,570,082; Jan. 19.

Rumely, Vincent P., assignor to Essex Motors, Detroit, Mich. Quarter pad for vehicle tops. 1,570,412; Jan. 19.

Rumford Chemical Works. (See Wilson, Ellery L., assignor.)

Runzi, Charles, St. Louis, Mo. Knife-blade sharpener. 1,570,083; Jan. 19.

Russell, Gregg A., et al. (See Morgenier, Robert, assignor.)

Russell, Hugh C., et al. (See Morgenier, Robert, assignor.)

Russell, Robert A., Ridgewood, N. J. Ash receiver. Des. 69,288; Jan. 19.

Russell, Thomas C., Chicago, Ill. Electric-resistance element. 1,570,084; Jan. 19.

Salerno, Ferdinando G., Chicago, Ill. Machine for coating wafers. 1,570,405; Jan. 19.

Salisbury, Robert F., New Kensington, assignor to Aluminum Company of America, Pittsburgh, Pa. Polishing machine. 1,570,406; Jan. 19.

Sanders, Albert D., jr., Evanston, assignor to Benjamin Electric Manufacturing Company, Chicago, Ill. Refrigerator. 1,570,009; Jan. 19.

Santoro, Stanislao. (See Ronca, L., and Santoro.)

Sargent, Charles E., Rock Island, Ill. Poppet-valve rotator. 1,569,887; Jan. 19.

Saze, Walter E., Los Angeles, Calif. Excavator. 1,570,085; Jan. 19.

Schaffer, John C., Pittsburg, Pa. Nodulisation. 1,570,086; Jan. 19.

Schaffner, Leon R., Fort Dodge, Iowa. Coaster wagon. 1,570,528; Jan. 19.

Scherer, Benoit. Courbevoie, France. Orientable headlight for automobiles. 1,570,284; Jan. 19.

Schleyer, Victor, assignor, by mesne assignments, to Dean Hill Pump Company, Anderson, Ind. Cleaning lubrication of deep-well pumps. 1,570,285; Jan. 19.

Schneider, Leopold C., Hatboro, Pa. Trap. 1,570,578; Jan. 19.

Schnoebelen, Louis V., Iowa City, Iowa. Planter. 1,570,087; Jan. 19.

Schoeller, Alfred, Frankfort-on-the-Main, Germany. Electric cigar lighter. 1,570,286; Jan. 19.

Schou, Einar V., Paisgaard, near Juelsminde, Denmark. Manufacture of margarine and edible fats. 1,570,529; Jan. 19.

Schutte and Koerting Company. (See Zimmermann, Hans J., assignor.)

Schwab, Louis J., Peoria, Ill. Turnover mechanism. 1,570,088; Jan. 19.

Schwartz, Edward S. (See Irwin, W. A., and Schwartz.)

Schwartzberg, Alter L., Shreveport, La. Ventilator. 1,570,089; Jan. 19.

Scofield, Thomas E. (See Oberle, Alfred, assignor.)

Scovill Manufacturing Company. (See Dowd, Lewis M., assignor.)

Scovill Manufacturing Company. (See Warner, Frank E., assignor.)

Scowcroft, Heber, jr., Ogden, Utah. Fuel-feeding system. 1,570,010; Jan. 19.

Security Trust Company, The. (See Replogle, John R., assignor.)

Seidel, Albin, assignor to The Becker-Seidel Company, Cleveland, Ohio. Wall-radiator support. 1,570,407; Jan. 19.

Seil, Helmut, assignor to Siemens & Halske, Aktiengesellschaft, Siemensstadt, near Berlin, Germany. Telephone. 1,570,287; Jan. 19.

Serewicz, Albert E., Chicago, Ill. Spark plug and making same. 1,570,320; Jan. 19.

Serafé, Jacques E., Brussels, Belgium. Machinasm for raising and lowering the window frames in convertible vehicle bodies. 1,570,011; Jan. 19.

Shaw, Nathan. (See Strouse, A. L., and Weinschenk, assignor.)

Sheets, William P., Glendale, Ariz. Dirigible headlight. 1,570,188; Jan. 19.

Sheller, Harry E., Portland, Ind. Steering wheel. 1,569,888; Jan. 19.

Shoecraft, Judson, Eskridge, Kans. Train-control system. 1,570,530; Jan. 19.

Siebert, O. W., Company. (See Kuniholm, Eric, assignor.)

Siegel, Maude, assignor to Franklin Simon & Co., Inc., New York, N. Y. Dress-trimming ornament. Des. 69,289; Jan. 19.

Siemens & Halske, Aktiengesellschaft. (See Duhme, Emil, assignor.)

Siemens & Halske, Aktiengesellschaft. (See Seil, Helmut, assignor.)

Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung. (See Gleichmann, H., and Stender, assignors.)

Siewers, Walter L., assignor to The Maline Mills Company, Winston-Salem, N. C. Lady's undergarment. 1,569,889; Jan. 19.

Silverstein, Oscar. (See Van Valkenberg, Eber H., assignor.)

Simmons, Robert P., Cleveland, Ohio. Electric hair waver. 1,570,012; Jan. 19.

Simoneau, Simon, Chicopee Falls, Mass. Hat holder. 1,570,451; Jan. 19.

Simpson, George S. (See Crossley, M. L., and Simpson.)

Simpson, John H., Providence, R. I. Contact-filing device. 1,570,090; Jan. 19.

Singer Manufacturing Company, The. (See Clayton, Andrew B., assignor.)

Sjobring, Nels P., and M. Swanson, assignors to Globe Steel Tubes Company, Milwaukee, Wis. Adjusting means for rollers. 1,570,452; Jan. 19.

Sloan, Carl T., Wilkinsburg, Pa. Ash tray. Des. 69,290; Jan. 19.

Small, Fred F., and C. E. Nagel, Oakland, Calif. Locomotive and vehicle drive mechanisms. 1,570,091; Jan. 19.

Smidth, F. L., & Co. (See Herbst, Peter V. A. A., assignor.)

Smith, Albert W., St. Louis, Mo. Bed. 1,570,580; Jan. 19.

Smith, Albert W., and W. J. Duvall, St. Louis, Mo. Bed. 1,570,579; Jan. 19.

Smith, Alfred H., deceased, New York, N. Y.; M. E. Smith and E. H. Smith, executors. Interchangeable car unit. 1,570,288; Jan. 19.

Smith, Charles, St. Louis, Mo. Charge-heating device for internal-combustion engines. 1,570,413; Jan. 19.

Smith, Charles F., assignor to Adam Hilger, Limited, London, England. Camera. 1,570,453; Jan. 19.

Smith, Emery H., et al., executors. (See Smith, Alfred H.)

Smith, Franklin P. (See McClure, Edward, assignor.)

Smith, Jesse A. B., Stamford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,569,890; Jan. 19.

Smith, Jesse A. B., Stamford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,569,891; Jan. 19.

Smith, John A., Bellevue, Ky. Grinding machine. 1,570,092; Jan. 19.

Smith, Maude E., et al., executors. (See Smith, Alfred H.)
Smith, Newman W., May, Ill. Fountain comb. 1,570,013; Jan. 19.
Smith, S. Morgan, Company. (See Syvertsen, Harald, assignor.)
Smith, T. L., Company. (See Kemble, Percy R., assignor.)
Snapp, Le Roy F., Brooklyn, N. Y. Swimming appliance. 1,569,892; Jan. 19.
Snodgrass, William, Senado, Cuba. Sugar-cane harvester. 1,570,093; Jan. 19.
Sorrells, James A., Gainesville, Ga., assignor to Draper Corporation, Hopedale, Mass. Thread-cutting temple for looms. 1,570,593; Jan. 19.
Spalding, A. G., & Bros. (See Reach, William F., assignor.)
Sperling, Max J., Chicago, Ill. Shoe-cleaning device. 1,569,939; Jan. 19.
Sprague-Sells Corporation. (See Holmquist, August, assignor.)
Spry, Elizabeth J., administratrix. (See Jager, Frank.)
Spry, Samuel A. (See Jager, Frank, assignor.)
Standard Oil Company. (See Conley, Gardner L., assignor.)
Steinmetz, Herman W., Rochester, N. Y. Game apparatus. 1,569,893; Jan. 19.
Stender, Waldemar. See Gleichmann, H., and Stender.)
Steppinge, Max E. (See Brodersen, L., and Steppinge.)
Stevens, Douglas F., assignor to I. K. Stevens, Danville, Ill. Apparatus for and method of ornamenting surfaces of ceramic products. 1,570,594; Jan. 19.
Stevens, Douglas F., assignor to I. K. Stevens, Danville, Ill. Structural unit. 1,570,595; Jan. 19.
Stevens, Harry P., New York, N. Y. Sprocket chain. 1,570,014; Jan. 19.
Stevens, Ida K. (See Stevens, Douglas F., assignor.)
Stevens, James O., Post Falls, Idaho. Fruit grader. 1,570,094; Jan. 19.
Stevens, William E. (See Bohannon, Claude S., assignor.)
Stevenson, Peter, jr., Edinburgh, Scotland. Device for displaying printed or other matter employed in sight testing and which can also be used as a mirror. 1,570,408; Jan. 19.
Stewart, Charles E. (See Peterson, William, assignor.)
Stewart-Warner Speedometer Corporation. (See Olsen, John K., assignor.)
Stewart-Warner Speedometer Corporation. (See Whittington, Frederick G., assignor.)
Stewart-Warner Speedometer Corporation. (See Wood, A. C., and Meyers, assignors.)
Stitt, Roscoe R., Marquette, Mich. Refrigerant. 1,570,080; Jan. 19.
Stokes, John W., Dallas, Tex. Incinerator. 1,570,531; Jan. 19.
Stoppel, Louis D., Isleton, Calif. Asparagus-assorting machine. 1,570,409; Jan. 19.
Strandt, Gustav, Milwaukee, Wis. Grease-handling method and mechanism. 1,570,095; Jan. 19.
Strandt, Gustav, assignor to Milwaukee Dairy Supply Mfg. Co., Milwaukee, Wis. Wire-cutting attachment for milk-bottle-capping machines. 1,569,894; Jan. 19.
Stransky, Stephen, Darby, Pa. Chair. 1,570,096; Jan. 19.
Strauss, Ferdinand, New York, N. Y. Child's vehicle. 1,570,410; Jan. 19.
Strouse, Abraham L., and S. Weinschenk, New York, N. Y.; said Strouse assignor of his entire right to N. Shaw, New York, N. Y. Article of furniture. 1,570,532; Jan. 19.
Stuart, Clyde W., Melrose Highlands, Mass. Display device. 1,570,581; Jan. 19.
Sturm, John S., Hayti, Mo. Adjustable shovel. 1,570,189; Jan. 19.
Styli, Harry H., Southbridge, Mass. Mailing box. 1,570,533; Jan. 19.
Sullivan Machinery Company. (See Gilman, George H., assignor.)
Sullivan Machinery Company. (See Holmes, Morris P., assignor.)
Sullivan Machinery Company. (See Mitchell, Joseph S., assignor.)
Sumbulian, Starkis H., by change of name S. H. Beulan, San Francisco, Calif. Automatic clutch. 1,570,414; Jan. 19.
Sumbulian, Sarkis H., by change of name S. H. Beulan, Fresno, Calif. Cultivator. 1,570,415; Jan. 19.
Sumner, James W., and A. G. Rayburn, Los Angeles, assignors to E. Winship, San Francisco, Calif. Fluid-pressure-control system. 1,570,097; Jan. 19.
Superheater Company, The. (See Wagner, Rudolf, assignor.)
Suren, Nathan H., Needham, assignor, by mesne assignments, to The Gamewell Company, Newton, Mass. Transmitter. 1,570,596; Jan. 19.
Svensson, Svenning H., and K. O. Engkvist, assignors to Aktiebolaget Bofors, Bofors, Sweden. Holder for the blank in machines for making rivets screw blanks, and the like, and in other upsetting machines. 1,569,895; Jan. 19.
Swanson, Martin. (See Sjobring, N. P., and Swanson.)
Sweeney, Edward, Norristown, and G. A. Hunsberger, Pottstown, Pa. Bobbin. 1,570,534; Jan. 19.
Sweeney, John T., Kingston, N. Y. Skimming spoon. 1,570,321; Jan. 19.
Swett, Charles E., West Roxbury, assignor to United States Envelope Company, Springfield, Mass. Rendering paper transparent. 1,570,098; Jan. 19.
Swiderski, Walter, assignor of one-half to J. J. Kelly, Monroe, Mich. Grinding machine. 1,570,535; Jan. 19.
Swingspout Measure Co. (See Wiswell, Ozro N., assignor.)
Swisher, R. D., Mfg. Co. (See Meyer, Daniel F., assignor.)
Syvertsen, Harald, assignor to S. Morgan Smith Company, York, Pa. Gate stop for turbine construction. 1,570,536; Jan. 19.
Tabulating Machine Company, The. (See Lake, Clair D., assignor.)
Tabulating Machine Company, The. (See Page, Ralph E., assignor.)
Tannenbaum, Isidor, New York, N. Y. Watchcase. Des. 69,291; Jan. 19.
Tanner, Inos B., assignor to Joseph E. Nelson & Sons, Chicago, Ill. Filtering tank. 1,569,896; Jan. 19.
Taylor, Charles W. (See Kearney, A. R., Taylor, and Leith.)
Taylor, Henry, South Chingford, London, England. Binding of books. 1,570,099; Jan. 19.
Taylor, Robert, Oldham, England. Ring-spinning frame and other spinning machine. 1,570,323; Jan. 19.
Teitsworth, Clark S., Lompoc, assignor to The Celite Company, Los Angeles, Calif. Absorbent material and making same. 1,570,537; Jan. 19.
Terry, Charles M., assignor to A. W. Cash Company, Decatur, Ill. Automatic regulating means. 1,569,897; Jan. 19.
Thomas, James, Montrose, Calif. Making artificial stone. 1,570,538; Jan. 19.
Thomas, Michael C., Detroit, Mich. Locking an ore bridge or the like against movement resulting from wind pressure. 1,570,289; Jan. 19.
Thompson, Osceola C., Rockaway, N. J., assignor to Wire-bounds Patents Company. Machine for use in making boxes or crates. 1,570,539; Jan. 19.
Thompson, Robert A., New Orleans, La. Road-packing machine. 1,570,582; Jan. 19.
Throm, Henry K. (See Buettner, E. F., Ganun, and Throm.)
Thull, Frank J., Minneapolis, Minn. Bag-sewing machine. 1,570,100; Jan. 19.
Thurston, Ernest B., assignor to The Haughton Elevator & Machine Co., Toledo, Ohio. Hoisting and lowering control mechanism. 1,570,101; Jan. 19.
Tinker, Herbert W., assignor to Federal Pressed Steel Company, Milwaukee, Wis. Fender guard for vehicles. Des. 69,292; Jan. 19.
Titus, Elijah W. (See Leech, F. B., and Titus.)
Todd Company, The. (See Payne, Walter B., assignor.)
Toledo Scale Company. (See Hapgood, Clarence H., assignor.)
Toman, E., & Co. (See Koranek, John, assignor.)
Toomey, John F., New York, N. Y., assignor to American Telephone and Telegraph Company. Signaling system. 1,569,898; Jan. 19.
Topp, William A. B., Annandale, near Sydney, New South Wales, Australia. Gutter bracket. 1,570,102; Jan. 19.
Townsend Manufacturing Corporation. (See Pickering, Albert V., assignor.)
Trees, Joseph C. (See McCurdy, R. P., and Hochstetter, assignors.)
Trent Process Corporation. (See Trent, Walter E., assignor.)
Trent, Walter E., New York, N. Y., assignor, by mesne assignments, to Trent Process Corporation, Wilmington, Del. Treating coal products. 1,570,103; Jan. 19.
Trico Products Corporation. (See Folberth, Frederick G. and W. M., assignors.)
Trimont Manufacturing Company. (See Kenerson, Joseph E., assignor.)
Troxell, David F., Rockbridge Baths, Va. Fastener for laces. 1,570,015; Jan. 19.
Truemper, John C., Indianapolis, Ind. Awning. 1,570,016; Jan. 19.
Trumbull Electric Manufacturing Company, The. (See Getchell, Benjamin E., assignor.)
Trumbull Electric Manufacturing Company, The. (See Leppert, Henry E., assignor.)
Turner Machine Company. (See Craw, Frank C., assignor.)
Tyler, Herbert B., Valparaiso, Ind. Heater. 1,570,017; Jan. 19.
Underwood Typewriter Company. (See Campbell, George W., assignor.)
Underwood Typewriter Company. (See Kurowski, Alfred G. F., assignor.)
Underwood Typewriter Company. (See Smith, Jesse A. B., assignor.)
Underwood Typewriter Company. (See Vickers, Harry H., assignor.)
Unger, Adolph, Chicago, Ill. Hot-air-regulating device. 1,570,290; Jan. 19.
United Shoe Machinery Corporation. (See De Minico, Charles, assignor.)
United Shoe Machinery Corporation. (See Fauase, Joseph, assignor.)
United Shoe Machinery Corporation. (See Furber, Frederick M., assignor.)
United Shoe Machinery Corporation. (See Goddu, G., and Mackenzie, assignors.)

United Shoe Machinery Corporation. (See La Chapelle, Fred N., assignor.)
United Shoe Machinery Corporation. (See Lund, Thomas, assignor.)
United States Cast Iron Pipe & Foundry Company. (See Anthony, Thomas P., assignor.)
United States Envelope Company. (See Swett, Charles E., assignor.)
Universal Draft Gear Attachment Company. (See Camp, Percy B., assignor.)
Universal Oil Products Company. (See Egloff, G., and Benner, assignors.)
Universal Oil Products Company. (See Morrell, Jacque C., assignor.)
Untermeyer, Robbins & Co. (See Robbins, Meyer L., assignor.)
Valfer, H. R. (See Vancil, Frederick W., assignor.)
Van Alstine, Frank, Sacramento, Calif. Clothesline splicer and tightener. 1,570,291; Jan. 19.
Vancil, Frederick W., assignor of eighty-five per cent to H. R. Valfer, Joplin, Mo. Automobile map container 1,570,104; Jan. 19.
Vandergaw, Edward B., Brooklyn, and J. Heinrich, assignors to Fred Butterfield & Co., Inc., New York, N. Y. Flocked voile fabric. Des. 69,293; Jan. 19.
Vandergaw, Edward B., Brooklyn, and J. Heinrich, assignors to Fred Butterfield & Co., Inc., New York, N. Y. Flocked voile fabric. Des. 69,294; Jan. 19.
Vandergaw, Edward B., Brooklyn, and J. Heinrich, assignors to Fred Butterfield & Co., Inc., New York, N. Y. Flocked voile fabric. Des. 69,295; Jan. 19.
Vandergaw, Edward B., Brooklyn, and J. Heinrich, assignors to Fred Butterfield & Co., Inc., New York, N. Y. Flocked voile fabric. Des. 69,296; Jan. 19.
Vandergaw, Edward B., Brooklyn, and J. Heinrich, assignors to Fred Butterfield & Co., Inc., New York, N. Y. Flocked voile fabric. Des. 69,297; Jan. 19.
Vandergaw, Edward B., Brooklyn, and J. Heinrich, assignors to Fred Butterfield & Co., Inc., New York, N. Y. Flocked voile fabric. Des. 69,298; Jan. 19.
Vandergaw, Edward B., Brooklyn, and J. Heinrich, assignors to Fred Butterfield & Co., Inc., New York, N. Y. Flocked voile fabric. Des. 68,299; Jan. 19.
Vandergaw, Edward B., Brooklyn, and J. Heinrich, assignors to Fred Butterfield & Co., Inc., New York, N. Y. Flocked voile fabrics. Des. 69,300; Jan. 19.
Vandergaw, Edward B., Brooklyn, and J. Heinrich, assignors to Fred Butterfield & Co., Inc., New York, N. Y. Flocked voile fabric. Des. 69,301; Jan. 19.
Van Dorn, Herbert E., Chicago, Ill. Electric coupling for railway vehicles. 1,570,105; Jan. 19.
Van Valkenberg, Eber H., Monroe, assignor of one-half to O. Silverstein, Spokane, Wash. Airship. 1,570,322; Jan. 19.
Vassar, Hervey S., Bloomfield, N. J. Refrigeration. 1,570,416; Jan. 19.
Vernam, Gilbert S., Brooklyn, and E. F. Watson, Yonkers, N. Y., assignors to American Telephone and Telegraph Company. Telegraph repeater. 1,569,899; Jan. 19.
Vesuvius Crucible Company. (See Jackman, Arthur J., assignor.)
Vickers, Harry H., Corona, Long Island, assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,569,900; Jan. 19.
Vickers Limited. (See Wearham, John, assignor.)
Villaret, Gustave E., Leonia, N. J., assignor to William R. Noe & Sons, New York City, N. Y. Base for portable electric lamps. Des. 69,302; Jan. 19.
Villaret, Gustave E., Leonia, N. J., assignor to William R. Noe & Sons, New York, N. Y. Base for portable electric lamps. Des. 69,303; Jan. 19.
Villaret, Gustave E., Leonia, N. J., assignor to William R. Noe & Sons, New York, N. Y. Base for portable electric lamps. Des. 69,304; Jan. 19.
Villaret, Gustave E., Leonia, N. J., assignor to William R. Noe & Sons, New York, N. Y. Pedestal for portable electric lamps. Des. 69,305; Jan. 19.
Virdin, Joseph D., Baltimore, Md. Attachment to fire-arms. 1,569,901; Jan. 19.
Vollman, Joseph, Elizabeth, N. J. Machine for sewing on buckles. 1,569,902; Jan. 19.
Waddell, Dean T., Greenfield, assignor to The Irwin Auger Company, Wilmington, Ohio. Container. 1,570,018; Jan. 19.
Wade, Roy, Pocatello, Idaho. Wheel guard for vehicle. 1,570,292; Jan. 19.
Wagner Electric Corporation. (See Weichsel, Hans, assignor.)
Wagner, Rudolf, Hamburg, Germany, assignor to The Superheater Company, New York, N. Y. Air-cooled condensation apparatus for locomotives. 1,570,106; Jan. 19.
Wallace, Stephen J., assignor of one-half to J. Lynch, Logansport, Ind. Violin chin rest. 1,570,361; Jan. 19.
Walsh, John W., assignor to H. Bayersdorfer and S. H. Bayersdorfer, Philadelphia, Pa. Spray basket. 1,570,417; Jan. 19.
Walsh, Lawrence H., Chicago, Ill. Circuit-controlling means for signaling devices. 1,570,107; Jan. 19.
Warner, Frank E., assignor to Scovill Manufacturing Company, Waterbury, Conn. Bachelor button. 1,570,302; Jan. 19.
Warr, A. W. (See Cormier, Alfred J., assignor.)
Watson, Edward F. (See Vernam, G. S., and Watson.)
Wearham, John, assignor to Vickers Limited, Westminster, London, England. Piano player. 1,570,019; Jan. 19.
Wegener, Ulrich, Berlin-Steglitz, Germany. Preserved yeast and making it. 1,570,418; Jan. 19.
Wehner, Lewis, Milwaukee, assignor to Pawling and Harnischfeger Company, West Milwaukee, Wis. Excavator crane. 1,570,108; Jan. 19.
Weichsel, Hans, assignor to Wagner Electric Corporation, St. Louis, Mo. Alternating-current motor. 1,570,109; Jan. 19.
Weinschenk, Samuel. (See Strouse, A. L., and Weinschenk.)
Weinschenk, Samuel, New York, N. Y. Umbrella rack and smoking stand. 1,570,540; Jan. 19.
Welker-Hoops Manufacturing Company, The. (See Welker, Oscar B., assignor.)
Welker, Oscar B., assignor to The Welker-Hoops Manufacturing Company, Middletown, Conn. Cap for gasoline tanks. Des. 69,306; Jan. 19.
Weller, Floyd E., Toledo, Ohio. Tire rack. 1,570,110; Jan. 19.
Welsh, Frederick E., Buffalo, N. Y. Portable bulkhead. 1,570,020; Jan. 19.
West, Charles M., Chicago, Ill. Scaffold or staging. 1,570,541; Jan. 19.
Western Drilling Tool & Supply Co. (See Horrell, Maurice R., assignor.)
Western Electric Company. (See Bennett, Arthur F., assignor.)
Western Electric Company. (See Clarke, Harry R., assignor.)
Western Electric Company. (See Clokey, Allison A., assignor.)
Western Electric Company. (See Fry, Thornton C., assignor.)
Western Electric Company. (See Horton, Joseph W., assignor.)
Westinghouse Electric and Manufacturing Company. (See Kasley, Alexander T., assignor.)
White, Franklin R., assignor to The Patent Button Company, Waterbury, Conn. Fastener. 1,570,363; Jan. 19.
Whiting & Davis Company. (See Berkley, Richard H., assignor.)
Whitney, F. A., Carriage Company. (See Ambler, George B., assignor.)
Whitney Mfg. Co., The. (See Müller, Friederich, assignor.)
Whittal, A. R., Can Company. (See Bisset, David L., assignor.)
Whittington, Frederik G., Evanston, assignor to Stewart-Warner Speedometer Corporation, Chicago, Ill. Production of units of combined speedometer and odometer. 1,570,021; Jan. 19.
Wicks, John, assignor to Automatic Electric Company, Chicago, Ill. Automatic telephone system. 1,570,022; Jan. 19.
Wickware, Walter H., Ottawa, Ontario, Canada. Shutter mechanism for automobile radiators. 1,570,111; Jan. 19.
Wieder, Joe, New York, N. Y. Sample tab. 1,570,364; Jan. 19.
Wilcox, Merrill M., Saginaw, Mich. Cam follower and making same. 1,570,023; Jan. 19.
Wiley, Edward J., Hollidays Cove, W. Va. Pipe trap. 1,570,112; Jan. 19.
Willett, Robert V., et al. (See Herr, Von H., assignor.)
Willett, Robert V., et al. (See Mattingly, Frank H., assignor.)
Williams, James E., Enterprise, Miss. Paper-roll holder. 1,570,190; Jan. 19.
Willys-Overland Company. (See Greene, Otto W., assignor.)
Wilson, Ellery L., assignor to Rumford Chemical Works, Providence, R. I. Plaster of Paris and making the same. 1,570,583; Jan. 19.
Wilson, James E., S. McConnell, and C. Brown, Belfast, Ireland. Preparation of dough for the making of bread. 1,570,365; Jan. 19.
Wilton, Ralph W., Washington, D. C. Protector for laboratory burners. 1,569,903; Jan. 12.
Wine, William E., Toledo, Ohio. Car ventilator. 1,570,113; Jan. 19.
Winkley, Erastus E., Lynn, Mass. Equilibrating apparatus. 1,570,542; Jan. 19.
Winkley, Erastus E., Lynn, Mass. Steering apparatus. 1,570,543; Jan. 19.
Winship, Emory. (See Sumner, J. W., and Rayburn, assignors.)
Wirebounds Patents Company. (See Thompson, Osceola C., assignor.)
Wiswell, Arthur M., Portland, Oreg. Automobile lock. 1,570,366; Jan. 19.
Wiswell, Ozro N., Los Angeles, Calif., assignor to Swingspout Measure Co. Swing-spout valve. 1,570,114; Jan. 19.
Wolf, Carl F., Chicago, Ill. Shackle-bolt-oiling device. 1,570,367; Jan. 19.
Wolf, Elmer E. (See Osgood, L. A., and Wolf.)
Wolkenhauer, Gustav, assignor to Riverview Park Company, Chicago, Ill. Game of skill. 1,570,419; Jan. 19.

Wood, Andrew C., and L. I. Meyers, assignors to Stewart-Warner Speedometer Corporation, Chicago, Ill. Dirigible searchlight. 1,570,024; Jan. 19.
Wood, William H., South Euclid, Ohio. Storage battery. 1,570,115; Jan. 19.
Wright, Joseph, Lancaster, Wis. Trap for cattle flies. 1,569,904; Jan. 19.
Wyman-Gordon Company. (See Damerell, Mark H., assignor.)
Wyrembek, Theodor J., Oconomowoc, Wis. Railway switch cleaner. 1,570,191; Jan. 19.
Yale & Towne Manufacturing Company, The. (See Brauning, Karl A., assignor.)
Yates, P. B., Machine Company. (See Lane, Franklin L., assignor.)
Yngve, Victor, South Orange, N. J., assignor to Manhattan Electrical Supply Company, Incorporated, New York, N. Y. Electrical contact maker and breaker. 1,570,420; Jan. 19.
Young, John V., New York, N. Y. Hand grip. 1,570,025; Jan. 19.
Younick, Michael, Delano, Minn. Wrecking bar. 1,570,192; Jan. 19.
Yount, Miles F., Beaumont, Tex. Line guide. 1,570,116; Jan. 19.
Zeh, Charles C., North Hackensack, N. J., assignor to Zeh Incorporated. Decorating glass surfaces. 1,570,368; Jan. 19.
Zeh Incorporated. (See Zeh, Charles C., assignor.)
Zimmermann, Hans J., Mannheim, Germany, assignor to Schutte and Koerting Company, Philadelphia, Pa. Apparatus for applying helical ribs to pipes. 1,570,117; Jan. 19.
Zinn, Frank E., Hartford, Conn. Movable headlight. 1,570,544; Jan. 19.
Zinti, Albert E., et al. (See Mattingly, Frank H., assignor.)

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 19TH DAY OF JANUARY, 1926.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Abrasive mitt. G. W. Doerr. 1,569,854; Jan. 19.
Absorbent material and making same. C. S. Teitsworth. 1,570,537; Jan. 19.
Acetic anhydride, Manufacturing. R. Meingast and M. Mugdan. 1,570,514; Jan. 19.
Adjustable shovel. J. S. Sturm. 1,570,189; Jan. 19.
Advertising-contest card. G. Melikov. Des. 69,279; Jan. 19.
Aeroplane propelling mechanism. H. M. Cosey. 11,570,044; Jan. 19.
Air bag, Valved. C. B. Knepper. 1,570,157; Jan. 19.
Air brake. C. S. Picó. 1,570,279; Jan. 19.
Air cleaner. M. E. Chandler. 1,570,040; Jan. 19.
Air, Method and apparatus for conditioning. C. J. Ramsburg. 1,570,184; Jan. 19.
Air washing and conditioning apparatus. A. S. Romero and L. R. Gonzalez. 1,570,577; Jan. 19.
Airship. E. H. Van Valkenberg. 1,570,322; Jan. 19.
Alkali-metal amides, Manufacture of. T. Ewan. 1,570,467; Jan. 19.
Alloy. J. I. Mee. 1,569,996; Jan. 19.
Alloy for pen points. M. M. Goldsmith. 1,569,921; Jan. 19.
Alloys, Making magnetic. V. B. Browne. 1,570,229; Jan. 19.
Alumina, Producing. R. Jacobsson. 1,570,353; Jan. 19.
Alumino-silicates, Treating. H. and H. Reinbold. 1,570,006; Jan. 19.
Ammonia by means of catalysts, Synthesis of. H. Harter. 1,570,485; Jan. 19.
Ammonia soda process. H. A. Galt. 1,570,299; Jan. 19.
Amplifying device, Long-stroke. B. M. McFarland and M. A. Dimmick. 1,570,385; Jan. 19.
Antiskid attachment for automobile wheels. H. B. Lindhorst. 1,570,359; Jan. 19.
Antiskid attachment for vehicle wheels. F. Dombrowski. 1,570,651; Jan. 19.
Antitheft device. H. Loeb. 1,569,868; Jan. 19.
Arch support. I. M. Pease. 1,570,000–1; Jan. 19.
Ash receiver. R. A. Russell. Des. 69,288; Jan. 19.
Ash tray. C. T. Sloan. Des. 69,290; Jan. 19.
Asparagus-assorting machine. L. D. Stoppel. 1,570,409; Jan. 19.
Automobile lock. A. M. Wiswell. 1,570,366; Jan. 19.
Automobile radiators, Shutter mechanism for. W. H. Wickware. 1,570,111; Jan. 19.
Automobile spring, Pneumatic. E. E. Cothran. 1,569,850; Jan. 19.
Automobile underframes, Stabilizing device for. A. De Coninck. 1,570,210; Jan. 19.
Automobiles, Brake-equalizing attachment for. F. J. Andel. 1,570,221; Jan. 19.
Automobiles, Safety device for. A. Damore. 1,570,464; Jan. 19.
Automobiles, Spring bumper for. F. D. Robinson. 1,570,526; Jan. 19.
Awning. J. C. Truemper. 1,570,016; Jan. 19.
Axle brace and positioner. J. A. Mebane. 1,569,995; Jan. 19.
Bag: *See*—
  Air bag. Hand bag.
  Golf bag. Hat bag.
Bank. A. L. Hansen. 1,569,975; Jan. 19.
Bar: *See*—
  Wrecking bar.
Barge, bathing. C. S. Bohannon. 1,569,910; Jan. 19.
Barrel agitator. C. E. Farrington. 1,569,858; Jan. 19.
Basket, Spray. J. W. Walsh. 1,570,417; Jan. 19.
Bathtubs, Temporary cover for. L. Mayer. 1,570,164; Jan. 19.
Bearing. L. Fritz. 1,570,056; Jan. 19.
Bearing construction. C. H. Hanson. 1,570,566; Jan. 19.
Bearing or bearing liner. R. J. Banner. 1,570,033; Jan. 19.
Bed. A. W. Smith. 1,570,580; Jan. 19.
Bed. A. W. Smith and W. J. Duvall. 1,570,579; Jan. 19.
Beta naphthol, Sulphonating. M. L. Crossley and G. S. Simpson. 1,570,046; Jan. 19.
Bin: *See*—
  Gravel bin.
Bird house. T. and J. Evans. Des. 69,262; Jan. 19.
Bituminous substances, Treating. G. W. Acheson. 1,570,193; Jan. 19.
Blade holder. A. Goetz. 1,570,478; Jan. 19.
Block: *See*—
  Drag-scraper block. Sanding block.
  Sheave block.
Boat, Air. W. P. Fritsche and J. D. Clarke. 1,570,470; Jan. 19.
Bobbin. E. Sweeney and G. A. Hunsberger. 1,570,534; Jan. 19.
Boiler stand. L. Doerr. 1,570,211; Jan. 19.
Boilers from an unheated tank, Feeding steam. H. Gleichmann and W. Stender. 1,569,919; Jan. 19.
Boiling, washing, condensing, and drying machine, Combined. J. W. Bowerbank. 1,570,552; Jan. 19.
Bolt and nut, Combined. W. B. Hanner. 1,570,565; Jan. 19.
Books, Binding of. H. Taylor. 1,570,099; Jan. 19.
Boring machine. J. B. Owens. 1,570,181; Jan. 19.
Bottle-capping machines, Wire-cutting attachment for milk-. G. Strandt. 1,569,894; Jan. 19.
Bottle filling and sealing machine. A. Calleson. 1,569,948; Jan. 19.
Bottle-opening tool, Combination. W. Johnson. 1,570,306; Jan. 19.
Bowling-alley ball return. J. W. Bishop. 1,570,549–51; Jan. 19.
Box: *See*—
  Feed box. Vanity box.
  Mailing box. Wagon box.
Box and table, Combined. E. N. Howell. 1,570,350; Jan. 19.
Box or carton. E. S. Hill. 1,569,932; Jan. 19.
Boxes or crates, Machine for use in making. O. C. Thompson. 1,570,539; Jan. 19.
Bracket: *See*—
  Gutter bracket.
Bracket. G. B. Pollock. 1,570,396; Jan. 19.
Brake: *See*—
  Air brake.
Brick, Glazing. A. Fischer, jr. 1,570,137; Jan. 19.
Brick machine and operating the same. H. K. King. 1,570,501; Jan. 19.
Bricks, Apparatus for burning. W. W. Dickinson, jr. 1,569,952–3; Jan. 19.
Bridge or the like against movement resulting from wind pressure, Locking an ore. M. C. Thomas. 1,570,289; Jan. 19.
Broaching machine. F. J. Lapointe. 1,569,862; Jan. 19.
Buckles, Machine for sewing on. J. Vollman. 1,569,902; Jan. 19.
Bulkhead, Portable. F. E. Welsh. 1,570,020; Jan. 19.
Bumper and fender, Combined. L. Ronca and S. Santoro. 1,570,527; Jan. 19.
Burner: *See*—
  Liquid-fuel burner. Oil burner.
Burner and generator, Combination. C. C. Richardson. 1,569,883; Jan. 19.
Burners, Thermostatic control device for fuel. D. R. Martin. 1,569,994; Jan. 19.
Button. F. G. Purinton. 1,570,398; Jan. 19.
Button, Bachelor. F. E. Warner. 1,570,362; Jan. 19.
Buttons, Making one-piece metal. W. T. Abel. 1,570,324; Jan. 19.
Cabinet, Service. G. R. Craw. 1,570,207; Jan. 19.
Calculator. E. C. Isom. 1,570,352; Jan. 19.
Cam follower and making same. M. M. Wilcox. 1,570,023; Jan. 19.
Camera. C. F. Smith. 1,570,453; Jan. 19.
Can: *See*—
  Dispensing can.
Can-end drier. D. L. Bisset. 1,570,122; Jan. 19.
Can-filling machine. A. Holmquist. 1,570,151; Jan. 19.
Can opener, Tin-. C. Bachr. 1,569,906; Jan. 19.
Candlestick. F. Di Bella. 1,570,133; Jan. 19.
Candy doll. J. Josephsohn. Des. 69,277; Jan. 19.
Cane harvester. J. A. Melancon. 1,570,269; Jan. 19.
Car door. F. Jager. Re16,255; Jan. 19.
Car-heating system. W. G. Hartwig. 1,569,928; Jan. 19.
Car-loading apparatus, Skip-bucket. W. E. Hale. 1,570,303; Jan. 19.
Car roof. C. D. Bonsall. 1,570,123; Jan. 19.
Car unit, Interchangeable. A. H. Smith. 1,570,288; Jan. 19.
Car ventilator. W. E. Wine. 1,570,113; Jan. 19.
Cars, Brake-actuating means for motor. C. B. Kurtz. 1,570,066; Jan. 19.
Cars, Brake mechanism for railway. P. B. Camp. 1,569,949; Jan. 19.
Cars, Safety appliance for railway hand. V. Di Tommaso. 1,570,556; Jan. 19.
Carburetor. W. A. Heide. 1,570,143; Jan. 19.
Card-delivering device. R. E. Page. 1,570,182; Jan. 19.

Cards, Container for automobile registration. J. Browne. 1,569,963; Jan. 19.
Cards, Playing. V. D. Brittingham. 1,569,945; Jan. 19.
Cards, Playing. F., jr., and T. Geraci. 1,570,475; Jan. 19.
Carpet sweepers, Furniture guard for. K. L. Hale. 1,570,482; Jan. 19.
Carriage, Baby. E. Kuniholm. 1,569,985; Jan. 19.
Casing, Lock. K. A. Brauning. 1,570,331; Jan. 19.
Catalyzers for the synthesis of ammonia, Production of. I. W. Cederberg. 1,570,333; Jan. 19.
Ceiling light. F. S. Crowell. Des. 69,256; Jan. 19.
Ceiling plate. F. S. Crowell. Des. 69,257; Jan. 19.
Cellulose solutions, Manufacture of. A. Classen. 1,570,553; Jan. 19.
Ceramic products, Apparatus for and method of ornamenting surfaces of. D. F. Stevens. 1,570,594; Jan. 19.
Cereal food, Preparing. J. L. Kellogg. 1,569,861; Jan. 19.
Chain. M. P. Holmes. 1,570,440; Jan. 19.
Chain belt. A. R. Kearney, C. W. Taylor, and T. G. Leith. 1,570,380; Jan. 19.
Chair. S. Stransky. 1,570,096; Jan. 19.
Chair base. R. K. Dawson. 1,570,436; Jan. 19.
Chair bases, Hub for. R. K. Dawson. 1,570,437; Jan. 19.
Chairs or the like, Fitting for. R. K. Dawson. 1,570,435; Jan. 19.
Check books, Holder for. L. G. Kurtzeborn. 1,569,986; Jan. 19.
Check, Rebound. R. H. Hassler. 1,569,976; Jan. 19.
Chopper: *See*—
Cotton chopper.
Christmas-tree support and water container. L. L. Ripczinske. 1,570,403; Jan. 19.
Cigar lighter. O. Cohen. Des. 69,253; Jan. 19.
Cigar lighter, Electric. A. Schoeller. 1,570,286; Jan. 19.
Clamp: *See*—
Shingle clamp.
Cleaner: *See*—
Air cleaner. Windshield cleaner.
Switch cleaner.
Clothes-drying apparatus. P. Lungstras. 1,570,508; Jan. 19.
Clothesline splicer and tightener. F. Van Alstine. 1,570,291; Jan. 19.
Clutch, Automatic. S. H. Sumbulian. 1,570,414; Jan. 19.
Coal products, Treating. W. E. Trent. 1,570,103; Jan. 19.
Coat and trousers, Transformable cover. L. M. Brainle. 1,570,227; Jan. 19.
Code machine. F. Prevost. 1,570,178; Jan. 19.
Collar-band attachment. A. W. Land. 1,569,988; Jan. 19.
Collet and collet mechanism. F. O. Hoagland. 1,570,251; Jan. 19.
Coloring composition. A. David. 1,569,915; Jan. 19.
Comb: *See*—
Fountain comb.
Compass. W. Champion. 1,570,459; Jan. 19.
Concrete form. H. E. Noyes. 1,569,876; Jan. 19.
Concrete hollow tile building block, Reenforced-. J. Feigenbaum. 1,570,233; Jan. 19.
Concrete structures which contain embedded means for circulating a heating or cooling medium. Apparatus for constructing reenforced. J. L. Musgrave and R. G. Crittall. 1,570,448; Jan. 19.
Confectionery machine. I. J. Handlen. 1,570,247; Jan. 19.
Connecter switch. F. P. McIntosh. 1,569,869; Jan. 19.
Contact-filing device. J. H. Simpson. 1,570,090; Jan. 19.
Container. F. E. Lowenstein. 1,570,572; Jan. 19.
Container. D. T. Waddell. 1,570,018; Jan. 19.
Container snap-on rotatably releasable cap. C. Hammer. 1,569,926; Jan. 19.
Containers, Gasket for pressure. R. Chilton. 1,570,334; Jan. 19.
Control system. H. L. Blood and R. C. Deale. 1,570,369; Jan. 19.
Controlling moving bodies by radiant energy, System of and mechanism for. J. H. Hammond, jr. 1,569,927; Jan. 19.
Cooking and cooling process. N. H. Fooks. 1,570,236; Jan. 19.
Cotton blocker or chopper. J. W. Baird. 1,570,118; Jan. 19.
Cotton chopper. J. L. Parks. 1,570,277; Jan. 19.
Converter system. H. M. Hobart. 1,570,347; Jan. 19.
Conveyer. H. M. Hanson. 1,570,484; Jan. 19.
Conveyer or apron and the like, Slatted. M. F. Kevlin. 1,570,587; Jan. 19.
Covered dish or similar article. G. Haviland. Des. 69,272–3; Jan. 19.
Crane, Hoisting. O. S. Hubbard. 1,569,979; Jan. 19.
Cranes, Hoisting mechanism for excavating. A. G. Henricks. 1,570,061; Jan. 19.
Crosshead guide. E. O. Elliott. 1,570,559; Jan. 19.
Crowbar. R. A. Dresser. 1,570,342; Jan. 19.
Crucibles, Making. A. J. Jackman. 1,570,064; Jan. 19.
Cue tip and making the same. W. S. Borden. 1,570,294 Jan. 19.
Cultivator. S. H. Sumbulian. 1,570,415; Jan. 19.
Cultivator attachment. S. Devenbaugh. 1,570,132; Jan. 19.
Cumaron resin composition and making same. C. Ellis. 1,570,584; Jan. 19.
Cup hook and support. C. J. Lawless. 1,569,863; Jan. 19.
Current motor, Alternating-. H. Weichsel. 1,570,109; Jan. 19.
Curved surfaces, Working. P. Goerz and E. Jacobi. 1,570,242; Jan. 19.
Cushion-stuffing machine. R. W. Busse. 1,570,432; Jan. 19.
Cuspidor, Sanitary. S. F. Massy. 1,570,512; Jan. 19.
Cut-off, Automatic. N. E. Richardson. 1,570,007; Jan. 19.
Dental toothpick. W. F. Lawrenz. 1,570,357; Jan. 19.
Dials, Indicating means for calling. N. D. Newby. 1,569,874; Jan. 19.
Die-casting machine. J. B. Bushnell. 1,569,851; Jan. 19.
Direction signal. N. W. Knight. 1,570,158; Jan. 19.
Direction-signal casing. E. F. Crabtree. Des. 69,255; Jan. 19.
Discus. W. F. Reach. 1,570,185; Jan. 19.
Dishwashing machine. H. Cave. 1,570,296; Jan. 19.
Disk wheel, Lock-gear. C. T. Reynolds. 1,570,319; Jan. 19.
Dispensing can. J. H. Miller. 1,570,270; Jan. 19.
Display container. G. L. Conley. 1,570,336; Jan. 19.
Display device. E. C. Essinger. 1,570,466; Jan. 19.
Display device. C. W. Stuart. 1,570,581; Jan 19.
Display holder. G. E. Gates. 1,570,139; Jan. 19.
Display receptacle. B. Rosenberg. 1,569,886; Jan. 19.
Display stand for jewelry. M. Colker. Des. 69,254; Jan. 19.
Doll. J. Chapman. Des. 69,252; Jan. 19.
Door and analogous structure, Sheet-metal. L. R. Ljungberg and W. A. Anderberg. 1,570,310; Jan. 19.
Door, Automatically-closing. M. Cope. 1,570,462; Jan. 19.
Door construction. C. Bic. 1,570,427; Jan. 19.
Dough for the making of bread, Preparation of. J. E. Wilson, S. McConnell, and C. Brown. 1,570,365; Jan. 19.
Dough-molding and like machine. W. H. Rippin. 1,570,525; Jan. 19.
Dough-molding machine. C. D. Dilley. 1,570,339; Jan. 19.
Drag scraper. W. E. Hale. 1,569,925; Jan. 19.
Drag-scraper back-post block. W. E. Hale. 1,569,924; Jan. 19.
Drawing press. O. S. Beyer. 1,570,199; Jan. 19.
Drier: *See*—
Can-end drier.
Drilling apparatus. G. H. Gilman. 1,569,970; Jan. 19.
Drilling fixture. H. T. and E. J. Kinsbury. 1,570,156; Jan. 19.
Drilling holes, Method and apparatus for. J. S. Mitchell. 1,570,518; Jan. 19.
Drilling machine. F. W. Dine. 1,570,050; Jan. 19.
Drilling machine. G. H. Gilman. 1,570,239; Jan. 19.
Drills, Indicator and safety coupling for rotary. G. A. Goldsmith. 1,570,244; Jan. 19.
Drum beater and cymbal sounder, Pedal-operated. A. Mortensen. 1,570,167; Jan. 19.
Drying apparatus. C. Rees and C. F. Hine. 1,569,880; Jan. 19.
Dyeing wood. H. Renner. 1,570,575; Jan. 19.
Ejector, pawl-. W. Peterson. 1,570,317; Jan. 19.
Electric appliance. E. N. Lightfoot. 1,570,507; Jan. 19.
Electric control system for all movable elements operating by a very small power, and chiefly for the gyroscopic compass. E. Granat. 1,569,922; Jan. 19.
Electric heating system. W. S. Hadaway, jr. 1,570,301; Jan. 19.
Electric-light globe. A. L. Eliasoff and C. Birnbaum. 1,570,345; Jan. 19.
Electric machinery, Automatic. W. D. Mercer. 1,570,591; Jan. 19.
Electric-resistance element. T. C. Russell. 1,570,084; Jan. 19.
Electric switch. B. E. Getchell. 1,570,237; Jan. 19.
Electric switch. A. E. Greene. 1,570,245; Jan. 19.
Electric switch. H. E. Leppert. 1,569,864; Jan. 19.
Electrical contact maker and breaker. V. Yngve. 1,570,420; Jan. 19.
Electrical network. T. C. Fry. 1,570,215; Jan. 19.
Electrode for discharge tubes. K. A. Lebbink. 1,570,265; Jan. 19.
Elevator attachment, Grain. H. H. Parliament. 1,570,521; Jan. 19.
Emulsions, particularly of petroleum, by means of an electric current, Separating the phases of. J. H. C. de Brey. 1,570,209; Jan. 19.
Engine for utilizing low-grade water powers, Water-power. A. Abraham. 1,570,421; Jan. 19.
Engines, Apparatus for measuring the temperature of internal-combustion. J. W. Hobbs. 1,570,602; Jan. 19.
Engines, Charge-heating device for internal-combustion. C. Smith. 1,570,413; Jan. 19.
Equilibrating apparatus. E. E. Winkley. 1,570,542; Jan. 19.
Ethylating amines. A. R. Cade. 1,570,203; Jan. 19.
Excavator. W. E. Saxe. 1,570,085; Jan. 19.
Excavator crane. L. Wehner. 1,570,108; Jan. 19.

Expansible-collapsible elements, Producing. H. C. Mallory. 1,570,312; Jan. 19.
Eyelet button. L. M. Dowd. 1,570,341; Jan. 19.
Eyeshield, Sun-glare. H. S. Humes. 1,570,254; Jan. 19.
Fastener. F. R. White. 1,570,363; Jan. 19
Fastener. V. H. Herr. 1,570,148; Jan. 19.
Fastening and clamping ring. G. E. Mittinger. 1,570,519; Jan. 19.
Fastening device, Two-head rotatable. A. F. Raymond. 1,570,281; Jan. 19.
Fastening inserting machine. G. Goddu and F. L. Mackenzie. 1,569,920; Jan. 19.
Feed box. E. E. Lovering. 1,569,990; Jan. 19.
Feeder, Chicken. R. B. Herrington. 1,569,931; Jan. 19.
Fencepost driver. C. A. Farb. 1,569,857; Jan. 19
Film and backing solution for use in making same, Non-static. E. C. Pitman. 1,570,079; Jan. 19.
Film, Making nonstatic. H. J. Hoffman. 1,570,062; Jan. 19.
Film-printing machine. J. Kalmanovitch. 1,570,498; Jan. 19.
Filter bags, Treating. J. D. Gat. 1,570,138; Jan. 19.
Filtering apparatus. P. H. Crawford and J. F. Abbema. 1,570,374; Jan. 19.
Filtering tank. I. B. Tanner. 1,569,896; Jan. 19.
Finger ring. E. E. Bayardi. Des. 69,248; Jan. 19.
Finger ring. B. Gross. Des. 69,266–8; Jan. 19.
Finger ring. M. L. Robbins. Des. 69,286; Jan. 19.
Finger ring, Gem-set. M. L. Robbins. Des. 69,287; Jan. 19.
Finger ring or article of similar nature. L. Fiedler. Des. 69,263; Jan. 19.
Finger ring or similar article. J. L. Herzog. Des. 69,275; Jan. 19.
Fire-alarm apparatus. H. Hunke. 1,570,255; Jan. 19. Jan. 19.
Firearms, Attachment to. J. D. Virdin. 1,569,901; Jan. 19.
Fire-extinguishing device. O. R. Erwin. 1,570,052; Fish lure. S. B. MacLeod. 1,569,993; Jan. 19.
Fishhook book. S. Focht. 1,570,213; Jan. 19.
Fishing tool. M. W. Jones. 1,570,066; Jan. 19.
Flash light. C. Ocean. 1,570,393; Jan. 19.
Flies, Trap for cattle. J. Wright. 1,569,904; Jan. 19.
Floor cleaning and polishing device. E. J. Burch. 1,570,127; Jan. 19.
Floors, Warming. J. W. McKechan and G. J. Henry. 1,570,162; Jan. 19.
Fluid-pressure-control system. J. W. Sumner and A. G. Rayburn. 1,570,097; Jan. 19.
Flying jenny. W. R. Branham. 1,570,124; Jan. 19.
Food product. E. R. McSorley. 1,570,443; Jan. 19.
Fountain comb. N. W. Smith. 1,570,013; Jan. 19.
Frames, Making side. L. C. Pritner and H. C. Dorris. 1,569,879; Jan. 19.
Fruit grader. J. O. Stevens. 1,570,094; Jan. 19.
Fuel. G. Hammond. 1,570,059–60; Jan. 19.
Fuel apparatus, Pulverized. J. K. Blum and D. L. Braine. 1,570,037; Jan. 19.
Fuel-feeding system. H. Scowcroft, jr. 1,570,010; Jan. 19.
Fur, Dyed. H. M. Becher. Des. 69,249; Jan. 19.
Furnace: *See*—
Hot-air furnace.
Furnace. H. H. Dodge. 1,570,340; Jan. 19.
Furnaces, Device for. A Gudmundsen and H. W. Clark. 1,569,923; Jan. 19.
Furnaces, Unloading device for. M. H. Damerell. 1,570,463; Jan. 19.
Furniture, Article of. A. L. Strouse and S. Weinschenk. 1,570,532; Jan. 19.
Fuse, Expulsion-type repeating. T. F. Johnson, jr. 1,569,981; Jan. 19.
Game. H. B. Minnick. 1,570,517; Jan. 19.
Game apparatus. H. W. Steinmetz. 1,569,893; Jan. 19.
Game-chip rack. E. Black. 1,569,848; Jan. 19.
Game, Indoor golf. A. H. Adams. 1,570,422; Jan. 19.
Game of skill. G. Wolkenhauer. 1,570,419; Jan. 19.
Garment hanger, Folding. L. Barron. 1,570,196; Jan. 19.
Garment supporter. M. J. Jackson. 1,570,492; Jan. 19.
Garter, armlet, or like band. L. M. Davis. 1,569,968; Jan. 19.
Gas-main controller. R. B. Richardson. 1,570,008; Jan. 19.
Gas meter. T. Fox. 1,570,214; Jan. 19.
Gas producer. S. A. Moss. 1,570,314; Jan. 19.
Gasket seats, Facing tool for. S. B. Clay. 1,570,042; Jan. 19.
Gasoline tanks, Cap for. O. B. Walker. Des. 69,306; Jan. 19.
Gate: *See*—
Railway-crossing gate.
Gauge: *See*—
Pressure gauge.
Gauge. H. E. Durtsche. 1,570,558; Jan. 19.
Gear-hobbing machines, Lost-motion-compensating means for. E. Ruckingham. 1,570,372; Jan. 19.
Gem-set ring. M. L. Robbins. Des. 69,285; Jan. 19.
Glass surfaces, Decorating. C. C. Zeh. 1,570,868; Jan. 19.
Golf bag. B. Kennedy. 1,570,500; Jan. 19.
Golf bag. P. S. McQuirk. 1,570,510; Jan. 19.
Grader, Road. M. Fluto. 1,569,957; Jan. 19.
Grain huller. J. J. Ross. 1,570,081; Jan. 19.
Grapple. R. I. Flynn. 1,569,918; Jan. 19.
Gravel bin. M. L. O'Neil. 1,570,172; Jan. 19.
Grease-dispensing device. J. Baidner. 1,570,031–2; Jan. 19.
Grease-handling method and mechanism. G. Strandt. 1,570,095; Jan. 19.
Grinding and polishing machine. T. P. Anthony. 1,569,940; Jan. 19.
Grinding machine. J. A. Smith. 1,570,092; Jan. 19.
Grinding machine. W. Swiderski. 1,570,535; Jan. 19.
Grinding machines, Wheel feeding and adjusting means for. J. A. Doane. 1,570,376; Jan. 19.
Grinding mill. J. G. Bryant. 1,570,456; Jan. 19.
Grinding tool. A. Morris. 1,570,166; Jan. 19.
Gutter bracket. W. A. B. Topp. 1,570,102; Jan. 19.
Hair-drying apparatus. F. Coune. 1,570,045; Jan. 19.
Hair waver. J. Glantz. 1,570,141; Jan. 19.
Hair waver, Electric. R. P. Simmons. 1,570,012; Jan. 19.
Halter, All-around. E. S. Beckwith. 1,570,225; Jan. 19.
Hand bag. E. Meltzer. 1,570,515; Jan. 19.
Hand-bag frame and vanity case, Combined. R. C. Banga. 1,570,326; Jan. 19.
Hand grip. J. V. Young. 1,570,025; Jan. 19.
Hanger: *See*—
Garment hanger.
Hardness-testing machine. E. Henkel. 1,570,249; Jan. 19.
Harrow. O. H. Johnson. 1,570,154; Jan. 19.
Harrow. R. Crabtree. 1,569,913; Jan. 19.
Harvester, Sugar-cane. W. Snodgrass. 1,570,093; Jan. 19.
Hat. I. Boldstein. Des. 69,265; Jan. 19.
Hat bag. E. A. Nalle. 1,570,275; Jan. 19.
Hat holder. S. Simoneau. 1,570,451; Jan. 19.
Hat, Reversible. J. M. Barnhill. 1,569,942; Jan. 19.
Hat-rounding machine, Soft-. F. C. Craw. 1,570,378; Jan. 19.
Headlight. A. F. Kralicek. 1,570,503; Jan. 19.
Headlight. R. P. McCurdy and F. W. Hochstetter. 1,570,589; Jan. 19.
Headlight. W. A. Irwin and E. S. Schwartz. 1,570,491; Jan. 19.
Headlight, Dirigible. W. P. Sheets. 1,570,188; Jan. 19.
Headlight for automobiles, Orientable. B. Scherer. 1,570,284; Jan. 19.
Headlight, Movable. F. E. Zinn. 1,570,544; Jan. 19.
Heat-treating container. R. F. Flintermann. 1,570,055; Jan. 19.
Heat treating substances packed in sealed receptacles, Apparatus for. N. H. Fooks. 1,570,235; Jan. 19.
Heater: *See*—
Kerosene heater.
Heater. F. M. Hill. 1,570,489; Jan. 19.
Heater. H. B. Tyler. 1,570,017; Jan. 19.
Heaters and the like, Controlling device for. F. Lawrence. 1,570,570; Jan. 19.
Heating systems, Time-controlled regulator for. H. W. Royce. 1,570,082; Jan. 19.
Hedge trimmer. V. Lamberti. 1,569,987; Jan. 19.
Helicopter. H. A. Berliner. 1,570,121; Jan. 19.
Helium from gases containing the same, Extraction of. R. G. Boltoms. 1,569,943; Jan. 19.
Hemstitch machine. M. H. Pérez. 1,570,278; Jan. 19.
Hides and skins for manufacture into leather, Treatment of. D. McCandlish and W. R. Atkin. 1,570,383; Jan. 19.
High-frequency generators, Electrode for. R. G. Clark. 1,570,041; Jan. 19.
Hinge, Jewelry-box. R. I. Rhodes. 1,570,411; Jan. 19.
Hoist, Double-dump skip. W. E. Hale. 1,570,302; Jan. 19.
Hoisting and lowering control mechanism. E. B. Thurston. 1,570,101; Jan. 19.
Hoisting and lowering loads, Device for. H. Kell. 1,570,442; Jan. 19.
Hoisting machinery. C. W. Aveling. 1,569,846; Jan. 19.
Hook: *See*—
Safety hook.
Hook and eye. W. F. Conahan. 1,570,130; Jan. 19.

Pharmaceutical preparation and a pharmaceutical preparation thus produced, Producing a. L. Flodquist and I. G. Blomquist. 1,569,956; Jan. 19.
Phonograph loud-speaker unit, Casing for a. D. H. Moss. Des. 69,280; Jan. 19.
Photographic film, Nonstatic. E. C. Pitman. 1,570,076–8; Jan. 19.
Photographic production of typographical printing surfaces, Means for use in the. J. N. Banks. 1,570,424; Jan. 19.
Photographing system, Detective. R. R. Reed. 1,570,004; Jan. 19.
Photographs in natural colors on paper, Producing. H. Diernhofer. 1,570,375; Jan. 19.
Piano player. J. Wearham. 1,570,019; Jan. 19.
Pianoforte. E. Maxted-Massey. 1,570,513; Jan. 19.
Pile and pile driving. A. G. Rotinoff. 1,570,404; Jan. 19.
Pinning and nailing machine. F. and H. Curtin. 1,569,914; Jan. 19.
Pipe connection. V. Karbowski. 1,570,155; Jan. 19.
Pipe-gripping device. P. G. Leonard. 1,570,069; Jan. 19.

Pipe joint. G. C. Bartram. 1,570,223; Jan. 19.
Pipe trap. E. J. Wiley. 1,570,112; Jan. 19.
Pipes, Apparatus for applying helical ribs to. H. J. Zimmermann. 1,570,117; Jan. 19.
Pipes, valves, and other vessels, Closure for. H. C. Nixon. 1,569,875; Jan. 19.
Pistol, Automatic. J. E. Eriksen. 1,569,856; Jan. 19.
Piston. D. E. Claypool. 1,569,966; Jan. 19.
Planter. L. V. Schnoebelen. 1,570,087; Jan. 19.
Plaster of Paris and making the same. E. L. Wilson. 1,570,583; Jan. 19.
Plastic composition. C. J. Hoover. 1,570,585; Jan. 19.
Plastic composition, a putty or a filler cement. M. W. and W. F. Nelson. 1,570,169; Jan. 19.
Plate or similar article. G. Haviland. Des. 69,274; Jan. 19.
Platen equipment, Multibilling. H. A. Foothorap. 1,569,917; Jan. 19.
Platform structure. E. McClure. 1,570,384; Jan. 19.
Plow. L. P. Biggers. 1,569,962; Jan. 19.
Plug or socket for masonary. A. B. Feldmar. 1,570,234; Jan. 19.
Plug, Pull-off. J. B. Glowacki. 1,569,972; Jan. 19.
Polishing machine. R. F. Salisbury. 1,570,406; Jan. 19.
Pool-table ball collecting and returning device. E. F. O'Neill and E. L. Kern. 1,570,173; Jan. 19.
Power-transmission chain. F. Müller. 1,570,272–4; Jan. 19.
Press: *See*—
Drawing press. Necktie press.
Presses, Platen for pot. F. S. Carvel. 1,570,433; Jan. 19.
Pressure-fluid motor. G. H. Gilman. 1,570,379; Jan. 19.
Pressure gauge, Differential. J. W. Gamble. 1,569,959; Jan. 19.
Printing apparatus. G. F. Pond. 1,570,450; Jan. 19.
Printing machine. W. B. Payne. 1,570,175; Jan. 19.
Printing presses, Inking mechanism for. H. M. Barber. 1,570,293; Jan. 19.
Profilograph. D. Berge. 1,570,548; Jan. 19.
Propylene-thiohydrin or propylene-ethylene-thiohydrin and products obtained thereby, Preparing. G. Kränzlein and M. Corell. 1,570,262; Jan. 19.
Pump. G. Constantinesco. 1,570,554; Jan. 19.
Pump, Air booster. F. J. Kimball. 1,570,259; Jan. 19.
Pump jack. E. R. Purvis. 1,570,280; Jan. 19.
Pump liners and valve seats, Device for removing. B. H. Davis. 1,570,338; Jan. 19.
Pump mechanism. J. M. Lea. 1,570,381; Jan. 19.
Pump-packing-expanding device. A. J. Cormier. 1,570,043; Jan. 19.
Pumping power for oil wells. R. A. Dresser. 1,570,343; Jan. 19.
Pumps, Cleaning lubrication of deep-well. V. Schleyer. 1,570,285; Jan. 19.
Rack: *See*—
Game-chip rack. Tire rack.
Radiator. J. Palermiti. 1,570,316; Jan. 19.
Radiator. O. Haseiau. 1,569,929; Jan. 19.
Radiator cap. H. T. Hollingshead. Des. 69,276; Jan. 19.
Radiator protector. V. E. Blackburn. 1,570,428; Jan. 19.
Radiator shield and humidifier, Combined. H. W. Reuter. 1,570,402; Jan. 19.
Radiator support, Wall-. A. Seidel. 1,570,407; Jan. 19.
Radio apparatus and the like, Pointer knob for. H. J. Kasch. Des. 69,278; Jan. 19.
Radio-battery-charging switch means. J. F. Keane. 1,570,499; Jan. 19.
Radiocabinet. A. J. D. Ohm. Des. 69,283; Jan. 19.
Radiointerference on wire lines, Method of and apparatus for neutralizing. H. A. Affel and L. M. Ilgenfritz. 1,569,905; Jan. 19.
Railway-crossing gate. E. E. Beecher. 1,569,908; Jan. 19.
Railway rail and tie securing device. G. W. Muller. 1,570,390; Jan. 19.
Railway-switch cleaner. T. J. Wyrembek. 1,570,191; Jan. 19.
Raincoat. W. Geisler. 1,569,960; Jan. 19.
Ranges and the like, Fuel gasifier for kitchen. F. Allendorf. 1,570,325; Jan. 19.
Razor, Safety. T. S. Goff. 1,570,599; Jan. 19.
Reamers, Making. J. B. Dillard. 1,570,049; Jan. 19.
Receptacle, Sanitary. A. Edwards. 1,570,344; Jan. 19.
Refrigerant. R. R. Stitt. 1,570,080; Jan. 19.
Refrigeration. H. S. Vassar. 1,570,416; Jan. 19.
Refrigerator. A. D. Sanders, jr. 1,570,009; Jan. 19.
Refrigerators, Pressure-controlled temperature regulator for artificial. F. J. Heideman. 1,570,144; Jan. 19.
Regulating means, Automatic. C. M. Terry. 1,569,897; Jan. 19.
Regulator: *See*—
Window regulator.
Release lever. F. W. Bold. 1,569,911; Jan. 19.
Religious automata. J. C. Freidhoff. 1,569,958; Jan. 19.
Resin substitute produced by Friedel Crafts reaction. E. Freund and H. Jordan. 1,570,469; Jan. 19.
Ribbon reverse, Automatic. G. F. Handley. 1,570,218; Jan. 19.
Ring: *See*—
Fastening and clamping Packing ring.
ring.
Ring-spinning frame and other spinning machine. R. Taylor. 1,570,323; Jan. 19.
Rivets, screw blanks, and the like, and in other upsetting machines, Holder for the blank in machines for making. S. H. Svensson and K. O. Engkvist. 1,569,895; Jan. 19.
Road equalizer. C. J. Patterson. 1,570,522; Jan. 19.
Road grader. C. E. Gilbert. 1,570,140; Jan. 19.
Road-grading machine. D. G. Mackenzie and M. H. Necker. 1,570,267; Jan. 19.
Road-packing machine. R. A. Thompson. 1,570,582; Jan. 19.
Road-working apparatus. T. S. O'Brien. 1,570,171; Jan. 19.
Rolled material, Holder for. P. Levine. 1,570,358; Jan. 19.
Rollers, Adjusting means for. N. P. Sjobring and M. Swanson. 1,570,452; Jan. 19.
Rolling mill. L. Lee. 1,570,068; Jan. 19.
Roof covering. J. E. Hooker. 1,570,152; Jan. 19.
Route meter. E. F. Buettner, E. Ganun, and H. K. Throm. 1,569,946; Jan. 19.
Rubber to metal and article produced thereby, Attaching. A. B. Merrill. 1,570,445; Jan. 19.
Rule and compass, Combined parallel. S. G. Le Gresley. 1,569,938; Jan. 19.
Saddle-traversing mechanism. R. H. Rausch. 1,570,401; Jan. 19.
Safety hook. G. F. Hickok. 1,570,149; Jan. 19.
Safety signal. W. E. Beard. 1,569,907; Jan. 19.
Sample tab. J. Wieder. 1,570,364; Jan. 19.
Sanding block. J. B. Pointer. 1,570,177; Jan. 19.
Sash fastener. J. O. Becvar. 1,570,034; Jan. 19.
Sash fastener, Window-. B. E. Bowles. 1,569,849; Jan. 19.
Sash-weight cores, Mold for. J. J. Fleming. 1,570,054; Jan. 19.
Scaffold anchor. P. E. Cooper. 1,569,951; Jan. 19.
Scaffold or staging. C. M. West. 1,570,541; Jan. 19.
Scale. L. A. Osgood and E. E. Wolf. 1,570,074; Jan. 19.
Scale casing. C. H. Hapgood. Des. 69,271; Jan. 19.
Seal or tag for meats. F. G. Purinton. 1,570,399–400; Jan. 19.
Sealing strip. J. R. Replogle. 1,570,186; Jan. 19.
Seam anchor. P. Hogan. 1,570,439; Jan. 19.
Seam rubbing. F. M. Furber. 1,570,057; Jan. 19.
Searchlight, Dirigible. A. C. Wood and L. L. Meyers. 1,570,024; Jan. 19.
Seed hulls and product, Treating. R. Morgenler. 1,570,389; Jan. 19.
Sending and receiving system, Simultaneous. A. J. Kloneck. 1,570,261; Jan. 19.
Sewing machine, Bag-. F. J. Thull. 1,570,100; Jan. 19.
Sewing-machine looper mechanism. A. B. Clayton. 1,569,912; Jan. 19.
Sewing machines, Feeding mechanism for book-. U. Bischof. 1,569,909; Jan. 19.
Sewing machines, Shuttle casing for. G. G. Paine. 1,570,075; Jan. 19.
Sewing machines, Thread puller for automatic-stop. M. McCann. 1,569,992; Jan. 19.
Shaft-drive draw work and rotary drilling machine. E. W. Gosser and W. D. Davidson. 1,570,243; Jan. 19.
Shaft-rocking mechanism. P. R. Kemble. 1,569,984; Jan. 19.
Sharpener, Knife-blade. C. Runzi. 1,570,083; Jan. 19.
Shears, Extension-limiting means for grass. G. Reiter. 1,570,282; Jan. 19.
Sheave block. B. S. Minor. 1,570,271; Jan. 19.
Sheet-feeding mechanism for forming machines. L. E. Parker. 1,570,592; Jan. 19.
Shell and producing the same, Decorative exfoliated. S. Rauschenberg. 1,570,183; Jan. 19.
Shingle. T. D. Miller. 1,570,516; Jan. 19.
Shingle clamp, Storm-type. J. C. Barley. 1,570,222; Jan. 19.
Shirt. J. H. Cronin. 1,570,208; Jan. 19.
Shock absorber. B. T. Phillips. 1,570,395; Jan. 19.
Shock absorber. M. E Goldensky and S. S. Harris. 1,570,479; Jan. 19.
Shock absorber for vehicles. S. A. Moss. 1,569,873; Jan. 19.
Shock diffuser. F. F. Landis. 1,570,159; Jan. 19.
Shocking machine. L. J. Clement 1,570,204; Jan. 19.
Shoe-cleaning device. M. J. Sperling. 1,569,989; Jan. 19.
Shoe-polishing machine. S. D'Aprea. 1,570,465; Jan. 19.
Shoe support and form. E. L. Cavanna. 1,570,295; Jan. 19.
Shoes, Machine for use in the manufacture of. T. Lund. 1,569,991; Jan. 19.
Shoes, Making. F. N. La Chapelle. 1,570,067; Jan. 19.
Shoes, Method of and machine for operating upon. C. De Minico. 1,569,853; Jan. 19.
Shore, Adjustable. G. B. Bosco. 1,570,226; Jan. 19.
Shovel: *See*—
Adjustable shovel.
Sidewalk mat. B. Izzo. 1,569,934; Jan. 19.
Sight testing and which can also be used as a mirror. Device for displaying printed or other matter employed in. P. Stevenson, jr. 1,570,408; Jan. 19.
Signal: *See*—
Direction signal. Safety signal.
Signaling devices, Circuit-controlling means for. L. H. Walsh. 1,570,107; Jan. 19.

Signaling system. J. F. Toomey. 1,569,898; Jan. 19.
Sink. C. E. Howard. 1,569,978; Jan. 19.
Sled. I. L. Robblee. 1,569,885; Jan. 19.
Snow-removing apparatus. E. L. Dunkle. 1,570,377; Jan. 19.
Sodium thiosulphate, Manufacture of. H. Howard. 1,570,253; Jan. 19.
Sound-reproducing machine, Cabinet for a. M. Nystrom. Des. 69,282; Jan. 19.
Sound-reproducing method and apparatus. J. W. Horton. 1,570,490; Jan. 19.
Sounds, Recording and reproducing. F. L. Dyer. 1,570,297; Jan. 19.
Spark and throttle control, Combined. H. M. Denyes. Des. 69,259; Jan. 19.
Spark plug and making same. A. E. Serewicz. 1,570,320; Jan. 19.
Speedometer and odometer, Production of units of combined. F. G. Whittington. 1,570,021; Jan. 19.
Spoon, Skimming. J. T. Sweeney. 1,570,321; Jan. 19.
Spring: *See*—
Automobile spring.
Sprocket chain. H. P. Stevens. 1,570,014; Jan. 19.
Stamp-canceling machine. J. O. Lamoureux. 1,570,355; Jan. 19.
Stamp for convex surfaces, Hand-. D. F. Meyer. 1,570,387; Jan. 19.
Stand: *See*—
Boiler stand. Music stand.
Steel, Degassing and deoxidizing. S. Peacock and N. E. Cook. 1,570,176; Jan. 19.
Steering apparatus. E. E. Winkley. 1,570,543; Jan. 19.
Steering gear. O. M. Jackson. 1,570,493; Jan. 19.
Steering wheel. H. E. Sheller. 1,569,888; Jan. 19.
Step plate, Illuminated. W. Lindsay. 1,569,867; Jan. 19.
Stereotype printing plates, Apparatus for casting curved. B. J. J. Goulding. 1,570,480; Jan. 19.
Stone, Making artificial. J. Thomas. 1,570,538; Jan. 19.
Stone-cutting machine. E. T. Pollard. 1,570,318; Jan. 19.
Stop cock. J. H. Bruhn and A. E. Matz. 1,570,126; Jan. 19.
Storage battery. W. H. Wood. 1,570,115; Jan. 19.
Storage receptacle for substances easily decomposable in solutions. M. Hahn. 1,570,346; Jan. 19.
Stove chimneys, Insulating attachment for oil-. A. H. Jewell. 1,570,495; Jan. 19.
Stoves, Depending shield attachment for oil. A. H. Jewell. 1,570,494; Jan. 19.
Straw-spreading attachment. W. F. Reschke. 1,569,882; Jan. 19.
Stropper, Razor. E. B. Gibford. 1,569,969; Jan. 19.
Structural unit. D. F. Stevens. 1,570,595; Jan. 19.
Structural unit, Composite. J. G. Donaldson and H. L. Coles. 1,569,954; Jan. 19.
Suction apparatus. L. Brodersen and M. E. Steppings. 1,570,370; Jan. 19.
Suitcase, Wardrobe. G. M. Kapriellan. 1,569,982; Jan. 19.
Sundial. S. W. Balch. 1,570,029; Jan. 19.
Swimming appliance. L. F. Snapp. 1,569,892; Jan. 19.
Switch: *See*—
Connecter switch. Thermostatic switch.
Electric switch. Transfer switch.
Switch indicator. H. B. Newhall. 1,570,315; Jan. 19.
Syringe, Hypodermic. M. F. Bauchert. 1,569,961; Jan. 19.
T Square. S. S. Hinds. 1,570,150; Jan. 19.
Tabulating machine, Automatically-controlled. C. D. Lake. 1,570,264; Jan. 19.
Tank: *See*—
Filtering tank.
Tank or can closure. J. S. Reid. 1,569,881; Jan. 19.
Tanks, Metallic roof for. J. T. Maguire. 1,570,311; Jan. 19.
Tanks, Safety attachment for. J. Cohn. 1,570,461; Jan. 19.
Telegraph repeater. G. S. Vernam and E. F. Watson. 1,569,899; Jan. 19.
Telegraph system. A. A. Clokey. 1,570,460; Jan. 19.
Telemotor apparatus, Electric. M. P. Laughlin. 1,570,505; Jan. 19.
Telephone. H. Sell. 1,570,287; Jan. 19.
Telephone calling transmitter, Automatic. S. W. Balch. 1,570,030; Jan. 19.
Telephone device. A. F. Bennett. 1,570,120; Jan. 19.
Telephone receivers, Diaphragm for. P. J. Cook. 1,570,337; Jan. 19.
Telephone receivers, Support for head. H. R. Clarke. 1,570,129; Jan. 19.
Telephone system, Automatic. J. Wicks. 1,570,022; Jan. 19.
Telephones, Memorandum-pad equipment for. C. L. Bowers. 1,570,430; Jan. 19.
Temperature on a portion of the body, Apparatus for maintaining constant. S. L. Owens. 1,569,877; Jan. 19.
Testing appliance. A. O. Oehrli. 1,570,520; Jan. 19.
Textile machines, Clearer and slub catcher for. W. M. Hastings. 1,570,248; Jan. 19.
Thermostatic control. L. Mombaruzzo. 1,570,446; Jan. 19.
Thermostatic switch. R. H. Houk. 1,569,933; Jan. 19.
Thiocyanates and thiosulphates, Recovery of. M. Darrin. 1,570,047; Jan. 19.
Tile, Roof or building. L. Lane. 1,570,504; Jan. 19.
Tiles, Making concrete. A. G. Hatch. 1,569,977; Jan. 19.
Time indicator and sighting compass, Combination. G. Hollinwood. 1,570,349; Jan. 19.
Tire. L. R. Davis. Des. 69,258; Jan. 19.
Tire and demountable rim. C. M. Manly. 1,570,590; Jan. 19.
Tire carrier and rim contractor and expander, Combined spare-. H. K. Johnson. 1,569,980; Jan. 19.
Tire casings, Repairing. A. H. Fisher. 1,570,298; Jan. 19.
Tire rack. F. E. Weller. 1,570,110; Jan. 19.
Tire traction chain, Truck. W. and M. H. Paterson. 1,570,174; Jan. 19.
Tire valve. C. S. Preston. 1,570,397; Jan. 19.
Tire, Vehicle. E. H. Dickensheet. 1,570,048; Jan. 19.
Tires of automobiles, Locking mechanism for the spare. C. A. Godshalk. 1,570,477; Jan. 19.
Tires or wheels from motor trucks, Device for removing. E. C. Lyman. 1,570,070; Jan. 19.
Toaster, Electric. M. Murphy. 1,570,447; Jan. 19.
Toe binder. J. Fausse. 1,570,053; Jan. 19.
Toilet articles, Holder for. A. O. Nelson. Des. 69,281; Jan. 19.

Typewriting machine. J. A. B. Smith. 1,569,890–1; Jan. 19.
Typewriting machine. H. H. Vickers. 1,569,900; Jan. 19.
Typewriting machines, Casing for. A. G. F. Kurowski. 1,570,263; Jan. 19.
Typewriting machines, Ribbon feeding mechanism for. C. B. B. Hess and L. C. Myers. 1,570,220; Jan. 19.
Typographical composing and distributing machine. D. S. Kennedy. 1,570,258; Jan. 19.
Umbrella rack and smoking stand. S. Weinschenk. 1,570,540; Jan. 19.
Undergarment, Lady's. W. L. Siewers. 1,569,889; Jan. 19.
Universal joint. A. H. Leipert. 1,569,989; Jan. 19.
Vacuum tanks, Strainer for. J. K. Olsen. 1,570,073; Jan. 19.
Valve. H. E. Freebury. 1,570,468; Jan. 19.
Valve and cock. R. Howell. 1,570,568; Jan. 19.
Valve, Air-brake release. P. B. Rohner. 1,570,187; Jan. 19.

Valve-controlled ventilating device, Gas-. H. Dyer. 1,570,232; Jan. 19.
Valve for air compressors and the like. B. V. Nordberg. 1,570,392; Jan. 19.
Valve mechanism. H. L. Colby. 1,569,852; Jan. 19.
Valve, Railway-air-brake-control. L. A. M. Barascud. 1,570,426; Jan. 19.
Valve rotator, Poppet-. C. E. Sargent. 1,569,887; Jan. 19.
Valve-spring compressor. G. D. Bussard. 1,570,039; Jan. 19.
Valve-spring lifter. L. H. Bayler. 1,570,224; Jan. 19.
Valve, Swing-spout. O. N. Wiswell. 1,570,114; Jan. 19.
Vanadium from petroleum hydrocarbons, Recovering. A. Oberle. 1,570,170; Jan. 19.
Vanity box. A. S. Lyhne. 1,570,382; Jan. 19.
Vault, Fireproof. H. S. Gaskill. 1,570,472; Jan. 19.
Vehicle brake apparatus. G. A. Evans. 1,570,378; Jan. 19.
Vehicle, Child's. F. Strauss. 1,570,410; Jan. 19.
Vehicle, Motor. J. Hammerl. 1,570,483; Jan. 19.
Vehicle tops, Quarter pad for. V. P. Rumely. 1,570,412; Jan. 19.
Vehicles, Body construction for. W. H. Emond. 1,570,560; Jan. 19.
Vehicles, Discharging device for. C. Möller. 1,569,997; Jan. 19.
Vehicles, Electric coupling for railway. H. E. Van Dorn. 1,570,105; Jan. 19.
Vehicles, Fender guard for. H. W. Tinker. Des. 69,292; Jan. 19.
Vehicles, Radiator for motor. J. D. Harris and T. M. Dalgarn. 1,570,142; Jan. 19.
Vehicles, Wheel guard for. R. Wade. 1,570,292; Jan. 19.
Ventilating fan. W. Buccuto. 1,570,371; Jan. 19.
Ventilator: *See*—
Car ventilator. Window ventilator.
Ventilator. A. L. Schwartzberg. 1,570,089; Jan. 19.
Ventilator. W. H. Jardine. 1,570,441; Jan. 19.
Violin chin rest. S. J. Wallace. 1,570,361; Jan. 19.
Violin-position guide. F. A. Bua. 1,570,457; Jan. 19.
Vitreous composition and articles made therefrom. E. C. Buck. 1,570,202; Jan. 19.
Voile fabric, Flocked. E. B. Vandergaw and J. Heinrich. Des. 69,293–301; Jan. 19.
Wafers, Machine for coating. F. G. Salerno. 1,570,405; Jan. 19.
Wagon box, Dumping. W. C. and H. C. Bruhn. 1,570,125; Jan. 19.
Wagon, Coaster. L. R. Schaffner. 1,570,528; Jan. 19.
Wall board, etc., Machine for making. H. B. and H. W. Cobb. 1,570,335; Jan. 19.
Wall paper. A. C. Dodman, jr., and C. S. Reiber. Des. 69,260–1; Jan. 19.
Wardrobe and blackboard, Class-room. F. B. Miller. 1,570,388; Jan. 19.
Washboiler. A. E. Fisher. 1,570,136; Jan. 19.
Washer: *See*—
Window washer.
Washing machine. J. H. Andresen. 1,570,423; Jan. 19.
Washing-machine wringer. A. J. Fisher. 1,569,859; Jan. 19.
Washing machines and the like, Drain spout for. W. H. George. 1,570,058; Jan. 19.
Watchcase. I. Tannenbaum. Des. 69,291; Jan. 19.
Water bags, Making. H. G. Carter. 1,570,128; Jan. 19.
Water craft, Sectional. J. Gleave. 1,570,241; Jan. 19.
Water or liquid, Filtration of. R. H. L. Pennell. 1,570,523; Jan. 19.
Water plug. W. Z. Pulliam. 1,570,180; Jan. 19.
Waterproof quilting. R. Falter. 1,569,955; Jan. 19.
Water transportation and a novel boat for use in connection therewith, System of. H. H. Fisher and W. B. Rittenhouse. 1,569,916; Jan. 19.
Weight for the horns of cattle. F. H. Petersen. 1,570,524; Jan. 19.
Wheel: *See*—
Disk wheel. Steering wheel.
Wheel. A. Kaufmann. 1,570,257; Jan. 19.
Wheeled toy. R. D. Grove. Des. 69,269; Jan. 19.
Wick trimmer. S. T. Atkin. 1,570,194; Jan. 19.
Window and door frames, Method and arrangement for fastening. V. K. Hultin. 1,570,351; Jan. 19.
Window-blind fitting. C. Nevatt. 1,570,573; Jan. 19.
Window-blind fitting, Roller. C. Nevatt. 1,570,574; Jan. 19.
Window frames in convertible vehicle bodies, Mechanism for raising and lowering the. J. E. Sersté. 1,570,011; Jan. 19.
Window regulator. E. Koeb. 1,570,502; Jan. 19.
Window ventilator, Automatic. V. M. Allen. 1,569,847; Jan. 19.
Window washer. R. A. Lychou. 1,570,509; Jan. 19.
Window-washing apparatus. J. C. G. Bonney. 1,570,201; Jan. 19.
Window-washing apparatus, Pad for. J. C. G. Bonney. 1,570,200; Jan. 19.
Windshield cleaner. F. G. and W. M. Folberth. 1,570,598; Jan. 19.
Windshield, Rear-seat. J. C. Kelsch. 1,570,569; Jan. 19.
Wire, Process and machine for shaping. F. H. Beyea. 1,570,036; Jan. 19.
Wireless apparatus. A. Mavrogenis. 1,570,444; Jan. 19.
Wood, Machine for bending. L. Johnson. 1,569,935; Jan. 19.
Woven fabric. L. Bluhm. Des. 69,250; Jan. 19.
Wrecking bar. M. Younick. 1,570,192; Jan. 19.
Wrench. J. E. Kenerson. 1,570,586; Jan. 19.
Wringer: *See*—
Washing-machine wringer.
Wringer. A. W. Altorfer. 1,570,545; Jan. 19.
Wringer. B. E. Getz. 1,570,562; Jan. 19.
Yeast and making it, Preserved. U. Wegener. 1,570,418; Jan. 19.

CLASSIFICATION OF PATENTS

ISSUED JANUARY 19, 1926.

NOTE.—First number—class, second number—subclass, third number—patent number.

1— 1: 1,569,914
11: 1,570,589
18: 1,569,920
2— 12: 1,570,254
78: 1,569,889
86: 1,570,227
88: 1,569,960
127: 1,569,988
128: 1,570,208
197: 1,569,942
4— 173: 1,570,164
187: 1,569,978
285: 1,570,512
5— 53: 1,570,579
348: 1,569,937
6— 9: 1,570,134
8— 6: 1,569,915
19: 1,570,423
9— 2: 1,570,241
11: 1,570,470
21: 1,569,892
10— 25: 1,569,895
12— 27: 1,569,991
51: 1,569,853
107: 1,570,053
128.1: 1,570,295
145: 1,570,067
15— 23: 1,570,465
29: 1,570,509
45: 1,570,482
161: 1,569,939
220: 1,570,201
227: 1,569,854
230: 1,570,127
232: 1,570,200
238: 1,569,934
253: 1,570,598
16— 128: 1,570,411
18— 1: 1,570,086
42: 1,570,147
45: 1,570,157
56: 1,570,128
59: 1,570,445
19— 134: 1,570,323
20— 1.11: 1,570,580
11: 1,570,351
16: 1,570,462
22: R.16,255
35: 1,570,427
69: 1,570,186
22— 4: 1,570,480
69: 1,569,851
90: 1,570,506
95: 1,570,474
148: 1,570,473
173: 1,570,054
23— 1: 1,570,594
16: 1,570,170
65: 1,570,299
75: 1,570,047
111: 1,570,006
116: 1,570,253
142: 1,570,353
146: 1,570,438
182: 1,570,537
198: 1,570,485
233: 1,570,005
237: 1,570,333
24— 11: 1,570,425
71.2: 1,570,291

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 26TH DAY OF JANUARY, 1926.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Abram, Edmund W., London, England. Teapot, coffeepot, and the like. 1,570,818; Jan. 26.
Adair, Herbert J., Ardmore, and E. J. Flannery, Philadelphia, Pa. Automobile rim compressor. 1,570,719; Jan. 26.
Adams, Robert P., et al. (See Sweeney, David, assignor.)
Aitken, Andrew W., assignor to The Buffalo-Springfield Roller Co., Springfield, Ohio. Motor vehicle. 1,571,035; Jan. 26.
Aktiebolaget Ljungströms Angturbin. (See Ljungström, Fredrik, assignor.)
Albright, Neil T., assignor to Kokomo Automotive Mfg. Co., Kokomo, Ind. Signal lamp. 1,570,605; Jan. 26.
Albright, Neil T., assignor to Kokomo Autcmotive Manufacturing Company, Kokomo, Ind. Shock absorber. 1,570,606; Jan. 26.
All-In-One Manufacturing Company, The. (See Lieberthal, Robert H., assignor.)
Alsager, Arne O., Willow Creek Township, Lee County, Ill. Ironing-board-cover fastener. 1,571,083; Jan. 26.
Aluminum Company of America. (See Hobbs, Douglas B., assignor.)
American Electrical Heater Company. (See Kuhn, F., and Thomas, assignors.)
American Laundry Machinery Company, The. (See Benjamin, Dana H. and H. W., assignors.)
American Magnesium Corporation. (See Templin, Richard L., assignor.)
American Optical Company. (See Schumacher, Elmer L., assignor.)
American Shoe Machinery Company. (See Wright, W. C., and Merrick, assignors.)
American Telephone and Telegraph Company. (See Harden, W. H., and Graefenecker, assignors.)
American Telephone and Telegraph Company. (See Loynes, Owen H., assignor.)
American Telephone and Telegraph Company. (See Nyquist, Harry, assignor.)
American Tube and Stamping Company, The. (See Marchesseault, Joseph R., assignor.)
American Tube & Stamping Company, The. (See Tatem, James B., assignor.)
Amos, Hermann, Doltzschen, near Dresden, Germany. Artificial-stone abrasive wheel. 1,570,604; Jan. 26.
Anderson, Alexander. (See Dostal, J. L., and Anderson.)
Anderson, Emil I., New York, and N. E. Anderson, Bronx, N. Y. Flexible bracelet or the like. 1,570,932; Jan. 26.
Anderson, Nils E. (See Anderson, Emil I. and N. E.)
Andrews-Bradshaw Company. (See Andrews, Roger W., assignor.)
Andrews, Roger W., assignor to Andrews-Bradshaw Company, Pittsburgh, Pa. Steam purifier. 1,570,985; Jan. 26.
Anguish, Allen A., Everett, Mass. Hoisting and equalizing apparatus. 1,571,036; Jan. 26.
Aram, Otto, Philadelphia, Pa., assignor to Westinghouse Electric and Manufacturing Company. Stoker ram. 1,570,604; Jan. 26.
Armstrong Cork Company. (See Bentley, L. L., and Sloan, assignors.)
Arrow Electric Company, The. (See Harrington, William H., assignor.)
Automatic Appliance Company, The. (See Mapel, Lewis A., assignor.)
Ayars, Charles H., assignor to Ayars Machine Company, Salem, N. J. Canning machine. 1,570,980; Jan. 26.
Ayars Machine Company. (See Ayars, Charles H., assignor.)
Ayres, Eugene E., jr., Chester, Pa., assignor to The Sharples Specialty Company, Philadelphia, Pa. Resolving emulsions. 1,570,987; Jan. 26.
Backstrom, Gustaf V. (See Brown, Perry O., assignor.)
Bagley, William H., Detroit, Mich., assignor to The Studebaker Corporation, South Bend, Ind., and Detroit, Mich. Plug gauge. 1,571,154; Jan. 26.
Baker, Percy W., Kingston-on-Thames, England. Thermally-actuated device for controlling electric circuits. 1,571,104; Jan. 26.
Baker, Wedworth V., Detroit, Mich. Industrial oven. 1,570,720; Jan. 26.
Baldwin, Frederick M., Los Angeles, Calif. Auto signaling device. 1,570,721; Jan. 26.
Baldwin, James C., Junction City, assignor of one-fourth to W. C. Donnell, one-fourth to R. C. Sheets, Navarre, Kans., and one-fourth to E. B. Saufley, Kansas City, Mo. Battery terminal. 1,570,722; Jan. 26.
Banks, Clarence E., assignor of one-half to J. L. Brightwell, Monticello, Mo. Insulator. 1,570,723; Jan. 26.
Barber, William H. (See Evans, E. J., and Barber.)
Barney, Edwin E., New Rochelle, assignor to Remington Typewriter Company, Ilion, N. Y. Typewriting machine. 1,570,988; Jan. 26.
Bart, Blasius, East Orange, N. J. Electroplating and apparatus therefor. 1,570,819; Jan. 26.
Bartlett, Arthur F., and W. F. Straub, Fitchburg, Mass. Nut lock. 1,571,037; Jan. 26.
Bashline, George S., Wynona, Okla. Pulling device. 1,570,607; Jan. 26.
Bassett, William C., Long Beach, Calif. Composition for casehardening. 1,571,084; Jan. 26.
Bayer, Leo J., St. Louis, Mo. Soot blower. 1,571,038; Jan. 26.
Bayer, Leo J., St. Louis, Mo. Soot blower. 1,571,039; Jan. 26.
Bazzoni, Lewis J., Swampscott, Mass. Internal-combustion engine. 1,571,175; Jan. 26.
Beagle, Steve A., et al. (See Seifke, Herman A., assignor.)
Beck, Frédérick, Neuilly-sur-Sein, France. Automatic chuck. 1,570,724; Jan. 26.
Bedaux, Charles E. (See Parsons, George A., assignor.)
Benckenstein, Charles H., Vinton, La. Screen for oil wells. 1,570,725; Jan. 26.
Bendix Brake Company. (See Smith, F. H., and Sindelar, assignors.)
Benjamin, Dana H., and H. W., Cleveland Heights, assignors to The American Laundry Machinery Company, Cincinnati, Ohio. Power pressing machine. 1,571,040; Jan. 26.
Benjamin Electric Manufacturing Company. (See McClatchie, Stanley, assignor.)
Benjamin Electric Manufacturing Company. (See Warner, Chester E., assignor.)
Benjamin, Howard W. (See Benjamin, Dana H. and H. W.)
Bennington, Earl T., Willoughby, assignor to The Cleveland Crane & Engineering Company, Wickliffe, Ohio. Current collector. 1,570,933; Jan. 26.
Bennington, Earl T., Cleveland Heights, assignor to The Cleveland Crane & Engineering Company, Wickliffe, Ohio. Tramrail switch. 1,570,934; Jan. 26.
Bentley, Louis L., Beaver Falls, and J. W. Sloan, New Brighton, assignors to Armstrong Cork Company, Pittsburgh, Pa. Shoe-botton-filling apparatus. 1,570,608; Jan. 26.
Best, Norman A. (See Hoy, J. E., and Best.)
Betéa, Vicente, Venado Tuerto, Argentina. Groundcleaning rake. 1,570,820; Jan. 26.
Bethlehem Steel Company. (See Burns, Timothy, assignor.)
Bethlehem Steel Company. (See Entwisle, Edward F., assignor.)
Bethlehem Steel Company. (See Hilpert, Meier G., assignor.)
Bethlehem Steel Company. (See Julstedt, Clas J., assignor.)
Bethlehem Steel Company. (See Lehr, Charles E., assignor.)
Bethlehem Steel Company. (See Schenck, C., Fine, and Ibach, assignors.)
Bethlehem Steel Company. (See Schulz, Paul A., assignor.)
Bethlehem Steel Company. (See Van Essen, Pieter D., assignor.)
Beyea, Frank H., assignor to J. R. Gammeter, Akron, Ohio. Machine for the manufacture of bead cables or grommets. 1,570,821; Jan. 26.
Bishop, Frederic L., assignor to Window Glass Machine Company, Pittsburgh, Pa. Method and apparatus for annealing and cooling sheet glass. 1,570,822; Jan. 26.
Black, Hugh R., Hall, N. Y. Packaging fruit and the like. 1,571,041; Jan. 26.
Block, William, Chicago, Ill. Supporting arm for lamp stands. Des. 69,307; Jan. 26.
Block, William, Chicago, Ill. Arm-supporting bracket for lamp stands. Des. 69,308; Jan. 26.

Block, William, Chicago, Ill. Finial for lamps. Des. 69,309; Jan. 26.
Bodker, John W., Ponchatoula, La. Garment hanger. 1,571,087; Jan. 26.
Boeck, Percy A., Los Angeles, Calif., assignor, by mesne assignments, to The Celite Company. Treating filtration residues for reuse. 1,571,042; Jan. 26.
Bohrer, Raymond E. (See Payne, W. B., Tiefel, and Bohrer.)
Bolens, Harry W. (See Murakami, Rin N., assignor.)
Booth, Prentice, North Fond du Lac, Wis. Power-driven saw. 1,570,935; Jan. 26.
Bossert, Edward, Toledo, assignor to National Malleable and Steel Castings Company, Cleveland, Ohio. Mold flask. 1,570,989; Jan. 26.
Böttner, Arno, Sudenburg, near Magdeburg, assignor to the Firm: Polte, Magdeburg, Germany. Steam-cut-off valve. 1,570,990; Jan. 26.
Bowers, Albert P., assignor to Columbian Bank Note Company, Chicago, Ill. Paper-gripping device for plate printers. 1,570,936; Jan. 26.
Brahs, Charles, Paterson, N. J. Lining for transmission and brake bands. 1,571,085; Jan. 26.
Brand, Anna P., assignor to B. A. Brand, Chicago, Ill. Garter and arm band. 1,570,937; Jan. 26.
Brand, Benjamin A. (See Brand, Anna P., assignor.)
Brandes Laboratories, Inc. (See Gerns, William H., assignor.)
Brenne, Arild M., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Hand brake. 1,570,609; Jan. 26.
Briggs Manufacturing Company. (See Marshall, William, assignor.)
Brightwell, Jesse L. (See Banks, Clarence E., assignor.)
British Dyestuffs Corporation Limited. (See Lefebure, V., and Hallwood, assignors.)
Brittain, Gustavus O., Canton, Ohio. Air-cooled engine. 1,571,086; Jan. 26.
Broderick, Frank W., assignor of one-half to E. H. Slater, Memphis, Tenn. Pipe-cutting machine. 1,570,726; Jan. 26.
Broughton, E. B. (See Ward, David A., assignor.)
Brown, James V., Erlanger, N. C., assignor to H. & B. American Machine Company, Pawtucket, R. I. Bunch builder for spinning machines. 1,571,155; Jan. 26.
Brown-Lipe Gear Company. (See Leighton, Herbert J., assignor.)
Brown, Perry O., assignor of one-half to G. V. Backstrom, St. Vincent, Minn. Emergency grease cup. 1,570,873; Jan. 26.
Brumfield, Thomas R., assignor of one-half to P. L. Hines, Danville, Va. Combined nut and bolt lock. 1,570,874; Jan. 26.
Brunn, George T., Pittsburgh, Pa. Electric system. 1,570,823; Jan. 26.
Buchanan, David E., Dublin, Tex. Knee pad. 1,571,088; Jan. 26.
Buchli, Jacob, Winterthur, Switzerland. Steam locomotive. 1,570,991; Jan. 26.
Budd Company, The. (See Gormley, Frank L., assignor.)
Buffalo-Springfield Roller Co., The. (See Aitken, Andrew W., assignor.)
Bullinger, Christ. (See Jaeger, W., and Potstock, assignors.)
Burdick, Charles L., London, England. Paper-folding machine. 1,571,105; Jan. 26.
Burger, Luis, New York, N. Y. Shoe. 1,571,106; Jan. 26.
Burnham Chemical Company. (See Gauger, A. W., and Storch, assignors.)
Burns, Timothy, Buffalo, N. Y., assignor to Bethlehem Steel Company, Bethlehem, Pa. Regenerative furnace. 1,570,992; Jan. 26.
Butler, Matthew J., and E. A. Johnson, Joliet, Ill. Combined sight gauge and thermometer. 1,570,938; Jan. 26.
Byer, Solomon. (See Moore, R. A., and Byer.)
Cahusac, Clarence N., Newark, N. J. Smoker's novelty ash tray. 1,570,610; Jan. 26.
Calhoun, Lawrence V., Lima, assignor to The Dayton Malleable Iron Company, Dayton, Ohio. Sealing lock and door starter. 1,570,611; Jan. 26.
Cameron, James A., Brooklyn, N. Y., and R. M. Johnstone, Roselle Park, N. J., assignors to Cameron Machine Company, Brooklyn, N. Y. Slitting machine. 1,570,939; Jan. 26.
Cameron, James A., Brooklyn, N. Y., and R. M. Johnstone, Roselle Park, N. J., assignors to Cameron Machine Company, Brooklyn, N. Y. Slitting machine. 1,570,940; Jan. 26.
Cameron Machine Company. (See Cameron, J. A., and Johnstone, assignors.)
Capelle, Agnes, and H. Harris, New York, N. Y. Hat. 1,571,107; Jan. 26.
Carborundum Company, The. (See Johnson, Boyd M., assignor.)
Carey, Philip Manufacturing Company. (See Milar, James J., assignor.)
Carpenter, Herbert L., Brooklyn, N. Y. Container. 1,571,089; Jan. 26.
Carrasco-Sánchez, Manuel, Washington, D. C. Mechanical movement. 1,570,727; Jan. 26.
Carroll, John G., assignor to Walker Vehicle Company, Chicago, Ill. Axle for vehicles. 1,570,941; Jan. 26.
Carroll, John G., assignor to Walker Vehicle Company, Chicago, Ill. Brake construction. 1,570,942; Jan. 26.
Cartee, William R., Lakewood, Ohio. Game apparatus. 1,570,875; Jan. 26.
Case, Arthur F., assignor to The Wellman-Seaver-Morgan Company, Cleveland, Ohio. Car dumper. 1,570,943; Jan. 26.
Case, J. I., Threshing Machine Company. (See Coburn, Ernest, assignor.)
Case, Robert W. (See Lavender, Samuel C., assignor.)
Celite Company, The. (See Boeck, Percy A., assignor.)
Celite Company, The. (See Eisenbast, Arthur S., assignor.)
Celite Company, The. (See Thatcher, Harry S., assignor.)
Chandler, Henry, Marysville, Mich. Valve follower. 1,570,728; Jan. 26.
Choate, Earl F. (See Steigh, J., and Choate.)
Chrysler Corporation. (See Kent, Philip J., assignor.)
Cincinnati Stamping Company, The. (See Krueger, Fred G., assignor.)
Cinq-Mars, Legendre, San Francisco, Calif. Gas furnace. 1,570,612; Jan. 26.
Cisco, George W., Hawthorne, N. J. Incubator. 1,570,944; Jan. 26.
Cisco, George W., Hawthorne, N. J., and J. F. MacKay, Lancaster, Pa. Incubator. 1,570,945; Jan. 26.
Clark, Henry F. (See Monro, W. L., Clark, and Pierce.)
Clark, Lester G., Montreal, Quebec, Canada, assignor, by mesne assignments, to The E. Z. Auto Washer Company, New Haven, Conn. Surface washer. 1,570,824; Jan. 26.
Clashing, Fred, Sacramento, Calif. Water-conserving system for gas-engine radiators. 1,571,043; Jan. 26.
Clausing, George, assignor to The Vulcan Last Company, Portsmouth, Ohio. Last. 1,570,613; Jan. 26.
Clausing, George, assignor to The Vulcan Last Company, Portsmouth, Ohio. Last. 1,570,614; Jan. 26.
Clausing, George, assignor to The Vulcan Last Company, Portsmouth, Ohio. Last. 1,570,615; Jan. 26.
Clements, Louis F., Kansas City, Mo. Advertising novelty. 1,570,729; Jan. 26.
Cleveland Crane & Engineering Company, The. (See Bennington, Earl T., assignor.)
Coburn, Ernest, assignor to J. I. Case Threshing Machine Company, Racine, Wis. Combination harvester thrasher. 1,570,825; Jan. 26.
Cochran, Frank A., et al. (See Wyatt, Alfred, assignor.)
Cochran, Samuel J., et al. (See Wyatt, Alfred, assignor.)
Coffman, Hurshel R., Independence, Kans. Starting-switch interlocking device. 1,570,616; Jan. 26.
Cohn, Samuel, New York, N. Y. Necktie-display stand. 1,570,946; Jan. 26.
Coll, Pete S. (See Whitney, F., and Coll.)
Columbian Bank Note Company. (See Bowers, Albert P., asignor.)
Columbian Enameling & Stamping Co. (See Topping, W., and Nelson, assignors.)
Compton, Arthur H., St. Louis, Mo., assignor to Westinghouse Lamp Company. Glass and article made therefrom. 1,570,876; Jan. 26.
Connell, Lawrence, jr., Portland, Oreg. Telegraphy. 1,570,877; Jan. 26.
Consolidated Machine Tool Corporation of America. (See Trosch, A., and Moreton, assignors.)
Cook, Pearl M., assignor of one-half to G. E. Rasmussen, Seattle, Wash. Vending machine. 1,570,993; Jan. 26.
Cook, William A., Mount Clemens, Mich. Spring-forming die. 1,570,994; Jan. 26.
Copeman, Lloyd G., Flint, Mich. Refrigerator manufacture. 1,570,617; Jan. 26.
Copony Auto Loading Company, et al., The. (See Michod, Charles L., assignor.)
Costantin, Henry B. (See Wright, L. E., and Costantin.)
Cotton, Walter H., Chicago, Ill. Pressing mechanism. 1,570,618; Jan. 26.
Cregier, Nathaniel B., assignor to Mills Novelty Company, Chicago, Ill. Automatic stringed instruments of the viol class. 1,570,947; Jan. 26.
Cribben & Sexton Company. (See Harter, August F., assignor.)
Crompton, Edwin C., assignor to The Rollaway Motor Company, Toledo, Ohio. Vehicle lamp control. 1,570,619; Jan. 26.
Crouch, James L., Summit, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Test fixture. 1,570,948; Jan. 26.
Crowell, Frank T., Dover, N. J. Mechanical delay element for fuses. 1,570,620; Jan. 26.
Crum, Emanuel L., Indianapolis, Ind. Hood latch. 1,570,621; Jan. 26.
Cumming, Gladys P., Windsor, Ontario, Canada. Toilet-article cabinet. Des. 69,310; Jan. 26.
Cunningham, Frank H., Youngstown, and H. W. Mosely, Struthers, Ohio. Metal-coating machine. 1,570,949; Jan. 26.
Curry, J. P., Mfg. Co. (See Foulder, Henry B., assignor.)
Curtiss, George E., assignor to Landers, Frary & Clark, New Britain, Conn. Jug. Des. 69,311; Jan. 26.
Da Costa, Arthur V., Providence, R. I., assignor, by mesne assignments, to Providence Press Machinery Co., Inc. Power press. 1,571,044; Jan. 26.
Danberg, Fred W., Toledo, Ohio. Article-setting-up means. 1,570,622; Jan. 26.

Danford, Burt W., Lansing, and E. E. Emshwiller, East Lansing, Mich. Valve structure. 1,570,878; Jan. 26.
Davey, George W. (See Waite, F. H., and Davey.)
Davis, Harry A. (See Stimpson, W. I., and Davis.)
Dawson, Claude I., Anderson, S. C. Motor-vehicle hood. 1,571,090; Jan. 26.
Dayton Malleable Iron Company, The. (See Calhoun, Lawrence V., assignor.)
Delano, Roy A., Eugene, Oreg. Ratchet mechanism. 1,570,730; Jan. 26.
De Lony, Knud, New Haven, assignor to J. Schlott, Greens Farms, Conn. Refrigeration. 1,570,995; Jan. 26.
Dennis, Samuel L., Norfolk, Va. Window frame. 1,571,045; Jan. 26.
Dennison, Roy K., East Machias, Me. Mechanical toy. 1,570,996; Jan. 26.
De Olaneta, Harold, assignor to Winchester Repeating Arms Company, New Haven, Conn. Apparatus for introducing paste into dry-cell cups. 1,570,916; Jan. 26.
De Zeng, Henry L., Geneva, N. Y., assignor to De Zeng Standard Company, Camden, N. J. Diagnostic instrument. 1,570,623; Jan. 26.
De Zeng Standard Company. (See De Zeng, Henry L., assignor.)
Diamant, Nicholas S., Jamestown, N. Y. Method and system for cooling internal-combustion engines. 1,571,108; Jan. 26.
Dixon, James W., Chicago, Ill., assignor, by mesne assignments, to The Fisk Rubber Company, Chicopee Falls, Mass. Cutting machine. 1,570,665; Jan. 26.
Doan, Gilbert E., Cleveland, Ohio. Joint plate for railway rails. 1,570,997; Jan. 26.
Doherty Research Company. (See Fisher, James P., assignor.)
Dominguez, Manuel D., New Orleans, La. Bumper for vehicles. 1,570,624; Jan. 26.
Donahoo, Anna B. (See Horswill, Milton J., assignor.)
Donnell, W. C., et al. (See Baldwin, James C., assignor.)
Dorneth, Julius, Konradshohe, near Tegel, Germany. Matrix-setting and type-bar-casting machine. 1,570,826; Jan. 26.
Dostal, Joseph L., and A. Anderson, assignors to E. Holley, Detroit, Mich. Extension bar. 1,570,950; Jan. 26.
Dour, Frederick J., Brooklyn, assignor to Prindor Sectional Rim Co., New York, N. Y. Sectional pneumatic-tire rim. 1,570,879; Jan. 26.
Dow Chemical Company, The. (See Hoy, J. E., and Best, assignors.)
Dowd, J. C. & Co. (See Weigel, Fred E., assignor.)
Downing, William J., Salisbury, Md. Tar burner. 1,570,951; Jan. 26.
Doyle, James J., administrator. (See Hayes, Albert.)
Draper Corporation. (See Rhoades, Alonzo E., assignor.)
Draper Corporation. (See Stimpson, W. I., and Davis, assignors.)
Drenovics, Andras, Tamasi, Hungary, assignor of one-fourth to J. Fabian and one-fourth to C. Szombathy, New York, N. Y. Padlock. 1,570,952; Jan. 26.
Dubendorf, Horace H. (See Dyer, Z. A., and Dubendorf.)
Dunkelsberg, Louis, New York, N. Y. Ophthalmic mounting. 1,570,880; Jan. 26.
Duff, Lee F., and G. Langhans, Los Angeles, Calif. Rotary display case. 1,570,731; Jan. 26.
Dyer, Zeb A., and H. H. Dubendorf, Long Beach, assignors to F. W. Huber, Riverside, Calif. Cup-packing gasket for oil-well-cementing plugs. 1,571,046; Jan. 26.
E. Z. Auto Washer Company, The. (See Clark, Lester G., assignor.)
Eagle Manufacturing Company. (See Ross, Hugh M., assignor.)
East, James V. T., Longmeadow, Mass., assignor to A. G. Spalding & Bros., New York, N. Y. Golf club. 1,571,109; Jan. 26.
Ebbesen, Mads P., Frederiksberg, near Copenhagen, Denmark. Packing material. 1,570,953; Jan. 26.
Ebert, Albert G. (See Ebert, William H., and A. G.)
Ebert, William H. and A. G., Buffalo, N. Y. Music indicator. 1,571,110; Jan. 26.
Eddins, Sextus A., Brockton, Mass. Garment clasp and making same. 1,570,625; Jan. 26.
Edelman, Morris, et al. (See Seifke, Herman A., assignor.)
Egger, Everett V., Elgin, Ill. Mold for building blocks and the like. 1,570,998; Jan. 26.
Egler, Nicholas F., Chicago, Ill. Regenerative furnace. 1,570,954; Jan. 26.
Elkins, Hubert A., Midkiff, W. Va. Gas regulator. 1,570,881; Jan. 26.
Ellis, George, assignor to Scammell China Company, Trenton, N. J. Plate or similar article. Des. 69,312; Jan. 26.
Ellisen, Luther A., Topeka, Kans. Burglarproof safe. 1,570,882; Jan. 26.
Eisenbast, Arthur S., New York, N. Y., assignor, by mesne assignments, to The Celite Company. Dehydrating liquids. 1,570,626; Jan. 26.
Emerson, Kenneth W., assignor to Hawaiian Pineapple Company, Limited, Honolulu, Hawaii. Vacuum indicator for sealed cans and the like. 1,570,732; Jan. 26.
Emshwiller, Errol E. (See Danford, B. W., and Emshwiller.)
Englund, Carl R., West Long Branch, and A. Haddock, East Orange, N. J., assignors to Western Electric Company, Incorporated, New York, N. Y. Loop antenna. Des. 69,313; Jan. 26.
Englund, Carl R., West Long Branch, and A. Haddock, East Orange, N. J., assignors to Western Electric Company, Incorporated, New York, N. Y. Loop antenna. Des. 69,314; Jan. 26.
Entwisle, Edward F., Steelton, Pa., assignor to Bethlehem Steel Company. Making rails. 1,570,999; Jan. 26.
Eschbach, Wilhelm, Troisdorf, near Cologne-on-the-Rhine, Germany. Electric time fuse for blasting cartridges. 1,570,733; Jan. 26.
Essex Motors. (See Whisler, Ralph H., assignor.)
Eustis, Grant B., et al., executors. (See Eustis, John P.)
Eustis, James W., et al., executors. (See Eustis, John P.)
Eustis, John P., deceased, Newton; J. W. Eustis, Cambridge; W. Eustis, Newton, G. B. Eustis, Watertown, and F. O. White, Brookline, Mass., executors. Article holder. 1,571,000; Jan. 26.
Eustis, Warner, et al., executors. (See Eustis, John P.)
Evans, Edwin J., and W. H. Barber, Salt Lake City, Utah. Pipe wrench. 1,570,627; Jan. 26.
Evans, Thomas F., Williams, Calif. Ironing board. 1,570,955; Jan. 26.
Everbrite Stove Company, The. (See Kise, William K., assignor.)
Everaman, Lewis W., Julesburg, Colo. Gate fastener. 1,570,734; Jan. 26.
Fabian, J., et al. (See Drenovics, Andras, assignor.)
Falcone, Sam, Cleveland, Ohio. Rail joint. 1,570,956; Jan. 26.
Farrior, James W., Warsaw, N. C. Attachment for supply tanks of automobiles. 1,571,111; Jan. 26.
Feldman, Joseph C., assignor to T. K. Feldman, New York, N. Y. Electric water heater. 1,570,827; Jan. 26.
Feldman, Tillie K. (See Feldman, Joseph C., assignor.)
Fenton, Paul E., Thomaston, assignor to Scovill Manufacturing Company, Waterbury, Conn. Separable fastener. 1,571,001; Jan. 26.
Ferrodesherbeuse Scheuchzer Societe Anonyme. (See Scheuchzer, Auguste, assignor.)
Fine, Lewis. (See Schenck, C., Fine, and Ibach.)
Finney, James M. (See Schroeder, Anthony, assignor.)
Firm: Polte. (See Böttner, Arno, assignor.)
Fisher, James P., Bartlesville, Okla., assignor to Doherty Research Company, New York, N. Y. Apparatus for drilling oil wells. 1,570,828; Jan. 26.
Fisk Rubber Company, The. (See Dixon, James W., assignor.)
Flagstad, Cornell, Minneapolis, Minn., assignor of one-fourth to I. Sivertsen, one-fourth to J. P. Jacobsen, and one-fourth to O. Flagstad. Nailhead-spacing device. 1,570,735; Jan. 26.
Flagstad, Oscar, et al. (See Flagstad, Cornell, assignor.)
Flannery, Edward J. (See Adair, H. J., and Flannery.)
Flohr, Andrew, Colorado Springs, Colo. Saw guard. 1,570,628; Jan. 26.
Fluegel, Otto L., Birmingham, Mich. Composition of matter for a paint remover. 1,570,957; Jan. 26.
Folkman, Morris, assignor to The Morris Folkman-Shiffer Company, Cleveland, Ohio. Safety catch for badges. 1,570,883; Jan. 26.
Ford, Emery J., Everett, Wash. Illuminated register. 1,570,884; Jan. 26.
Forsyth, John A., Nemacolin, assignor of one-fourth to C. J. Smith, Uniontown, Pa. Loading machine. 1,570,829; Jan. 26.
Foss, David L. (See Foss, Leland L. and D. L., and Parrish.)
Foss, Leland L. and D. L., Pulaski, and C. H. Parrish, Statesboro, Ga. Automatic signal for railway crossings. 1,570,629; Jan. 26.
Foss, William D., Bell, Calif. Sash holder. 1,570,885; Jan. 26.
Foster, Clarence C., Covington, Ky. Heel for boots and shoes. 1,571,112; Jan. 26.
Foulder, Henry B., Glenbrook, assignor to J. P. Curry Mfg. Co., Inc., Stamford, Conn. Wire-tying tool. 1,570,630; Jan. 26.
Fournier, Albert A., Ottawa, Ontario, Canada. Cuff. 1,570,736; Jan. 26.
Franck, Maurice. (See Lutton, William J., assignor.)
Frantz Manufacturing Co. (See Frantz, Peter, assignor.)
Frantz, Peter, assignor to Frantz Manufacturing Co., Sterling, Ill. Door hanger and track construction. 1,570,958; Jan. 26.
Fred Goat Company. (See Johnson, Axel V., assignor.)
French, George F., Manchester, England. Belt or like tensioning and fastening appliance. 1,571,113; Jan. 26.
French, Hamman L., Piedmont, Tenn. Adjustable fan-belt pulley. 1,571,047; Jan. 26.
Fulton, William H., Irvington, and H. Shellmer, Newark, N. J., assignor, by mesne assignments, to Titeflex Metal Hose Co. Flexible tube. 1,570,886; Jan. 26.
Furler, John, Williamsburg, Iowa. Hay-loader coupler. 1,570,737; Jan. 26.
Fuss, Max, Berlin, Germany, assignor to Meyer-Keller & Cie., Lucerne, Switzerland. Regulable electrical steam boiler. 1,571,165; Jan. 26.
G & W Electric Specialty Co. (See Williams, Paul F., assignor.)
Gammeter, John R. (See Beyea, Frank H., assignor.)

Gargan, John O., Brooklyn, assignor to Western Electric Company, Incorporated, New York, N. Y. Tube mounting. 1,570,959; Jan. 26.
Garisio, Theodore J., Allentown, Pa. Doup. 1,570,738; Jan. 26.
Garisio, Theodore J., Allentown, Pa. Shuttle attachment. 1,571,114; Jan. 26.
Garrabrant, Joseph E. (See Wallace, William C., assignor.)
Garrow, James R., assignor, by mesne assignments, to Novocrete & Cement Products Company Limited, London, England. Treatment of fibrous materials. 1,571,048; Jan. 26.
Gatchell, Frederick D., New York, N. Y. Multi-unit package. 1,571,049; Jan. 26.
Gately, Michael F., and F. N. Wells, Westpoint, Nebr. Boxing-glove attachment. 1,570,960; Jan. 26.
Gauger, Alfred W., and H. H. Storch, Westend, Calif., assignors to Burnham Chemical Company, Reno, Nev. Recovering borax from saline liquors. 1,571,002; Jan. 26.
Genaille, Alexandre, Ridgefield Park, N. J. Smoker's accessory. 1,571,003; Jan. 26.
General Fire Extinguisher Company. (See Rose, H. E., and Loepsinger, assignors.)
Geppert, Joseph, assignor to The Mantle Lamp Company of America, Chicago, Ill. Wick. 1,570,666; Jan. 26.
Gerling, Henry H. (See Wesolik, Joseph, assignor.)
Gerns, William H., East Orange, assignor, by mesne assignments, to Brandes Laboratories, Inc., Newark, N. J. Electromagnetic driving apparatus. 1,571,050; Jan. 26.
Gibbons, Willis A. (See Hopkinson, E., and Gibbons.)
Gibson, Angus H., assignor to Gibson Products Co., Salt Lake City, Utah. Snubber for vehicles. 1,571,156; Jan. 26.
Gibson, Guy T., New Rochelle, N. Y. Perfume bottle. Des. 69,315; Jan. 26.
Gibson, Guy T., New Rochelle, N. Y. Perfume bottle. Des. 69,316; Jan. 26.
Gibson, Guy T., New Rochelle, N. Y. Perfume bottle. Des. 69,317; Jan. 26.
Gibson Products Co. (See Gibson, Angus H., assignor.)
Gilliland, John R. and W. J., San Francisco, Calif. Polishing attachment for portable vacuum cleaners. 1,570,739; Jan. 26.
Gilliland, William J. (See Gilliland, John R. and W. J.)
Goertz, August, & Co. (See Goertz, August, assignor.)
Goertz, August, Newark, N. J., assignor to August Goertz & Co. Lock for a suitcase or similar article. Des. 69,318; Jan. 26.
Goertz, August, Newark, N. J., assignor to August Goertz & Co. Lock for a suitcase or similar article. Des. 69,319; Jan. 26.
Golden, Samuel, New York, N. Y. Hull for vessels. 1,570,961; Jan. 26.
Goldstein, Milton J. (See Wehr, Arthur J., assignor.)
Gootherts, Louis, San Francisco, Calif. Mahlstick. 1,571,115; Jan. 26.
Gormley, Frank L., Brookline, Mass., assignor to The Buda Company, Harvey, Ill. High-speed lifting jack. 1,570,962; Jan. 26.
Graefenecker, Michael A. (See Harden, W. H., and Graefenecker.)
Gragert, Charles, Ada, Minn. Crossing signal. 1,571,051; Jan. 26.
Graves, William B., Kingman, Ariz. Pipe connection. 1,570,887; Jan. 26.
Gray, Arthur W., Pueblo, Colo. Dirigible headlight. 1,570,888; Jan. 26.
Gray, Reuben G., Canterbury, near Sydney, New South Wales, Australia. Race-starting machine. 1,571,168; Jan. 26.
Greathouse, Herman T., Lexington, Ky. Releasing device for livestock. 1,570,889; Jan. 26.
Green, Charles E., London, and K. S. Stevenson, Kensington, London, England. Tea, coffee, and like pot. 1,571,116; Jan. 26.
Green, Leslie P. (See Knoblauch, Curt G., assignor.)
Greer, Jesse W., Cambridge, Mass. Coating and drying machine. 1,571,052; Jan. 26.
Grieb, Alfred, assignor to The Singer Manufacturing Company, Elizabeth, N. J. Sewing-machine loop taker. 1,570,667; Jan. 26.
Griffin Wheel Company. (See Wickland, A. A., and Vial, assignors.)
Griffith, Vernia E., Lodi, Calif. Oil-pump attachment for gas engines. 1,570,668; Jan. 26.
Guttman, Herman H. and S., Brooklyn, N. Y. Snap fastener. 1,571,117; Jan. 26.
Guttman, Sigmund. (See Guttman, Herman H. and S.)
H. & B. American Machine Company. (See Brown, James Y., assignor.)
Haddock, Arthur. (See Englund, C. R., and Haddock.)
Hagey, Marvin A., and L. T. McKee, Los Angeles, Calif. Automatic water control. 1,570,830; Jan. 26.
Hall, Frank W., Port Arthur, Tex., assignor to The Texas Company, New York, N. Y. Treating hydrocarbon oils. 1,570,890; Jan. 26.
Hall, James W., Brighton, assignor to The Moore Pen Company, Boston, Mass. Electric-light globe. Des. 69,320; Jan. 26.
Hallwood, Anthony J. (See Lefebure, V., and Hallwood.)
Hamblin, Ed. jr., Woodward, Okla. Composition of matter for use in the treatment of fabrics. 1,570,740; Jan. 26.
Hamilton, Young C., Fort Worth, Tex. Candy or merchandise display box. 1,570,963; Jan. 26.
Hansen, Charles C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Air-feed control for stopers. 1,570,964; Jan. 26.
Hanson, Bengt M. W., deceased, Hartford, Conn.; E. A. Hanson and C. E. Whitney, executors. Measuring device. 1,570,831; Jan. 26.
Hanson, Elnar A., et al., executors. (See Hanson, Bengt M. W.)
Harden, William H., Brooklyn, and M. A. Graefenecker, New York, N. Y., assignors to American Telephone and Telegraph Company. Testing system for machine switching circuits. 1,570,741; Jan. 26.
Harrington, William H., assignor to The Arrow Electric Company, Hartford, Conn. Attachment-plug base Des. 69,321; Jan. 26.
Harris, Herbert. (See Capelle, A., and Harris.)
Harris, John, Lakewood, Ohio. Blowpipe. 1,571,004; Jan. 26.
Harter, Augustus F., Oak Park, assignor to Cribben & Sexton Company, Chicago, Ill. Gas range. 1,571,053; Jan. 26.
Hartford-Empire Company. (See Mulholland, Vergil, assignor.)
Hartley, Ralph V. L., South Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Secret signaling. 1,571,005; Jan. 26.
Hartley, Ralph V. L., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Signaling system. 1,571,006; Jan. 26.
Hasselberg, Jens, Klamath Falls, Oreg. Power steering mechanism for logging trucks. 1,570,832; Jan. 26.
Hattie, James A., Ewa, Hawaii. Nut for guitars. 1,571,118; Jan. 26.
Hauvette-Michelin, Jules, New Brunswick, assignor to Michelin Tire Company, Milltown, N. J. Tire tread. Des. 69,322; Jan. 26.
Hawaiian Pineapple Company. (See Emerson, Kenneth W., assignor.)
Hayes, Albert, New York, N. Y., assignor to G. F. McKay, Newark, N. J.; J. J. Doyle administrator of G. F. McKay, deceased. Mechanical movement. 1,571,007; Jan. 26.
Heinzelman, Chester A., Belleville, Ill. Die for die casting. 1,570,669; Jan. 26.
Helbert, John T., Broadway, Va. Fishing tool for wells. 1,570,833; Jan. 26.
Herminghuysen, Crist, Van Wert, Ohio. Bunching attachment for mowing machines. 1,570,965; Jan. 26.
Hess, Victor F., Orange, and E. D. Leman, East Orange, N. J., assignors to United States Radium Corporation. Method of and apparatus for purification of radium emanation. 1,570,834; Jan. 26.
Heuser, Herman, Chicago, Ill. Utilizing corncobs. 1,570,891; Jan. 26.
Hewitt, Frank M., Oakland, Calif. Shoveling machine. 1,570,835; Jan. 26.
Hilfman, Harry. (See Villaret, Gustave E., assignor.)
Hill, Walter A., assignor to R. R. Watson, Columbus, Ohio. Washtub attachment. 1,570,892; Jan. 26.
Hilpert, Meier G., Bethlehem, Pa., assignor, by mesne assignments, to Bethlehem Steel Company. Railfastening means. 1,571,008; Jan. 26.
Hines, Posie L. (See Brumfield, Thomas R., assignor.)
Hobbs, Douglas B., Cleveland, Ohio, assignor to Aluminum Company of America. Making aluminum-silicon alloy castings. 1,570,893; Jan. 26.
Hoffmeier, Arthur S., Jeannette, Pa. Tie. 1,571,119; Jan. 26.
Hofman, Wincenty, South Chicago, Ill. Flying machine. 1,570,742; Jan. 26.
Holley, Earl. (See Dostal, J. L., and Anderson, assignors.)
Hollis, Frederick B., London, England. Golf tee. 1,570,743; Jan. 26.
Holman, Charles B., assignor to O. F. Simpson, Eureka, Calif. Hasp. 1,570,836; Jan. 26.
Holmes, William K., Brooklyn, N. Y. Pencil. 1,571,120; Jan. 26.
Holzer, Hiram A., assignor to United Iron Works, Inc., Kansas City, Mo. Long-wall conveyer. 1,571,009; Jan. 26.
Homan, Walter A., Denver, Colo. Copyholder. 1,570,744; Jan. 26.
Homestead Valve Manufacturing Company. (See Trinks, Willibald, assignor.)
Hood Rubber Company. (See Perrault, Joseph E., assignor.)
Hopkins, Morton K., assignor to J. L. Kennedy, Chicago, Ill. Fusible link. 1,570,894; Jan. 26.
Hopkinson, Ernest, New York, and W. A. Gibbons, Little Neck, N. Y., assignors to Revere Rubber Company, Chelsea, Mass. Making articles of various shapes directly from solutions or suspensions of rubber, and to the articles so obtained. 1,570,895; Jan. 26.
Horswill, Milton J., Alameda, Calif. Electric water heater. 1,570,670; Jan. 26.

Hosenfeld, Martin, Berlin-Siemensstadt, assignor to Siemens & Halske, Aktiengesellschaft, Siemensstadt, near Berlin, Germany. Removing silica from ore leaches. 1,571,054; Jan. 26.
Howard, Charles P., assignor to James L. Howard and Company, Hartford, Conn. Baggage rack for railway passenger cars. 1,570,631; Jan. 26.
Howard, James L., and Company. (See Howard, Charles P., assignor.)
Hoy, John E., and N. A. Best, assignors to The Dow Chemical Company, Midland, Mich. Piston. 1,570,837; Jan. 26.
Huber, Frederick W. (See Dyer, Z. A., and Dubendorf, assignors.)
Humphreys, Robert, San Francisco, Calif. Cake-dropping machine. 1,571,121; Jan. 26.
Hutchins, Melvin M., St. Paul, Minn. Oil-gauge-testing device. 1,571,055; Jan. 26.
Hutchinson, Frank L., Wauwatosa, assignor, by mesne assignments, to Milwaukee Valve Company, Milwaukee, Wis. Valve. 1,571,176; Jan. 26.
Hutton, Ernest, Fairmont, W. Va. Blasting cartridge. 1,571,122; Jan. 26.
Hutton, Ernest, Fairmont, W. Va. Blasting gun. 1,571,123; Jan. 26.
Ibach, Emil. (See Schenck C., Fine, and Ibach.)
Ingersoll-Rand Company. (See Hansen, Charles C., assignor.)
International Time Recording Company of New York. (See Larrabee, Clinton E., assignor.)
Ivins, Raymond W., Battle Creek, Mich. Gear-shifting mechanism. 1,570,745; Jan. 26.
Jackman, Charles, assignor of one-half to P. E. Selby, Portsmouth, Ohio. Shoe-sole trimmer. 1,570,838; Jan. 26.
Jackson, James M., Parkersburg, W. Va. Shackle-bolt and spring lubricating means. 1,570,746; Jan. 26.
Jacobsen, John P., et al. (See Flagstad, Cornell, assignor.)
Jaeger, Walter, and H. Potatock; said Jaeger assignor to C. Bullinger, Chicago, Ill. Cigar box. 1,570,896; Jan. 26.
Janes & Kirtland, Inc. (See Janes, Henry E., assignor.)
Janes, Henry E., Pelham Manor, assignor to Janes & Kirtland, Inc., New York, N. Y. Ironing board. 1,570,671; Jan. 26.
Jessup, Wardlow M., Clinton, Iowa. Bottle stopper. 1,570,672; Jan. 26.
Jewett, Ralph, Elmora, Pa. Combination shade and curtain holder. 1,570,747; Jan. 26.
Joaquin, Jose, San Jose, Calif. Roof tile. 1,570,839; Jan. 26.
Johns, Sam, Detroit, Mich. Parking light. 1,570,673; Jan. 26.
Johnson, Axel V., assignor to Fred Goat Company, Brooklyn, N. Y. Preventing backlash in rounding and backing machines. 1,570,840; Jan. 26.
Johnson, Boyd M., Metuchen, N. J., assignor to The Carborundum Company, Niagara Falls, N. Y. Heat exchanger. 1,570,674; Jan. 26.
Johnson, Elmer A. (See Butler, M. J., and Johnson.)
Johnson, Joseph A., Niagara Falls, N. Y. Dynamo-electric machine. 1,570,675; Jan. 26.
Johnstone, Robert M. (See Cameron, J. A., and Johnstone.)
Jones, Edmund H., Milwaukee, assignor to Milwaukee Corrugating Company, Greenfield, Wis. Fastening for plaster terminals. 1,570,676; Jan. 26.
Jones, Edwin S. (See Oeschger, J. P., and Jones.)
Julstedt, Clas J., assignor to Bethlehem Steel Company, Bethlehem, Pa. Self-cocking firing mechanism. 1,570,677; Jan. 26.
Kalbfleisch Corporation, The. (See Kast, Harry A., assignor.)
Kalkanis, James N., Detroit, Mich. Candy-making machinery. 1,570,748; Jan. 26.
Kanegafuchi Boseki Kabushiki Kwaisha. (See Kobori, Kihachiro, assignor.)
Kantarski, Frank B. (See Lijeski, Anton, assignor.)
Karnatz, William, Bismarck, N. Dak. Flower box. 1,570,841; Jan. 26.
Karsh, Alexander, New York, N. Y. Stand for silverware or similar article. Des. 69,323; Jan. 26.
Kast, Harry A., Elmhurst, assignor to The Kalbfleisch Corporation, New York, N. Y. Carboy. 1,570,678; Jan. 26.
Keller, Hugo F., Oneida, N. Y. Tool for removing shackle bolts. 1,570,749; Jan. 26.
Keller, John F., Philadelphia, Pa. Decapitating, cutting, and cleaning machine. 1,571,169; Jan. 26.
Kelly, Michael W., Rochester, N. Y. Shoe-horn-pulling machine. 1,570,679; Jan. 26.
Kendall, Burton W., assignor to Western Electric Company, Incorporated, New York, N. Y. Secret signaling. 1,571,010; Jan. 26.
Kendall, Burton W., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Secret signaling. 1,571,011; Jan. 26.
Kennedy, John L. (See Hopkins, Morton K., assignor.)
Kent, Arthur A., Ardmore, Pa. Ignition apparatus. 1,570,680; Jan. 26.
Kent, Philip J., Detroit, assignor to Chrysler Corporation, Highland Park, Mich. Lamp front frame. Des. 69,324; Jan. 26.
Kent, Philip J., assignor to Chrysler Corporation, Detroit, Mich. Automobile parking lamp. Des. 69,325; Jan. 26.
Keuser, Emanuel, sr., Palmyra, N. J. Antirattler for windows. 1,571,012; Jan. 26.
Kevari, Matti I., Bessemer, Mich. Windshield cleaner. 1,570,842; Jan. 26.
Kideney, Robert J., Buffalo, N. Y. Device for catching and throwing balls. 1,570,632; Jan. 26.
Kirkham, Walter J., Helena, Ark. Seat for flush valves. 1,570,681; Jan. 26.
Kise, William K., assignor to The Everbrite Stove Company, Kansas City, Mo. Oil burner. 1,570,966; Jan. 26.
Kling, Ferdinand R., New York, N. Y. Cardboard box for men's hats. 1,570,682; Jan. 26.
Knoblauch, Curt G., Park Ridge, assignor to L. P. Green, Chicago, Ill. Screening device. 1,570,897; Jan. 26.
Kobori, Kihachiro, Kobe, assignor to Kanegafuchi Boseki Kabushikt Kwaisha, Tokyo, Japan. Apparatus for drying live cocoons and the like. 1,570,843; Jan. 26.
Kohn, Milton M., New York, N. Y. Gas burner. 1,570,683; Jan. 26.
Kokomo Automotive Manufacturing Company. (See Albright, Neil T., assignor.)
Kolko, Aron, Colombes, France. Mixing valve for air and combustion gases. 1,571,124; Jan. 26.
Koppers Company, The. (See Van Ackeren, Joseph, assignor.)
Krause, Arthur R., Woodhaven, N. Y., assignor to The Lion Electric Manufacturing Co., Inc. Backplate for lighting fixtures. Des. 69,326; Jan. 26.
Krause, Arthur R., Woodhaven, N. Y., assignor to The Lion Electric Manufacturing Co., Inc. Lighting fixture. Des. 69,327; Jan. 26.
Krause, Arthur R., Woodhaven, N. Y., assignor to The Lion Electric Manufacturing, Co., Inc. Chandelier. Des. 69,328; Jan. 26.
Krause, Arthur R., Woodhaven, N. Y., assignor to The Lion Electric Manufacturing Co., Inc. Ceiling lighting fixture. Des. 69,329; Jan. 26.
Krenzler, Gustav, Barmen, Germany. Coupling for single-thread lace-braiding machines. 1,571,056; Jan. 26.
Kroll, Waldemar, Philadelphia, Pa., assignor, by mesne assignments, to The Yale & Towne Manufacturing Company, Stamford, Conn. Chain and lock therefor. 1,571,057; Jan. 26.
Krueger, Fred G., Norwood, assignor to The Cincinnati Stamping Company, Cincinnati, Ohio. Scale. 1,570,967; Jan. 26.
Krum, Howard L., assignor, by mesne assignments, to Morkrum-Kleinschmidt Corporation, Chicago, Ill. Printing-telegraph receiver. 1,570,633; Jan. 26.
Kuellmer, Fay L., Denver, Colo. Elastic threading and fastening device. 1,570,844; Jan. 26.
Kuhn, Frank, and L. H. Thomas, assignors to American Electrical Heater Company, Detroit, Mich. Grinding and polishing machine. 1,570,684; Jan. 26.
Kurtz, Roberto, Buenos Aires, Argentina. Road scraper. 1,570,845; Jan. 26.
Kussner, Israel, New York, N. Y. Steeplechase game. 1,570,846; Jan. 26.
Lake, Walter S., Kansas City, Mo. Belt fastener. 1,570,750; Jan. 26.
Lally, John, Boston, Mass. Fireproof building construction. 1,571,091; Jan. 26.
Lally, John, Great Neck, N. Y. Connection for building columns. 1,571,092; Jan. 26.
Lally, John, Great Neck, N. Y. Connection for building columns. 1,571,093; Jan. 26.
Landers, Frary & Clark. (See Curtiss, George E., assignor.)
Landis, Ulrich F., Kiowa, Kans. Concave for thrashing machines. 1,570,898; Jan. 26.
Langhans, George. (See Duff, L. F., and Langhans.)
Langley, Earle A., Detroit, Mich., assignor to Sees-All Mfg. Co., Seattle, Wash. Rear-view mirror. 1,570,751; Jan. 26.
Lannas, Nikitas, Peabody, Mass. Permutation lock. 1,571,125; Jan. 26.
Larrabee, Clinton E., Binghamton, assignor to International Time Recording Company of New York, Endicott, N. Y. Time-controlled device for dampers, valves, and the like. 1,570,685; Jan. 26.
Latta, John S. (See Renwick, Frederick W., assignor.)
Laukel, Arthur K., Detroit, Mich. Denosited-metal pattern and method of making it. 1,570,634; Jan. 26.
Laukel, Arthur K., Detroit, Mich. Production of deposited-metal patterns and metal pattern produced by such method. 1,570,635; Jan. 26.
Lavender, Samuel C., Pickens, assignor of one-fourth to R. W. Case, Wright City, Okla. Adjustable clevis. 1,570,847; Jan. 26.
Lawson, Oscar L., Lynn, Mass. Tack-driving device. 1,570,686; Jan. 26.
Ledgers Limited. (See Myatt, John W., assignor.)
Ledic, Richard G., assignor to A. Mecky Company, Philadelphia, Pa. Combined bicycle and scooter. 1,571,013; Jan. 26.
Leedy Manufacturing Company. (See Strupe, Cecil H., assignor.)
Lefebure, Victor, and A. J. Hallwood, Manchester, assignors to British Dyestuffs Corporation Limited, Manchester, Lancashire, England. Compound for accelerating the vulcanization of caoutchouc. 1,570,752; Jan. 26.

Lehr, Charles E., Bethlehem, Pa., assignor to Bethlehem Steel Company. Mold compound. 1,571,014; Jan. 26.
Leighton, Herbert J., assignor to Brown-Lipe Gear Company, Syracuse, N. Y. Friction clutch for motor vehicles. 1,571,015; Jan. 26.
Leman, Edwin D. (See Hess, V. F., and Leman.)
Lengersdorff, Nicola, Dresden, Germany. Kiln and like structure and heat treatment. 1,571,058; Jan. 26.
Lesser, Albert D., New York, N. Y. Sports trousers. 1,571,016; Jan. 26.
Lester, Thomas H., Highland Park, Ill. Snap fastener. 1,571,017; Jan. 26.
Lewis Electric Mfg. Co. (See Lewis, James N., assignor.)
Lewis, James N., Detroit, Mich., assignor to Lewis Electric Mfg. Co. Inc. Thermal switch for electric irons. 1,570,687; Jan. 26.
Lewis, Max, et al. (See Selfke, Herman A., assignor.)
Lichtentag, Hortense, deceased; R. Paskin, administratrix, assignor to herself and L. Paskin, a Copartnership doing business as Paris Laboratories, New York. N. Y. Toilet article. 1,570,688; Jan. 26.
Lieberthal, Robert H., assignor to The All-In-One Manufacturing Company, Incorporated, Bridgeport, Conn. Collapsible tube. 1,570,900; Jan. 26.
Lijeski, Anton, assignor of one-half to F. B. Kantorski, Milwaukee, Wis. Thermostatic valve. 1,570,899; Jan. 26.
Lion Electric Manufacturing Co., The. (See Krause, Arthur R., assignor.)
Lipman, Carl E. L., assignor to Lipman Refrigerator Car & Manufacturing Company, Beloit, Wis. Sharp freezer. 1,571,018; Jan. 26.
Lipman Refrigerator Car & Manufacturing Company. (See Lipman, Carl E. L., assignor.)
Livingston, Martin E., Livingston, Tenn. Stretcher. 1,571,126; Jan. 26.
Ljungström, Fredrik, Brevik, Lidingon, assignor to Aktiebolaget Ljungströms Angturbin, Stockholm, Sweden. Blower for cleaning air-cooled condensers or the like. 1,571,127; Jan. 26.
Lloyd, William C., Montreal, Quebec, Canada, assignor, by mesne assignments, to Simmons Company, Kenosha, Wis. Method of and apparatus for making mattresses. 1,570,848; Jan. 26.
Loepsinger, Albert J. (See Rose, H. E., and Loepsinger.)
Loewe, Siegmund, Berlin, Germany, assignor to Western Electric Company, Incorporated, New York, N. Y. Amplifying system. 1,570,901; Jan. 26.
Logan, Henry H., Chicago, Ill. Hoist-control unit. 1,570,753; Jan. 26.
Looney, William E., Detroit, Mich. Engine. 1,570,902; Jan. 26.
Louderback, George B., Compton, Calif. Well tool. 1,570,754; Jan. 26.
Loynes, Owen H., Brooklyn, N. Y., assignor to American Telephone and Telegraph Company. Radio ringing system. 1,570,755; Jan. 26.
Lucas, Edmund B., Madioen, Java. Thrashing machine. 1,571,128; Jan. 26.
Lucas, Rose J. H., East Orange, N. J. Nonglare transparent shade for automobiles and other vehicles. 1,571,019; Jan. 26.
Luckhoff, Louis, Fenton, Ohio. Folding seat. 1,571,129; Jan. 26.
Lutton, William J., assignor of one-half to M. Franck, Paterson, N. J. Pattern mechanism for looms. 1,570,903; Jan. 26.
Lykken, Henry G. (See Wilson, W. E., and Lykken.)
Lynn, John M., Elkhart, Tex. Rodent trap. 1,571,130; Jan. 26.
Lyons, Jacob W., Morrisonville, Ill. Cultivator. 1,570,689; Jan. 26.
MacKay, John F. (See Cisco, G. W., and MacKay.)
MacKenzie, Alexander C., et al. (See Sweeney, David, assignor.)
Maedke, Frank A., and C. M. Raithel, Portland, Oreg. Boiler. 1,570,760; Jan. 26.
Magie, Morton H., Los Angeles, Calif. Tool-feeding means for drilling rigs. 1,570,756; Jan. 26.
Magie, Morton H., Los Angeles, Calif. Drilling-line support. 1,570,757; Jan. 26.
Malzahn, John, Westpoint, Nebr. Traction wheel. 1,570,758; Jan. 26.
Manley, Raymond H., Cottonwood, Ariz. Toy vehicle. 1,570,849; Jan. 26.
Mantle Lamp Company of America, The. (See Geppert, Joseph, assignor.)
Mapel, Lewis A., assignor to The Automatic Appliance Company, St. Louis, Mo. Indicating instrument. 1,570,691; Jan. 26.
Marchessenault, Joseph R., assignor to The American Tube and Stamping Company, Bridgeport, Conn. Lifting jack. 1,571,132; Jan. 26.
Marks, Herbert E., Sewickley, Pa. Roof or floor construction. 1,570,904; Jan. 26.
Marks, Myer M., Chicago, Ill. Lighting fixture. 1,570,759; Jan. 26.
Marshall, William, assignor to Briggs Manufacturing Company, Detroit, Mich. Door buffer. 1,570,692; Jan. 26.
Martell, John, New York, N. Y. Pick holder for fretted musical instruments. 1,570,905; Jan. 26.
Martin, Jerome B., Granite, Okla. Stalk cutter. 1,570,850; Jan. 26.
Martin, Ollie M., Bloomington, Ind. Cultivator. 1,570,968; Jan. 26.
Mayer, Friedrich, Solingen, Germany. Manufacturing coating for permanent metal molds. 1,570,969; Jan. 26.
McCall, Eugene G., Buffalo, N. Y. Assembling apparatus. 1,571,157; Jan. 26.
McClatchie, Stanley, Cambridge, Mass., assignor to Benjamin Electric Manufacturing Company, Chicago, Ill. Attachment plug. 1,570,690; Jan. 26.
McCord, Rhey, St. Louis, Mo. Device for advertising and promoting the sale of an article or material. 1,570,906; Jan. 26.
McCormack, Anthony J., New Haven, Conn. Irrigated brush. 1,570,761; Jan. 26.
McGowan, William D., Jersey City, N. J. Crystal detector for wireless telephony and telegraphy. 1,571,020; Jan. 26.
McIntosh, Clayton A., Greybull, Wyo. Folding drawing table. 1,571,131; Jan. 26.
McKay, George F. (See Hayes, Albert, assignor.)
McKee, Loren T. (See Hagey, M. A., and McKee.)
McKee, Neal T., Mount Vernon, assignor to The Superheater Company, New York, N. Y. Steam separator. 1,570,907; Jan. 26.
McLeod, Margaret, et al. (See Sweeney, David, assignor.)
McTigue, Francis H., Holyoke, Mass. Door hanger. 1,570,762; Jan. 26.
Mecky, A., Company. (See Ledig, Richard G., assignor.)
Meilland, Andrew, Buffalo, N. Y. Life-preserving suit. 1,570,636; Jan. 26.
Mellor, John, Bay Head, N. J. Safety approach to railway crossings. 1,571,166; Jan. 26.
Meloche, Daniel H. (See Udale, S. M., and Meloche.)
Mendel, Hugo, Baton Rouge, La. Brake-beam hanger. 1,571,133; Jan. 26.
Merco Nordstrom Valve Company. (See Nordstrom, Sven J., assignor.)
Merrick, Frank W. (See Wright, W. C., and Merrick.)
Merz, Gottlieb, McKeesport, Pa. Shock absorber. 1,570,908; Jan. 26.
Metals Production Company of North America, Incorporated. (See Perkins, Walter G., assignor.)
Metcalfe, Thomas C., Bowsman River, Manitoba, Canada. Tire armor. 1,570,851; Jan. 26.
Meyer-Keller & Cie. (See Fuss, Max, assignor.)
Meyer, Peter, Newark, N. J. Drilling machine. 1,571,021; Jan. 26.
Michelin Tire Company. (See Hauvette-Michelin, Jules, assignor.)
Michod, Charles L., Chicago, Ill., assignor, by mesne assignments, of one-half to The Studebaker Corporation, South Bend, Ind., and one-half to The Copony Auto Loading Company, Detroit, Mich. Vehicle shipping bracket. 1,570,694; Jan. 26.
Milar, James J., Chicago, Ill., assignor to The Philip Carey Manufacturing Company. Expansion joint. 1,570,970; Jan. 26.
Miller, Adolph, Kirkwood, Mo. Metallic composition and making the same. 1,570,763; Jan. 26.
Miller, Henry J., Kansas City, Mo. Automatic shocking machine. 1,570,764; Jan. 26.
Miller, Walter H., Richmond, Va. Baffle section for hot-water heaters. 1,570,852; Jan. 26.
Mills, Bertie E., Oak Park, assignor to Mills Novelty Company, Chicago, Ill. Motor-controlling means. 1,570,911; Jan. 26.
Mills, Fred L., Oak Park, assignor to Mills Novelty Company, Chicago, Ill. Slot-guard device. 1,570,909; Jan. 26.
Mills, Fred L., Oak Park, assignor to Mills Novelty Company, Chicago, Ill. Latch-controlling device for coin-controlled machines. 1,570,910; Jan. 26.
Mills Novelty Company. (See Cregier, Nathaniel B., assignor.)
Mills Novelty Company. (See Mills, Bertie E., assignor.)
Mills Novelty Company. (See Mills, Fred L., assignor.)
Milwaukee Corrugating Company. (See Jones, Edmund H., assignor.)
Milwaukee Valve Company. (See Hutchinson, Frank L., assignor.)
Miner, W. H., Inc. (See Brenne, Arild M., assignor.)
Mittinger, George E., Cleveland, Ohio. Paint pail and clamping ring therefor. 1,571,134; Jan. 26.
Moise, Harmon D., assignor to Sumter Super-Siphon Company, Sumter, S. C. Automatic flushing apparatus. 1,571,135; Jan. 26.
Molloy, Francis F., Montreal, Quebec, Canada. Vending machine. 1,571,167; Jan. 26.
Monitor Controller Company. (See Whittingham, George H., assignor.)
Monro, William L., assignor to Window Glass Machine Company, Pittsburgh, Pa. Glass-drawing apparatus. 1,570,695; Jan. 26.
Monro, William L., Pittsburgh, H. F. Clark, Oakmont, and L. J. Pierce, assignors to Window Glass Machine Company, Pittsburgh, Pa. Manufacture of glass cylinders. 1,570,853; Jan. 26.
Moore Pen Company, The. (See Hall, James W., assignor.)
Moore, Roswell A., Waterbury, Conn., and S. Byer, New York, N. Y. Pocket for bathing belts. 1,570,696; Jan. 26.

Moore, Samuel, jr., Wilmington, Del. Shaving brush. 1,571,136; Jan. 26.
Moore, Thomas F., Morris Plains, N. J. Well point. 1,570,697; Jan. 26.
Moorhead, Albert E., San Francisco, Calif. Toy. 1,570,698; Jan. 26.
Moorman, Francis E., Guthrie, Okla. Shooting device. 1,570,699; Jan. 26.
Morel, Theodore O., Tutaki, New Zealand. Rim contracting and expanding tool. 1,570,971; Jan. 26.
Moreton, George W. (See Trosch, A., and Moreton.)
Morkrum-Kleinschmidt Corporation. (See Krum, Howard L., assignor.)
Morris Folkman-Shiffer, The. (See Folkman, Morris, assignor.)
Moscini, John, Brooklyn, assignor to Oval Match Company, Inc., New York, N. Y. Paper-match machine. Re16,256; Jan. 26.
Moseley, Harry W. (See Cunningham, F. H., and Moseley.)
Moskowitz, Benjamin, New York, N. Y. Underwaist. 1,570,912; Jan. 26.
Mover, Charles L., Chicago, Ill. Snap switch. 1,570,913; Jan. 26.
Mulholland, Vergil, West Hartford, assignor to Hartford-Empire Company, Hartford, Conn. Method and apparatus for annealing glassware. 1,571,137; Jan. 26.
Müller, Friedrich, Vienna, Austria. Starting mechanism for internal-combustion engines. 1,570,914; Jan. 26.
Müller, Max, Rastatt, assignor to Thaleswerk m. b. H., Rastatt, Baden, Germany. Calculating machine provided with two counters. 1,570,765; Jan. 26.
Murakami, Rin N., Milwaukee, assignor to H. W. Bolens, Port Washington, Wis. Valve adjuster. 1,570,700; Jan. 26.
Murray, John, London, England. Rotary stamping press for bookbinders' use. 1,571,059; Jan. 26.
Murphy, John H., Lowell, Mass. Toilet apparatus. 1,570,766; Jan. 26.
Myatt, John W., assignor to Ledgers Limited, Tipton, England. Loose-leaf book or binder. 1,570,767; Jan. 26.
Myers, Frederick H., Barberton, Ohio. Strainer. 1,571,138; Jan. 26.
Nakagawa, Schoichi, San Jose, Calif. Sun and rain shield for automobiles. 1,570,701; Jan. 26.
Nathan, Edwin B., Mount Vernon, and F. Nathan, New York, N. Y. Curtain window. 1,570,768; Jan. 26.
Nathan, Frank. (See Nathan, Edwin B. and F.)
National Malleable and Steel Castings Company. (See Bossert, Edward, assignor.)
Naumburg, Robert E., Winchester, Mass. Full-can-changer stop mechanism. 1,571,060; Jan. 26.
Nelson, Andrew W. (See Topping, W., and Nelson.)
Nelson, Charles G., assignor to Zouri Drawn Metals Company, Chicago Heights, Ill. Metal window sash. 1,570,702; Jan. 26.
Nelson, George W., assignor to The Standard Sewing Machine Company, Cleveland, Ohio. Stop mechanism for sewing machines. 1,570,769; Jan. 26.
Nelson, Leigh G., Chicago, Ill. Food cover. 1,571,061; Jan. 26.
Newport, Daniel O., Columbus, Ohio. Rail joint. 1,570,703; Jan. 26.
Nisbet, Nicholas. (See Thomson, T., and Nisbet.)
No-Dust Drying Machine Co. (See Warren, Albert W., assignor.)
Nock, Harold E., assignor to Towle Manufacturing Company, Newburyport, Mass. Plate or analogous article. Des. 69,330; Jan. 26.
Noe, William R., & Sons. (See Villaret, Gustave E., assignor.)
Nolen, James G., New York, N. Y. Refractor. 1,571,139; Jan. 26.
Nordell, Carl H., Fort Wayne, Ind. Means for separating, washing, and discharging comminuted solid material immersed in liquids. 1,570,854; Jan. 26.
Nordstrom, Sven J., assignor to Merco Nordstrom Valve Company, San Francisco, Calif. Valve for tank cars and the like. 1,570,637; Jan. 26.
Nose, Toichi, Kamakura Gun, Kanagawa Ken, Japan. Device for constructing culverts of concrete. 1,570,915; Jan. 26.
Novocrete & Cement Products Company. (See Garrow, James R., assignor.)
Nyquist, Harry, Elmhurst, N. Y., assignor to American Telephone and Telegraph Company. Reducing interference. 1,570,770; Jan. 26.
Nyquist, Harry, Elmhurst, N. Y., assignor to American Telephone and Telegraph Company. Reducing interference. 1,570,771; Jan. 26.
Nyquist, Harry, Elmhurst, N. Y., assignor to American Telephone and Telegraph Company. Reduction of distortion in multiplex repeaters. 1,570,772; Jan. 26.
Nystrom, Karl F., Montreal, Quebec, Canada. Refrigerator car. 1,570,855; Jan. 26.
Obert, Casin W., Mount Vernon, N. Y. Pressure-relief device. 1,571,022; Jan. 26.
O'Connor, Michael F., Sheridan, Wyo. Neurovertameter. 1,571,140; Jan. 26.
Oeschger, Joseph P., Chicago, and E. S. Jones, Princeville, Ill. Spot marker for corn planters. 1,570,773; Jan. 26.
Olson, Louis, Enumclaw, Wash. Oil burner. 1,570,774; Jan. 26.
Optische Anstalt C. P. Goerz Aktiengesellschaft. (See Schulz, Hans, assignor.)
Orent, Jacob L., New York, N. Y. Garment. 1,570,917; Jan. 26.
Orth, Frank, Indiana Harbor, Ind. Slag pocket and draining the same. 1,570,704; Jan. 26.
Oval Match Company. (See Moscini, John, assignor.)
Palmolive Company, The. (See Schwantes, Julius A., assignor.)
Paragon Can & Cap Company. (See Russell, Robert A., assignor.)
Parant, Joseph A., Melrose Highlands, Mass. Cribber and ballast remover. 1,570,638; Jan. 26.
Paris Laboratories. (See Lichtentag, Hortense.)
Park, Andrew J., Pueblo, Colo. Rail chair and clamp. 1,571,141; Jan. 26.
Parrish, Charles H. (See Foss, Leland L. and D. L., and Parrish.)
Parsons, George A., assignor to Charles E. Bedaux Company, Inc., New York, N. Y. Loose-leaf binder. 1,571,172; Jan. 26.
Parsons, Philip D., Philadelphia, Pa., assignor to Scott Paper Company. Conveyer and package-labeling machine. 1,570,918; Jan. 26.
Parsons, Philip D., Swarthmore, Pa., assignor to Scott Paper Company. Label-applying machine. 1,570,919; Jan. 26.
Paskin, Louis. (See Lichtentag, Hortense, assignor.)
Paskin, Ruth, administratrix. (See Lichtentag, Hortense.)
Pateiski, Erich J., Chicago, Ill. Power attachment for kitchen utensils and the like. 1,570,920; Jan. 26.
Patterson, Edward B., Merchantville, N. J. Electrical transformer. 1,570,921; Jan. 26.
Payne, Walter B., C. G. Tiefel, and R. E. Bohrer, assignors to The Todd Company, Inc., Rochester, N. Y. Printing apparatus. 1,570,856; Jan. 26.
Peavey, David H., Brewer, Me. Spurred pickeroon. 1,571,062; Jan. 26.
Pecker, Joseph S., Philadelphia, Pa. Double-rib knitting machine. 1,570,775; Jan. 26.
Peerless Electric Company, The. (See Reibel, H. G., and Sparks, assignors.)
Pekora, Michael, Philadelphia, Pa. Outlet plug for dye vats. 1,571,023; Jan. 26.
Perkins, Andrew J. and L., assignors to Yellow Jack-It Manufacturing Co., Chicago, Ill. Lifting jack for automobiles. 1,570,639; Jan. 26.
Perkins, Charles G., Kinross, Mich. Oil indicator. 1,571,142; Jan. 26.
Perkins, James F., Hayward, Calif. Inking roller. 1,570,857; Jan. 26.
Perkins, James M., West Bend, Iowa. Hitch. 1,571,094; Jan. 26.
Perkins, Lester. (See Perkins, Andrew J. and L.)
Perkins, Ross L., Orosi, Calif. Door-control mechanism. 1,570,641; Jan. 26.
Perkins, Walter G., London, England, assignor to Metals Production Company of North America, Incorporated, New York, N. Y. Leaching process for the extraction of metals. 1,570,858; Jan. 26.
Perrault, Joseph E., assignor to Hood Rubber Company, Watertown Mass. Multiple fastener. 1,571,095; Jan. 26.
Peters, Henry W., Boston, Mass. Finger ring. 1,570,776; Jan. 26.
Peterson, John, Faribault, Minn. Combined table and phonograph cabinet. 1,570,640; Jan. 26.
Philipp, Otto, Washington, D. C. Servomotor. 1,570,922; Jan. 26.
Pierce, Lonnie J. (See Monro, W. L., Clark and Pierce.)
Pike, Robert D., San Francisco, Calif. Treating sulphide ores. 1,570,777; Jan. 26.
Pitman, Catherine F., Stockton, Calif. Bag or similar article. Des. 69,331; Jan. 26.
Porter, William N., Leigh, Nebr. Tire-chain tool. 1,570,859; Jan. 26.
Posson, Edward, Chicago, Ill. Sealing lock and door starter. 1,571,158; Jan. 26.
Posson, Edward, Chicago, Ill. Sealing lock and door starter. 1,571,159; Jan. 26.
Potstock, Herman. (See Jaeger, W., and Potstock.)
Potts, Louis M., Highwood, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Printing telegraphy. 1,570,923; Jan. 26.
Powell, Aldin H., Harmony, Pa. Plowpoint. 1,570,860; Jan. 26.
Powell, George A. (See Watson, James A., assignor.)
Prindor Sectional Rim Co. (See Dour, Frederick J., assignor.)
Providence Press Machinery Co. (See Da Costa, Arthur V., assignor.)
Putnam, Thomas M., Toronto, Ontario, Canada. Portable electric stove. 1,570,778; Jan. 26.
Quiroz, Francisco A., New York, N. Y. Pump. 1,570,861; Jan. 26.
Raithel, Carl M. (See Maedke, F. A., and Raithel.)
Rambin, Louis G., and W. A., Smackover, Ark.; said W. A. Rambin assignor of one-half of his right to said Louis G. Rambin. Escape for derricks. 1,571,096; Jan. 26.
Rambin, William A. (See Rambin, Louis G., and W. A.)
Rasmussen, Guss E. (See Cook, Pearl M., assignor.)

Rawdon, George L., Lakewood, Ohio. Telegraph relay. 1,571,063; Jan. 26.
Redman, Henry C., Moore, Mont. Windshield attachment. 1,571,097; Jan. 26.
Reed, John D., Toledo, Ohio. Toy balloon valve. 1,570,642; Jan. 26.
Reibel, Herman G., and V. P. Sparks, assignors to The Peerless Electric Company, Warren, Ohio. Short-circuiting device for alternating-current motors. 1,570,779; Jan. 26.
Remington Typewriter Company. (See Barney, Edwin E., assignor.)
Renwick, Frederick W., Camden, N. J., assignor of one-half to J. S. Latta, Philadelphia, Pa. Wireless-receiving-apparatus cabinet. 1,571,064; Jan. 26.
Revere Rubber Company. (See Hopkinson, E., and Gibbons, assignors.)
Rhoades, Alonzo E., assignor to Draper Corporation, Hopedale, Mass. Automatically-threading shuttle. 1,571,160; Jan. 26.
Rieger, George. (See Simmons, Finn., assignor.)
Rimke, William, Berwyn, Ill. Cabinet. 1,571,098; Jan. 26.
Rimmer, Gilbert, London, England, assignor to Sullivan Machinery Company, Chicago, Ill. Coal-cutting machine. 1,571,161; Jan. 26.
Rimmer, Gilbert, Radford, England, assignor to Sullivan Machinery Company, Chicago, Ill. Coal-cutting machine. 1,571,162; Jan. 26.
Rinker, Levi M., Pittsburgh, Pa. Pipe-organ structure. 1,570,780; Jan. 26.
Rippingille, Frank S., Birmingham, England. Fuel-consumption meter for use with liquid-fuel engines. 1,570,643; Jan. 26.
Risser, Arthur I., assignor to U. S. Bottlers Machinery Co., Chicago, Ill. Clutch for bottle-screw-capping machines. 1,571,065; Jan. 26.
Rizk, Elias, Sioux City, Iowa. Oil burner. 1,570,644; Jan. 26.
Robertson, John, St. Annes-on-the-Sea, England. Photographic type-setting machine. 1,571,170; Jan. 26.
Roche, Edward G., San Leandro, Calif. Bolt. 1,570,645; Jan. 26.
Rockford Tool Company. (See Sundstrand, Gustaf D., assignor.)
Rogers, Charles E., Detroit, Mich. Method of pasteurizing and deodorizing cream. 1,570,646; Jan. 26.
Rohlf, Anna. (See Rohlf, Claus H., assignor.)
Rohlf, Claus H., assignor of one-half to A. Rohlf, San Antonio, Tex. Cotton-packer attachment. 1,571,163; Jan. 26.
Rollaway Motor Company, The. (See Crompton, Edwin C., assignor.)
Rose, Herbert E., Warwick, and A. J. Loepsinger, assignors by mesne assignments to General Fire Extinguisher Company, Providence, R. I. Alarm device. 1,570,705; Jan. 26.
Rosenblatt, Isidor, New York, N. Y. Lighting-fixture arm or article of similar nature. Des. 69,332; Jan. 26.
Ross, Hugh M., Woodhaven, N. Y., assignor to Eagle Manufacturing Company, Wellsburg, W. Va. Container attachment and making same. 1,570,706; Jan. 26.
Ross, John K., Fort Erie, Ontario, Canada. Vegetable knife. 1,570,707; Jan. 26.
Rothkirch, Herman, New York, N. Y. Piano leg or similar article. Des. 69,333; Jan. 26.
Roush, Frank L., Northumberland, Pa. Bending tool. 1,570,708; Jan. 26.
Royer, Eugéne, assignor to Societe pour l'Exploitation du Surallimentateur Royer, Paris, France. Automatic controlling device for compressors supplying explosion engines. 1,571,143; Jan. 26.
Ruben, Samuel, New York, N. Y. Testing apparatus and method. 1,570,781; Jan. 26.
Rumely, William N., Chicago, Ill. Combined thrasher and huller. 1,570,709; Jan. 26.
Russell, Robert A., Ridgewood, assignor to Paragon Can & Cap Company, Inc., Paterson, N. J. Receptacle closure. 1,570,924; Jan. 26.
Safion, Herman A., New York, N. Y. Lighting-fixture loop. Des. 69,334; Jan. 26.
Saignol, Ernest, Grangeneuve St. Etienne, France. Iron fitting or bracket for insulators. 1,571,144; Jan. 26.
Saufley, Elmer B., et al. (See Baldwin, James C., assignor.)
Scammell China Company. (See Ellis, George, assignor.)
Scheid, Walter J., Newark, N. J. Window lock. 1,571,024; Jan. 26.
Schenck, Charles L. Fine, and E. Ibach, assignors to Bethlehem Steel Company, Bethlehem, Pa. Apparatus for forming wheel shapes. 1,570,710; Jan. 26.
Scherer, Adolph, Philadelphia, Pa. Lamp-shade vent ring. 1,571,025; Jan. 26.
Scheuchzer, Auguste, Renens, near Lausanne, assignor to Ferrodesherbeuse Scheuchzer Societe Anonyme, Renens, Switzerland. Railway-track-weeding machine. 1,571,099; Jan. 26.
Scheving, Edward A., Hensel, N. Dak. Row weeder. 1,570,782; Jan. 26.
Schiffer, Charles D., Columbus, Ohio. Manifold recording and mailing device. 1,570,783; Jan. 26.
Schlott, Johannes. (See De Lony, Knud, assignor.)
Schläppi, Adolph F., Curwensville, Pa. Holder. 1,571,145; Jan. 26.
Schmidt, George C., Houston, Tex., assignor to The Texas Company, New York, N. Y. Automatic engine cut-off. 1,570,784; Jan. 26.
Schmidt, William H., Milwaukee, Wis. Two-speed power unit. 1,570,925; Jan. 26.
Schneider, Fred E., Hitchcock, Okla. Automatic truck dump. 1,570,785; Jan. 26.
Schofield, Samuel T., Washington, D. C. Bank pass book. 1,570,786; Jan. 26.
Schroeder, Anthony, assignor of one-half to J. M. Finney, Cleveland, Ohio. Truck. 1,570,787; Jan. 26.
Schuls, Hans, Grosslichterfelde-Ost, near Berlin, assignor to Optische Anstalt C. P. Goerz Aktiengesellschaft, Friedenau, near Berlin, Germany. Refractometer. 1,571,066; Jan. 26.
Schulz, Paul A., assignor to Bethlehem Steel Company, Bethlehem, Pa. Roll-changing rack. 1,571,026; Jan. 26.
Schumacher, Elmer L., assignor to American Optical Company, Southbridge, Mass. Demiamber rim and the production of same. 1,571,067; Jan. 26.
Schumacher, Elmer L., assignor to American Optical Company, Southbridge, Mass. Goggles. 1,571,146; Jan. 26.
Schwantes, Julius A., Milwaukee, Wis., assignor, by mesne assignments, to The Palmolive Company. Sealing machine. 1,570,788; Jan. 26.
Scott, Albert E., Houston, Tex. Shock absorber. 1,571,147; Jan. 26.
Scott Paper Company. (See Parsons, Philip D., assignor.)
Scovill Manufacturing Company. (See Fenton, Paul E., assignor.)
Seely, Thomas H., Malden, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Determining the shape of molds. 1,570,862; Jan. 26.
Sees-All Mfg. Co. (See Langley, Earle A., assignor.)
Seifert, Thomas H., Springtown, Pa. Cement-vault handle. 1,570,972; Jan. 26.
Seifke, Herman A., assignor of twenty-two one-hundredths to M. Edelman, twenty-five one-hundredths to S. A. Beagle, and twenty-two one-hundredths to M. Lewis, San Francisco, Calif. Alternating-current rectifier. 1,570,789; Jan. 26.
Selas Aktiengesellschaft. (See Wolff, F., assignor.)
Selby, Pearl E. (See Jackman, Charles, assignor.)
Sharples Specialty Company, The. (See Ayres, Eugene E., jr., assignor.)
Sheets, Ray C., et al. (See Baldwin, James C., assignor.)
Shellmer, Herman. (See Fulton, W. H., and Shellmer.)
Sibbald, John W., New York, N. Y. Golf tee. 1,570,926; Jan. 26.
Siemens & Halske, Aktiengesellschaft. (See Hosenfeld, Martin, assignor.)
Simmons Company. (See Lloyd, William C., assignor.)
Simmons, Finn, assignor of one-half to G. Rieger, Brooklyn, N. Y. Folding furniture. 1,570,863; Jan. 26.
Simonelli, Michael, Everett, Mass. Book holder. 1,570,973; Jan. 26.
Simpson, Ora F. (See Holman, Charles B., assignor.)
Sindelar, Thomas A. (See Smith, F. H., and Sindelar.)
Singer Manufacturing Company, The. (See Grieb, Alfred, assignor.)
Singer Manufacturing Company, The. (See Wood, Alfred R., assignor.)
Sinn, George H., Spencer, Iowa. Electric fuse. 1,570,864; Jan. 26.
Sisolak, John, Chicago, Ill. Wrench. 1,571,148; Jan. 26.
Sivertsen, Ivar, et al. (See Flagstad, Cornell, assignor.)
Skinner, Emerson E., Elgin, Nebr. Cooler. 1,571,100; Jan. 26.
Slater, Emmet H. (See Broderick, Frank W., assignor.)
Sloan, John W. (See Bentley, L. L., and Sloan.)
Smith, Clyde J. (See Forsyth, John A., assignor.)
Smith, Frank H., and T. A. Sindelar, Cleveland, Ohio, assignors, by mesne assignments, to Bendix Brake Company, Chicago, Ill. Manufacture of brake shoes. 1,571,164; Jan. 26.
Smith, Henry R., Prince Rupert, British Columbia, Canada. Gauge for oil tanks. 1,570,790; Jan. 26.
Smith, Owen E. (See Swain, E. W., and Smith.)
Societe pour l'Exploitation du Surallimentateur Royer. (See Royer, Eugéne, assignor.)
Solarz, George, Gallitzin, Pa. Ice creeper. 1,570,791; Jan. 26.
Sommer, William H., Peoria, Ill. Collecting box for wire-drawing blocks. 1,570,711; Jan. 26.
Sommer, William H., Peoria, Ill. Furnace. 1,570,712; Jan. 26.
Soucy, Victor, Caron Brook, New Brunswick, Canada. Safety grab-hook lock. 1,570,865; Jan. 26.
Spalding, A. C., & Bros. (See East, James V. T., assignor.)
Spang, Joseph P., Quincy, Mass. Meat tenderer. 1,570,792; Jan. 26.
Sparks, Virgil P. (See Reibel, H. G., and Sparks.)
Spottswood, Edwin E., Cincinnati, Ohio. Safety door structure. 1,570,927; Jan. 26.
Staiti, Charles C. (See Thomas, J. C., and Staiti.)
Stancliffe, Cecil W., assignor to Stancliffe Engineering Corporation, New York, N. Y. Heat interchanger. 1,571,068; Jan. 26.

Stancliffe Engineering Corporation. (See Standcliffe, Cecil W., assignor.)
Standard Sewing Machine Company, The. (See Nelson, George W., assignor.)
Steigh, Jacob, and E. F. Choate, Taft, Calif. Earth-boring sampler. 1,570,647; Jan. 26.
Stempel, John E., Bloomington, Ind. Basket-ball score card. 1,570,866; Jan. 26.
Sternberg, Emil R., Chicago, Ill. Bowl stand. 1,571,101; Jan. 26.
Stevens, Henry V., Topeka, Kans. Steam-pipe-connection packing. 1,570,974; Jan. 26.
Stevenson, Kathleen S. (See Green, C. E., and Stevenson.)
Stevenson, William M., Springfield, Mass., assignor to Unit Rug Company, Oshkosh, Wis. Floor covering and like material. 1,571,069; Jan. 26.
Stewart, James O., Gorrie, Ontario, Canada. Emergency grip for vehicle wheels. 1,570,713; Jan. 26.
Stickle, Cole, assignor to Stickle Steam Specialty Company, Indianapolis, Ind. Thermostatic valve mechanism. 1,570,714; Jan. 26.
Stickle Steam Specialty Company. (See Stickle, Cole, assignor.)
Still, George A., Cullman, Ala. Spring-tooth cultivator. 1,571,102; Jan. 26.
Stimpson, Edwin B., assignor to Edwin B. Stimpson Company, Brooklyn, N. Y. Rivet construction. 1,570,715; Jan. 26.
Stimpson, Edwin B., Company. (See Stimpson, Edwin B., assignor.)
Stimpson, Wallace L., and H. A. Davis, assignors to Draper Corporation, Hopedale, Mass. Shuttle. 1,571,149; Jan. 26.
Stoney, John T., Lakewood, Ohio. Cleaning apparatus. 1,570,716; Jan. 26.
Storch, Henry H. (See Gauger, A. W., and Storch.)
Straight, Halver R., Adel, Iowa. Combination window and ventilator. 1,570,793; Jan. 26.
Straub, John, Ashley, N. Dak. Tag. 1,571,070; Jan. 26.
Straub, William F. (See Bartlett, A. F., and Straub.)
Strupe, Cecil H., assignor to Leedy Manufacturing Company, Indianapolis, Ind. Forming kettles and die therefor. 1,571,171; Jan. 26.
Stubbs, Robert C., Dallas, Tex. Bonding new concrete formations to old concrete formations. 1,570,794; Jan. 26.
Studebaker Corporation, The. (See Bagley, William H., assignor.)
Studebaker Corporation, The, et al. (See Michod, Charles L., assignor.)
Sullivan Machinery Company. (See Rimmer, Gilbert, assignor.)
Sumter Super-Siphon Company. (See Moise, Harmon D., assignor.)
Sundstrand, Gustaf D., assignor to Rockford Tool Company, Rockford, Ill. Lathe. 1,570,648; Jan. 26.
Sundstrand, Gustaf D., assignor to Rockford Tool Company, Rockford, Ill. Automatic lathe. 1,570,649; Jan. 26.
Superheater Company, The. (See McKee, Neal T., assignor.)
Sury, Joseph, Wyneghem, near Antwerp, Belgium. Photographic pigmentary printing paper. 1,571,103; Jan. 26.
Sutherland, Donald W., jr., Sioux Falls, S. Dak. Acidity-test machine. 1,570,717; Jan. 26.
Swain, Evan W., and O. E. Smith, Stockton, Calif. Steering mechanism for tractors. 1,570,718; Jan. 26.
Sweeney, David, assignor of one-eighth to M. McLeod one-fourth to A. C. MacKenzie, and one-fourth to R. P. Adams, Winnipeg, Manitoba, Canada. Carbonating milk or cream. 1,570,975; Jan. 26.
Sweet, Clifford L., Highland Park, Ill. Animated toy. 1,571,071; Jan. 26.
Szombathy, C., et al. (See Drenovics, Andras, assignor.)
Tainton, Urlyn C., Johannesburg, South Africa. Storage bin or hopper. 1,570,795; Jan. 26.
Talbert, John T., Bradley, S. C. Automatic tire-inflating mechanism. 1,571,072; Jan. 26.
Talbot, William P., Millbrook, N. Y. Watch guard. 1,571,027; Jan. 26.
Tanner, Frederick H., Bristol, England. Speed-changing transmission. 1,570,867; Jan. 26.
Tapling, Robert D., Chicago, Ill. Exercising device. 1,571,073; Jan. 26.
Tatem, James B., Putnam, assignor of one-half to The American Tube & Stamping Company, Bridgeport, Conn. Picker stick. 1,570,796; Jan. 26.
Technicolor Motion Picture Corporation. (See Wescott, William B., assignor.)
Templin, Richard L., Parnassus, Pa., assignor to American Magnesium Corporation, Niagara Falls, N. Y. Extruding magnesium. 1,570,868; Jan. 26.
Teufel, Otto C. (See White, L. J., and Teufel.)
Texas Company, The. (See Hall, Frank W., assignor.)
Texas Company, The. (See Schmidt, George C., assignor.)
Thaleswerk m. b. H. (See Müller, Max, assignor.)
Thatcher, Harry S., Los Angeles, Calif., assignor, by mesne assignments, to The Celite Company. Recovered inorganic filter aid and producing the same. 1,571,074; Jan. 26.
Thomas, George P., Glenshaw, Pa. Metal-perforating machine. 1,570,928; Jan. 26.
Thomas, J. Clarence, and C. C. Staiti, Houston, Tex. Automobile locking device. 1,570,797; Jan. 26.
Thomas, Joseph W., New York, N. Y. Grease gun. 1,571,028; Jan. 26.
Thomas, Laurence H. (See Kuhn, F., and Thomas.)
Thomson, Thomas, and N. Nisbet, Scunthorpe, England. Apparatus for filtering dust-laden gases. 1,570,869; Jan. 26.
Thomson, William S., assignor to The Tobrin Tool Company, Plantsville, Conn. Cold chisel. 1,570,650; Jan. 26.
Thorn, Lawrence T., Harrisburg, Ark. Identification-card and registration-tag holder for motor vehicles. 1,570,798; Jan. 26.
Tiefel, Charles G. (See Payne, W. B., Tiefel, and Bohrer.)
Titeflex Metal Hose Co. (See Fulton, W. H., and Shellmer, assignors.)
Tobrin Tool Company, The. (See Thomson, William S., assignor.)
Todd Company, Inc., The. (See Payne, W. B., Tiefel, and Bohrer, assignors.)
Topping, Wilbur, and A. W. Nelson, assignors to Columbian Enameling & Stamping Co., Terre Haute, Ind. Display stand. 1,570,651; Jan. 26.
Towle Manufacturing Company, The. (See Nock, Harold E., assignor.)
Townsend, John S., assignor to Whiting Corporation, Harvey, Ill. Sand-ramming machine. 1,570,652; Jan. 26.
Traffic Signal Corporation. (See Williams, Robert M., assignor.)
Trinks, Willibald, Pittsburgh, assignor to Homestead Valve Manufacturing Company, Incorporated, Homestead, Pa. Lubrication system for valves. 1,571,150; Jan. 26.
Trosch, Alfred, Rochester, N. Y., and G. W. Moreton, Wilmington, Del., assignors to Consolidated Machine Tool Corporation of America, Rochester, N. Y. Work-clamping mechanism for vertical boring and turning mills. 1,570,799; Jan. 26.
Tunley, Edgar H., Brooklyn, N. Y. Ferris-wheel toy. Des. 69,335; Jan. 26.
Udale, Stanley M., and D. H. Mcloche, Detroit, Mich. Protecting the surface of metal molds. 1,570,929; Jan. 26.
Uhthoff, Eduard, Berlin-Charlottenburg, Germany. Typeline setting and casting machine. 1,571,075; Jan. 26.
Union Switch & Signal Company, The. (See Young, Henry S., assignor.)
Unit Rug Company. (See Stevenson, William M., assignor.)
United Iron Works, Inc. (See Holzer, Hiram A., assignor.)
United Printing Machinery Company. (See Upham, Burt F., assignor.)
United Shoe Machinery Corporation. (See Seely, Thomas H., assignor.)
U. S. Bottlers Machinery Co. (See Risser, Arthur I., assignor.)
United States Radium Corporation. (See Hess, V. F., and Leman, assignors.)
Upham, Burt F., Brookline, assignor to United Printing Machinery Company, Boston, Mass. Bronzing machine. 1,570,976; Jan. 26.
Van Ackeren, Joseph, assignor to The Koppers Company, Pittsburgh, Pa. Coking retort oven. 1,570,870; Jan. 26.
Van Ackeren, Joseph, assignor to The Koppers Company, Pittsburgh, Pa. Inclined coking retort oven. 1,570,871; Jan. 26.
Van Allen, Frederic L., Goderich, Ontario, Canada. Apparatus for desceding flax. 1,570,800; Jan. 26.
Van Essen, Pieter D., Haag, Netherlands, assignor to Bethlehem Steel Company. Safety device for high-explosive fuses and projectiles. 1,570,983; Jan. 26.
Vial, Frederick K. (See Wickland, A. A., and Vial.)
Victor Balata & Textile Belting Co. (See Vollrath, Edwin, assignor.)
Villaret, Gustave E., Leonia, N. J., assignor to William R. Noe & Sons, New York, N. Y. Base for portable electric lamps. Des. 69,336; Jan. 26.
Villaret, Gustave E., Leonia, N. J., assignor to H. Hillman, New York, N. Y. Loop for lighting fixtures or the like. Des. 69,337; Jan. 26.
Viviano, Philip, St. Louis, Mo. Advertising scale. 1,570,872; Jan. 26.
Vollrath, Edwin, Easton, Pa., assignor to Victor Balata & Textile Belting Co., New York, N. Y. Belt clamp. 1,570,801; Jan. 26.
Von Bichowsky, Foord, Glendale, Calif. Preventing adherence of cast metal to the mold. 1,570,802; Jan. 26.
Vulcan Last Company, The. (See Clausing, George, assignor.)
Waite, Frank H., and G. W. Davey, Long Island City, N. Y. Furnace wall. 1,570,653; Jan. 26.
Wakefield, Albert F., assignor to The F. W. Wakefield Brass Company, Vermilion, Ohio. Lighting-fixture construction. 1,570,930; Jan. 26.
Wakefield, F. W., Brass Company, The. (See Wakefield, Albert F., assignor.)
Walizer, Clarence W., Salina, Kans. Automobile heater. 1,570,977; Jan. 26.
Walker, Fletcher L., jr., Westwood, Calif. Starting an arc in a welding apparatus and the like. 1,570,803; Jan. 26.
Walker, Fletcher L., jr., Westwood, Calif. Arc-welding system. 1,570,804; Jan. 26.

Walker Vehicle Company. (See Carroll, John G., assignor.)
Wallace, Elmer J., Freeport, Ill. Heater for printing presses. 1,571,174; Jan. 26.
Wallace, William C., assignor of one-half to J. E. Garrabrant, New York, N. Y. Lock mechanism for slidable windows. 1,570,654; Jan. 26.
Wallet, George, Milwaukee, Wis. Trolley wheel. 1,570,805; Jan. 26.
Walling, Claude L., Sherburne, N. Y. Machine for handling snow or the like. 1,570,806; Jan. 26.
Ward, David A., assignor of one-half to E. B. Broughton, Primrose, Nebr. Tire-chain fastener. 1,570,978; Jan. 26.
Warner, Chester E., Berwyn, assignor to Benjamin Electric Manufacturing Company, Chicago, Ill. Electrical switch. 1,570,655; Jan. 26.
Warren, Albert W., assignor to No-Dust Drying Machine Co., Providence, R. I. Drying machine. 1,571,076; Jan. 26.
Washa, Frank, Muscoda, Wis. Earth-boring machine. 1,571,077; Jan. 26.
Waters, William J., Elizabeth, N. J., assignor to The Watson-Stillman Co., New York, N. Y. Hydraulic jack. 1,571,029; Jan. 26.
Watson, James A., assignor to J. A. Watson and G. A. Powell, Winnipeg, Manitoba, Canada. Leacher. 1,570,807; Jan. 26.
Watson, Robert R. (See Hill, Walter A., assignor.)
Watson-Stillman Co., The. (See Waters, William J., assignor.)
Weaver, Ira A., assignor to Weaver Manufacturing Company, Springfield, Ill. Tractor hitch. 1,571,030; Jan. 26.
Weaver Manufacturing Company. (See Weaver, Ira A., assignor.)
Webr, Arthur J., Oceanport, assignor of one-half to M. J. Goldstein, Long Branch, N. J. Garter. 1,571,151; Jan. 26.
Weigel, Fred E., Leominster, Mass., assignor to J. C. Dowd & Co., New York, N. Y. Rack for manicuring set. Des. 69,338; Jan. 26.
Weil, Maximilian, New York, N. Y. Spring motor indicator. 1,571,031; Jan. 26.
Weintraub, Harry, New York, N. Y. Gas iron. 1,570,808; Jan. 26.
Wellman-Seaver-Morgan Company, The. (See Case, Arthur F., assignor.)
Wells, Floyd N. (See Gately, M. F., and Wells.)
Wertz, Frederick L., Montclair, N. J. Display device for advertisements. 1,570,656; Jan. 26.
Wescott, William B., Wellesley, assignor, by mesne assignments, to Technicolor Motion Picture Corporation, Boston, Mass. Treatment of cinematographic films. 1,570,809; Jan. 26.
Wesolik, Joseph, assignor of one-half to H. H. Gerling, Belleville, Ill. Car coupler. 1,571,032; Jan. 26.
Wesolik, Joseph, assignor of one-half to H. H. Gerling, Belleville, Ill. Car coupler. 1,571,033; Jan. 26.
Western Electric Company. (See Crouch, James L., assignor.)
Western Electric Company. (See Englund, C. R., and Haddock, assignors.)
Western Electric Company. (See Gargan, John O., assignor.)
Western Electric Company. (See Hartley, Ralph V. L., assignor.)
Western Electric Company. (See Kendall, Burton W., assignor.)
Western Electric Company. (See Loewe, Siegmund, assignor.)
Western Electric Company. (See Potts, Louis M., assignor.)
Westinghouse Electric and Manufacturing Company. (See Aram, Otto, assignor.)
Westinghouse Lamp Company. (See Compton, Arthur H., assignor.)
Whisler, Ralph H., Halfway, assignor to Essex Motors, Detroit, Mich. Electric self-starter for internal-combustion engines. 1,570,810; Jan. 26.
White, Bruce C., deceased, New York, N. Y.; M. L. White, executrix. Sheet-control device for printing presses. 1,570,979; Jan. 26.
White, Frank O., et al., executors. (See Eustis, John P.)
White, Le Roy J., and O. C. Teufel, Eldon, Iowa. Camp grate. 1,570,657; Jan. 26.
White, Maria L., executrix. (See White, Bruce C.)
Whiting Corporation. (See Townsend, John S., assignor.)
Whitney, Clarence E., et al., executors. (See Hanson, Bengt M. W.)
Whitney, Frank, and P. S. Coll, Glenrock, Wyo. Tank-car valve. 1,571,078; Jan. 26.
Whittingham, George H., assignor to Monitor Controller Company, Baltimore, Md. Motor-starting switch. 1,571,152; Jan. 26.
Wickland, Algot A., Chicago, and F. K. Vial, Lagrange, assignors to Griffin Wheel Company, Chicago, Ill. Molding machine. 1,570,658; Jan. 26.
Wiegand, Kurt, Berlin, Germany. Illuminated sign. 1,570,980; Jan. 26.
Wilden, Rudolf, New York, N. Y., F. J. Winarski, jr., and A. J. Winarski, West Hoboken, N. J. Valve grinder. 1,570,981; Jan. 26.
Wilkinson, Elza A., San Francisco, Calif. Combined refrigerator and display counter. 1,570,811; Jan. 26.
Williams, Paul F., assignor to G & W Electric Specialty Co., Chicago, Ill. Fothead for electrical circuit connecters. 1,571,172; Jan. 26.
Williams, Robert M., assignor to Traffic Signal Corporation, New York, N. Y. Traffic safety signal switch. 1,570,982; Jan. 26.
Wilson, Elihu C., Los Angeles, Calif. Latch guard for casing-handling tools. 1,570,812; Jan. 26.
Wilson, Peter, Springfield, Ill. Safety device for elevators. 1,570,813; Jan. 26.
Wilson, William E., Mason City, Iowa, and H. G. Lykken, Minneapolis, Minn. Method of and apparatus for drying refractory materials. 1,570,659; Jan. 26.
Winarski, August J. (See Wilden, R., and F. J., jr., and A. J. Winarski.)
Winarski, Frank J., jr.. (See Wilden, R. and F. J., jr., and A. J. Winarski.)
Winchester Repeating Arms Company. (See de Olaneta, Harold, assignor.)
Window Glass Machine Company. (See Bishop, Frederic L., assignor.)
Window Glass Machine Company. (See Monro, William L., assignor.)
Window Glass Machine Company. (See Monro, W. L., Clark, and Pierce, assignors.)
Witherow Steel Company. (See Witherow, William P., assignor.)
Witherow, William P., Pittsburgh, assignor to Witherow Steel Company, Neville Island, Pa. Die rolling. 1,570,660; Jan. 26.
Witman, Ephriam. Sinking Spring, Pa. Heater. 1,571,079; Jan. 26.
Wolff, Friedrich, assignor to Selas Aktiengesellschaft, Berlin, Germany. Gas mixer. 1,570,984; Jan. 26.
Wood, Alfred R., Bridgeport, Conn., assignor to The Singer Manufacturing Company, Elizabeth, N. J. Needle throat for buttonhole-sewing machines. 1,570,661; Jan. 26.
Woolley, Horace M., jr., Alameda, Calif. Reinforcing-bar support. 1,570,814; Jan. 26.
Wright, Ernest H., Morrinsville, Auckland, New Zealand. Testing apparatus for use in cow milkers. 1,571,080; Jan. 26.
Wright, J. T., Company, The. (See Wright, Joseph T., assignor.)
Wright, Joseph T., assignor to The J. T. Wright Company, Cincinnati, Ohio. Pulley drive and belt tightener. 1,571,153; Jan. 26.
Wright, Lysander E., East Orange, and H. B. Costantin, Clifton, N. J. Tire. Des. 69,339; Jan. 26.
Wright, Lysander E., East Orange, and H. B. Costantin, Clifton, N. J. Tire. Des. 69,340; Jan. 26.
Wright, Wallace C., Brookfield, N. H., and F. W. Merrick, assignors to American Shoe Machinery Company, Boston, Mass. Leather-tempering machine. 1,570,693; Jan. 26.
Wyatt, Alfred, assignor of one-third to S. J. Cochran and one-third to F. A. Cochran, Kansas City, Mo. Sound-wave-intensifying device for reproducers. 1,570,662; Jan. 26.
Wyckoff, Amos A., Oakland, Calif. Pneumatic vehicle tire casing. 1,570,663; Jan. 26.
Wylie, Hamilton N., Coventry, England. Process and apparatus for insuring the straightness of metal tubes and strips of angle or other form during heat treatment. 1,570,815; Jan. 26.
Yale & Towne Manufacturing Company, The. (See Kroll, Waldemar, assignor.)
Yellow Jack-It Manufacturing Co. (See Perkins, Andrew J. and L., assignors.)
Young, Charles W., Killingly, Conn. Tension-control indicator. 1,570,931; Jan. 26.
Young, Henry S., Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway signaling. 1,571,034; Jan. 26.
Yount, John V., Shidler, Okla. Brace for drill-rod wrenches. 1,571,081; Jan. 26.
Zimlich, Julius M., Mobile, Ala. Agricultural machine. 1,571,082; Jan. 26.
Zipper, Walter, Vienna, Austria. Divided rim for automobile wheels. 1,570,816; Jan. 26.
Zottoli, Salvatore S., Quincy, Mass. Artificial stone and making same. 1,570,817; Jan. 26.
Zouri Drawn Metals Company. (See Nelson, Charles G., assignor.)

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 26TH DAY OF JANUARY, 1926.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Acidity-test machine. D. W. Sutherland, jr. 1,570,717; Jan. 26.
Advertisements, Display device for. F. L. Wertz. 1,570,656; Jan. 26.
Advertising and promoting the sale of an article or material, Device for. R. McCord. 1,570,906; Jan. 26.
Advertising novelty. L. P. Clements. 1,570,729; Jan. 26
Advertising scale. P. Viviano. 1,570,872; Jan. 26.
Agricultural machine. J. M. Zimlich. 1,571,082; Jan. 26
Air-cooled engine. G. O. Brittain. 1,571,066; Jan. 26.
Alarm device. H. E. Rose and A. J. Loepsinger. 1,570,705; Jan. 26.
Amplifying system. S. Loewe. 1,570,901; Jan. 26.
Annealing glassware, Method and apparatus for. V. Mulholland. 1,571,137; Jan. 26.
Article holder. J. P. Eustis. 1,571,000; Jan. 26.
Article-setting-up means. F. W. Danberg. 1,570,622; Jan. 26.
Ash tray, Smoker's novelty. C. N. Cahusac. 1,570,610; Jan. 26.
Assembling apparatus. E. C. McCall. 1,571,157; Jan. 26.
Auto signaling device. F. M. Baldwin. 1,570,721; Jan. 26.
Automobile heater. C. W. Walizer. 1,570,977; Jan. 26.
Automobile locking device. J. C. Thomas and C. C. Staiti. 1,570,797; Jan. 26.
Automobile rim compressor. H. J. Adair and E. J. Flannery. 1,570,719; Jan. 26.
Automobile wheels. Divided rim for. W. Zipper. 1,570,816; Jan. 26.
Automobiles and other vehicles, Nonglare transparent shade for. R. J. H. Lucas. 1,571,019; Jan. 26.
Automobiles, Attachment for supply tanks of. J. W. Farrior. 1,571,111; Jan. 26.
Automobiles, Lifting jack for. A. J. and L. Perkins. 1,570,639; Jan. 26.
Automobiles, Sun and rain shield for. S. Nakagawa. 1,570,701; Jan. 26.
Axle for vehicles. J. G. Carroll. 1,570,941; Jan. 26.
Badges, Safety catch for. M. Folkman. 1,570,883; Jan. 26.
Bag or similar article. C. F. Pitman. Des. 69,331; Jan. 26.
Balls, Device for catching and throwing. R. J. Kideney. 1,570,632; Jan. 26.
Bank pass book. S. T. Schofield. 1,570,786; Jan. 26.
Bar: *See*—
Extension bar.
Bar support, Reenforcing-. H. M. Woolley, jr. 1,570,814; Jan. 26.
Basket-ball score card. J. E. Stempel. 1,570,866; Jan. 26.
Bathing belts, Pocket for. R. A. Moore and S. Byer. 1,570,696; Jan. 26.
Battery terminal. J. C. Baldwin. 1,570,722; Jan. 26.
Belt clamp. E. Vollrath. 1,570,801; Jan. 26.
Belt fastener. W. S. Lake. 1,570,750; Jan. 26.
Belt or like tensioning and fastening appliance. G. F. French. 1,571,113; Jan. 26.
Bending tool. F. I. Roush. 1,570,768; Jan. 26.
Bicycle and scooter, Combined. R. G. Ledig. 1,571,013; Jan. 26.
Binder, Loose-leaf. G. A. Parsons. 1,571,173; Jan. 26.
Blowpipe. J. Harris. 1,571,004; Jan. 26.
Board: *See*—
Ironing board.
Boiler: *See*—
Steam boiler.
Boiler. F. A. Maedke and C. M. Raithel. 1,570,760; Jan. 26.
Bolt. E. G. Roche. 1,570,645; Jan. 26.
Book holder. M. Simonelli. 1,570,973; Jan. 26.
Book or binder, Loose-leaf. J. W. Myatt. 1,570,767; Jan. 26.
Borax from saline liquors, Recovering. A. W. Gauger and H. H. Storch. 1,571,002; Jan. 26.
Boring machine, Earth-. F. Washa. 1,571,077; Jan. 26.
Bottle, Perfume. G. T. Gibson. Des. 69,315–17; Jan. 26.
Bottle-screw-capping machines, Clutch for. A. I. Risser. 1,571,065; Jan. 26.
Bottle stopper. W. M. Jessup. 1,570,672; Jan. 26.
Box: *See*—
Cigar box.
Flower box.
Box for men's hats, Cardboard. F. R. Kling. 1,570,682; Jan. 26.
Boxing-glove attachment. M. F. Gately and F. N. Wells. 1,570,960; Jan. 26.
Bowl stand. E. R. Sternberg. 1,571,101; Jan. 26.
Bracelet or the like, Flexible. E. I. and N. E. Anderson. 1,570,932; Jan. 26.
Bracket: *See*—
Vehicle shipping bracket.
Braiding machines, Coupling for single-thread lace-. G. Krenzler. 1,571,056; Jan. 26.
Brake: *See*—
Hand brake.
Brake-beam hanger. H. Mendel. 1,571,133; Jan. 26.
Brake construction. J. G. Carroll. 1,570,942; Jan. 26.
Brake shoes, Manufacture of. F. H. Smith and T. A. Sindelar. 1,571,164; Jan. 26.
Bronzing machine. B. F. Upham. 1,570,976; Jan. 26.
Brush, Irrigated. A. J. McCormack. 1,570,761; Jan. 26.
Brush, Shaving. S. Moore, jr. 1,571,136; Jan. 26.
Building blocks and the like, Mold for. E. V. Egger. 1,570,998; Jan. 26.
Building columns, Connection for. J. Lally. 1,571,092–3; Jan. 26.
Burner: *See*—
Gas burner.
Oil burner.
Tar burner.
Cabinet. W. Rimke. 1,571,098; Jan. 26.
Cables or grommets, Machine for the manufacture of bead. F. H. Beyea. 1,570,821; Jan. 26.
Cake-dropping machine. R. Humphreys. 1,571,121; Jan. 26.
Calculating machine provided with two counters. M. Müller. 1,570,765; Jan. 26.
Can-changer, stop mechanism, Full-. R. E. Naumburg. 1,571,060; Jan. 26.
Canning machine. C. H. Ayars. 1,570,986; Jan. 26.
Cans and the like, Vacuum indicator for sealed. K. W. Emerson. 1,570,732; Jan. 26.
Candy-making machinery. J. N. Kalkanis. 1,570,748; Jan. 26.
Caoutchouc, Compound for accelerating the vulcanization of. V. Lefebure and A. J. Hailwood. 1,570,752; Jan. 26.
Carboy. H. A. Kast. 1,570,678; Jan. 26.
Car coupler. J. Wesolik. 1,571,032–3; Jan. 26.
Car dumper. A. F. Case. 1,570,943; Jan. 26.
Car valve, Tank-. F. Whitney and P. S. Coll. 1,571,078; Jan. 26.
Cars, Baggage rack for railway passenger. C. P. Howard. 1,570,631; Jan. 26.
Cartridge, Blasting. E. Hutton. 1,571,122; Jan. 26.
Case: *See*—
Display case.
Cast metal to the mold, Preventing adherence of. F. Von Bichowsky. 1,570,802; Jan. 26.
Casting machine, Matrix-setting and type-bar-. J. Dorneth. 1,570,826; Jan. 26.
Castings, Making aluminum-silicon-alloy. D. B. Hobbs. 1,570,893; Jan. 26.
Chain and lock therefor. W. Kroll. 1,571,057; Jan. 26.
Chandelier. A. R. Krause. Des. 69,328; Jan. 26.
Chisel, Cold. W. S. Thomson. 1,570,650; Jan. 26.
Chuck, Automatic. F. Beck. 1,570,724; Jan. 26.
Cigar box. W. Jaeger and H. Potstock. 1,570,896; Jan. 26.
Cinematographic films, Treatment of. W. B. Wescott. 1,570,809; Jan. 26.
Clamp: *See*—
Belt clamp.
Cleaner: *See*—
Windshield cleaner.
Cleaning apparatus. J. T. Stoney. 1,570,716; Jan. 26.
Clevis, Adjustable. S. C. Lavender. 1,570,847; Jan. 26.
Coal-cutting machine. G. Rimmer. 1,571,161–2; Jan. 26.
Coating and drying machine. J. W. Greer. 1,571,052; Jan. 26.
Cocoons and the like, Apparatus for drying live. K. Kobori. 1,570,843; Jan. 26.
Coin-controlled machines, Latch-controlling device for. F. L. Mills. 1,570,910; Jan. 26.
Collapsible tube. R. H. Lieberthal. 1,570,900; Jan. 26.
Comminuted solid material immersed in liquids, Separating, washing, and discharging. C. H. Nordell. 1,570,854; Jan. 26.
Composition for casehardening. W. C. Bassett. 1,571,084; Jan. 26.

Concrete formations to old concrete formations, Bonding new. R. C. Stubbs. 1,570,794; Jan. 26.
Condensers or the like, Blower for cleaning air-cooled. F. Ljungström. 1,571,127; Jan. 26.
Container. H. L. Carpenter. 1,571,089; Jan. 26.
Container attachment and making same. H. M. Ross. 1,570,706; Jan. 26.
Conveyer and package-labeling machine. P. D. Parsons. 1,570,918; Jan. 26.
Conveyer, Long-wall. H. A. Holser. 1,571,009; Jan. 26.
Cooler. E. N. Skinner. 1,571,100; Jan. 26.
Copyholder. W. A. Homan. 1,570,744; Jan. 26.
Corncobs, Utilizing. H. Heuser. 1,570,891; Jan. 26.
Cotton-packer attachment. C. H. Rohlf. 1,571,163; Jan. 26.
Cream, Pasteurizing and deodorizing. C. E. Rogers. 1,570,646; Jan. 26.
Cribber and ballast remover. J. A. Parant. 1,570,638; Jan. 26.
Crossing signal. C. Gragert. 1,571,051; Jan. 26.
Cuff. A. A. Fournier. 1,570,736; Jan. 26.
Cultivator. J. W. Lyons. 1,570,689; Jan. 26.
Cultivator. O. M. Martin. 1,570,968; Jan. 26.
Cultivator, Spring-tooth. G. A. Still. 1,571,102; Jan. 26.
Culverts of concrete, Device for constructing. T. Nose. 1,570,915; Jan. 26.
Cup: *See*—
Grease cup.
Current collector. E. T. Bennington. 1,570,933; Jan. 26.
Current rectifier, Alternating-. H. A. Seifke. 1,570,789; Jan. 26.
Cutter: *See*—
Stalk cutter.
Cutting machine. J. W. Dixon. 1,570,665; Jan. 26.
Dampers, valves, and the like, Time-controlled device for. C. E. Larrabee. 1,570,685; Jan. 26.
Decapitating, cutting, and cleaning machine. J. F. Keller. 1,571,169; Jan. 26.
Dehydrating liquids. A. S. Elsenbast. 1,570,626; Jan. 26.
Derricks, Escape for. L. G. and W. A. Rambin. 1,571,096; Jan. 26.
Diagnostic instrument. H. L. De Zeng. 1,570,623; Jan. 26.
Die: *See*—
Spring-forming die.
Die for die casting. C. A. Heinzelman. 1,570,669; Jan. 26.
Die rolling. W. P. Witherow. 1,570,660; Jan. 26.
Display box, Candy or merchandise. Y. C. Hamilton. 1,570,963; Jan. 26.
Display case, Rotary. L. F. Duff and G. Langhans. 1,570,731; Jan. 26.
Display stand. W. Topping and A. W. Nelson. 1,570,651; Jan. 26.
Door buffer. W. Marshall. 1,570,692; Jan. 26.
Door-control mechanism. R. L. Perkins. 1,570,641; Jan. 26.
Door hanger. F. M. McTigue. 1,570,762; Jan. 26.
Door hanger and track construction. P. Frantz. 1,570,958; Jan. 26.
Door structure, Safety. E. E. Spottswood. 1,570,927; Jan. 26.
Doup. T. J. Garisio. 1,570,738; Jan. 26.
Drawing table, Folding. C. A. McIntosh. 1,571,131; Jan. 26.
Drilling-line support. M. H. Magie. 1,570,757; Jan. 26.
Drilling machine. P. Meyer. 1,571,021; Jan. 26.
Drilling rigs, Tool-feeding means for. M. H. Magie. 1,570,756; Jan. 26.
Dry-cell cups, Apparatus for introducing paste into. H. de Olaneta. 1,570,916; Jan. 26.
Drying machine. A. W. Warren. 1,571,076; Jan. 26.
Dye vats, Outlet plug for. M. Pekora. 1,571,023; Jan. 26.
Earth-boring sampler. J. Steigh and E. F. Choate. 1,570,647; Jan. 26.
Elastic threading and fastening device. F. L. Kuellmer. 1,570,844; Jan. 26.
Electric circuits, Thermally-actuated device for controlling. P. W. Baker. 1,571,104; Jan. 26.
Electric irons, Thermal switch for. J. N. Lewis. 1,570,687; Jan. 26.
Electric-light globe. J. W. Hall. Des. 69,320; Jan. 26.
Electric machine, Dynamo-. J. A. Johnson. 1,570,675; Jan. 26.
Electric system. G. T. Bruun. 1,570,823; Jan. 26.
Electrical circuit connecters, Pothead for. P. F. Williams. 1,571,172; Jan. 26.
Electrical switch. C. E. Warner. 1,570,655; Jan. 26.
Electrical transformer. E. B. Patterson. 1,570,921; Jan. 26.
Electromagnetic driving apparatus. W. H. Gerns. 1,571,050; Jan. 26.
Electroplating and apparatus therefor. B. Bart. 1,570,819; Jan. 26.
Elevators, Safety device for. P. Wilson. 1,570,813; Jan. 26.
Emulsions, Resolving. E. E. Ayres, jr. 1,570,987; Jan. 26.
Engine: *See*—
Air-cooled engine. Internal-combustion engine.
Engine. W. E. Looney. 1,570,902; Jan. 26.
Engine cut-off, Automatic. G. C. Schmidt. 1,570,784; Jan. 26.
Engine radiators, Water-conserving system for gas-. F. Clasing. 1,571,043; Jan. 26.
Engines, Automatic controlling device for compressors supplying explosion. E. Royer. 1,571,143; Jan. 26.
Engines, Electric self-starter for internal-combustion. R. H. Whisler. 1,570,810; Jan. 26.
Engines, Fuel-consumption meter for use with liquid-fuel. F. S. Rippingille. 1,570,643; Jan. 26.
Engines, Method and system for cooling internal-combustion. N. S. Diamant. 1,571,108; Jan. 26.
Engines, Oil-pump attachment for gas. V. E. Griffith. 1,570,668; Jan. 26.
Engines, Starting mechanism for internal-combustion. F. Müller. 1,570,914; Jan. 26.
Exercising device. R. D. Tapling. 1,571,073; Jan. 26.
Expansion joint. J. J. Milar. 1,570,970; Jan. 26.
Extension bar. J. L. Dostal and A. Anderson. 1,570,950; Jan. 26.
Fabrics, Composition of matter for use in the treatment of. E. Hamblin, jr. 1,570,740; Jan. 26.
Fan-belt pulley, Adjustable. H. L. French. 1,571,047; Jan. 26.
Fastener, Separable. P. E. Fenton. 1,571,001; Jan. 26.
Fibrous materials, Treatment of. J. R. Garrow. 1,571,048; Jan. 26.
Filtration residues for reuse, Treating. P. A. Boeck. 1,571,042; Jan. 26.
Finger ring. H. W. Peters. 1,570,776; Jan. 26.
Fireproof building construction. J. Lally. 1,571,091; Jan. 26.
Firing mechanism, Self-cocking. C. J. Julstedt. 1,570,677; Jan. 26.
Flask: *See*—
Mold flask.
Flax, Apparatus for deseeding. F. L. van Allen. 1,570,800; Jan. 26.
Flexible tube. W. H. Fulton and H. Shellmer. 1,570,886; Jan. 26.
Floor-covering and like material. W. M. Stevenson. 1,571,069; Jan. 26.
Flower box. W. Karnatz. 1,570,841; Jan. 26.
Flushing apparatus, Automatic. H. D. Moise. 1,571,135; Jan. 26.
Flying machine. W. Hofman. 1,570,742; Jan. 26.
Folding seat. L. Luckhoff. 1,571,129; Jan. 26.
Food cover. L. G. Nelson. 1,571,061; Jan. 26.
Frame: *See*—
Window frame.
Freezer, Sharp. C. E. L. Lipman. 1,571,018; Jan. 26.
Fruit and the like, Packaging. H. R. Black. 1,571,041; Jan. 26.
Furnace: *See*—
Gas furnace. Regenerative furnace.
Furnace. W. H. Sommer. 1,570,712; Jan. 26.
Furnace wall. F. H. Waite and G. W. Davey. 1,570,653; Jan. 26.
Furniture, Folding. F. Simmons. 1,570,863; Jan. 26.
Fuse, Electric. G. H. Sinn. 1,570,864; Jan. 26.
Fuse for blasting cartridges, Electric time. W. Eschbach. 1,570,733; Jan. 26.
Fuses and projectiles, Safety device for high-explosive. P. D. Van Essen. 1,570,983; Jan. 26.
Fuses, Mechanical delay element for. F. T. Crowell. 1,570,020; Jan. 26.
Game apparatus. W. R. Cartee. 1,570,875; Jan. 26.
Game, Steeplechase. I. Kussner. 1,570,846; Jan. 26.
Garment. J. L. Orent. 1,570,917; Jan. 26.
Garment clasp and making same. S. A. Eddins. 1,570,625; Jan. 26.
Garment hanger. J. W. Bodker. 1,571,087; Jan. 26.
Garter. A. J. Wehr. 1,571,151; Jan. 26.
Garter and arm band. A. P. Brand. 1,570,937; Jan. 26.
Gas burner. M. M. Kohn. 1,570,683; Jan. 26.
Gas furnace. L. Cinq-Mars. 1,570,612; Jan. 26.
Gas iron. H. Weintraub. 1,570,808; Jan. 26.
Gas mixer. F. Wolff. 1,570,984; Jan. 26.
Gas regulator. H. A. Elkins. 1,570,881; Jan. 26.
Gases, Apparatus for filtering dust-laden. T. Thomson and N. Nisbet. 1,570,869; Jan. 26.
Gate fastener. L. W. Eversman. 1,570,734; Jan. 26.
Gauge: *See*—
Plug gauge.
Gauge and thermometer, Combined sight. M. J. Butler and E. A. Johnson. 1,570,938; Jan. 26.
Gear-shifting mechanism. R. W. Ivins. 1,570,745; Jan. 26.
Glass and article made therefrom. A. H. Compton. 1,570,876; Jan. 26.
Glass cylinders, Manufacture of. W. L. Monro, H. F. Clark, and L. J. Pierce. 1,570,853; Jan. 26.

Motor-starting switch. G. H. Whittingham. 1,571,152; Jan. 26.
Motor-vehicle hood. C. I. Dawson. 1,571,090; Jan. 26.
Motors, Short-circuiting device for alternating-current. H. G. Reibel and V. P. Sparks. 1,570,779; Jan. 26.
Mowing machines, Bunching attachment for. C. Herminghuysen. 1,570,965; Jan. 26.
Multiple fastener. J. E. Perrault. 1,571,095; Jan. 26.
Multi-unit package. F. D. Gatchell. 1,571,049; Jan. 26.
Music indicator. W. H. and A. G. Ebert. 1,571,110; Jan. 26.
Musical instruments, Pick holder for fretted. J. Martell. 1,570,905; Jan. 26.
Nailhead-spacing device. C. Flagstad. 1,570,735; Jan. 26.
Necktie-display stand. S. Cohn. 1,570,946; Jan. 26.
Neurovertameter. M. F. O'Connor. 1,571,140; Jan. 26.
Nut and bolt lock, Combined. T. R. Brumfield. 1,570,874; Jan. 26.
Nut lock. A. F. Bartlett and W. F. Straub. 1,571,037; Jan. 26.
Oil burner. W. K. Kise. 1,570,966; Jan. 26.
Oil burner. L. Olson. 1,570,774; Jan. 26.
Oil burner. E. Rizk. 1,570,644; Jan. 26.
Oil-gauge-testing device. M. M. Hutchins. 1,571,055; Jan. 26.
Oil indicator. C. G. Perkins. 1,571,142; Jan. 26.

Oils, Treating hydrocarbon. F. W. Hall. 1,570,890; Jan. 26.
Ophthalmic mounting. L. Dunkelsberg. 1,570,880; Jan. 26.
Ores, Treating sulphide. R. D. Pike. 1,570,777; Jan. 26.
Organ structure, Pipe-. L. M. Rinker. 1,570,780; Jan. 26.
Oven, Coking retort. J. van Ackeren. 1,570,870; Jan. 26.
Oven, Inclined coking retort. J. van Ackeren. 1,570,871; Jan. 26.
Oven, Industrial. W. V. Baker. 1,570,720; Jan. 26.
Packing material. M. P. Ebbesen. 1,570,953; Jan. 26.
Packing, Steam-pipe-connection. H. V. Stevens. 1,570,974; Jan. 26.
Pad: *See*—
Knee pad.
Padlock. A. Drenovics. 1,570,952; Jan. 26.
Pail and clamping ring therefor, Paint. G. E. Mittinger. 1,571,134; Jan. 26.
Paint remover, Composition of matter for a. O. L. Fluegel. 1,570,957; Jan. 26.
Paper-folding machine. C. L. Burdick. 1,571,105; Jan. 26.
Paper-match machine. J. Moscini. Re16,256; Jan. 26.
Parking light. S. Johns. 1,570,673; Jan. 26.
Pencil. W. K. Holmes. 1,571,120; Jan. 26.
Permutation lock. N. Lappas. 1,571,125; Jan. 26.
Photographic pigmentary printing paper. J. Sury. 1,571,103; Jan. 26.
Photographic type-setting machine. J. Robertson. 1,571,170; Jan. 26.
Piano leg or similar article. H. Rothkirch. Des. 69,333; Jan. 26.
Picker stick. J. B. Tatem. 1,570,796; Jan. 26.
Pipe connection. W. B. Graves. 1,570,887; Jan. 26.
Pipe-cutting machine. F. W. Broderick. 1,570,726; Jan. 26.
Pipe wrench. E. J. Evans and W. H. Barber. 1,570,627; Jan. 26.
Piston. J. E. Hoy and N. A. Best. 1,570,837; Jan. 26.
Planters, Spot marker for corn. J. P. Oeschger and E. S. Jones. 1,570,773; Jan. 26.
Plaster terminals, Fastening for. E. H. Jones. 1,570,676; Jan. 26.
Plate or analogous article. H. E. Nock. Des. 69,330; Jan. 26.
Plate or similar article. G. Ellis. Des. 69,312; Jan. 26.
Plate printers, Paper-gripping device for. A. P. Bowers. 1,570,936; Jan. 26.
Plowpoint. A. H. Powell. 1,570,860; Jan. 26.
Plug, Attachment. S. McClatchie. 1,570,690; Jan. 26.
Plug base, Attachment-. W. H. Harrington. Des. 69,321; Jan. 26.
Plug gauge. W. H. Bagley. 1,571,154; Jan. 26.
Power press. A. V. Da Costa. 1,571,044; Jan. 26.
Press: *See*—
Power press.
Press for bookbinders' use, Rotary stamping. J. Murray. 1,571,059; Jan. 26.
Pressing machine, Power. D. H. and H. W. Benjamin. 1,571,040; Jan. 26.
Pressing mechanism. W. H. Cotton. 1,570,618; Jan. 26.
Pressure-relief device. C. W. Obert. 1,461,022; Jan. 26.
Printing apparatus. W. B. Payne, C. G. Tiefel and R. E. Bohrer. 1,570,856; Jan. 26.
Printing presses, Heater for. E. J. Wallace. 1,571,174; Jan. 26.
Printing presses, Sheet-control device for. B. C. White. 1,570,979; Jan. 26.
Pulley: *See*—
Fan-belt pulley.
Pulley drive and belt tightener. J. T. Wright. 1,571,153; Jan. 26.
Pulling device. G. S. Bashline. 1,570,607; Jan. 26.
Pump. F. A. Quiroz. 1,570,861; Jan. 26.
Race-starting machine. R. G. Gray. 1,571,168; Jan. 26.
Rack: *See*—
Roll-changing rack.
Rake: *See*—
Ground-cleaning rake.
Ratchet mechanism. R. A. Delano. 1,570,730; Jan. 26.
Radio ringing system. O. H. Loynes. 1,570,755; Jan. 26.
Radium emanation, Method of and apparatus for purification of. V. F. Hess and E. D. Leman. 1,570,834; Jan. 26.
Rail chair and clamp. A. J. Park. 1,571,141; Jan. 26.
Rail-fastening means. M. G. Hilpert. 1,571,008; Jan. 26.
Rail joint. S. Falcone. 1,570,956; Jan. 26.
Rail joint. D. O. Newport. 1,570,703; Jan. 26.
Rails, Making. E. F. Entwisle. 1,570,999; Jan. 26.
Railway crossings, Automatic signal for. L. L. and D. L. Foss and C. H. Parrish. 1,570,629; Jan. 26.
Railway crossings, Safety approach to. J. Mellor. 1,571,166; Jan. 26.
Railway rails, Joint plate for. G. E. Doan. 1,570,997; Jan. 26.
Railway signaling. H. S. Young. 1,571,034; Jan. 26.
Ramming machine, Sand-. J. S. Townsend. 1,570,652; Jan. 26.
Range, Gas. A. F. Harter. 1,571,053; Jan. 26.
Receptacle closure. R. A. Russell. 1,570,924; Jan. 26.
Refractometer. H. Schulz. 1,570,066; Jan. 26.
Refractor. J. G. Nolen. 1,571,139; Jan. 26.
Refractory materials, Method of and apparatus for drying. W. E. Wilson and H. G. Lykken. 1,570,650; Jan. 26.
Refrigeration. K. De Lony. 1,570,995; Jan. 26.
Refrigerator and display counter, Combined. E. A. Wilkinson. 1,570,811; Jan. 26.
Refrigerator car. K. F. Nystrom. 1,570,855; Jan. 26.
Refrigerator manufacture. L. G. Copeman. 1,570,617; Jan. 26.
Regenerative furnace. T. Burns. 1,570,992; Jan. 26.
Regenerative furnace. N. F. Egler. 1,570,954; Jan. 26.
Register: *See*—
Illuminated register.
Regulator: *See*—
Gas regulator.
Repeaters, Reduction of distortion in multiplex. H. Nyquist. 1,570,772; Jan. 26.
Rim and production of same, Demiamber. E. L. Schumacher. 1,571,067; Jan. 26.
Rim contracting and expanding tool. T. O. Morel. 1,570,971; Jan. 26.
Ring: *See*—
Finger ring. Lamp-shade vent ring.
Rivet construction. E. B. Stimpson. 1,570,715; Jan. 26.
Rodent trap. J. M. Lynn. 1,571,130; Jan. 26.
Roll-changing rack. P. A. Schulz. 1,571,026; Jan. 26.

Welding apparatus and the like, Starting an arc in a. F. L. Walker, Jr. 1,570,803; Jan. 26.
Welding system, Arc-. F. L. Walker, jr. 1,570,804; Jan. 26.
Well-cementing plugs, Cup-packing gasket for oil-. Z. A. Dyer and H. H. Dubendorf. 1,571,046; Jan. 26.
Well point. T. F. Moore. 1,570,697; Jan. 26.
Well tool. G. B. Louderback. 1,570,754; Jan. 26.
Wells, Apparatus for drilling oil. J. P. Fisher. 1,570,828; Jan. 26.
Wells, Fishing tool for. J. T. Helbert. 1,570,833; Jan. 26.
Wells, Screen for oil. C. H. Benckenstein. 1,570,725; Jan. 26.
Wheel: *See*—
Stone abrasive wheel. Trolley wheel.
Traction wheel.
Wheel shapes, Apparatus for forming. C. Schenck, L. Fine, and E. Ibach. 1,570,710; Jan. 26.
Wheels, Emergency grip for vehicle. J. O. Stewart. 1,570,713; Jan. 26.
Wick. J. Geppert. 1,570,666; Jan. 26.
Window and ventilator, Combination. H. R. Straight. 1,570,793; Jan. 26.

Window, Curtain. E. B. and F. Nathan. 1,570,768; Jan. 26.
Window frame. S. L. Dennis. 1,571,045; Jan. 26.
Window lock. W. J. Scheld. 1,571,024; Jan. 26.
Windows, Antirattler for. E. Keuser, sr. 1,571,012; Jan. 26.
Windows, Lock mechanism for slidable. W. C. Wallace. 1,570,654; Jan. 26.
Windshield attachment. H. C. Redman. 1,571,097; Jan. 26.
Windshield cleaner. M. I. Kevarl. 1,570,842; Jan. 26.
Wire-drawing blocks, Collecting box for. W. H. Sommer. 1,570,711; Jan. 26.
Wire-tying tool. H. B. Foulder. 1,570,630; Jan. 26.
Wireless-receiving-apparatus cabinet. F. W. Renwick. 1,571,064; Jan. 26.
Wireless telephony and telegraphy, Crystal detector for. W. D. McGowan. 1,571,020; Jan. 26.
Wrench: *See*—
Pipe wrench.
Wrench. J. Sisolak. 1,571,148; Jan. 26.
Wrenches, Brace for drill-rod. J. V. Yount. 1,571,081; Jan. 26.

CLASSIFICATION OF PATENTS

JANUARY 26, 1926.

NOTE.—First number—class, second number—subclass, third number—patent number.

1— 46: 1,570,696
2— 14: 1,571,146
18: 1,570,960
24: 1,571,088
70: 1,570,917
112: 1,570,912
123: 1,570,736
197: 1,571,107
228: 1,571,016
240: 1,571,027
4— 57: 1,570,681
7— 1: 1,571,115
9— 20: 1,570,636
11— 5: 1,570,840
12— 15: 1,570,679
91: 1,570,838
136: 1,570,613
1,570,614
1,570,615
15— 49: 1,570,739
128: 1,570,761
130: 1,570,894
135: 1,571,136
264: 1,570,802
16— 86: 1,570,692
97: 1,570,762
17— 4: 1,571,109
25: 1,570,792
18— 1: 1,570,606
48: 1,571,067
48.8: 1,570,817
54: 1,570,805
19— 164: 1,571,060
20— 1.01: 1,570,927
11: 1,571,045
20: 1,570,958
56.4: 1,570,702
22— 1: 1,570,716
25: 1,570,658
26: 1,570,950

ERRATA.

Patent Suits, page 229, second column, line 44, for Patent No. "1,359,399" read *1,395,899*.

1,573,742, page 719, in heading, assignment, name of assignee, for Hartford-Fairmont Company, Hartford, Conn., a Corporation of New York, read *Hartford-Empire Company of Hartford, Conn., a Corporation of Delaware.*

1,574,450, page 952, in heading, assignment, name of assignee, for "Bernhart Mercantile Company" read *Barnhart Mercantile Company.*

Patents Nos. 1,571,177 to 1,571,924.

THE OFFICIAL GAZETTE
OF THE
United States Patent Office.

Vol. 343—No. 1. TUESDAY, FEBRUARY 2, 1926. Price—$5 per year.

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscription, $5.00 per annum; single numbers, 10 cents each.
PRINTED COPIES OF PATENTS are furnished by the Patent Office at 10 cents each. For the latter, address the Commissioner of Patents, Washington, D. C.
CIRCULARS OF GENERAL INFORMATION concerning PATENTS or concerning TRADE-MARKS, PRINTS, and LABELS will be sent without cost on request to the Commissioner of Patents, Washington, D. C.

Interference Notices.

U. S. Patent Office, *Washington, Jan. 21, 1926.*

James M. Gaar, his assigns or legal representatives, take notice:

An interference having been declared by this Office between the applications for patent of James M. Gaar, 9 East Thirty-ninth Street, New York, N. Y., and Leslie Stevens, 46 East Houston Street, New York, N. Y., and counsel for Gaar having informed the Office that the present whereabouts of Gaar is unknown to them, notice is hereby given that unless said James M. Gaar, his assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the Official Gazette for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

U. S. Patent Office, *Washington, Jan. 21, 1926.*

James M. Gaar, his assigns or legal representatives, take notice:

An interference having been declared by this Office between the applications for patent of James M. Gaar, 9 East Thirty-ninth Street, New York, N. Y., Jesse B. Hawley, 829 Sixteenth Street, Wilmette, Ill., and Leslie Stevens, 46 East Houston Street, New York, N. Y., and counsel for Gaar having informed the Office that the present whereabouts of Gaar is unknown to them, notice is hereby given that unless said James M. Gaar, his assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the Official Gazette for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

U. S. Patent Office, *Washington, Jan. 21, 1926.*

James M. Gaar, his assigns or legal representatives, take notice:

An interference having been declared by this Office between the applications for patent of James M. Gaar, 9 East Thirty-ninth Street, New York, N. Y., Jesse B. Hawley, 829 Sixteenth Street, Wilmette, Ill., Jesse B. Hawley and Ralph H. Townsend, 829 Sixteenth Street, Wilmette, Ill., and 209 Hillside Avenue, Mount Vernon, N. Y., respectively, Benjamin F. Miessner, South Orange, N. J., and Leslie Stevens, 46 East Houston Street, New York, N. Y., and counsel for Gaar having informed the Office that the present whereabouts of Gaar is unknown to them, notice is hereby given that unless said James M. Gaar, his assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the Official Gazette for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

U. S. Patent Office, *Washington, Jan. 15, 1926.*

Robert Carr, his assigns or legal representatives, take notice:

An interference has been declared by this Office between applications for patents filed by Thomas Lonet, of 273 Ninth Street, Oakland, Calif., and Robert Carr, of General Delivery, Anaconda, Mont. Counsel for Carr states that the present whereabouts of Carr is unknown to him. Notice is hereby given that unless said Carr, his assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the Official Gazette for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

Notice of Cancellation.

U. S. Patent Office, *Washington, Jan. 19, 1926.*

New York Incandescent Lamp Company, its assigns or legal representatives, take notice:

A cancellation proceeding having been instituted by this Office upon the application of Manhattan Electrical Supply Company, Incorporated, of 17 Park Row, New York, N. Y., to effect the cancellation of the trade-mark registration of the New York Incandescent Lamp Company, of 132 West Fourteenth Street, New York, N. Y., No. 82,351, dated June 20, 1911, and the notice of such proceeding sent by registered mail to the said New York Incandescent Lamp Company at the said address having been returned by the post office as undeliverable, notice is hereby given that unless said New York Incandescent Lamp Company, its assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the cancellation will be proceeded with as in case of default. This notice will be published in the Official Gazette for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

Condition of Applications Under Examination at Close of Business January 22, 1926.

Room No.	(Total number of applications awaiting action, exluding Trade-Mark Division, 41,046; Trade-Mark Division, 2,153. Oldest new case, July 25, 1925; oldest amended, July 22, 1925. The dates given are 1925 except where † indicates 1926.) DIVISIONS, EXAMINERS, AND SUBJECTS OF INVENTIONS.	Oldest new application and oldest action by applicant awaiting office action. New.	Amended.	No. of applications awaiting action.
112	1. LOEFFLER, F. A., Closure Operators; Fences; Gates; Harrows and Diggers; Plant Husbandry; Plows; Planting; Scattering Unloaders.	Oct. 28	Oct. 31	594
126	2. HADEN, C. F., Bee Culture; Dairy; Preserving; Presses; Tobacco	Sept. 22	Aug. 24	581
331	3. RICH, WM. J., Electric Heating; Electrochemistry; Heating; Metal Founding; Metallurgical Apparatus; Metallurgy; Metal Treatment; Plastic Metal Working.	Nov. 3	Nov. 4	679
234	4. MERRITT, A. D., Conveyers, Chutes, Skids, Guides, and Ways; Conveyers, Fluid Current; Conveyers, Power Driven; Excavating; Handling—Hand and Hoist-Line Implements; Material or Article Handling; Pushing and Pulling Implements; Traversing Hoists.	Oct. 26	Oct. 31	549

DECISIONS IN PATENT AND TRADE-MARK CASES.

Commissioner's Decisions.

EX PARTE SUTTON.

Decided February 9, 1925.

1. FINAL REJECTION IN SECOND OFFICE ACTION—PETITION TO SET ASIDE.

Where the Examiner in his first action fully pointed out why in his opinion the reissue of the patent could not be granted and cited references against the claims, applying them specifically, and the applicant did not amend the claims, but merely argued why the reissue should be granted, denying the pertinence of the references and pointing out what they disclosed, but not pointing out in detail why they did not meet the claims, *Held* that the Examiner properly made the rejection final in his second action where he was still of the opinion that his refusal was correct.

2. SAME—SAME—REQUEST FOR OPPORTUNITY TO REPLY TO EXAMINER'S ANSWER.

Where an applicant petitions that a final rejection be set aside and the case reopened for further prosecution, requesting that he be given an opportunity to reply to the Examiner's answer, and the record shows that a reply is unnecessary, action on the petition will not be delayed to permit the petitioner to reply.

ON PETITION.

MUD-GUARD LIGHTS.

Mr. Fred H. Hayn for the applicant.

ROBERTSON, *Commissioner:*

Applicant petitions that the final rejection in this case be set aside and the case reopened for further prosecution.

The Examiner in his first action fully pointed out why in his opinion the reissue of the patent could not be granted and cited a number of references against the claims, applying them specifically. In his response the applicant did not amend the claims, but merely presented an argument as to why in his opinion the reissue should be granted, and while referring to the references more or less in detail as to what they disclosed, but not pointing out in detail why they did not meet the claims, said that not a single reference cited had any bearing on applicant's inventive idea and that none of the references could be combined to anticipate that idea.

[1] As the Examiner was not convinced by this argument, but was still of the opinion that his refusal was correct, he properly made the rejection final, even though it was only the second action in the case. See *Ex parte Handel*, 162 O. G. 999.

[2] In his petition applicant requests that he be given an opportunity to reply to the Examiner's answer. The Examiner reported that he did not think that an answer was necessary, as the record spoke for itself. A review of the record shows that the Examiner was correct in this view, and no reason is seen for further delaying action on the petition.

The petition is denied.

HOLT *v.* RIMAILHO.

Decided April 3, 1924.

1. INTERFERENCE—REDUCTION TO PRACTICE—DILIGENCE.

In cases where the invention can be used only by the Government and Government aid is necessary in securing an actual reduction to practice it often requires a long time to secure such actual reduction to practice.

2. SAME—SAME—SAME.

It is not required that all an inventor's time be given to reducing an invention to practice or that he rush into the Patent Office with an application on an incompletely-developed construction. All that is necessary is that under the particular circumstances of the case the inventor be reasonably diligent.

3. SAME—SAME—SAME.

Where there is no evidence that R. had actually reduced the invention to practice and given it to the world prior to H.'s filing date, the delay of H. is not so important as if he had been spurred to activity by seeing the invention made public by his opponent.

4. SAME—SAME—INVENTION USABLE ONLY BY A GOVERNMENT.

Where the invention involves a construction which would not be used by the public generally or any part of it, but only by a Government, and the practicability of the invention, the value of it, as well as the particular embodiment of the reduction to practice would have to be determined by Government representatives, and their judgment of what would be needed and how it should be constructed would be a necessary and vital factor in any reduction to practice, no individual or company would be justified in attempting a reduction to practice.

5. SAME—ISSUE—PRIORITY AWARDED TO DIFFERENT PARTIES ON COUNTS NOT PATENTABLY DISTINCT.

Where priority was awarded to H. on counts covering the general combination and to R. on count 1 because it recited a specific unpatentable feature which H. failed to show, the Examiner was instructed to reject in R.'s application the claim involved in count 1.

(*Affirmed by the Court of Appeals of the District of Columbia. See p. 6 post.*)

Patent interference No. 46,089.

APPEAL from the Examiners in Chief.

GUN CARRIAGE.

Patent granted to Pliny E. Holt June 20, 1920, No. 1,344,397, on application filed May 14, 1917, Serial No. 168,386.

Application of Emile Rimailho filed July 27, 1917, Serial No. 183,198.

Messrs. Strong & Townsend and *Messrs. Church & Church* for Holt.

Messrs. Munn & Co. for Rimailho.

KINNAN, *First Assistant Commissioner:*

This is an appeal by the junior party, Holt, from the decision of the Examiners in Chief reversing the decision of the Examiner of Interferences and awarding priority to the senior party, Rimailho.

The Examiner of Interferences awarded priority as to all of the counts to Holt. The Examiners in Chief awarded priority as to counts 1, 2, 3,

and 7 to Rimailho, and recommended that the interference be dissolved as to counts 4, 5, 6, and 8 on the ground that Rimailho has no right to make these counts. Holt appealed as to counts 1, 2, 3, and 7. Rimailho moved for suspension of the interference and determination of the question of his right to make counts 4, 5, 6, and 8. He also proffered an amendment to his specification and drawings. The commissioner denied this motion, saying:

> At the hearing on Holt's appeal this matter will be reviewed and the question of approving or disapproving the recommendation of the Examiners-in-Chief considered, as well as the admissibility of the proposed amendment to the Rimailho application.

It is thus seen that the case is before me for the consideration of priority as to some counts and the right of Rimailho to make the remaining counts.

The invention relates to means for transporting heavy artillery and involves a construction in which the gun-supporting frame has its respective ends carried by separately-driven tractors of the caterpillar type. The issue is stated in eight counts, of which the following are illustrative:

> 1. A gun carriage comprising a main frame and a self-propelled tractor truck mechanism at each end supporting the same, each of said truck mechanisms being pivotally connected for turning movement relative to the frame, the connection being such as to permit rocking movement of the truck mechanism about transversely and longitudinally extending axes.
>
> 4. A gun carriage comprising a substantially rigid main frame, tractor truck mechanism pivotally connected at each end thereof, each of said truck mechanisms comprising self-propelled, self-laying tracks at each side, and means for controlling the operation of the tracks to steer the trucks.
>
> 6. In a gun carriage, a main frame, and independent tractor truck mechanisms each embodying a motor and traction members, said truck mechanisms being pivotally and detachably connected to opposite ends of the main frame and interchangeable with railway truck mechanism.
>
> 8. A big gun mounting, which consists in the combination of a longitudinal gun carriage frame supporting the gun and mobile traction members pivotally connected to the gun carriage frame, and connections for propelling the traction members in any desired direction, whereby the gun frame may be moved forward or backward, sidewise, obliquely, or be turned upon an axis lying within the length of the gun carriage.

On motion to shift the burden of proof Rimailho has been given the benefit of the date of filing in France of the French application corresponding to the Rimailho application here involved. Holt contends that Rimailho is not entitled to this date, because he has not proved that the French application was filed by his legal representatives or assigns or with his consent. For the reasons stated by the Examiner of Interferences (Holt's record, pp. 6 to 9) in his decision on Rimailho's motion to shift the burden of proof, it is believed that Rimailho has established his right to this date, which is August 30, 1916. Since Rimailho has not taken any testimony, he is only entitled to this date of August 30, 1916, for both conception and reduction to practice.

Holt's appeal alleges error on the part of the Examiners in Chief in holding he had not proved conception as to count 1 prior to August 30, 1916, and in holding him nondiligent in reducing the invention to practice.

Count 1 requires a pivotal connection between each end of the gun carriage and the corresponding truck mechanism which permits rocking movement of the truck mechanism about transversely and longitudinally extending axes. Holt relies upon his drawing (Exhibit F), dated "8—26—16," and his answer to cross-questions 21 and 22 to establish a conception of this specific type of connection as of that date, although he admits that the connection is not shown in detail in the drawing. The companion drawing (Exhibit E) shows the general combination, but also fails to show the rocking features claimed. Wickersham, who made these drawings, testified in answering cross-question 17 that the connection—

> consists of a rocking joint for longitudinal rocking, that is, rocking longitudinally with the truck frame, and a turn-table between this rocking joint and the gun-frame.

He said nothing about any provision for transverse rocking. In the absence of the showing of this feature in the drawings, as well as any corroboration by Wickersham of its presence in the designed construction of that date, Holt's unsupported testimony can not be accepted as proof of conception of the invention defined in count 1 prior to August 30, 1916. As to this count, therefore, Rimailho is entitled to the award of priority as the first to conceive and the first to reduce to practice.

It is believed that Holt's proofs of conception of the remaining counts as early as August 26, 1916, are sufficient. Each of the drawings Exhibits D, E, and F bears this date. Wickersham positively testified that he had completed these drawings at that time. His testimony taken in connection with the testimony of Holt and these exhibits is convincing of conception and disclosure by Holt as early as August 26, 1916. The question of Holt's diligence from August 30, 1916, when Rimailho entered the field, until May 14, 1917, when Holt constructively reduced to practice by filing his application, must, therefore, be considered.

Holt's activities relative to the invention in issue were not continuous throughout this period. It remains to be seen whether his intermittent activities under the circumstances of the case constituted reasonable diligence.

Holt was vice president and director of engineering of the Holt Manufacturing Company, which had offices and factories at Stockton, Calif., and at Peoria, Ill. This company manufactured caterpillar tractors, harvesters, plows, etc. During the month of October, 1916, Holt made a trip from California to Washington, D. C., and sought to interest the War Department in the invention. He testified that he took the drawings, Exhibits E and F, with him and left them with Major Dillard until December, 1916, when he recovered them on a subsequent trip. In his October interview with Major Dillard Holt testified that he requested immediate action, but that Major Dillard told him they did not have any money available for new development work, and that while they would be only too glad to take the matter up and help him all they could, they were helpless. Dillard said, however, according to Holt, that there was some money available which could be used to develop a tractor to carry an antiaircraft gun, and it was agreed between them that this would serve "just as a starter"—that is, would furnish data from which to determine the necessary steps in reducing the invention to practice. The next step he took with the instant invention was to submit the drawings to his patent attorney, Townsend, in January, 1917. Townsend advised against filing an application until they had inquired into the general state of the art, to which Holt consented. Townsend then instructed his associates at Washington, D. C., and London to investigate the patented state of the art in the United States and England, respectively. Following reports from said associates Townsend prepared the Holt application, which was executed on May 4, 1917, and filed on May 17, 1917.

[1, 2] Holt was very busy on other work during this period. The Examiner of Interferences thought, however, he was under all the circumstances reasonably diligent in reducing the invention to practice. The Examiners in Chief held he was nondiligent. It must be recognized that in cases where the invention can be used only by the Government, and that Government aid is necessary in securing an actual reduction to practice, it often requires a long time to secure such actual reduction to practice. The Government moves slowly, and an outsider can seldom hurry it. It is not required that all an inventor's time be given to reducing an invention to practice or that he rush into the Patent Office with an application on an incompletely-developed construction. All that is necessary is that under the particular circumstances of the case the inventor be reasonably diligent. *Christensen* v. *Ellis*, 94 O. G. 2561; 17 App. D. C. 498; *Nelson* v. *Faucette*, 143 O. G. 1348; 33 App. D. C. 217.

[3] In the case at bar there is no evidence that Rimailho had actually reduced the invention to practice and given it to the world prior to Holt's filing date. The delay of Holt, in consequence, is not so important as if he had been spurred to activity by seeing the invention made public by his opponent. *Ritter* v. *Krakau and Connor, jr.*, 114 O. G. 1553; 24 App. D. C. 271.

[4] The invention in the instant case is of an unusual character in that it involves a construction which would not be used by the public generally or any part of it, but only by a Government. No individual or company would be justified in attempting a reduction to practice of such an invention, because the practicability, the value of it, when reduced to practice, as well as the particular embodiment of that reduction to practice, would have to be determined by Government representatives. Their judgment of what would be needed and how it should be constructed would be a necessary and vital factor in any reduction to practice. It was natural Holt should seek Government representatives, as he sought Major Dillard, and lay the invention before them. This was about all he could do, because, the Government being the only interested purchaser or user, there was no use to proceed further except in accordance with directions and aid from the Government officials. The interview with Major Dillard, as testified to by Holt, did not result in such a final disposition of the matter as to warrant Holt in concluding the Government would never want to use the invention. The fact that no money was available at the time of the interview would not mean the inventor was to understand that none would ever be available and the Government would never aid in reducing the invention to practice or use it. Holt testifies that everyone felt at that time this country was soon to join in the war. This being true, he was justified in leaving his drawings with the War Department until December, 1916, because this officer had expressed great interest in the invention and had said the department "would be only too glad to take this up and help us all they possibly could." Under the circumstances of impending entrance into the war it was probable money would be available later to be used in a reduction to practice of the invention, especially if this country actually entered the war. The interview, as testified to by Holt, resulted in some steps being taken with the building of a caterpillar tractor to carry an antiaircraft gun, and these experiments were of a nature to be helpful in any subsequent reduction to practice that should be attempted.

After Holt, in December, 1916, again obtained the drawings he had left with Major Dillard his steps looking to the obtaining of a patent seem to have been taken with reasonable diligence, considering the character of the invention, the advice of his attorney to delay until the art was investigated, and the disturbed conditions abroad where the searches of the prior art were prosecuted. Under all the circumstances it would seem Holt's activities were as great as those of Dickinson in the case of *Dickinson* v. *Swinehart*, 273 O. G. 407; 263 Fed. 474; 29 App. D. C. 222. It is believed the conclusion of the Examiner of Interferences that Holt was not fatally lacking in diligence is sound.

The Examiners in Chief held that Rimailho has no right to make counts 4, 5, and 8, because he has not disclosed steering of the tractors by the traction elements or tracts, as therein defined, or count 6, because he has not disclosed the feature of interchangeable tractor and railway truck mechanisms. Rimailho's drawings show, more or less diagrammatically, separate tracks at the sides of each truck and a driving motor *f* located between each pair of tracks. He says in his specification that his device can make abrupt turns. It is believed that counts 4 and 5 are within his disclosure.

No suggestion is found in the Rimailho application of the detachable connections and interchangeable truck mechanisms referred to in count 6. Rimailho can not make this count.

As shown in Fig. 4 of Rimailho's drawings, the right-hand end of the gun beam *a* and the gun *i*

are located between the opposite sides of the bracket member *m*. The right truck *e* can have only a limited turning movement in a horizontal plane with respect to the main frame *a*. It can not be sufficiently turned to cause the gun frame *a* to move sidewise as distinguished from obliquely. Such structure is required by count 8, and Rimailho can not make this count.

Rimailho's lack of right to make counts 6 and 8 constitutes another reason for awarding these counts to Holt.

The proposed amendment to Rimailho's specification and drawing is considered within his original disclosure. *Ex parte Snyder*, 22 O. G. 1975; *Ex parte Wareman*, 97 O. G. 1600; *Hopkins* v. *Newman*, 134 O. G. 2028; 30 App. D. C. 402. Its entry after the termination of this interference is approved.

[5] The decision of the Examiners in Chief awarding priority to the senior party, Rimailho, as to count 1 is affirmed; but this count is held not patentable over the invention recited in the other counts. The recommendation of the Examiners in Chief that the interference be dissolved as to counts 4, 5, 6, and 8 is not approved, and their decision awarding priority as to counts 2, 3, and 7 to Rimailho is reversed. Priority as to counts 2 to 8, inclusive, is awarded to Holt. The Examiner, if this holding is not reversed or modified on appeal, will reject in Rimailho's application the claim involved in count 1.

Court of Appeals of the District of Columbia.

RIMAILHO *v.* HOLT.

No. 1,721. Decided December 7, 1925.

APPEAL from Patent Office. Affirmed.

(For Commissioner's Decision see p. 3 ante.)

Mr. E. G. Curtis, *Mr. A. D. Adams*, and *Mr. Nichol M. Sandhoe* for Rimailho.

Mr. Melville Church for Holt.

Before MARTIN, Chief Justice, ROBB, Justice, and SMITH, Judge U. S. Court of Customs Appeals.

ROBB, *J.*:

Appeal from a decision of the Patent Office in an interference proceeding awarding priority of invention to the party Holt.

The invention covers means for supporting heavy artillery and involves a construction in which the gun-supporting frame has its ends carried by independently-driven tractors of the caterpillar type. In the Patent Office the issue largely turned upon the question of Holt's diligence, Rimailho not having taken any testimony. The evidence has been fully and carefully reviewed by the tribunals of the Office and we agree with the conclusion reached that Holt, in view of the circumstances surrounding him, his conduct after conception and the character of the invention, was reasonably diligent. The decision therefore is affirmed.

Affirmed.

196,332. Certain named articles of clothing for men, women, and children. Alfred Decker & Cohn, Chicago, Ill. Registered March 17, 1925. Canceled January 13, 1926.

204,285. Saline laxative. Otis Clapp & Son, Inc., Boston, Mass. Registered October 13, 1925. Canceled January 15, 1926.

204,619. Glues and adhesive cement. Royal Glue Co., Washington, D. C. Registered October 20, 1925. Canceled January 15, 1926.

Disclaimers.

1,383,677.—*George Thompson*, Mount Vernon, N. Y. TELEPHONE-EXCHANGE SYSTEMS. Patent dated July 5, 1921. Disclaimer filed January 11, 1926, by the patentee, the assignee, *Western Electric Company, Incorporated*, consenting.

Hereby enters this disclaimer to the said claims of said Letters Patent which are in the following words, to wit:

"1. In a telephone exchange system, an automatic switch, a differentially wound stepping magnet for operating said switch, and means for energizing the windings of said magnet to prevent further operation thereof when the switch engages terminals of an idle line.

"2. In a telephone exchange system, an automatic switch, a stepping magnet for the switch having a normally inactive differential winding, a circuit for operating said magnet, and means for energizing said differential winding to prevent operation of said magnet when the switch engages terminals of an idle line."

1,471,010.—*John N. Selvig*, Chicago, Ill. SPINNING TOOLS AND MACHINES. Patent dated October 16, 1923. Disclaimer filed January 12, 1926, by the patentee, the assignee, *Western Electric Company, Incorporated*, consenting.

Hereby enters this disclaimer to the said claims of said Letters Patent which are in the following words, to wit:

"9. In a machine for flaring tubes, the combination with a spinning tool and a blow pipe for directing a flame toward the operative position of said tool, of a turret rotatable about a horizontal axis and having a plurality of rotatable work holding chucks and adapted to present a plurality of work pieces successively to the flame and to the tool.

"10. In a machine for flaring tubes, the combination with a spinning tool and a blow pipe for directing the flame toward the operative position of said tool, of a turret having a plurality of work holders rotatably mounted thereon and adapted to present a plurality of workpieces successively to the flame and to the tool and a single shaft for simultaneously rotating said work holders.

"11. In a machine for flaring tubes, a carrier, a plurality of rotatable tube holders, means for simultaneously rotating said tube holders, means for heating the tubes and means for flaring said tubes while heated.

"12. In a machine for flaring tubes, a carrier, means for advancing said carrier step-by-step, a plurality of tube holders, means for rotating said tube holders, means for heating said tubes, means for flaring said tubes while heated, said means comprising a flaring tool, means for advancing said tool toward said heated glass tube and means for withdrawing said tool from said heated glass tube.

"13. In a machine for flaring tubes, a shaft, a carrier, a plurality of work holders rotatably mounted on said carrier, said work holders being simultaneously rotated by said shaft, and a spinning tool for flaring tubes carried by said work holders.

"14. In a machine for flaring tubes, a shaft, a carrier, a plurality of work holders rotatably mounted on said carrier, said work holders being simultaneously rotated by said shaft, means for heating tubes carried by said holders, and means for flaring said tubes while heated."

1,506,884.—*Warren W. Carpenter*, Brooklyn, N. Y. TELEPHONE-EXCHANGE SYSTEMS. Patent dated September 2, 1924. Disclaimer filed January 11, 1926, by the patentee, assignee, *Western Electric Company, Incorporated*, consenting.

Hereby enters this disclaimer to the said claims of said Letters Patent which are in the following words, to wit:

"1. In a telephone exchange system, a calling and a called subscriber's line, means for extending said calling line, an impulse controlling mechanism to which said calling line is extended and which is common to said lines, relays simultaneously actuated by said impulse controlling mechanism for connecting said calling line to said called line, and means under the sole control of the calling subscriber for releasing the established connection.

"2. In a telephone exchange system, calling and called subscriber's lines, a relay mechanism individual to the calling line, a link circuit for joining said calling and called lines, an impulse controlling mechanism, switching means individual to said calling and called lines for connecting the same to said link circuit, the operation of the switching means individual to the calling line being dependent upon certain electrical conditions at the relay mechanism individual to said calling line and at said impulse controlling mechanism, and the switching means individual to said called line being responsive only to an electrical condition at the impulse controlling mechanism, and means for operating the switching means individual to said calling and called lines.

"3. In a telephone exchange system, calling and called subscriber's lines, a relay mechanism individual to the calling line, a link circuit for joining said calling and called lines, an impulse controlling mechanism, switching means individual to said calling and called lines for connecting the same to said link circuit, the operation of the switching means individual to the calling line being dependent upon certain electrical conditions nt the relay mechanism individual to said calling line and at said impulse controlling mechanism, and the switching means individual to said called line being responsive only to an electrical condition at the impulse controlling mechanism, and an electromagnetic means under the control of said impulse controlling mechanism for operating the switching means individual to said calling and called lines.

"7. In a telephone exchange system, a calling and a called subscriber's line, means individual to said calling line for extending same, an impulse controlling mechanism to which said calling line is extended and which is common to said lines, and relays actuated simultaneously for connecting said calling line to said called line, one of said relays being individual to the calling line and controlled by said impulse controlling mechanism and said individual means, and the other relay being individual to the called line and controlled only by said impulse controlling mechanism."

1,507,116.—*Edward E. Hinrichsen*, New York, N. Y. TELEPHONE SYSTEMS. Patent dated September 2, 1924. Disclaimer filed January 11, 1926, by the patentee, the assignee, *Western Electric Company, Incorporated*, consenting.

Hereby enters this disclaimer to the said claim of said Letters Patent which is in the following words, to wit:

"7. In a telephone system, telephone lines, link circuits, a trunk circuit, switching devices having permanently paired primary and secondary contacts for interconnecting said lines and said links and said trunk, means in said links under control of said lines for disconnecting a link from a line and causing the connection of said trunk to a line, said means including contacts of a switching device employed in connecting a said line to a said link."

TRADE-MARKS

OFFICIAL GAZETTE, FEBRUARY 2, 1926.

[VOL. 343. No. 1.]

The following trade-marks are published in compliance with section 6 of the act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed within thirty days of this publication.

Marks applied for "under the ten-year proviso" are registrable under the provision in clause (b) of section 5 of said act as amended February 18, 1911.

As provided by section 14 of said act, a fee of ten dollars must accompany each notice of opposition.

Ser. No. 143,086. (CLASS 39. CLOTHING.) A. J. BATES COMPANY, Webster, Mass. Filed Feb. 2, 1921. Under ten-year proviso.

THE *Bates* SHOE

Particular description of goods.—Shoes of Leather, Rubber, Fabric, or of Combinations of These Materials.
Claims use since January, 1890.

Ser. No. 152,450. (CLASS 12. CONSTRUCTION MATERIALS.) TEE-LOK SHINGLE COMPANY, Chicago, Ill. Filed Aug. 31, 1921.

TEE-LOK

No claim is made to the exclusive use of the words of the mark when used for descriptive or other purposes in the ordinary meaning of the words.
Particular description of goods.—Shingles.
Claims use since January, 1921.

Ser. No. 185,998. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) ACME STEEL GOODS COMPANY, Chicago, Ill. Filed Sept. 21, 1923.

ACME
WELD-FAST

Particular description of goods.—Electrical Welding Machines.
Claims use since June 9, 1923.

Ser. No. 191,211. (CLASS 15. OILS AND GREASES.) WESTERN REFINING AND OIL COMPANY, Davenport, Iowa. Filed Jan. 23, 1924.

RED FLASH
GASOLINE

The drawing is lined to indicate the colors of yellow and red. No claim is made to the use of the word "Gasoline" apart from the mark shown.
Particular description of goods.—Gasoline.
Claims use since on or about Sept. 1, 1922.

Ser. No. 191,660. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) SANTIAGO LOPEZ BARREDO S. A., Santander, Spain. Filed Jan. 30, 1924.

Applicant disclaims for this registration the words "Brand, Santander, Espana Santiago Lopez Barredo, S. A." except in the precise relation and association in which they appear.
Particular description of goods.—Preserved Fish and Canned Vegetables.
Claims use since Dec. 7, 1923.

Ser. No. 194,958. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) PETER L. SMITH, Worcester, Mass. Filed Apr. 3, 1924.

DIRECT-U-LITE

Particular description of goods.—Electrically-Illuminated Crossroad Signal Stand.
Claims use since Sept. 26, 1923.

Ser. No. 195,504. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) SAMUEL DIAMOND, New York, N. Y. Filed Apr. 14, 1924.

EVERBEST

No claim is made to the word "Everbest" apart from the mark shown in the drawing.
Particular description of goods.—Dry Batteries.
Claims use since Mar. 1, 1924.

Ser. No. 195,810. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) THE FAIRFACTS COMPANY, INC., New York, N. Y. Filed Apr. 19, 1924.

BATHROOM
Fairfacts
FIXTURES

The right to registration of the words "Bathroom Fixtures" under the act of 1905 is disclaimed but without prejudice to applicant's common-law rights to the use of these words or any right to the registration thereof under any other act of Congress.
Particular description of goods.—Containers for Electric Heaters, and in Particular Wall Recesses for Electric Heaters for Bathrooms.
Claims use since June, 1922.

Ser. No. 201,739. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) WILLIAM BRAND & COMPANY, New York, N. Y. Filed Aug. 22, 1924.

Turbonite

Particular description of goods.—Hard Paper Sheets Impregnated with Phenol Condensation Product for Electrical Insulations.
Claims use since July, 1923.

Ser. No. 202,322. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) BROWN, EDMONDS AND WILLARDSON, Salt Lake City, Utah. Filed Sept. 8, 1924.

MILKWHITE

Particular description of goods.—Eggs and Dressed Poultry.
Claims use since Nov. 1, 1922.

Ser. No. 202,756. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) J. G. MORGAN & COMPANY, New York, N. Y. Filed Sept. 18, 1924.

SALE MAKERS

Particular description of goods.—Electrically-Illuminated Transparency Display Signs.
Claims use since July 10, 1924.

Ser. No. 203,549. (CLASS 39. CLOTHING.) WEINGARTEN BROS., New York, N. Y. Filed Oct. 7, 1924.

Parasilk

Particular description of goods.—Women's Fitted Undergarments—Namely, Brassières, Corset Brassières, Corsets, and Girdles.
Claims use since July 1, 1924.

Ser. No. 203,925. (CLASS 2. RECEPTACLES.) THE ALLIED BELTING COMPANY, Greenville, Ohio. Filed Oct. 16, 1924.

GREEN DUCK

Particular description of goods.—News Bags Made from Cotton Material.
Claims use since Jan. 1, 1924.

Ser. No. 203,944. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) FAIRFAX TEXTILE MILLS, INC., New York, N. Y. Filed Oct. 16, 1924.

No claim is made to the words "Fast Forever" apart from the mark as shown.
Particular description of goods.—Woven Cotton Goods and Silk Cotton Goods.
Claims use since June 11, 1924.

Ser. No. 204,231. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) HAIG & HAIG MFG. CO. INC., Rochester, N. Y. Filed Oct. 21, 1924.

STRAITLINE

No claim is made to the use of the word "Straitline" apart from the mark shown.
Particular description of goods.—Condensers Used in Electrical Apparatus, and Particularly Radio Outfits, Apparatus, Machines, and Supplies.
Claims use since Dec. 11, 1923.

Ser. No. 205,159. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) ELECTRICAL RESEARCH LABORATORIES, Chicago, Ill. Filed Nov. 12, 1924.

CIR-KIT

Particular description of goods.—Radio Electrical Appliances—Namely, Boxes or Containers Containing a Panel, Wiring and Connections, Transformers, Condensers, and All Necessary Appliances to Construct a Complete Radio Receiving Set (Except Tubes, Batteries, and Antennæ).
Claims use since Oct. 13, 1924.

Ser. No. 205,731. (CLASS 12. CONSTRUCTION MATERIALS.) THE BEAVER PRODUCTS COMPANY, INC., Buffalo, N. Y. Filed Nov. 24, 1924.

EAGLE

Particular description of goods.—Plaster.
Claims use since Nov. 2, 1905.

Ser. No. 206,261. (CLASS 2. RECEPTACLES.) STANDARD OIL COMPANY, Whiting, Ind., and Chicago, Ill. Filed Dec. 4, 1924.

The words "Candle Chest" are disclaimed apart from the other features of the mark sought to be registered.
Particular description of goods.—Candle Containers.
Claims use since Nov. 26, 1924.

Ser. No. 207,144. (CLASS 35. BELTING, HOSE, MACHINERY PACKING AND NONMETALLIC TIRES.) PIONEER RUBBER MILLS, San Francisco, Calif. Filed Dec. 23, 1924.

SKOOKUM

Particular description of goods.—Piston Packing.
Claims use since about Aug. 1, 1924.

Ser. No. 208,045. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) E. F. DREW & CO. INC., New York, N. Y. Filed Jan. 13, 1925.

NAPTHOLE

Particular description of goods.—Paste Used in the Textile Industry for Scouring Wool.
Claims use since Nov. 11, 1924.

Ser. No. 208,454. (CLASS 37. PAPER AND STATIONERY.) CAREW MANUFACTURING COMPANY, South Hadley Falls, Mass. Filed Jan. 22, 1925.

TREASURY

Particular description of goods.—Bond Paper.
Claims use since June, 1891.

Ser. No. 208,540. (CLASS 39. CLOTHING.) VALCO MANUFACTURING CO., INC., New York, N. Y. Filed Jan. 23, 1925.

VALCO
"America's Quality Nightwear"

No claim is made to the exclusive use of the words "America's Quality Nightwear" apart from the mark shown in the drawing.
Particular description of goods.—Night Wear—viz, Pyjamas.
Claims use since November, 1923.

Ser. No. 208,742. (CLASS 1. RAW OR PARTLY-PREPARED MATERIALS.) H. W. BUCKBEE ROCKFORD SEED FARMS FOREST CITY GREENHOUSES, Rockford, Ill. Filed Jan. 28, 1925.

No claim is made to the words "Buckbee's Seeds" apart from their association as shown.

Particular description of goods.—Seeds, Bulbs, and Plants.

Claims use since Feb. 20, 1905

Ser. No. 208,749. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) ALEXANDER J. FORBES, doing business as Uncle Al's Radio Shop, Oakland, Calif. Filed Jan. 28, 1925.

MIRACLE

Particular description of goods.—Crystal Radio Receiving Sets and Parts Thereof.

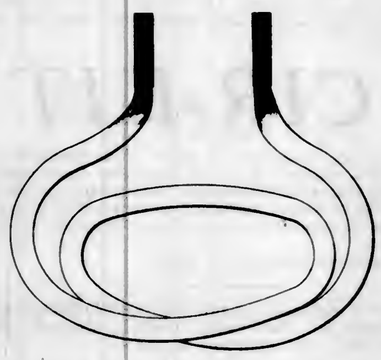
Claims use since Sept. 1, 1924.

Ser. No. 209,996. (CLASS 28. JEWELRY AND PRECIOUS-METAL WARE. FRANK LEBRON, New York, N. Y. Filed Feb. 21, 1925.

Particular description of goods.—Sterling Silverware, Gold-Plated Ware, and Silver-Plated Ware in Flat Tableware, Hollow Tableware, Toilet Articles, and Jewelry,—Namely, Bowls, Plates, Porringer Cups, Mugs, Forks, Food Pushers, Knives, Spoons, Napkin Rings, Rattles, Bracelets, Bib Holders, Necklaces, Pins, and Finger Rings for Children's Jewelry and Eating Implements.

Claims use since early in January, 1925

Ser. No. 210,303. (CLASS 40. FANCY GOODS, FURNISHINGS, AND NOTIONS.) INTERNATIONAL BRAID COMPANY, Providence, R. I. Filed Feb. 28, 1925.



No claim is made to the mere representation of the goods. The mark consists in applying a tip on a fabric lacing, said tip having its surface arbitrarily marked to imitate or simulate the fabric of the lacing to which it is attached.

Particular description of goods.—Shoe Lacings, Corset Lacings, Underwear Lacings, Blouse Lacings, All of Which Are made of Cotton, Linen, Silk, or Worsted.

Claims use since Jan. 29, 1925.

Ser. No. 210,733. (CLASS 40. FANCY GOODS, FURNISHINGS, AND NOTIONS.) INTERNATIONAL BRAID COMPANY, Providence, R. I. Filed Mar. 9, 1925.

No claim is made to the mere representation of the goods. The mark consists in applying a tip on a fabric lacing, said tip having its surface arbitrarily marked to imitate or simulate a linen fabric.

Particular description of goods.—Shoe Lacings, Corset Lacings, Underwear Lacings, Blouse Lacings, All of Which Are made of Cotton, Linen, Silk, or Worsted.

Claims use since Feb. 27, 1925.

Ser. No. 210,926. (CLASS 39. CLOTHING.) RAY THE HATTER, INC., Waterbury, Conn. Filed Mar. 12, 1925.

Particular description of goods.—Work, Dress, and Negligee Shirts; Men's and Women's Hats and Collars, Scarfs, and Cravats; and Men's Knitted Textile Underwear.

Claims use since 1911.

Ser. No. 211,421. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) JOSEPH GLUCK, New York, N. Y. Filed Mar. 21, 1925.

ADMIRA PRINTS

No claim is made to the word "Prints" apart from the mark shown in the drawing.

Particular description of goods.—Silks, Silk and Cotton, or Silk and Rayon Fabrics.

Claims use since Jan. 1, 1925.

Ser. No. 212,010. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) LOCKWOOD CO., Waterville, Me. Filed Apr. 1, 1925.

No claim is made to the exclusive use of the words "Lockwood Co." apart from the mark as shown in the drawing.

Particular description of goods.—Cotton Piece Goods, Sheets, and Pillowcases.

Claims use since 1910.

Ser. No. 212,077. (CLASS 43. THREAD AND YARN.) THE ELMORE COMPANY, doing business as The Elmore Thread Company, Spindale, N. C. Filed Apr. 2, 1925.

No claim is made to the word "Carolina" apart from the mark as shown.

Particular description of goods.—Thread.

Claims use since Mar. 23, 1925.

Ser. No. 212,621. (CLASS 39. CLOTHING.) JACKSON CORSET CO., Jackson, Mich. Filed Apr. 13, 1925.

College Girl Silhouette

Particular description of goods.—Corsets, Brassières, Corset Brassières, Corset Combinations, Bust Confiners, Bust Supporters; Vests, Chemises, Nightgowns, Step-Ins, and Petticoats Made of Textile and Woven Fabrics; Camisoles, Bandeaux, Belts for Personal Wear, Hip Confiners, Girdles, Reducing Girdles, Reducing Brassières, Reducing Corset Brassières, Reducing Corset Combinations.

Claims use since Nov. 1, 1924.

Ser. No. 213,233. (CLASS 36. MUSICAL INSTRUMENTS AND SUPPLIES.) GENERAL PHONOGRAPH CORPORATION OF CANADA, LTD., Kitchener, Ontario, Canada. Filed Apr. 24, 1925.

The representation of gears is claimed by applicant only in connection with the other features of the mark shown in drawing.

Particular description of goods.—Mechanical Motor for Talking Machines or Phonographs or Other Like Musical Instruments.

Claims use since on or about January, 1921.

Ser. No. 213,780. (CLASS 39. CLOTHING.) HYMAN W. GINSBURG, doing business as Graceline Stout Dress Co., New York, N. Y. Filed May 4, 1925.

Graceline SHORT STOUT

No claim is made to the exclusive use of the words "Short Stout" apart from the mark shown on the drawing. The mark consists in the words "Graceland Short Stout."

Particular description of goods.—Ladies' Costumes in One, Two, and Three Piece Garments—viz, Dresses, Coats, Suits, and Skirts.

Claims use since 1922.

Ser. No. 214,118. (CLASS 39. CLOTHING.) L. BAMBERGER & COMPANY, Newark, N. J. Filed May 11, 1925.

Fashion Lane

Particular description of goods.—Women's Coats and Suits, Women's Dresses; Girls' and Juniors' Coats, Suits, and Dresses; Misses' Coats and Suits, and Misses' Dresses and Furs.

Claims use since Nov. 1, 1924.

Ser. No. 214,671. (CLASS 4. ABRASIVE, DETERGENT, AND POLISHING MATERIALS.) THE LIVERPOOL BORAX CO. LTD., Liverpool, England. Filed May 21, 1925.

LAMOL

Particular description of goods.—Detergent Powder for Cleansing Receptacles.

Claims use since Nov. 27, 1919.

Ser. No. 214,727. (CLASS 17. TOBACCO PRODUCTS.) HAUS NEUERBURG O. H. G., Trier, Germany. Filed May 22, 1925.

Particular description of goods.—Leaf Tobacco, Cigars, Cigarettes, and Chewing and Smoking Tobacco.

Claims use since Oct. 31, 1908.

Ser. No. 214,785. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) DUNCAN, FOX & CO., INC., New York, N. Y. Filed May 23, 1925.

Particular description of goods.—Cotton Drills, Sheetings, Shirtings, and Flannels.

Claims use since May 20, 1925.

Ser. No. 215,024. (CLASS 15. OILS AND GREASES.) ROCKGAS PRODUCTS COMPANY, Wilmington, Del., and Coraopolis, Pa. Filed May 28, 1925.

ROCKGAS

Particular description of goods.—Liquid Hydrocarbon More Volatile Than Gasoline for Use as Domestic and Industrial Fuel and as Fuel for a Metallurgical Torch for Cutting Steel.

Claims use since June 17, 1918.

Ser. No. 215,284. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) VIRGINIA HAY & GRAIN CO., Virginia, Minn. Filed June 3, 1925.

Particular description of goods.—Flour.

Claims use since May 8, 1925.

Ser. No. 215,501. (CLASS 39. CLOTHING.) CHARLES H. BROWN, New York, N. Y. Filed June 9, 1925.

Particular description of goods.—Leather and Canvas Boots and Shoes.

Claims use since Nov. 1, 1924.

Ser. No. 216,065. (CLASS 39. CLOTHING.) MILLS CORSET COMPANY, Worcester, Mass. Filed June 19, 1925.

Marvelette

Particular description of goods.—Combination One-Piece Bandeau and Girdle.

Claims use since April, 1925.

Ser. No. 216,191. (CLASS 39. CLOTHING.) LONG'S HAT STORES, New York, N. Y. Filed June 22, 1925.

The Sunsrong STRAW Sunresisting-Custombilt "A Straw Superb"

No claim is made to the exclusive use of the words "Straw Sunresisting—Custombilt A Straw Superb" apart from the mark as shown in the drawing.

Particular description of goods.—Men's Hats.

Claims use since May 1. 1924.

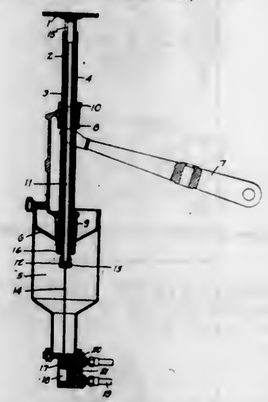
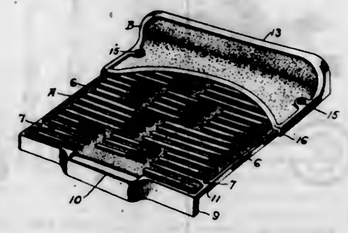
8,555.—*Title:* MONARCH. For Groceries. REID, MURDOCH & CO., Chicago, Ill. Published December 17, 1925.



8,556.—*Title:* BLUE RIBBON. For Pure Pork Sausage. ROCHESTER PACKING CO., INC., Rochester, N. Y. Published Mar. 4, 1925.

8,557.—*Title:* KIKI VIALS. For Perfumes. VENUS PERFUME COMPANY, INC., New York, N. Y. Published September 24, 1924.

REISSUES



FEBRUARY 2, 1926.

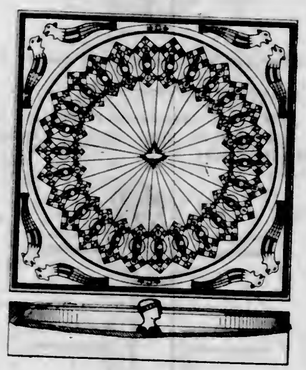
16,257. CLUTCH AND BRAKE CONTROL ON ROAD VEHICLES. JOHN GODFREY PARRY THOMAS, Preston, England, assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Apr. 12, 1924. Serial No. 706,198. Original No. 1,441,545, dated Jan. 9, 1923, Serial No. 417,859, filed Oct. 19, 1920. 23 Claims. (Cl. 303—62.)

1. In a motor road vehicle having an internal combustion engine the combination with a control lever, of a cylinder and piston adapted to operate said lever, a control device operable by the driver, a connection between said cylinder and the suction pipe of the engine, and a valve connecting said cylinder with the atmosphere depending on the positions of both said lever and said control device.

16,258. ADJUSTABLE STEP FOR AUTOMOBILE RUNNING BOARDS. JOSEPH DISCH and JOHN G. FRESE, St. Louis, Mo., assignors to L. J. Comstock, Oakland, Calif. Filed May 25, 1925. Serial No. 32,853. Original No. 1,457,152, dated May 29, 1923, Serial No. 564,024, filed May 27, 1922. 6 Claims. (Cl. 280—169.)

1. A step of the character described comprising an ornamental foot plate having a front contacting flange, a scraper formed by said flange, said plate attached to the running board and a toe section slidably mounted on said plate and brought in contact with the body of the machine, thereby taking the full depth of the running board, substantially as specified.

DESIGNS

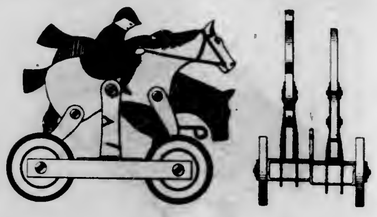


FEBRUARY 2, 1926.

69,341. BOX TOP. WILLIAM ATTAWAY, Spartanburg, S. C., assignor to Dixie Cake Company, Inc., Spartanburg, S. C., a Corporation of South Carolina. Filed Oct. 19, 1925. Serial No. 15,166. Term of patent 14 years.

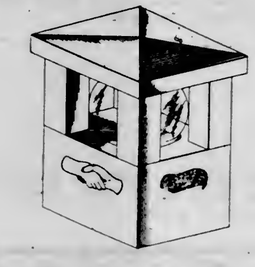
The ornamental design for a box top, as shown.

69,342. GAME BOARD. TORGER A. BAKKETUN, Northwood, Iowa. Filed Nov. 7, 1925. Serial No. 15,381. Term of patent 7 years.



The ornamental design for a game board substantially as shown.

69,343. STONE SETTING. ISADORE BEHRSTOCK, Los Angeles, Calif. Filed May 13, 1925. Serial No. 13,421. Term of patent 14 years.



The ornamental design for a stone setting, as shown.

69,344. PONY AND RIDER TOY. WILLIAM D. BLUDWORTH, Sacramento, Calif. Filed May 27, 1925. Serial No. 13,577. Term of patent 3½ years.

The ornamental design for a pony and rider toy, as shown.

69,345. GRAVE MARKER. JAMES W. CLAXTON, Abilene, Tex. Filed Nov. 28, 1925. Serial No. 15,574. Term of patent 3½ years.

The ornamental design for a grave marker as shown.

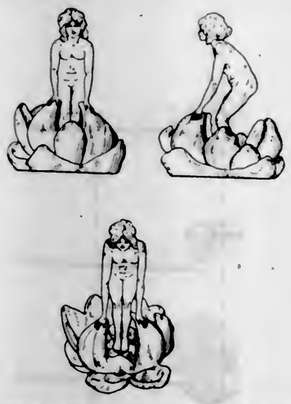
69,346. STICKPIN. NEHEMIAH P. CORNEY, Montville, N. J. Filed Nov. 30, 1925. Serial No. 15,585. Term of patent 3½ years.

The ornamental design for a stickpin, as shown.

69,347. LIGHTING FIXTURE. STANLEY CZAPEK, Detroit, Mich., assignor to Radiant Specialty Co., a Corporation of Michigan. Filed Nov. 20, 1925. Serial No. 15,483. Term of patent 3½ years.

The ornamental design for a lighting fixture, as shown.

69,348. WALL PLATE FOR LIGHTING FIXTURES. JACK FRANZINO, New York, N. Y. Filed July 21, 1925. Serial No. 14,159. Term of patent 3½ years.



The ornamental design for a wall plate for lighting fixtures, as shown.

69,349. WALL PLATE FOR LIGHTING FIXTURES. JACK FRANZINO, New York, N. Y. Filed July 21, 1925. Serial No. 14,160. Term of patent 3½ years.

The ornamental design for a wall plate for lighting fixtures as shown.

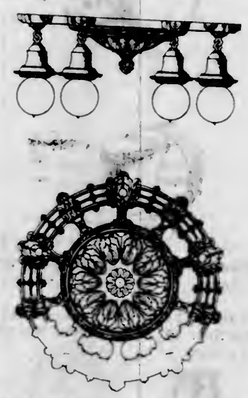
69,350. STATUETTE. EMANUEL FREUND, New York, N. Y. Filed Nov. 28, 1925. Serial No. 15,566. Term of patent 3½ years.

The ornamental design for a statuette, as shown.

69,351. FINGER RING. HERMAN W. A. GOETZKE, North St. Paul, Minn. Filed Sept. 28, 1925. Serial No. 14,932. Term of patent 14 years.

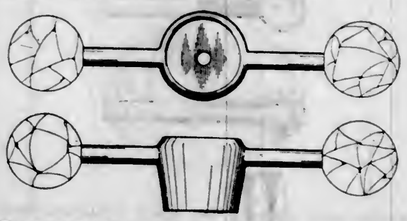
The ornamental design for a finger ring, as shown.

69,352. JAR. GEORGE JAMES, London, England, assignor to Crosse & Blackwell Limited, London, England. Filed Sept. 28, 1925. Serial No. 14,935. Term of patent 14 years.



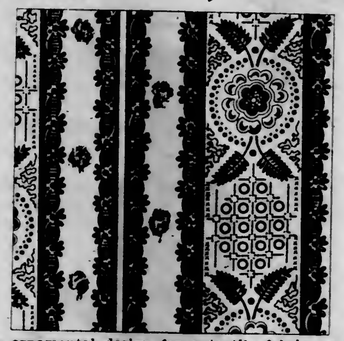
The ornamental design for a jar as shown.

69,353. BOTTLE. WILLIAM R. JOHNSON and FRANK P. JOHNSON, Rochester, N. Y., assignors to F. E. Reed Glass Company, Rochester, N. Y., a Corporation of New York. Filed Oct. 1, 1925. Serial No. 14,988. Term of patent 14 years.



The ornamental design for a bottle, as shown.

69,354. BODY FOR LIGHTING FIXTURES. MAX KLEIN, New York, N. Y., assignor to Shapiro & Aronson, Inc., New York, N. Y., a Corporation of New York. Filed Sept. 2, 1924. Serial No. 10,656. Term of patent 3½ years.



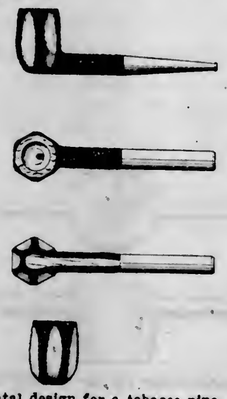
The ornamental design for a body for lighting fixtures, as shown.

69,355. RADIATOR CAP. JOHN J. KORAN, Oklahoma City, Okla. Filed Nov. 2, 1925. Serial No. 15,328. Term of patent 7 years.

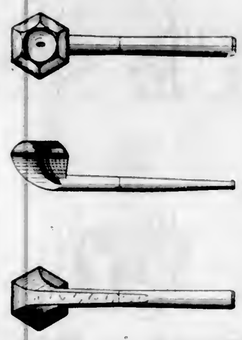
The ornamental design for the radiator cap, as shown.

69,356. TEXTILE FABRIC. WILLIAM C. KORZINEK, Cliffside Park, N. J., assignor to Golding Bros. Company, New York, N. Y., a Corporation of New York. Filed Dec. 11, 1925. Serial No. 15,716. Term of patent 3½ years.

The ornamental design for a textile fabric, as shown.

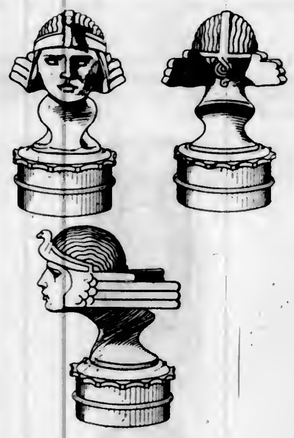


69,357. LOCOMOTIVE HEADLIGHT. NILS D. LEVIN, Columbus, Ohio, assignor to The Jeffrey Manufacturing Company, Columbus, Ohio, a Corporation of Ohio. Filed June 8, 1923. Serial No. 6,446. Term of patent 14 years.



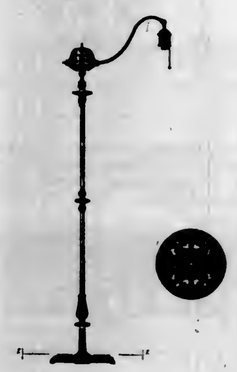
The ornamental design for a locomotive headlight substantially as shown.

69,358. TOBACCO PIPE. ALFRED ORLIK, New York, N. Y. Filed Nov. 10, 1925. Serial No. 15,396. Term of patent 3½ years.



The ornamental design for a tobacco pipe, as shown.

69,359. TOBACCO PIPE. ALFRED ORLIK, New York, N. Y. Filed Nov. 21, 1925. Serial No. 15,488. Term of patent 3½ years.



The ornamental design for a tobacco pipe, as shown.

69,360. RADIATOR CAP. AURELIUS MARCUS RENZETTI and DEE CARLTON BROWN, Philadelphia, Pa., assignors to Stutz Motor Car Company of America, Inc., Indianapolis, Ind., a Corporation of New York. Filed Nov. 14, 1925. Serial No. 15,422. Term of patent 7 years.

The ornamental design for a radiator cap, as shown.

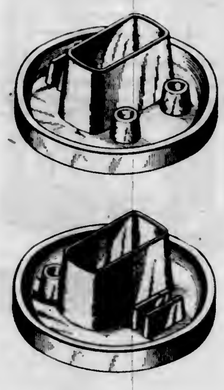
69,361. LAMP. VICTOR K. SAMUELSON and THEODORE J. NELSON, Chicago, Ill. Filed June 8, 1925. Serial No. 13,708. Term of patent 7 years.

The ornamental design for a lamp as shown and described.

69,362. LAMP. VICTOR K. SAMUELSON and THEODORE J. NELSON, Chicago, Ill. Filed June 8, 1925. Serial No. 13,709. Term of patent 7 years.

The ornamental design for a lamp as shown and described.

69,363. FINGER RING OR ARTICLE OF SIMILAR NATURE. CHARLES SCHERER, Long Island, N. Y., assignor to Benjamin & Edward J. Gross Co. Inc., New York, N. Y., a Corporation of New York. Filed Dec. 10, 1925. Serial No. 15,707. Term of patent 3½ years.

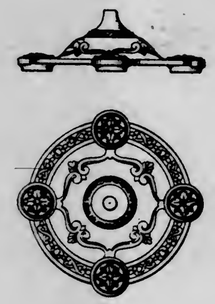


The ornamental design for a finger ring or article of similar nature as shown.

69,364. FINGER RING OR ARTICLE OF SIMILAR NATURE. CHARLES SCHERER, Long Island, N. Y., assignor to Benjamin & Edward J. Gross Co. Inc., New York, N. Y., a Corporation of New York. Filed Dec. 10, 1925. Serial No. 15,708. Term of patent 3½ years.

The ornamental design for a finger ring or article of similar nature as shown.

69,365. SMOKER'S SET. EDWIN E. SLICK, Pittsburgh, Pa. Filed Nov. 28, 1925. Serial No. 15,570. Term of patent 14 years.



The ornamental design for a smoker's set, substantially as shown.

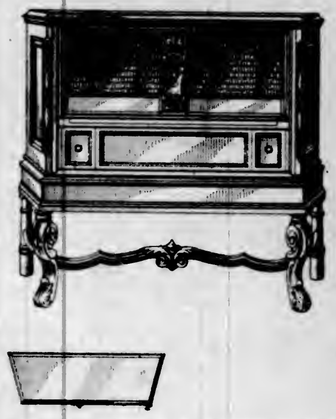
69,366. RIBBON. WILLIAM B. TERRY, New York, N. Y., assignor to Julius Kayser & Co., New York, N. Y., a Corporation of New York. Filed Oct. 4, 1924. Serial No. 10,968. Term of patent 7 years.

The ornamental design for ribbon, as shown.

69,367. BASE FOR PORTABLE ELECTRIC LAMPS. GUSTAVE E. VILLARET, Leonia, N. J., assignor to William R. Noe & Sons, New York, N. Y., a Copartnership. Filed Apr. 14, 1925. Serial No. 11,113. Term of patent 7 years.

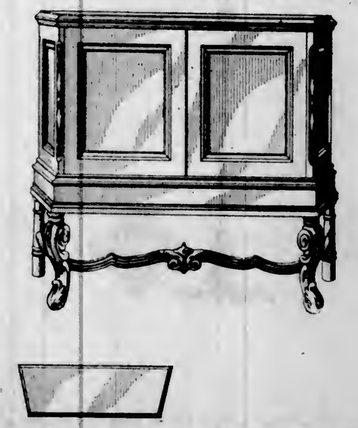
The ornamental design for a base for portable electric lamps, as shown.

69,368. ARM FOR BRIDGE LAMPS. GUSTAVE E. VILLARET, Leonia, N. J., assignor to William R. Noe & Sons, New York, N. N. Y., a Copartnership. Filed Apr. 14, 1925. Serial No. 13,114. Term of patent 7 years.



The ornamental design for an arm for bridge lamps, as shown.

69,369. ARM FOR BRIDGE LAMPS. GUSTAVE E. VILLARET, Leonia, N. J., assignor to William R. Noe & Sons, New York, N. Y., a Copartnership. Filed Apr. 14, 1925. Serial No. 13,115. Term of patent 7 years.



The ornamental design for an arm for bridge lamps, as shown.

69,370. RADIOCABINET. EVERETT WORTHINGTON, Chicago, Ill., assignor to Zenith Radio Corporation, Chicago, Ill., a Corporation of Illinois. Filed Dec. 7, 1925. Serial No. 15,654. Term of patent 14 years.

The ornamental design for a radiocabinet, as shown.

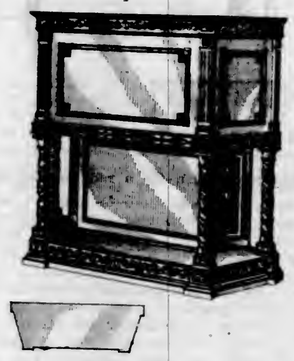
69,371. RADIOCABINET. EVERETT WORTHINGTON, Chicago, Ill., assignor to Zenith Radio Corporation, Chicago, Ill., a Corporation of Illinois. Filed Dec. 7, 1925. Serial No. 15,655. Term of patent 14 years.

The ornamental design for a radiocabinet, as shown.

69,372. RADIOCABINET. EVERETT WORTHINGTON, Chicago, Ill., assignor to Zenith Radio Corporation, Chicago, Ill., a Corporation of Illinois. Filed Dec. 7, 1925. Serial No. 15,656. Term of patent 14 years.

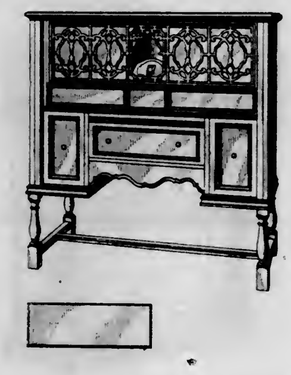
The ornamental design for a radiocabinet, as shown

69,373. RADIOCABINET. EVERETT WORTHINGTON, Chicago, Ill., assignor to Zenith Radio Corporation, Chicago, Ill., a Corporation of Illinois. Filed Dec. 7, 1925. Serial No. 15,657. Term of patent 14 years.



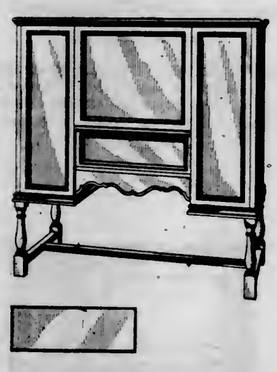
The ornamental design for a radiocabinet, as shown.

69,374. RADIOCABINET. EVERETT WORTHINGTON, Chicago, Ill., assignor to Zenith Radio Corporation, Chicago, Ill., a Corporation of Illinois. Filed Dec. 7, 1925. Serial No. 15,658. Term of patent 14 years.



The ornamental design for a radiocabinet, as shown.

69,375. RADIOCABINET. EVERETT WORTHINGTON, Chicago, Ill., assignor to Zenith Radio Corporation, Chicago, Ill., a Corporation of Illinois. Filed Dec. 7, 1925. Serial No. 15,659. Term of patent 14 years.



The ornamental design for a radiocabinet, as shown.

69,376. RADIOCABINET. EVERETT WORTHINGTON, Chicago, Ill., assignor to Zenith Radio Corporation, Chicago, Ill., a Corporation of Illinois. Filed Dec. 7, 1925. Serial No. 15,660. Term of patent 14 years.

The ornamental design for a radiocabinet, as shown.

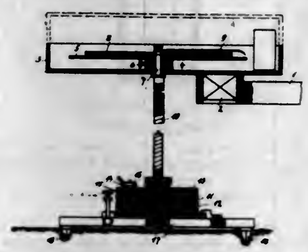
69,377. RADIOCABINET. EVERETT WORTHINGTON, Chicago, Ill., assignor to Zenith Radio Corporation, Chicago, Ill., a Corporation of Illinois. Filed Dec. 7, 1925. Serial No. 15,661. Term of patent 14 years.

The ornamental design for a radiocabinet, as shown.

69,378. RADIOCABINET. EVERETT WORTHINGTON, Chicago, Ill., assignor to Zenith Radio Corporation, Chicago, Ill., a Corporation of Illinois. Filed Dec. 7, 1925. Serial No. 15,662. Term of patent 14 years.

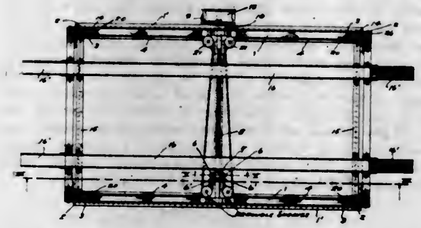
The ornamental design for a radiocabinet, as shown.

69,379. RADIOCABINET. EVERETT WORTHINGTON, Chicago, Ill., assignor to Zenith Radio Corporation, Chicago, Ill., a Corporation of Illinois. Filed Dec. 7, 1925. Serial No. 15,663. Term of patent 14 years.



The ornamental design for a radiocabinet, as shown.

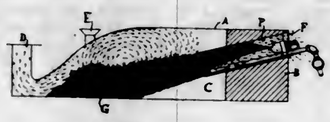
PATENTS



GRANTED FEBRUARY 2, 1926.

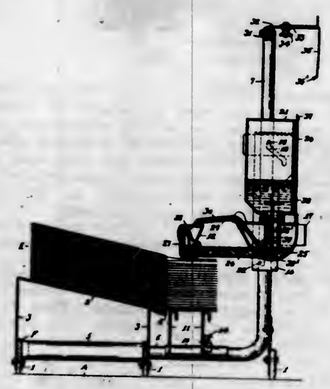
1,571,177. DEVICE FOR THE ADJUSTMENT OF THE SIDE ANGLE OF SIGHTING INSTRUMENTS. ALFRED JOHANN AUSPITZER, Munich, Germany. Filed Mar. 25, 1921. Serial No. 455,565. 17 Claims. (Cl. 33—72.)

2. In a device for side-angle adjustment the combination with a rotatable graduated disk, a pointer coacting therewith, an earth anchorage and a flexible shaft carrying said pointer and secured to said earth anchorage, of a level, and operative connections between said level and disk including a lever, substantially as described and for the purpose mentioned.



1,571,178. AUTOMOBILE HOIST. JOHN P. DONOVAN, San Francisco, Calif. Filed Dec. 9, 1924. Serial No. 754,805. 5 Claims. (Cl. 254—144.)

1. An automobile hoist comprising an outer rectangular frame embracing a vertically movable platform frame, said outer frame having an elevated idler wheel at each corner with a rope passing thereover, a screw bar revolvably supported by the outer frame, a traveling nut thereon, and the rope from each corner being guided over idlers to the nut and secured thereto for simultaneously pulling thereby upon turning the screw bar, and a grooved wheel mounted upon the screw bar adapted to receive power from contact with the wheel of an automobile adjacent the hoist.

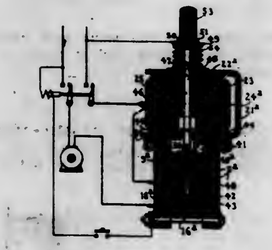


1,571,179. METHOD OF AND APPARATUS FOR CONTROLLING AND DIRECTING BURNING FUEL OR GASES. HENRY ADAMS, Plainfield, N. J. Filed Jan. 23, 1923. Serial No. 614,419. 22 Claims. (Cl. 263—43.)

1. In apparatus for controlling and directing burning fuel or gases, means for projecting burning fuel or gases, and means for projecting substantially in the line of projection of the burning fuel or gases steam or air of greater velocity than the velocity of the burning fuel or gases for drawing along therewith the burning fuel

or gases for controlling the same and after control thereof directing the burning fuel or gases for disposition of the heat thereof.

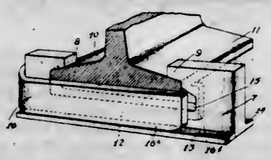
1,571,180. ENVELOPE AND STAMP MOISTENER. ROBERT ASTLEY, Boston, Mass. Filed Jan. 22, 1923. Serial No. 614,139. 22 Claims. (Cl. 91—47.)



10. In an envelope moistener, means for supporting a stack of envelopes with their flaps in extended position, a flap moistening device operative on top of said flaps so as to be supported thereby, and a tilting gravitating water reservoir mounted upon said flap moistening device to automatically lower as the height of the stack is reduced by withdrawal of the moistened envelopes and automatically tilting to drain the water from the flap moistening device when said device has passed beyond the plane of envelope support.

22. In an envelope and stamp moistener, means for supporting a stack of envelopes with their flaps extended, a gravitating flap moistener having a wick operative on top of said flaps, a tiltable water reservoir mounted to follow the movements of said flap moistener, a cup carried by said reservoir and supplied with water therefrom and supplying said flap moistener wick by capillary action in all vertical positions of the reservoir, said cup adapted to tilt rearwardly to drain the water back into the cup and away from the flap wick when said flap wick has passed the plane of envelope support, and a stamp table carried by said flap moistener and having a wick, one end of which is constantly disposed in said cup.

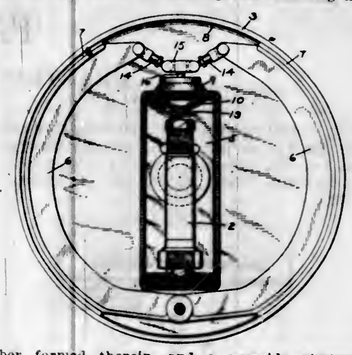
1,571,181. PROCESS FOR SULPHURIZING ORGANIC COMPOUNDS. FREDERICK WILLIAM ATACK, Manchester, England. Filed Jan. 22, 1923. Serial No. 614,290. 8 Claims. (Cl. 260—19.)



1. The process of treating organic materials sulphurizable at a temperature about the boiling point of normal butyl alcohol which consists in heating the material with a sulphurizing reagent in presence of an inert solvent having a boiling point not far removed from the boiling point of normal butyl alcohol.

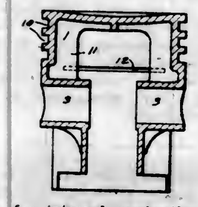
1,571,182. PROTECTIVE DEVICE FOR ELECTRIC CIRCUITS. THOMAS E. BARNUM, Wauwatosa, and ERWIN R. STOEKLE, Milwaukee, Wis., assignors to The Cutler-Hammer Mfg. Co., Milwaukee, Wis., a Corporation of Wisconsin. Filed Feb. 25, 1922. Serial No. 539,117. 13 Claims. (Cl. 200—88.)

1. A protective device for electric circuits comprising relatively movable electrodes, a conductor for connecting the same which is liquid at working temperatures, means subjecting said liquid conductor to a heating effect for interruption of circuit between said electrodes under given conditions and means to automatically effect relative movement of said electrodes for interrupting circuit therebetween under other conditions.



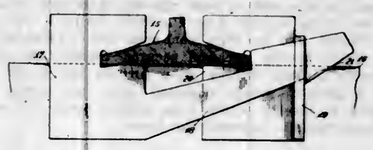
1,571,183. RAIL ANCHOR. ROLANDIS A. BLAIR, Fort Wayne, Ind., assignor to The P & M Company, Chicago, Ill., a Corporation of Illinois. Filed Jan. 10, 1925. Serial No. 1,520. 20 Claims. (Cl. 238—324.)

1. A rail anchor comprising a rail base embracing yoke having a subjacent portion normally horizontally disposed with respect to the under face of the rail and a resilient key adapted to be driven transversely of the rail between the under face of the rail base and said subjacent portion of the yoke.



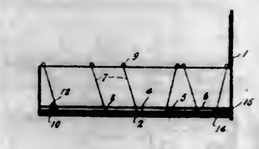
1,571,184. AUTOMOTIVE BRAKE. WILLIAM M. CADY, Edgewood, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Mar. 10, 1924. Serial No. 698,270. 1 Claim. (Cl. 188—152.)

The combination with a brake drum and brake heads mounted in said drum, of a cover plate for said drum having a central depression extending into said drum, one of the side walls of said depression having a brake



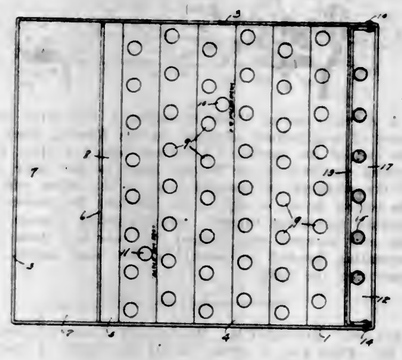
chamber formed therein, and a movable abutment in said chamber operatively connected to said brake heads.

1,571,185. PISTON. JOHN W. COVER and ORRIS F. OLIVER, Seattle, Wash. Filed Apr. 3, 1924. Serial No. 703,853. 5 Claims. (Cl. 74—108.)



1. A piston for internal combustion engines consisting of a head section, a skirt section and wrist pin bosses formed as an integral casting, the skirt section being peripherally continuous without a slit and having two oppositely positioned slide bearing segments which are separated from direct connection with the head by peripheral segment slits, the wrist pin bosses having direct connection with the head and expansion compensating members consisting of webs connecting the wrist pin bosses with the side edges of the slide segments and each having a component of material width lying in a plane which is substantially parallel with the axis of both the wrist pin and the piston.

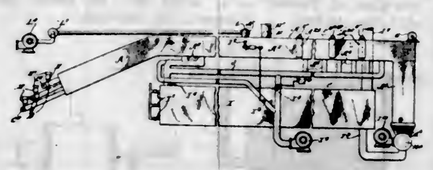
1,571,186. RAIL ANCHOR. WILLIAM H. DE BUSK, Chicago, Ill., assignor to The P. & M. Company, Chicago, Ill., a Corporation of Illinois. Filed Nov. 14, 1924. Serial No. 749,984. 21 Claims. (Cl. 238—321.)



1. A rail anchor comprising a jaw member adapted to have gripping engagement with the flange of a rail, and a second jaw member adapted to have gripping engagement with the flange of the rail at the opposite side thereof, each member being adapted by engagement with the other member to hold such other member in turned position about an axis extending longitudinally of the rail and adapted thereby to hold such other member in operative gripping engagement with the rail.

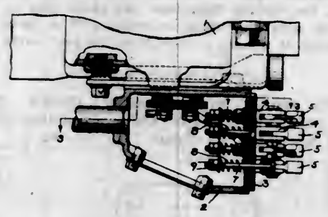
1,571,187. APPARATUS FOR FILING DOCUMENTS AND THE LIKE. WILLIAM ROBERT MURAD DE WHALLEY, London, England, assignor to Roneo Limited, London, England, a Company of Great Britain. Filed Feb. 26, 1924. Serial No. 695,146. 3 Claims. (Cl. 129—16.)

1. For use with filing cabinets of the type specified, a series of division or spacer members, an adjustable locking stop separate from said spacer members and formed from a strip of metal having flanges adapted to fit in the channel of the drawer, the said strip of metal being bored out centrally and tapped to receive a thumb screw for adjusting the stop in the drawer the said stop being housed within the channel of the drawer so that the flange of the last of the series of division or spacer member abuts against the flanged portions of the stop.



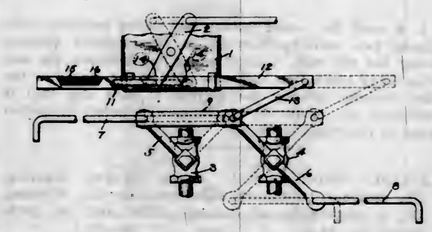
1,571,188. GAME. WILFRID E. DIEGEL, River Rouge, Mich. Filed July 29, 1925. Serial No. 46,742. 3 Claims. (Cl. 273—120.)

1. A game, comprising in combination a box-like structure; a flight of steps arranged within the structure, the said steps having a plurality of marble holes cut in their upper surfaces; a marble ledge extended adjacent the uppermost step; a trip bar pivotally mounted at the forward edge of the marble ledge; a plurality of stop-blocks adapted to fit into the said marble holes of the steps, the said blocks being divided into a plurality of differentiated lots; and a plurality of marbles for positioning back of the said trip bar, and adapted to roll down the said steps and to fall into the said marble holes, when the trip bar is raised.



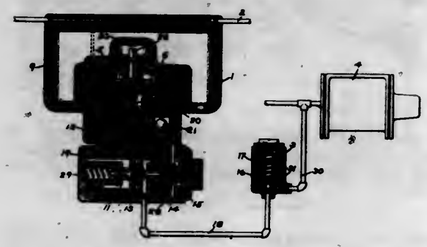
1,571,189. METHOD OF AND APPARATUS FOR DRYING AND CALCINING GYPSUM. CONRAD DRESSLER, New York, N. Y., assignor to American Dressler Tunnel Kilns, Inc., New York, N. Y., a Corporation of New York. Filed Feb. 25, 1920. Serial No. 361,239. 20 Claims. (Cl. 222—6.)

6. Apparatus for heating material comprising a horizontally elongated heating chamber terminating at one end in a depending portion, means for transporting material to be heated through the body portion of said chamber, comprising a plurality of conveyor belts longitudinally disposed in said body portion and arranged one above another and being longitudinally displaced with respect to one another so that at the discharge end



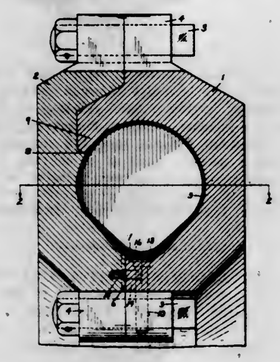
of the chamber each upper belt projects beyond the belt or belts beneath it and so that at their opposite ends each lower belt extends beyond the belt or belts above it.

1,571,190. ELECTRIC TRAIN WIRE COUPLER. CLYDE C. FARMER, Pittsburgh, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed June 27, 1921. Serial No. 480,706. 7 Claims. (Cl. 173—332.)



1. In an automatic electric train line coupler for connecting train line circuits between cars of a train, a contact member having a fixed relation to the coupler with respect to relative lateral movement and having a laterally extended contact face for engagement with a corresponding contact face of a contact member of a counter-part coupler to permit relative lateral sliding movement of corresponding contact members and thereby provide for relative lateral movement of the couplers.

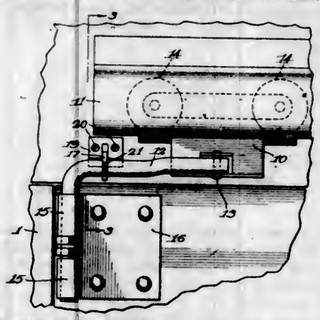
1,571,191. INTERLOCKING SWITCH DEVICE. CLYDE C. FARMER, Pittsburgh, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed June 22, 1923. Serial No. 647,093. 3 Claims. (Cl. 173—332.)



1. The combination with a switch for controlling an electric train line circuit, a casing enclosing said switch, a cock for controlling communication through a fluid pressure train pipe, an interlock member slidably mounted on said casing, a lever for operating said cock, a link pivotally connecting said lever with said member, and a lever for operating said switch and having an inclined face for engaging said member.

1,571,192. FLUID-PRESSURE BRAKE. CLYDE C. FARMER, Pittsburgh, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Mar. 20, 1925. Serial No. 16,886. 8 Claims. (Cl. 303—82.)

1. In a fluid pressure brake, the combination with a brake pipe and a brake cylinder, of a vent valve device operated upon a sudden reduction in brake pipe pressure for venting fluid from the brake pipe to a pipe connected with the brake cylinder, and a check valve in said pipe at a point remote from the vent valve device.

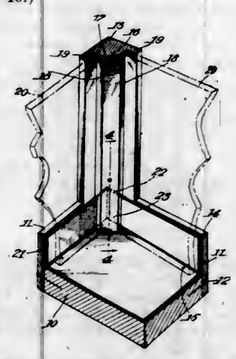


1,571,193. MOLD FOR CURING INNER TUBES. MICHAEL A. FLYNN, Akron, Ohio. Filed June 25, 1925. Serial No. 39,499. 3 Claims. (Cl. 18—42.)

1. A mold for curing inner tubes under pressure, comprising two sections enclosing a substantially circular cavity for the tube, both dividing lines between the sections being located on the same side of the center of the tube, thereby forming one section of such size that it overhangs the cavity at the inner and outer circumferences of the tube.

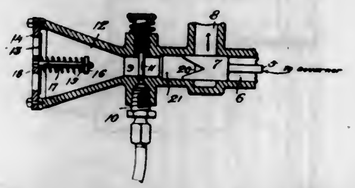
1,571,194. DOOR CATCH. PETER FRANTZ, Sterling, Ill., assignor to Frantz Manufacturing Co., Sterling, Ill., a Corporation of Illinois. Filed Apr. 20, 1925. Serial No. 24,533. 7 Claims. (Cl. 20—20.)

1. In a swinging and folding door construction, the combination of door sections hinged together, with one section hinged at the side of the doorway, a track over the doorway, a hanger body mounted to travel on said track, a horizontally swinging arm pivoted on said hanger body, means to swivel the outer end portion of said arm on the folding door, and a catch pivotally mounted over the doorway to engage said arm, adapted to be raised by engagement with the inner side of the arm when the door is closed, and adapted to then move downward into latching engagement with the outer side of the arm when the door is closed to hold the arm



against swinging movement, said catch being also adapted while in latching position and without motion thereof to permit disengagement of said arm endwise therefrom when the door is pushed open.

1,571,195. VALVE-SPRING LIFTER. LEO GAFFNEY, Philadelphia, Pa. Filed Dec. 26, 1923. Serial No. 682,631. 8 Claims. (Cl. 29—86.3.)



4. A valve-spring lifter including a top lever composed of longitudinal sections; prongs forming jaws on one end of the sections; a bottom lever; a pivot connecting one end of the bottom lever to the other end of the sections; a pronged jaw on the other end of the bottom lever; a clip on the sections for preventing outward movement thereof; means passing through the clip and between the sections for securing them and preventing inward movement thereof, and means for separating the jaws.

1,571,196. AQUARIUM. WLADYSLAW GALANT, Chicago, Ill. Filed Feb. 5, 1925. Serial No. 7,059. 7 Claims. (Cl. 113—49.)

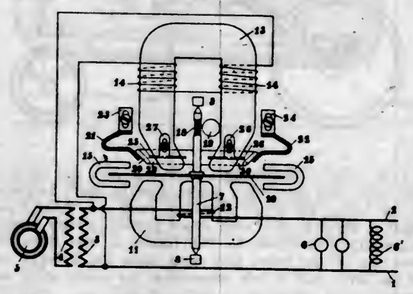
1. An aquarium comprising a base, side ledges on said base, a tray upon said base inclosed within said ledges, corner members, side walls, connecting means between said tray and said corner members, and means for holding said walls in position.

1,571,197. EXPLOSIVE-MIXTURE-SUPPLY CONTROL DEVICE FOR INTERNAL-COMBUSTION ENGINES. MEYER J. GOLDBERG, Muskegon, Mich., assignor, by mesne assignments, to The Maximotor Company, Muskegon Heights, Mich., a Corporation of Michigan. Filed Apr. 2, 1920. Serial No. 370,844. 3 Claims. (Cl. 123—123.)

1. In an apparatus of the character described, a flared nozzle having a passage therethrough in communication with the cylinder of an engine, an air inlet and an oil inlet into said passage, a spring valve on the outer end of said nozzle, and a balanced piston valve actuated according to the speed of the engine for controlling said cylinder communication, said piston valve having a V-shaped recess in its end surface.

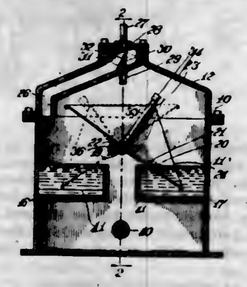
1,571,198. INDUCTION ELECTRICITY METER. JESSE HARRIS, La Fayette, Ind., assignor to Duncan Electric Manufacturing Company, La Fayette, Ind., a Corporation of Illinois. Filed Sept. 13, 1924. Serial No. 737,454. 14 Claims. (Cl. 171—264.)

12. An induction electricity meter including a torque producing magnet system having current and pressure windings, and a thermo-motive device responsive to changes in temperature for varying the reluctance encountered by flux set up by said magnet system.



1,571,199. SYNCHRONOUS INDUCTION MOTOR. JESSE HARRIS, La Fayette, Ind., assignor to Duncan Electric Manufacturing Company, La Fayette, Ind., a Corporation of Illinois. Filed Apr. 16, 1925. Serial No. 23,568. 3 Claims. (Cl. 172—275.)

1. A synchronous motor including an armature formed of non-magnetic metal mounted to turn; a field winding having a magnetic core and presenting poles to said armature upon opposite sides of its axis; shading coils disposed about said poles and each extending in the direction of rotation further upon one side of the axis of the associate pole than the other; and a group of magnetizable bodies carried by the armature which has said magnetizable bodies so disposed thereon that the

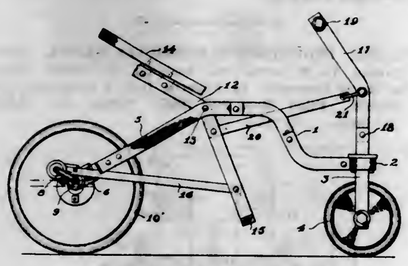


bodies which are nearing and next the poles are at unequal distances from the respective polar axes which they are nearing and next.

1,571,200. INDUCTION ELECTRICITY METER. JESSE HARRIS, La Fayette, Ind., assignor to Duncan Manufacturing Company, La Fayette, Ind., a Corporation of Illinois. Filed May 20, 1925. Serial No. 31,551. 15 Claims. (Cl. 171—309.)

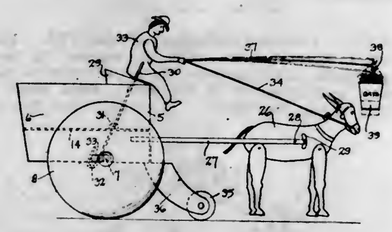
8. An induction electricity meter including a torque producing magnet system having current and pressure windings, and a device responsive to changes in temperature for varying the reluctance encountered by flux set up by said magnet system and serving to reduce the torque effecting flux upon increase in temperature and to increase the torque effecting flux upon reduction in temperature.

1,571,201. LIQUID-SAMPLING APPARATUS. FREDERICK L. JEFFERIES, Riverside, Ill., assignor, by mesne assignments, to International Patents Development Company, a Corporation of Delaware. Filed Sept. 19, 1923. Serial No. 663,720. 11 Claims. (Cl. 73—21.)



1. Liquid sampling apparatus comprising a substantially vertical fractioning pipe including a sloping member at its upper end slotted to divert a portion of a liquid stream flowing thereover, a tilting structure pivoted beneath said fractioning pipe and having liquid compartments adapted to be filled with liquid alternately so as to overbalance said tilting structure first on one side and then on the other, and a sampling duct on the tilting

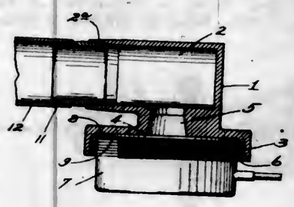
structure which cuts the liquid stream from the fractioning pipe and receives a portion thereof at each oscillatory movement of said structure.



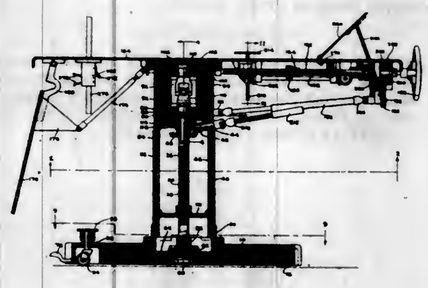
10. In liquid sampling apparatus, a fractioning device comprising a sloping surface upon which a stream of liquid is delivered and which is slotted to divert a portion of said stream, and means for intermittently cutting the diverted stream to intercept minute portions of the same.

1,571,202. VELOCIPEDE. OTTO KARCHER, Canton, Ohio. Filed Oct. 25, 1924. Serial No. 745,802. 6 Claims. (Cl. 208—33.)

1. A vehicle comprising a frame, a fork journaled in the frame and carrying a wheel, a crank shaft journaled in the frame, an off-set portion at each end of the crank shaft, a wheel fixed to each off-set portion, a lever pivoted intermediate its ends to the frame, a seat upon the rear end of the lever, foot rests upon the forward end of the lever and a link connecting the crank shaft and lever.



1,571,203. MECHANICAL TOY. LOUIS J. KASS, New York, N. Y., assignor to The Ferdinand Strauss Corporation, New York, N. Y., a Corporation of New York. Filed May 23, 1925. Serial No. 32,258. 2 Claims. (Cl. 46—45.)

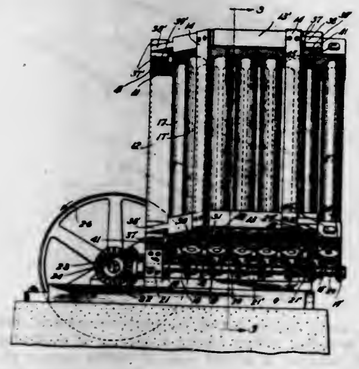


1. A toy comprising a cart member, a figure mounted thereon, an animal figure disposed forwardly of said cart, means for causing forward and rearward movement of said cart, and a pole member extending from the figure on the cart, a container carried on the end of said pole member, said pole member being made of spring material whereby the same will vibrate upon a movement of said cart.

1,571,204. TONE ARM AND WIRELESS HEADPIECE COUPLING. EUGENE J. KIRK and THOMAS D. JONES, Kansas City, Mo., and FRANK B. FISHER, Jr., Kansas City, Kans. Filed Mar. 27, 1922. Serial No. 546,979. 5 Claims. (Cl. 179—100.1.)

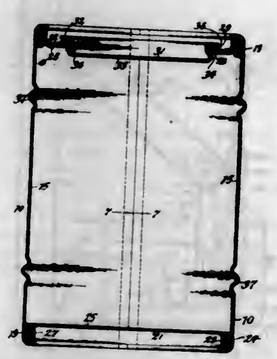
1. In a device of the character described, a circular casing, a sound tube rigidly closed at one of its ends and having its other end terminating in an outwardly tapering opening, a neck connecting said casing and sound tube and formed with a passageway communicating substantially coaxially with the casing at one of its ends at its other end intersecting said tube at a point between the ends of such tube.

1,571,205. OPERATING TABLE. ANTOINE A. LAURENT, Minneapolis, Minn. Filed Feb. 7, 1924. Serial No. 691,137. 8 Claims. (Cl. 45—50.)



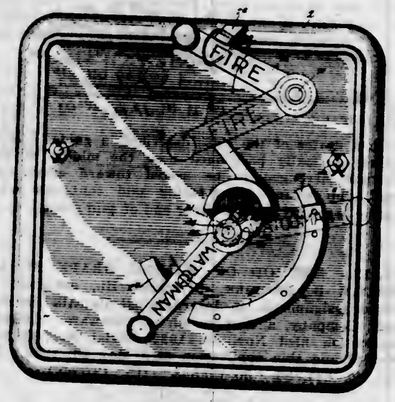
1. An operating table comprising a table top, a base, two juxtaposed wedge-shaped members interposed between said base and tabletop, and means whereby said members may be independently turned to give said tabletop various inclinations in any direction through an entire circumference of 360°.

1,571,206. MACHINE ELEMENT. WILLIAM F. LAUTENSCHLAGER, Cincinnati, Ohio. Filed Dec. 28, 1923. Serial No. 683,095. 8 Claims. (Cl. 74—14.)



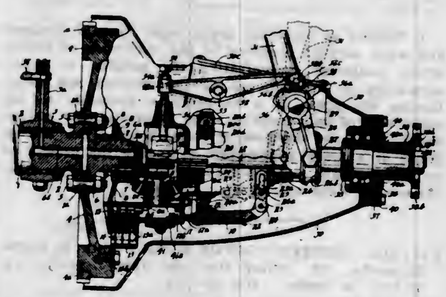
6. In a device of the class described, a frame having an opening therein and thrust receiving members respectively stationary and rotatably attached to said frame at opposite sides of said opening, said members having their bearing surfaces opposingly related and concentric.

1,571,207. SHEET-METAL-STRAIGHTENING MACHINE. GEORGE W. LENZ, Canton, Ohio, assignor to United Alloy Steel Corporation, Canton, Ohio, a Corporation of New York. Filed Jan. 15, 1923. Serial No. 612,746. 3 Claims. (Cl. 153—54.)



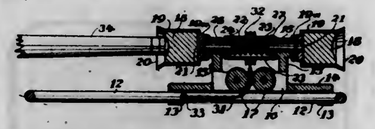
2. A sheet metal straightening machine including two bearing frames, a series of straightening rolls in each frame cooperating one with the other, and a pair of feed rolls in the end of one of the frames, and means for adjusting the other frame with reference to the one frame.

1,571,208. LINED SHEET-METAL BARREL. ADOLPH F. LINDGREN, Buffalo, N. Y. Filed June 13, 1923. Serial No. 645,084. 6 Claims. (Cl. 220—63.)



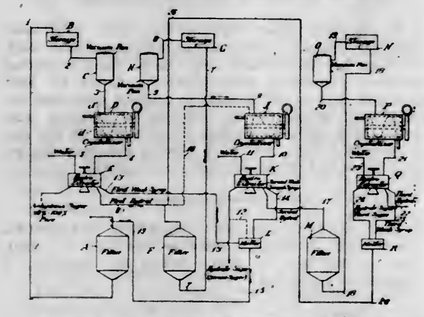
1. A barrel comprising an outer shell of sheet metal having a tubular body and heads arranged at the ends of said body, said body provided at each end with a double fold consisting of a web arranged within the body and connected at its outer edge therewith, and a flange arranged within the web and connected at its inner edge with the corresponding edge of the web but separated therefrom by an intervening outwardly opening channel, and each head having at its margin an inwardly projecting flange which engages with the channel of said double fold, and a protecting lining having a tubular body section arranged within the body of the shell and having parts following the corresponding surface of its double folds, and head sections arranged on the inner side of said shell heads and having parts following the flanges thereof, whereby the edge portions of the lining are clamped between the interlocking parts of said shell body and heads and are held in place thereby.

1,571,209. SIGNAL SERVICE. WALTER S. LUDLOW, Jr., Delhi, Ohio. Filed July 24, 1922. Serial No. 576,946. 18 Claims. (Cl. 177—364.)



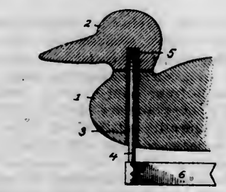
1. An electrical signal transmitting device comprising a clockwork signal-actuating mechanism, and a time-clock mechanism for controlling said clock signal-actuating mechanism, a common power-imparting spring for said mechanisms, and means movable in opposite directions for winding said spring in one direction of rotation, and setting said tie-clock mechanism for actuation at the end of a period of time, and in a reverse direction for releasing said clock signal-actuating mechanism.

1,571,210. MARINE-ENGINE COMBINED REVERSING GEAR AND CLUTCH. JOHN D. MOONEY, St. Paul, Minn. Filed Feb. 7, 1924. Serial No. 691,272. 7 Claims. (Cl. 74—34.)



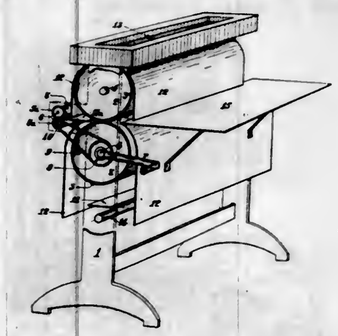
1. A driving mechanism having in combination, a driving member having a gear secured thereto, a driven member having a gear secured thereto, a member co-axial with said members and surrounding the same and circumferentially spaced from said driving member and carrying a plurality of planetary gears meshing with both said gears, a plurality of friction disks between said last mentioned member and said driving member, alternate disks engaging one of said members at their inner edges and the other disks engaging the other member at their outer edges, said disks being slidable axially into contact with said driving member, a brake drum mounted for axial sliding movement on said last mentioned member arranged to press said disks together to connect said last mentioned member and driving member, an annular brake shoe surrounding said drum, means for pressing said shoe against said drum, and means for moving said drum axially.

1,571,211. CUE CHALKER. ANTHONY NELSON, St. Paul, Minn. Filed Nov. 21, 1925. Serial No. 70,543. 9 Claims. (Cl. 273—17.)



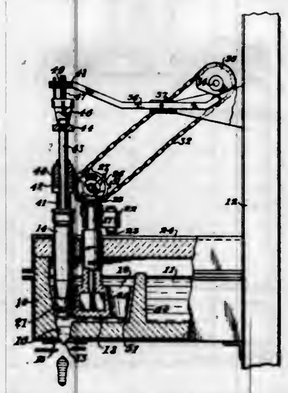
8. In a device of the class described, a guide, a chalk container normally positioned near the middle of said guide and arranged to be moved toward either end thereof, and means for rotating said container when the same is moved toward either end of said guide.

1,571,212. METHOD OF MAKING GRAPE SUGAR. WILLIAM B. NEWKIRK, Riverside, Ill., assignor, by mesne assignments, to International Patents Development Company, a Corporation of Delaware. Original application filed Nov. 16, 1922, Serial No. 601,302. Divided and this application filed May 28, 1923. Serial No. 641,886. 30 Claims. (Cl. 127—9.)



1. Method of obtaining grape sugar from a dextrose and water solution produced by the conversion of starch, which comprises concentrating the solution to supersaturation by heating, cooling the solution and maintaining the same at a temperature favorable to the production of anhydrous crystals, separating the mother liquor from the dextrose crystals, holding the mother liquor at a lower temperature to induce the growth of hydrate crystals, and separating the mother liquor from the second batch of crystals.

1,571,213. HUNTER'S DECOY DUCK. JOHN B. PITTS, Winnetka, Ill. Filed Oct. 30, 1925. Serial No. 65,740. 3 Claims. (Cl. 43—3.)

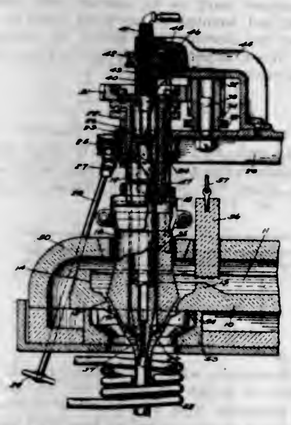


1. A decoy duck of the type described, comprising a body portion, a head portion formed separate from said body portion, a vertical stem passing through said body portion and journalled therein with its upper end fixedly attached to the aforesaid head portion, and a vane attached to the lower end of said stem, to receive the surge or wave of the water in which the decoy is used

1,571,214. APPARATUS FOR DRYING PLATES OF VARIOUS SORTS. FRANK T. POWERS, Douglaston, N. Y. Filed June 29, 1922. Serial No. 571,888. 9 Claims. (Cl. 34—1.)

9. A plate drying device for photo-mechanical process plates including rollers having a surface of water-out absorbent material, a second pair of rollers, means for rotating both pairs of rollers at the same peripheral speed to cause a plate to pass between the two pairs of rollers successively, and means for heating the first mentioned pair of rollers.

1,571,215. GLASS FEEDER. LEONARD D. SOUBIER, Toledo, Ohio, assignor to The Owens Bottle Company, Toledo, Ohio, a Corporation of Ohio. Filed Aug. 27, 1923. Serial No. 659,452. 9 Claims. (Cl. 49—55.)

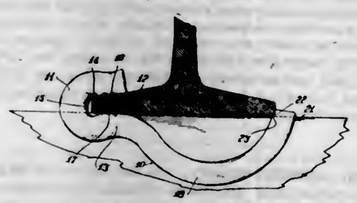


2. The combination of a container for molten glass having an outlet opening in the floor thereof, a vertically reciprocating plunger in line with said opening, and means operable to successively register measured quantities of glass with said outlet opening, said means comprising a horizontally rotatable member having a series of pockets formed therein.

1,571,216. METHOD OF AND APPARATUS FOR FORMING GLASS TUBING. LEONARD D. SOUDIER, Toledo, Ohio, assignor to The Owens Bottle Company, Toledo, Ohio, a Corporation of Ohio. Filed Oct. 4, 1923. Serial No. 666,428. 18 Claims. (Cl. 49—121.)

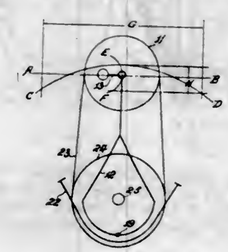
1. In a tube forming device, the combination of a container for molten glass having an outlet opening in the

bottom thereof, a forming device projecting vertically downward into the glass and through said opening, and a blow pipe disposed within said forming device and



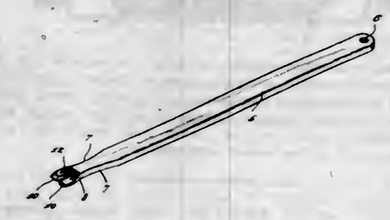
protruding below the forming device in positon to be engaged by the issuing glass and thereby assist in imparting a tubular formation to the glass.

1,571,217. SLICING MACHINE. HENRY THOMAS, London, England, assignor to U. S. Slicing Machine Company, La Porte, Ind., a Corporation of Indiana. Filed Sept. 4, 1924. Serial No. 735,726. 12 Claims. (Cl. 146—102.)



1. In a slicing machine, the combination with a feed table, of a support upon which said table is mounted to slide, a feed screw for moving said feed table upon said support, means connected with said table for engaging said feed screw, and a roller interposed between said table and support at the side of said table opposite said feed screw to prevent swinging of said feed table and consequent binding thereof due to the force exerted by said screw on said table.

1,571,218. RAIL ANCHOR. HAROLD G. WARR, Park Ridge, Ill., assignor to The P & M Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 9, 1925. Serial No. 7,910. 7 Claims. (Cl. 238—330.)

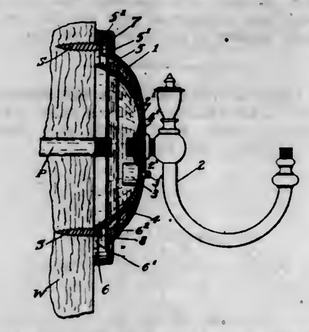


1. A rail anchor comprising means formed with a rail gripping portion adapted to grip the upper and lower surfaces of the base of a rail at one side of the rail, and means extending across the rail base and engaging the other edge of the rail base to hold said gripping portion in positon; said last named means being bent downwardly and upwardly with respect to said rail gripping portion, whereby said upwardly bent end portion thereof snaps into engagement with the rail base when the anchor is applied to its operative position.

1,571,219. SWING GEARING FOR SLUBBING, ROVING, AND LIKE FRAMES. EMILE JOHN WELFFENS, Manchester, England. Filed May 26, 1925. Serial No. 32,886. 2 Claims. (Cl. 118—41.)

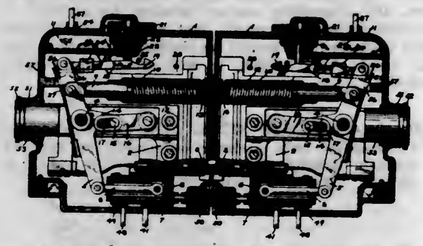
1. In swing gearing for slubbing, roving and like frames, the combination of a rail box, a crank shaft mounted for rotation therein, a thrust arm provided with a boss, a crank carried by said shaft and having a crank pin passing through said boss thereby to support the thrust arm, a wheel mounted for rotation on the thrust arm, and a coupling member mounted for rotation independently of said wheel, said crank being provided with passages therethrough for conducting lubricant from the crank shaft bearing to said wheel and coupling member.

1,571,220. CLOTHES STICK. ROY D. WICKERSHAM, Indianapolis, Ind., assignor of one-half to Clyde E. Weddell, Indianapolis, Ind. Filed July 10, 1924. Serial No. 725,097. 1 Claim. (Cl. 68—6.)



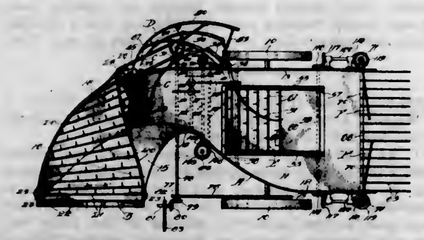
A clothes stick comprising a unitary head and flat handle, chisel-shaped prongs beveled on opposite sides of said handle forming part of said head, and a shoulder above said prongs and constituting a part of said head.

1,571,221. ELECTRIC-LIGHT FIXTURE. FRANK J. WILSON, Arlington, Mass. Filed Nov. 18, 1921. Serial No. 516,237. 2 Claims. (Cl. 240—85.)



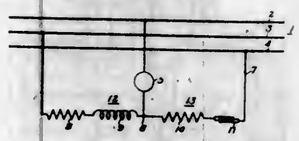
1. An electric light fixture comprising in combination with a domed wall plate having a bracket mounting opening, an attaching member arched to fit within and be concealed by said plate and having an opening alinable with said bracket mounting opening of the plate, said attaching member having an anchoring portion disposed to lie flatly against the wall, an anchoring element fixed to the wall, and detachably engageable with said anchoring portion upon endwise movement of said attaching member along the wall, and a bracket having a mounting

portion insertible through the registering openings of the wall plate and attaching member and itself constituting the sole connection between said parts, and said



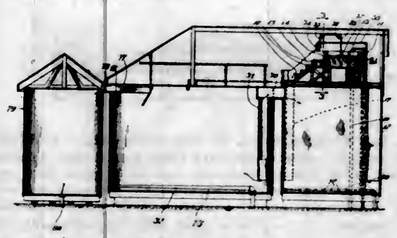
wall plate and arched attaching member being provided with a second set of registering openings through which the push button of a switch lodged between said plate and the wall is exposed for manual operation.

1,571,222. AUTOMATIC CAR, AIR, AND ELECTRIC COUPLER. HARRY F. WOERNLEY, Wilkinsburg, Pa., assignor to The Westinghouse Air Brake Company, a Corporation of Pennsylvania. Filed June 1, 1921. Serial No. 474,061. 16 Claims. (Cl. 173—332.)



1. In an electric coupler for cars, the combination of a movable member carrying electric contacts, resilient means, a mechanical connection interposed between said means and said member, manually operated means for compressing said resilient means and mechanism for holding said spring under compression.

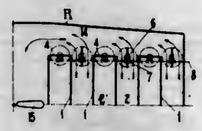
1,571,223. GRAIN SHOCKER. STIV ZARAN, Chicago, Ill. Filed Sept. 17, 1923. Serial No. 663,072. 6 Claims. (Cl. 56—406.)



1. In a shocker, the combination of continuously operating means for feeding grain bundles through the machine, means for tying a plurality of bundles into a shock, other means acted upon by the pressure of the grain bundles as the same are advanced by the continuously operating feeding means for causing the tying means to be operated, a second feeding device having a periodic movement such as to operate only after each shock is tied and adapted to move the same to the delivery end of the machine, and means for mechanically moving the shock therefrom onto the ground, substantially as described.

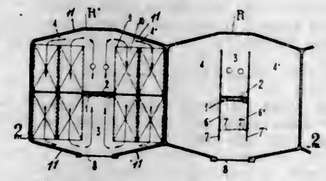
1,571,224. MEASURING DEVICE. CHESTER T. ALLCUTT, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Mar. 31, 1920. Serial No. 370,229. 8 Claims. (Cl. 172—245.)

6. The combination with a polyphase circuit and an electro-responsive device, of means for energizing said device in accordance with a symmetrical component of the voltage of the circuit comprising two equal impedances of different phase characteristics connected together and subjected to the voltages of tow separate phases of the circuit, the common point of said impedances being connected to said device.



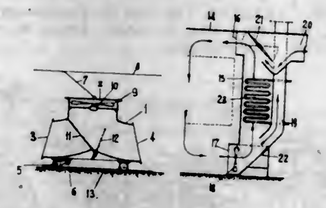
1,571,225. WATER-TREATING SYSTEM. ANDREW W. ANDERSON, Aurora, Ill., and JAY R. HICKOX, Lincoln, Nebr. Filed Sept. 7, 1922. Serial No. 586,554. 18 Claims. (Cl. 210—18.)

1. A system of the character described, comprising a water and treating solution receiving receptacle formed to permit the fluid to flow therefrom by gravity, said receptacle being provided along the path of the outflowing fluid with baffles or weirs whereby a mixing of the water and treating solution is induced, a second receptacle provided with a plurality of compartments having communication with each other alternately at top and bottom whereby the water is given an increased path, a third receptacle, means communicating with the upper end of the final compartment of the second mentioned receptacle whereby the treated water is conveyed to said third receptacle and delivered adjacent the bottom thereof, and means arranged adjacent the upper end of the third receptacle for withdrawing and skimming the water from its upper level.



1,571,226. DRYING PLANT. PILADE BARDUCCI, Naples, Italy. Filed Jan. 19, 1920. Serial No. 352,266. 3 Claims. (Cl. 34—19.)

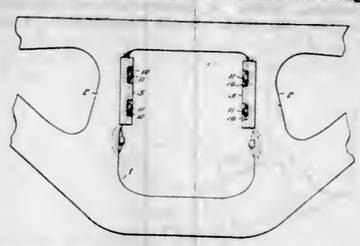
2. In a drier, the combination of a container for the material to be dried divided into separate sections, means outside of said container for producing air currents, and means for distributing the air currents to various sections of said container, said distributing means being adapted to alternately permit said air currents to pass through certain sections and prevent



them from passing through the other sections of said container, and means for automatically controlling said distributing means according to a predetermined sequence.

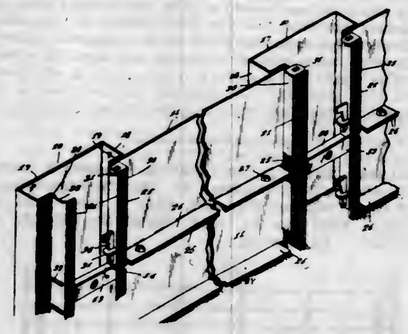
1,571,227. DRYING PLANT. PILADE BARDUCCI, Milan, Italy. Filed Feb. 18, 1922. Serial No. 537,495. 2 Claims. (Cl. 34—19.)

1. In a drying plant, a compartment having walls, a vertical partition in the central portion of the compartment, the partition having at least one opening, an air impelling means with a horizontal axis positioned in each opening, vertical side partitions at the ends of the first named partition and at right angles thereto, the side partitions providing in the room, a central space including the said air impelling means, and two side spaces for receiving material to be dried, and leaving a communication between the central space and the side spaces, at each of their ends.



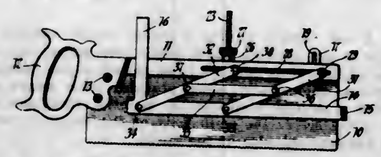
1,571,228. DRYING PLANT. PILADE BARDUCCI, Milan, Italy. Filed Feb. 20, 1922. Serial No. 538,037. 6 Claims. (Cl. 34—19.)

1. In a plant for drying materials, a room intended to contain the material to be dried, means reciprocating in said room and adapted to produce vertical air currents and air streams directed along the path of said means, and means at both ends of said room producing therein air currents directed towards and from said reciprocating means, respectively.



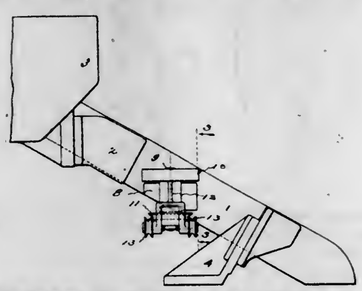
1,571,229. WEAR PLATE FOR CAR-TRUCK SIDE FRAMES. DONALD S. BARROWS, Rochester, N. Y., assignor, by mesne assignments, to The Symington Company, a Corporation of Maryland. Filed Dec. 17, 1923. Serial No. 681,209. 13 Claims. (Cl. 105—207.)

1. A wear plate adapted to be connected to the truck column of a car truck side frame, said plate involving a body web having a wearing surface, flanges extending from said body web and providing side bearing areas adjacent the wearing surface, and attaching pro-



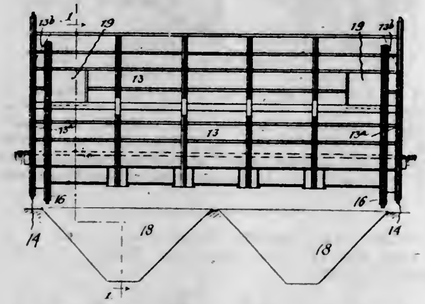
jections extending from the plate, said projections being formed by offsetting adjacent portions of the body web and flanges.

1,571,230. FURNITURE. MARTIN BOHN, Indianapolis, Ind., assignor to The Keyless Lock Company, a Copartnership composed of Arthur Jordan and Arthur F. Baxter, Indianapolis, Ind. Filed Sept. 19, 1924. Serial No. 738,599. 15 Claims. (Cl. 189—34.)



1. A sectional partition, comprising a plurality of vertical pilasters having vertical rabbets at their rear vertical corners, one or more panel sections each extending between adjacent pilasters and seated at the vertical edges in the adjacent rabbets of said pilasters, and locks for securing the panel sections and pilasters together.

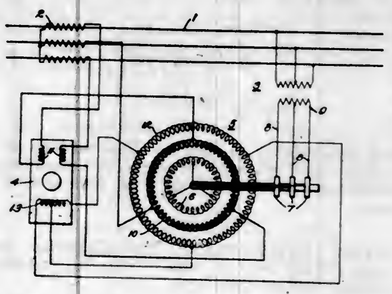
1,571,231. SAW GAUGE. HENRY BOLLI, Bronx, N. Y. Filed May 11, 1925. Serial No. 29,324. 2 Claims. (Cl. 145—35.)



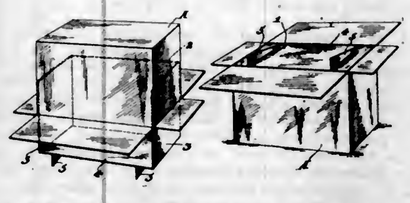
1. A gauge for controlling the depth of saw cuts comprising gauge rods, a system of pivoted arms connected with one of the gauge rods on one side of the saw, and two longitudinally slotted uprights on the other gauge rod on the opposite side of the saw, a socket on said latter gauge rod, a threaded rod adapted to engage with its lower end into said socket, means traveling in the slots of said uprights and adapted to carry locking means for locking the parts in their adjusted positions, and a sleeve having a knurled operating disc for adjusting the parts to the proper distance from the work piece.

1,571,232. MECHANISM FOR FEEDING METAL BLANKS. CHARLES T. BRENNAN, Waterbury, Conn., assignor to The E. J. Manville Machine Company, Waterbury, Conn., a Corporation of Connecticut. Filed Dec. 19, 1924. Serial No. 756,903. 1 Claim. (Cl. 10—165.)

A mechanism for feeding headed metal blanks that have irregular shaped stems, comprising inclined track plates spaced apart to support the blanks by their heads with the stems extending down between the plates, the upper section of the path between the plates being wider than the lower section of the path, and a whirl with its periphery extending into the path adjacent to the point of convergence from the wider to the narrower section, said whirl being adapted to engage and turn the stems of those blanks which arrive at this locality in such positions that they will not enter the narrower section of the path, so that they will enter the narrower section.



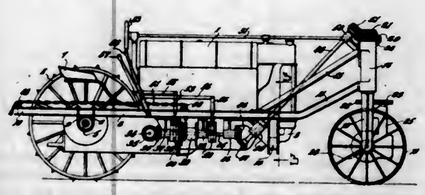
1,571,233. ROTARY CAR DUMPER. ARTHUR F. CASE, Cleveland, Ohio, assignor to The Wellman-Seaver-Morgan Company, Cleveland, Ohio, a Corporation of Ohio. Filed Jan. 11, 1924. Serial No. 685,504. 6 Claims. (Cl. 214—52.)



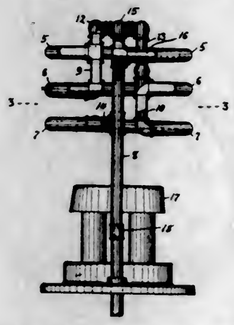
1. A car dumper having a rotary cradle adapted to receive a car, and an apron plate over which the material of the car is adapted to be passed in the dumping operation, said cradle being provided with means for causing a partial discharge of material from the car and cradle before the main body of the material passes over the forward edge of the apron.

1,571,234. VOLT-AMPERE METER. FRANK CONRAD, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Jan. 20, 1922. Serial No. 530,572. 10 Claims. (Cl. 171—309.)

10. The combination with a meter including co-operating elements one of which is adapted to be energized in accordance with one quantity of an alternating-current circuit, of a separate single self-contained translating device including only one set of relatively movable inductively related elements automatically relatively adjustable in accordance with changes in another quantity of said circuit, said device being adapted to supply current to another of said meter elements having a definite phase relation to the current in said one meter element.



1,571,235. BOX PACKER. BERT W. DEPPA, Lancaster, Ohio. Filed June 12, 1925. Serial No. 36,607. 2 Claims. (Cl. 226—18.)

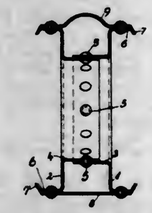


1. A box packer comprising a former having an open front and top and one or more tapered strips secured to the bottom of the former for supporting the same in a backwardly inclined position.

1,571,236. TRACTOR. EDWARD H. DIECKMANN, Florissant, Mo. Filed Dec. 31, 1923. Serial No. 683,698. 3 Claims. (Cl. 180—26.)

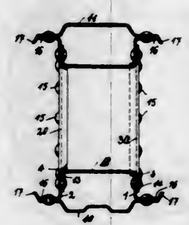
1. In combination with a tractor of standard manufacture having a frame, a motor thereon, traction wheels driven by the motor, and an auxiliary power shaft driven by the motor and accessible from the outside of the frame, a chassis comprising a pair of longitudinal side members supported at their rear by the traction wheels and a cross member supporting the forward part of the frame, a steering wheel supporting the forward end of said chassis, connections from said auxiliary shaft adapted to drive said steering wheel, a winding drum connected to be driven by said auxiliary shaft, and a cable passing from said drum rearwardly along said chassis adapted for operating an implement drawn by the tractor.

1,571,237. FUEL-OIL VAPORIZER. EBBETT B. DILL, Fort Wayne, Ind. Filed Apr. 19, 1924. Serial No. 707,592. 3 Claims. (Cl. 158—79.)



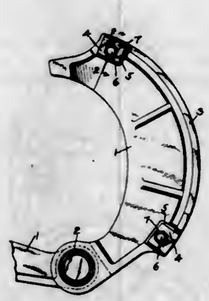
1. In combination with a fuel oil burner, a downflow feed pipe for the burner, a group of ascending pipe coils arranged in a vertical series, the highest end of each of the uppermost coils having an overflow connection with the lowest end of the next succeeding lower coil; an upflow supply pipe having connection with the lowest end of the uppermost coil for supplying fuel oil thereto; and an overflow connection between the highest end of the lowermost coil and the downflow feed pipe.

1,571,238. WOODEN GIRDER. CLAUDIUS DORNIER, Friedrichshafen-on-the-Bodensee, Germany. Filed June 28, 1920. Serial No. 392,556. 3 Claims. (Cl. 20—0.5.) (Granted under the provisions of the act of Mar. 3, 1921, 41 stat. L., 1313.)



1. A girder comprising in combination, nonmetallic boom members, a longitudinal grooved rib on said members, caps extending along said members and a row of panel rods connecting said members and having their ends inserted in said grooved ribs.

1,571,239. METAL GIRDER FOR LIGHT METAL STRUCTURES. CLAUDIUS DORNIER, Friedrichshafen-on-the-Bodensee, Germany, assignor to the Firm: Dornier Metallbauten Gesellschaft mit beschränkter Haftung, Friedrichshafen-on-the-Bodensee, Germany. Filed Feb. 17, 1923. Serial No. 619,696. 5 Claims. (Cl. 189—37.)

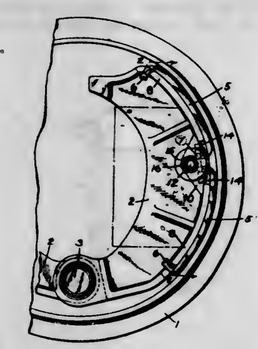


1. A light sheet metal girder comprising two juxtaposed apertured side walls and inwardly directed flanges surrounding the apertures of said wall, said flanges being rigidly connected.

1,571,240. METAL GIRDER. CLAUDIUS DORNIER, Friedrichshafen-on-the-Bodensee, Germany, assignor of one-half to Firm: Dornier Metallbauten Gesellschaft mit beschränkter Haftung, Friedrichshafen-on-the-Bodensee, Germany. Original application filed Feb. 17, 1923, Serial No. 619,696. Divided and this application filed Aug. 17, 1925. Serial No. 50,874. 3 Claims. (Cl. 189—37.)

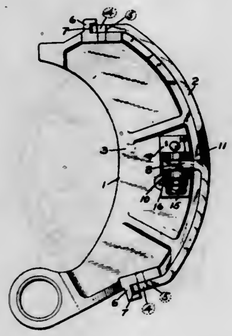
1. A low weight sheet-metal girder for air craft construction comprising two juxtaposed apertured side walls, inwardly directed flanges adjoining the apertures of said walls and a tubular connecting piece rigidly fixed between the flanges of oppositely disposed apertures.

1,571,241. BRAKE-SHOE CONSTRUCTION. SIDNEY G. DOWN, Pittsburgh, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Nov. 1, 1923. Serial No. 672,116. 1 Claim. (Cl. 188—242.)



The combination with a brake head having an arcuate face, of a brake shoe comprising a plate formed to engage said arcuate face and having a transverse cut at each end and at one side of the brake shoe, the cut portion being bent inwardly from the edge of the shoe to form a lug in a radial plane at right angles to the axis of the vehicle wheel and means for securing said lugs to said brake head.

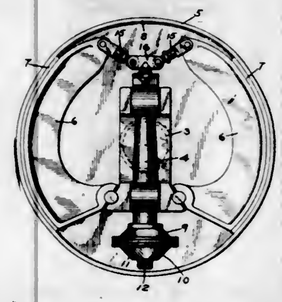
1,571,242. BRAKE-SHOE CONSTRUCTION. SIDNEY G. DOWN, Pittsburgh, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Nov. 1, 1923. Serial No. 672,118. 4 Claims. (Cl. 188—242.)



3. The combination with a brake head having an arcuate face for receiving a brake shoe, of a pair of brake

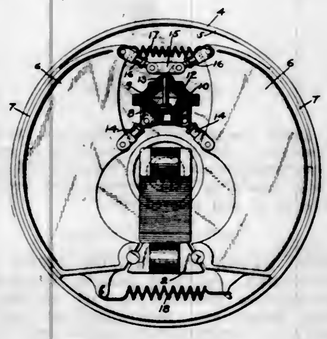
shoes formed to engage said face and each having one end detachably engaging said brake head, a pin associated with said brake head for engaging an aperture

in each of the other ends of the brake shoes, and a wedge for clamping each pin engaging end of the brake shoes to the brake head.



1,571,243. BRAKE-SHOE CONSTRUCTION. SIDNEY G. DOWN, Pittsburgh, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Nov. 17, 1923. Serial No. 675,281. 1 Claim. (Cl. 188—242.)

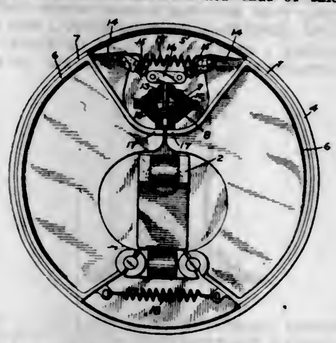
The combination with a brake head having a convex arcuate face, of a brake shoe comprising a plate bent to engage said face and having a centrally located inwardly bent lug cut from one side of the plate, a bracket secured to said head and having lugs forming a radially disposed slot for receiving the brake shoe lug, and means for securing said lug to said bracket.



1,571,244. AUTOMOTIVE BRAKE. SIDNEY G. DOWN, Pittsburgh, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Mar. 11, 1924. Serial No. 698,507. 2 Claims. (Cl. 188—152.)

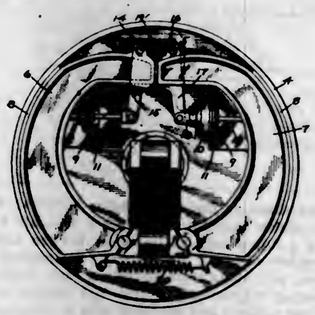
1. In a vehicle brake, the combination with a front wheel of a motor vehicle, a steering knuckle, and a pintle pin mounted in said knuckle, of a brake drum secured to the front wheel, brake heads mounted in said drum, a fluid pressure brake chamber secured to said

pin, a movable abutment in said chamber, and a rod operable by said abutment and extending through said pintle pin and operatively connected to said brake heads.



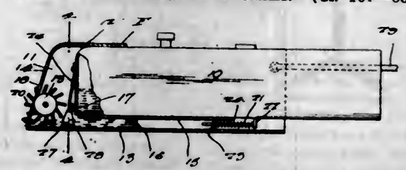
1,571,245. MOTOR-VEHICLE BRAKE. SIDNEY G. DOWN, Pittsburgh, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Mar. 11, 1924. Serial No. 698,508. 1 Claim. (Cl. 188—152.)

In a vehicle brake, the combination with a brake drum and brake heads mounted in said drum, of a fluid pressure brake chamber comprising a casing, links connecting said casing to said brake heads, a movable abutment in said brake chamber, a push rod operable by said abutment, and links operatively connecting said push rod to said brake heads.



1,571,246. AUTOMOTIVE BRAKE. SIDNEY G. DOWN, Pittsburgh, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Mar. 11, 1924. Serial No. 698,509. 2 Claims. (Cl. 188—152.)

1. In a vehicle brake, the combination with a brake drum and brake heads mounted in said drum and having the free ends of the brake heads extended, of a brake chamber mounted on the extended ends of said brake

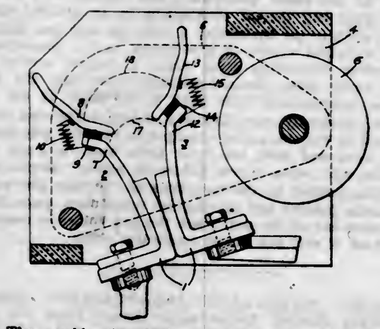


heads, a movable abutment in said chamber, and a push rod operable by said abutment and operatively connected to the free ends of said brake heads.

1,571,247. AUTOMOBILE BRAKE. SIDNEY G. DOWN, Pittsburgh, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Mar. 11, 1924. Serial No. 698,511. 4 Claims. (Cl. 188—152.)

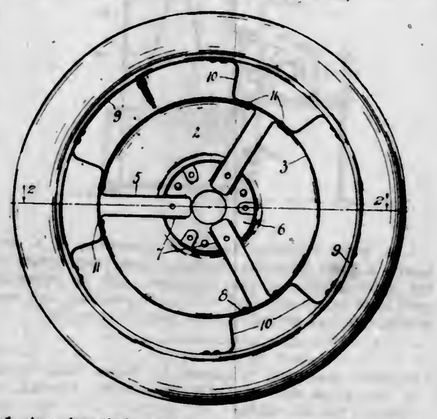
1. In a vehicle brake, the combination with a brake drum and brake heads mounted in said drum, of a fluid pressure brake chamber carried by each brake head, a lever mounted at the free end of each brake head, and a movable abutment in each brake chamber operatively connected to one of said levers.

1,571,248. TIRE-TREAD ADVERTISING DEVICE. FRIEDRICH EICKHOFF, Rochester, N. Y. Filed June 12, 1925. Serial No. 36,661. 5 Claims. (Cl. 101—351.)



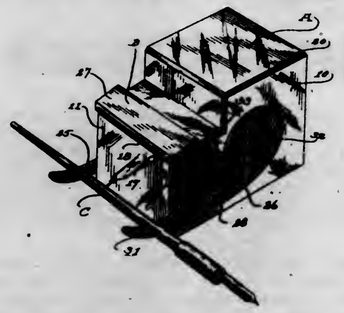
1. A printing-solution applicator comprising a tank, a frame slidable over one end of the tank, said end provided with openings, a rotatable member in the frame, flexible fingers on said rotatable member, said frame having an opening through which the fingers may project to apply the solution to a tire tread.

1,571,249. AUTOMOBILE BUMPER. WILLARD E. ERICSON, Evanston, Ill., assignor to Bidex Products Company, Waukegan, Ill., a Corporation of Delaware. Filed Oct. 31, 1924. Serial No. 746,970. 3 Claims. (Cl. 293—55.)



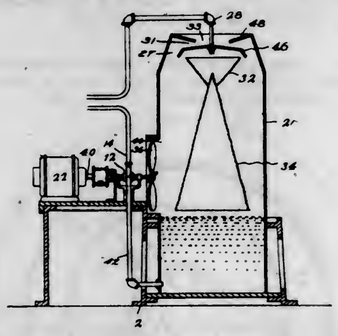
1. A bumper comprising a main impact member consisting of a single bar bent in the form of a flat loop and adapted to be attached to the vehicle frame, and a pair of relatively light auxiliary bars extending above and below the forward portion of said main bar and clamping members at the ends of said auxiliary bars, and engaging said main bar adjacent the ends of said forward portion.

1,571,250. ARC-EXTINGUISHING DEVICE. OTTO H. ESCHHOLZ, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 20, 1922. Serial No. 537,857. 7 Claims. (Cl. 200—146.)



3. The combination with a pair of relatively movable contact members, of arcing horns of a predetermined increasing resistance toward their extremities.

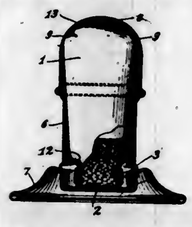
1,571,251. VEHICLE WHEEL. JAMES FREDERICK FAIRLEY, Birmingham, England. Filed Aug. 2, 1923. Serial No. 655,344. 2 Claims. (Cl. 301—64.)



1. A spoke reinforced disc structure for the purpose set forth comprising a disc having a peripheral flange, a nave plate coaxially arranged with respect to said disc, and a series of spokes severally secured at their outer ends to said flange and at their inner ends to said nave plate.

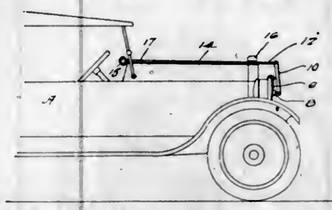
1,571,252. COMBINATION INKWELL AND PENBACK. RAY FAMULENER, Salt Lake City, Utah. Filed Aug. 21, 1922. Serial No. 583,215. 2 Claims. (Cl. 120—5.)

1. An ink stand including a pen dipping well having the upper end thereof terminating in an inclined plane in relation to the horizontal, a cover for said pen dipping well including a pair of side plates, and a transversely extending connecting cover plate, a stopper carried by said cover plate, means rockably connecting the side plates intermediate their ends to the sides of the ink stand, forwardly extending pen holder supporting arms formed on the side plates arranged to rock the side plates and move and hold the cover plate over the open end of the well when a pen holder is placed therein, and weights formed on the rear ends of the side plates for normally holding and moving the cover plate away from the open end of the well when the pen holder is removed from off of said pen holder supporting arms.



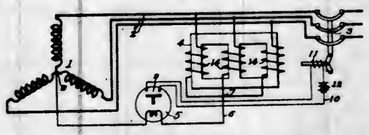
1,571,253. WATER-RECOOLING APPARATUS. GEORGE HENRY FISHER, Leavenworth, Kans. Filed Oct. 18, 1923. Serial No. 669,277. 2 Claims. (Cl. 183—22.)

1. A water recooling apparatus consisting of a container, a short upwardly diverging open mesh screen at the upper portion of said container, and an elongated open mesh screen arranged within the container and projecting into and depending from said short screen.



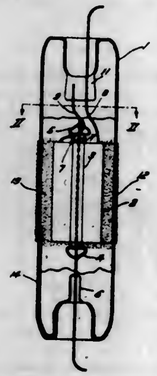
1,571,254. DAUBER. CHARLES B. FOOTE, New York, N. Y. Filed Oct. 29, 1921. Serial No. 511,451. 1 Claim. (Cl. 91—67.4.)

The dauber combination comprising a container for the liquid having a mouth at one end covered by a gauze stretched across it, and a holder to receive said liquid container comprising a base member to maintain the holder upright, a flat floor portion, and supporting walls to support said container upright with its gauze covered mouth resting flat on said floor portion, said supporting walls rising from said base member outside said floor portion and spaced from the gauze covering said mouth and extending a considerable part of the entire length of the container above said holder floor, and the end of



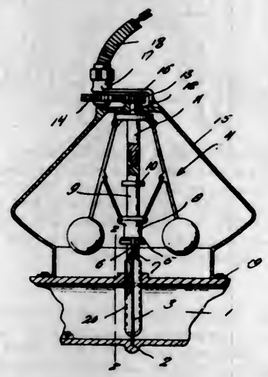
the container opposite its mouth being convex and its largest external transverse dimension being located above the top of said supporting walls when the container rests on its mouth on the holder floor and being greater than the internal transverse dimension between the supporting walls so that the contiuer can not be inserted into the holder with the gauze covered mouth outside the same.

1,571,255. HEADLIGHT-DIMMING MEANS. FRANK L. FOOTE, Boy River, Minn. Filed Aug. 12, 1924. Serial No. 731,582. 1 Claim. (Cl. 240—45.6.)



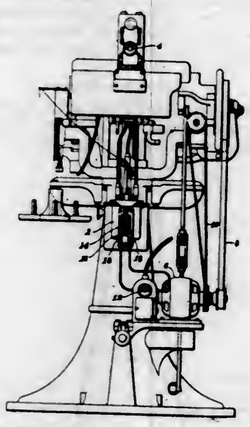
Headlight dimming means for motor vehicles; wherein the motor vehicle includes among other elements a radiator having a filling neck at its upper portion and headlights mounted adjacent the radiator; comprising a pair of dimmers, one hingedly mounted on each headlight, a bar connecting the dimmers, a push rod slidably mounted on the motor vehicle, and provided with a bifurcated end straddling the neck of the radiator, and a pair of links pivotally connected to the extremities of the bifurcated end of the bar, and pivoted to the bar connecting the dimmers.

1,571,256. ELECTRICAL PROTECTIVE DEVICE. CHARLES LE G. FORTESCUE, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Aug. 9, 1920. Serial No. 402,293. 5 Claims. (Cl. 175—294.)



1. In an electric circuit, the combination with a polyphase translating device and a protective device therefor, of a polyphase impedance device connected to the circuit, a circuit between the neutral points of the devices, means whereby the protective device is actuated when current traverses the neutral circuit, and anti-resonance means for precluding the operation of the protective device when currents of a predetermined frequency traverse the neutral circuit.

1,571,257. GRID LEAK. HUBERT M. FREEDMAN, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Aug. 18, 1921. Serial No. 498,490. 12 Claims. (Cl. 250—27.)



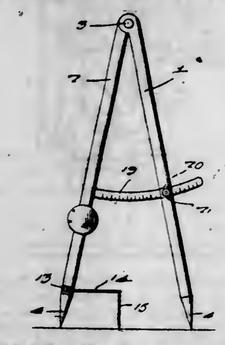
1. An evacuated electric device comprising an enclosing envelope, main electrodes forming a space-current path therein, a grid for controlling said space current and a grid leak contained within said envelope, said grid leak being of a conducting material of such a resistance that the electric flow therethrough is only sufficient to prevent the accumulation of a sufficient charge to interfere with the action of the device.

1,571,258. AUTOMATIC AIR VALVE. FRANK J. FRUNZ and JOHN W. FRUNZ, Patterson Calif. Filed July 22, 1924. Serial No. 727,590. 1 Claim. (Cl. 264—15.)

A device of the class described comprising an intake pipe, a valve arranged transversely in said pipe and adapted for vertical sliding movement, a casing mounted upon said pipe, said casing being provided with a bearing, a centrifugal governor arranged in said casing, the shaft of said governor being journaled for rotation in said bearing, a pinion carried by said shaft, said valve being provided with a central pocket open at its top, the lower end of said shaft telescoping into said pocket and being provided with spaced shoulders, said governor including a sleeve slidable upon the shaft between said shoulders, and a yoke having its arms connected to said valve and provided with a central ring through which said governor sleeve passes.

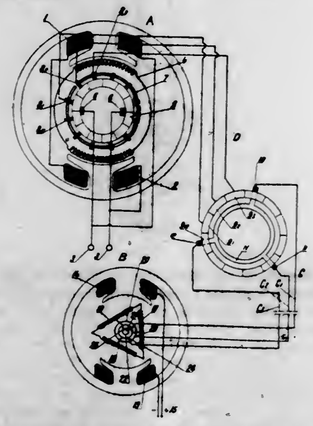
1,571,259. CONTROLLING MECHANISM. FREDERICK M. FURBER, Revere, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Sept. 8, 1919. Serial No. 322,444. 11 Claims. (Cl. 112—41.)

1. A machine comprising cooperating parts operating when actuated to perform an operation and having a part, the heating of which is a prerequisite to the proper operation of the machine in performing said operation, means for heating said part, actuating mechanism for said cooperating parts, and means for preventing the operative action of the actuated mechanism until the temperature of the heated part is raised to a certain point.



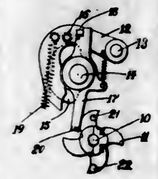
1,571,260. BORING TOOL. EMIL GAIRING, Detroit, Mich. Filed Dec. 6, 1923. Serial No. 678,844. 1 Claim. (Cl. 77—58.)

In a device of the character described, a tool holder provided with a socket hexagonal in cross-section throughout the greater portion of its length and having a short cylindrical portion at its outer end, said socket also having a circumferential groove in its flat inner walls formed by sections varying in depth from the angles of the said walls where the sections of the groove terminate, a nut within the hexagonal portion of the socket, an expansion ring engaging the sections of the groove in the socket and exposed at the angles of the same to overlap the outer corners of the nut and secure the same from dislodgement, a cutter head having a central bore and provided with a shank extending into the hexagonal portion of the socket and conforming to the configuration



of the same, the said ring being located between the nut and the shank of the cutter and the cutter head having a short cylindrical portion between the hexagonal shank and the head cooperating with the short outer cylindrical portion of the socket whereby precision in centering the cuter head is insured, and a threaded pilot rod having an enlarged head, the threaded portion extending through the cutter head and into said nut, whereby the enlarged head engages the cutter head to hold the same in position.

1,571,261. COMBINED COMPASS AND PROTRACTOR. EARL EDGAR GINTER, Ranshaw, Pa. Filed May 5, 1925. Serial No. 28,135. 4 Claims. (Cl. 33—1.)

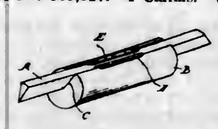


1. A device of the class described including a pair of legs pivoted together, an arm extending from one of the legs, means associated with said arm for engaging one side of an angle, and an indicating mechanism operatively associated with the arm so that when the other leg is engaged with the other side of the angle, said indicating mechanism will be brought into play to indicate the size of said angle.

1,571,262. ELECTRIC DISTANT-CONTROL SYSTEM. ELIE GRANAT, Paris, France, assignor of one-half to Compagnie des Forges et Aciéries de la Marine et d'Homécourt, Paris, France, a French Corporation. Filed May 14, 1924. Serial No. 713,308. 5 Claims. (Cl. 172—237.)

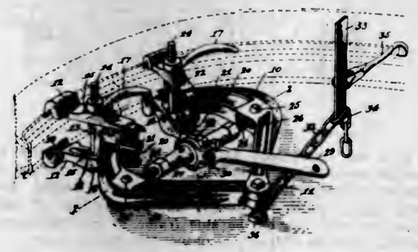
1. An electric distant control system for discontinuous operation comprising an electric D. C. machine having an armature and field piece, a commutator on said armature, a set of m stationary brushes round commutator, a set of m contact segments, wires connecting stationary brushes with corresponding segments, a set of n distributing brushes adapted to move over contact segments, means for controlling same, a synchronous motor, stator and rotor of said motor, a n-phase winding on rotor of motor, line wires connecting distributing brushes to corresponding phases of rotor winding.

1,571,263. TAXIMETER FARE-COUNTER CONTROL. FREDERICK O. GRAY, Dayton, Ohio, assignor to Ohmer Fare Register Company, Dayton, Ohio, a Corporation of New York. Filed May 12, 1923. Serial No. 638,455. 13 Claims. (Cl. 235—80.)



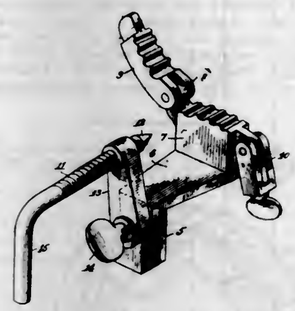
1. In a taximeter, a register operating arm, a device adapted to actuate said arm, a latch retaining said arm inoperative, means for setting said latch in a secondary latching position, and devices for moving said latch from said secondary position to ineffective position.

1,571,264. VEHICLE STABILIZER. RUDOLF GRETSCH, Berlin-Grunewald, Germany, assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Oct. 23, 1925. Serial No. 64,381. 14 Claims. (Cl. 114—122.)



1. The combination with a vehicle exposed to forces tending to rotate the same, of a stabilizer therefor comprising two masses rotating in opposite directions around an axis parallel to the axis of rotation of said forces and means for retarding one of said masses and supplying the energy derived from the retardation to the other of said masses to accelerate the same.

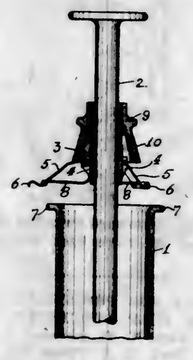
1,571,265. KNIFE-EDGE PIVOT FOR SCALES. CHARLES H. HARTMAN, Louisville, Ky., assignor to Walter F. Stimpson, Louisville, Ky. Filed June 19, 1922. Serial No. 569,317. 4 Claims. (Cl. 308—2.)



1. An article of manufacture consisting of a knife-edge bearing unit for scales comprising a bar of uniform V-shaped cross section, a body of a different cross-section and lesser length than the bar engaging the central portion having a V-shaped channel for receiving the central portion of said bar, and means for rigidly locking said bar in said recess.

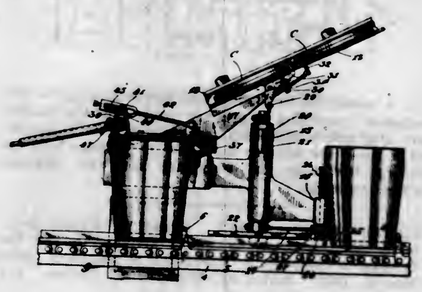
1,571,266. RIM TOOL. FRANK RUSSEL HARTSOCK, Warsaw, Ind., assignor of one-half to Charles O. Dickey and one-third to Leonard E. Dickey, Warsaw, Ind. Filed Mar. 20, 1922. Serial No. 545,071. 6 Claims. (Cl. 157—1.)

1. In a tire-rim tool, a frame composed of a pair of bars movably connected together at one end and each having a rim-gripper at its other end, means for spreading as well as contracting the bars for the purposes set forth, and means adapted to connect the inner end of said frame to an adjacent point on the rim for tilting the frame edgewisely on a fulcrum formed by one of said grippers to thereby swing inwardly one end of the rim.



1,571,267. TUBE-FLARING TOOL. FRANK R. HARTSOCK, Warsaw, Ind., assignor of one-third to Charles O. Dickey and one-third to Leonard E. Dickey, both of Warsaw, Ind. Filed Apr. 5, 1924. Serial No. 704,456. 3 Claims. (Cl. 153—79.)

1. In a tool of the class set forth, a supporting base having an upstanding stationary jaw, the upper face of this jaw being curved and provided with a series of semi-circular grooves of various diameters, a movable clamp-jaw provided with a similar set of grooves, a flanged-tool, and a standard for this flaring-tool pivotally mounted on the support to adapt the tool to be centered with respect to any one of the grooves in the clamp.

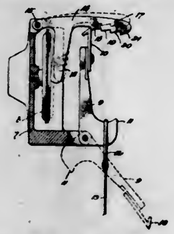


1,571,268. ADJUSTABLE PISTON-ROD CENTERING GUIDE AND COUPLING, ESPECIALLY ADAPTED FOR SYRINGES. GEORGE N. HEIN, San Francisco, Calif. Filed Sept. 21, 1925. Serial No. 57,509. 5 Claims. (Cl. 308—4.)

1. A piston-rod centering guide and coupling comprising a hub member adapted for a linear slidable fit upon said rod; a plurality of coupling arms pivotally carried at one end circumferentially of and by said member, and normally spreading outwardly therefrom, their free ends having means for engaging a barrel; and a clamp member

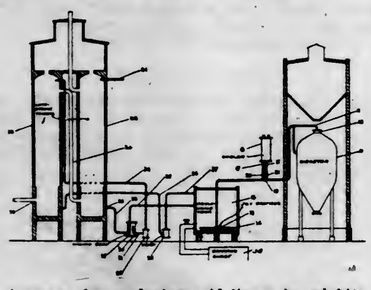
adjustably linearly fitted to the hub member and adapted to bear upon the coupling arms to contract and hold them to their engagement with the barrel.

1,571,269. PACKAGE-ASSEMBLING MACHINE. MAX JAEGER, Brooklyn, N. Y., assignor to Anchor Cap & Closure Corporation, Brooklyn, N. Y., a Corporation of New York. Filed Apr. 20, 1920. Serial No. 375,240. 42 Claims. (Cl. 226—80.)



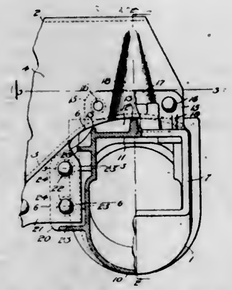
1. In a machine of the class described, in combination, means for advancing vessels continuously past a cap handling device, supply means for guiding caps, a movable cap handling device having a cap receiving postion and a cap applying position, means for retaining the cap handling device stationarily in said positions alternately, a stop for determining the position of a cap on the positioning means, cap feeding means effective upon caps successively to control their movement to the cap handling device, and means for operating the stop to release a cap from the cap handling device.

1,571,270. THERMOSTATIC CONTROL FOR HEATERS. HERBERT G. JENSEN, Detroit, Mich. Filed May 13, 1925. Serial No. 29,963. 4 Claims. (Cl. 126—351.)



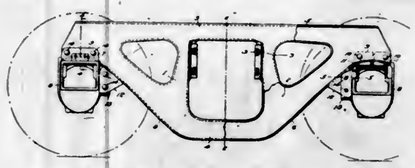
1. In combination with a tank and a heater having a valve, an expansible thermostat arranged on the side of said tank near the top thereof, an upwardly swingable latch member having a downwardly depending arm movable by said thermostat, a downwardly swingable member engaged in an upwardly adjusted position by said

latch member, and releasable therefrom by the raising of said latch member, valve opening means retained in operative position by said member in its raised position



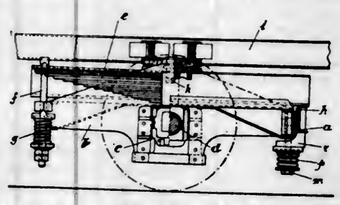
and released by the downward swinging of said member, and means closing the valve upon such release of the opening means.

1,571,271. MEANS FOR PRODUCING ACID LIQUOR IN SULPHITE PULP PROCESSES. JACOB DARRE JENSSEN, New York, N. Y., assignor to G. D. Jenssen Company, New York, N. Y. Filed Feb. 24, 1925. Serial No. 11,338. 6 Claims. (Cl. 23—285.)



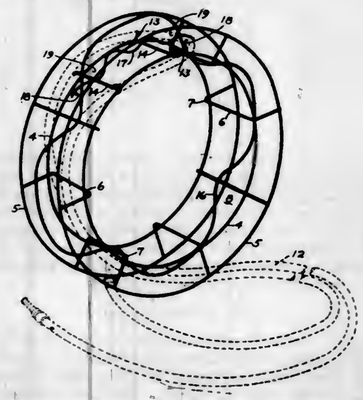
1. A means for producing acid liquor in sulphite pulp processes comprising a primary tower for the preliminary step and a secondary tower for further treatment, and a mixer for heating the liquor in passage from the primary tower to the secondary for the aforesaid further treatment.

1,571,272. JOURNAL BOX. BYRES W. KADEL, Baltimore, Md., assignor, by mesne assignments, to The Symington Company, a Corporation of Maryland. Filed Nov. 5, 1923. Serial No. 672,864. 20 Claims. (Cl. 105—220.)



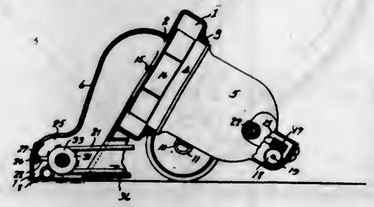
1. A journal box for railway cars, having a crowned top portion adapted to conform to the correspondingly curved portion of a car truck side frame, said top portion including a plurality of intersecting ribs, the upper faces of which are adapted to contact the adjacent curved portion of the side frame.

1,571,273. SIDE FRAME. BYRES W. KADEL, Baltimore, Md., assignor, by mesne assignments, to The Symington Company, a Corporation of Maryland. Filed Dec. 17, 1923. Serial No. 681,202. 18 Claims. (Cl. 105—205.)



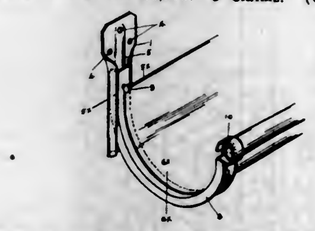
1. A car truck side frame involving a plurality of flanged metal sheets oppositely disposed and arranged in spaced relation to form inner and outer walls, and weld means uniting adjacent flanged portions of said sheets at the ends of the side frame to provide curved bearing surfaces adapted to contact the journal boxes.

1,571,274. BOGIE FOR RAIL AND TRAMWAY CARS. ALPHONSE KAMP, Ostende, Belgium. Filed Apr. 10, 1925. Serial No. 22,087. 3 Claims. (Cl. 105—165.)



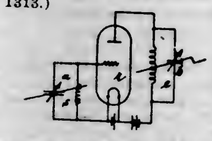
1. In a bogie for rail and tramway cars, the combination of: a main bogie-frame resiliently supported on two wheels and including two transverse members and two side-plates with journal-boxes; a secondary bogie-frame fitted with a housing for a central pivot; and self-reacting means for suspending said secondary frame from the aforesaid main frame, adapted to allow a relative lateral movement of the said two frames; substantially as described.

1,571,275. HOSE RACK. EDGAR A. KELLEY, Berkeley, Calif. Filed Sept. 12, 1924. Serial No. 737,275. 8 Claims. (Cl. 242—86.)



1. In a device of the character described, axially spaced pairs of substantially concentric rings, cross arms connecting said pairs together, and forming therewith an annular hose-receiving groove, and a partition dividing said groove into separate annular-hose-receiving channels and comprising a substantially continuous member passing under and secured to said arms and extending into said groove.

1,571,276. SUCTION CLEANER. JAMES B. KIRBY, Cleveland, Ohio. Filed Jan. 24, 1921. Serial No. 439,386. 10 Claims. (Cl. 15—8.)

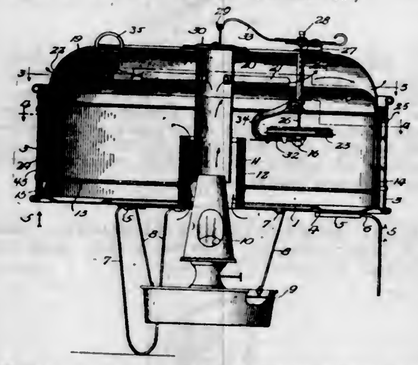


2. In a cleaner for floors and floor coverings, the combination with a collecting nozzle, means for moving the same to and fro over the floor, and a rotary brush located therein, of means for rotating said brush continuously in one direction regardless of the direction of movement of said nozzle over the floor and for automatically raising said brush relatively to said nozzle by an amount proportional to the resistance to rotation encountered by said brush.

1,571,277. EAVES-TROUGH HANGER. ELMER L. KNAB, Rochester, N. Y., assignor, by direct and mesne assignments, to The Knab Corporation, Rochester, N. Y., a Corporation of New York. Filed Mar. 20, 1925. Serial No. 16,975. 3 Claims. (Cl. 108—29.)

1. In an eaves trough hanger, the combination of a bracket having a dovetailed groove at the front thereof, a stiffening rib in the bottom of said groove, depressions in said stiffening rib, a hanger having a straight section with tapering sides adapted to slide in the dovetailed groove in said bracket, a set screw threaded into said hanger and adapted to engage the depressions in said stiffening rib in said bracket and force the tapered sides of said hanger from the inside against the inner side of the dovetailed grooves in said bracket.

1,571,278. CONNECTION FOR PRODUCING OSCILLATIONS WITH VACUUM TUBES. LUDWIG KÜHN, Berlin-Charlottenburg, Germany, assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Aug. 26, 1921. Serial No. 495,736. 3 Claims. (Cl. 250—36.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

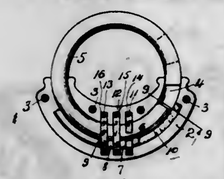


1. In a vacuum-tube device, a tuned plate circuit, a tuned grid circuit, each of said tuned circuits including a variable inductor and a variable capacity and means, including a mechanical connection between said variable reactors, for simultaneously tuning both circuits.

1,571,279. FIGURE TOY. MARGARET S. LAMB, St. Paul, Minn. Filed Apr. 3, 1922. Serial No. 548,895. 6 Claims. (Cl. 46—40.)

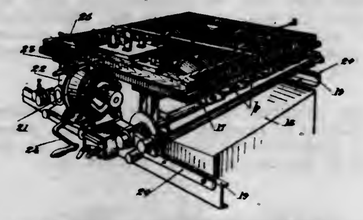
2. An animal toy composed of side walls connected together at their marginal portions to form a surrounding flange stiffer than the individual side walls, stuffing between the walls, a normally taut, strain-resisting member between said walls, and appendages connected to the strain-resisting member and projecting outwardly beyond the flange.

1,571,280. INCUBATOR. JACOB T. LANDGRAF, Macomb, Ill., assignor to American Steel Products Co., Macomb, Ill., a Corporation of Illinois. Filed Dec. 24, 1923. Serial No. 682,524. 4 Claims. (Cl. 119—39.)



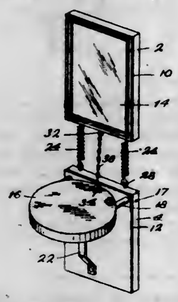
3. In an incubator, a casing having a hatching chamber, a heating chamber above the hatching chamber, a central chimney extending through the heating chamber and into the hatching chamber, heating means in communication with the chimney, and a series of spaced radial flue tubes extending into the chimney and having their outer ends spaced from the sides of the heating chamber, the heating chamber having outlets in its sides arranged at points in alinement with the spaces between the flue tubes.

1,571,281. COMBINATION LOCK. GEORGE E. LA PORT, St. Joseph, Mo. Filed May 29, 1922. Serial No. 564,480. 2 Claims. (Cl. 70—19.)



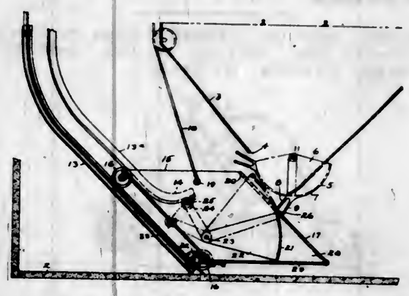
1. In a combination lock, a casing, an arcuate locking bolt having spaced apart ends and a longitudinal row of peripheral teeth and longitudinally movable in

said casing to and from a position in which the ends will be in the locked position in said casing, and tumblers rotatable on said bolt in said casing and held by the latter from longitudinal movement, each tumbler having a notch through which said teeth are adapted to pass, the tumblers, when their notches are not alined with said teeth, engaging the latter to hold the bolt



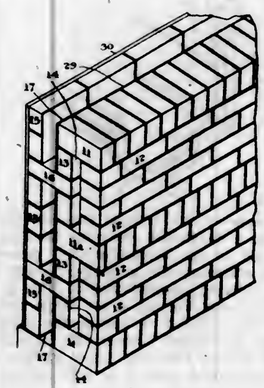
from longitudinal movement, one of said teeth engaging the casing to limit the movement of the bolt to the locking position and in the unlocked position extending through said notches to hold the tumblers from turning, the tumblers and casing having co-operating means, for indicating the positions of said notches with respect to said teeth, substantially as set forth.

1,571,282. APPARATUS FOR DRYING FABRICS OR THE LIKE. PAUL LECULIER, Lyon, France. Filed Feb. 5, 1924. Serial No. 690,857. 4 Claims. (Cl. 34—48.)



2. Apparatus for drying fabrics comprising a frame, means for supporting said frame means for vertically adjusting said frame, means for securing said frame in the vertically adjusted position, a series of oblong parabolic reflectors within said frame means for suspending said reflectors from said frame, electrically heated elements in said reflectors and means for conveying electric current to said heating elements.

1,571,283. SELF-FASTENING WALL BRACKET. OMER E. LONG, Chicago, Ill. Filed May 4, 1925. Serial No. 27,802. 4 Claims. (Cl. 45—51.)

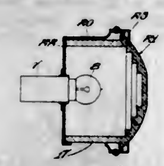


1. A device of the character described consisting of upper and lower rectangular wall members, spurs projecting rearwardly from said members, resilient means connecting said members, and a shelf supported by one of said members.

1,571,284. ELEVATING MECHANISM. LEONARD L. LUDWIG, Delavan, Kans. Filed Jan. 28, 1924. Serial No. 688,921. 9 Claims. (Cl. 214—125.)

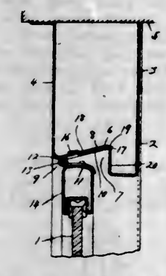
5. In a mechanism of the class described, a hopper having a discharge opening, means for controlling said opening, a bucket adapted to be moved under said opening, a feed opening in said bucket, means for controlling said feed opening and means responsive to the movement of the bucket for operating the controlling means for the bucket feed opening and for causing the hopper discharge opening controlling means to operate simultaneously therewith.

1,571,285. BUILDING WALL. JAMES CECIL MCDOUGALL, Montreal, Quebec, Canada. Filed Dec. 1, 1923. Serial No. 677,999. 2 Claims. (Cl. 72—102.)



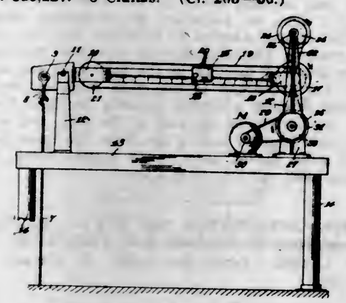
1. A hollow wall constructed of brick comprising three or more parallel brick partitions spaced from one another, vertically spaced bonding courses connecting each pair of adjacent partitions and extending the full length of the latter, the bonding courses of adjacent series being staggered vertically with relation to each other so that no joint between the partitions extends from one side of the wall to the other.

1,571,286. TAIL LIGHT. JOHN V. MACHESKY, Grosse Pointe Park, Mich., assignor to Hudson Motor Car Company, Detroit, Mich., a Corporation of Michigan. Filed Jan. 8, 1923. Serial No. 611,328. 1 Claim. (Cl. 240—8.3.)



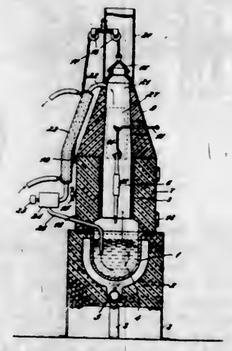
An improved tail lamp comprising a cylindrical shell open at one end and an integral cup-shape glass member

insertable in said shell, the rear portion of said glass member being colored glass and the barrel portion white



glass, and a circumferential flange on said glass member adapted to engage the edge of the shell at its open end to make a tight joint therewith.

1,571,287. HINGE FOR WINDSHIELDS. WILLIAM MARSHALL, Detroit, Mich., assignor to Briggs Manufacturing Company, Detroit, Mich., a Corporation of Michigan. Filed Sept. 2, 1924. Serial No. 735,459. 8 Claims. (Cl. 296—92.)

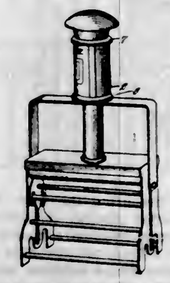


1. The combination with a windshield, and a hinge secured thereto, of a metallic windshield header extending over said windshield having openings therein, means for supporting said windshield from said header including tongues struck-out from said hinge engaging certain of said openings, and lugs projecting from said hinge engaging other of said openings.

1,571,288. WEIGHING MECHANISM. HERBERT L. MERRICK, Passaic, N. J. Filed Nov. 15, 1921. Serial No. 515,227. 6 Claims. (Cl. 265—56.)

1. In a weighing mechanism, the combination with a weighing beam arranged to support a load therefrom, of a poise weight movable upon the beam; a friction wheel carried by the beam to rotate on an axis extending transversely of the beam; means to operatively connect said wheel with the poise weight to impart movement thereto along the beam through the movement of the wheel; a pair of friction driving wheels rotatably supported to rotate in the same plane as the wheel carried by the beam; means for continuously rotating said driving wheels in opposite direction, said friction wheel being adapted to be brought into contact with one of the driving wheels when the beam is moved to overload position to rotate said friction wheel in one direction to thereby move the poise weight in one direction along the beam, and said frictional wheel being adapted to be brought into frictional engagement with the other driving wheel to move the friction wheel and poise weight in opposite direction when the beam is moved to underload position for the purpose specified.

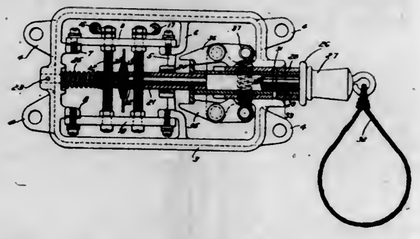
1,571,289. CASEHARDENING. WILLIAM J. MERTEN, Pittsburgh, Pa. Filed Dec. 2, 1920. Serial No. 427,753. 8 Claims. (Cl. 148—17.)



4. A method of case hardening which comprises heating a cyanide to produce cyanogen gases, allowing said gases to come in contact with an article to be treated, and agitating said cyanide by bubbling unabsorbed gases therethrough.

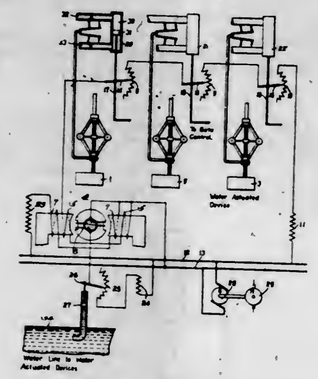
1,571,290. QUENCHING BATH. WILLIAM J. MERTEN, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed May 4, 1925. Serial No. 28,014. 6 Claims. (Cl. 148—28.)

1. A quenching bath which comprises an aqueous solution of an alkali metal chloride, an alkali metal cyanide and an oxide of an alkaline earth metal.



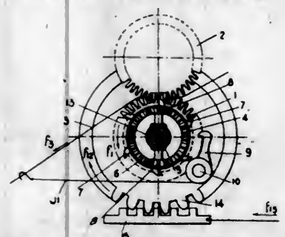
1,571,291. LABEL HOLDER FOR SELF-INKING STAMPS. GUSTAV A. J. MEYER, Chicago, Ill., assignor to Meyer & Wenthe, a Copartnership consisting of Gustav A. J. Meyer and Herman H. Wenthe, Chicago, Ill. Filed July 31, 1925. Serial No. 47,300. 4 Claims. (Cl. 40—21.)

1. A self-inking stamp embodying a handle having a cylindrical portion; a strip imprinted with at least a portion of the die plate and wrapped around the said handle portion, a transparent shield overlapping the



said strip and having its ends adjacent to each other, and means simultaneously securing the said strip and shield to the handle and overlapping the junctures of the ends of the shield.

1,571,292. ELECTRICAL SWITCH FOR CAR DOORS. HARRY R. MEYER and LYNN G. RILEY, Wilkinsburg, Pa., assignors to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 23, 1921. Serial No. 502,606. 9 Claims. (Cl. 200—16.)

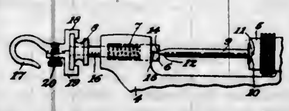


2. An electric switch comprising, in combination, a pair of spaced stationary contact members, a movable contact member, means for normally maintaining the movable contact member in engagement with one of the stationary contact members, means for operating the movable contact member and a movable latch operable by the operating means for releasably maintaining it in neutral position with respect to both of the stationary contact members.

1,571,293. FLOW METER. CHARLES MCL. MOSS, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed May 19, 1922. Serial No. 562,071. 10 Claims. (Cl. 177—351.)

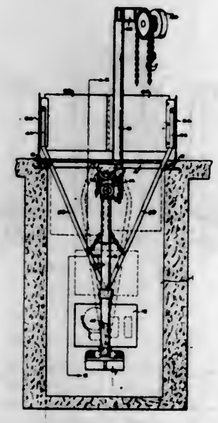
1. A device for measuring the flow of fluid to a plurality of fluid-actuated devices comprising a single indicating means, electro-responsive means actuated in accordance with the velocity of the fluid to be measured and electro-responsive means actuated in accordance with the summation of the effective gate-opening areas of the devices actuated by the fluid, said electro-responsive means cooperating to actuate said single indicating means.

1,571,294. STOP MECHANISM FOR KNITTING MACHINES. FORTUNATO NEVEUX, Rivoli, Turin, Italy, assignor to O. M. I. M. Officina Meccanica Industria Maglieria, Turin, Italy, a Company. Filed Mar. 9, 1923. Serial No. 624,004. 4 Claims. (Cl. 66—7.)



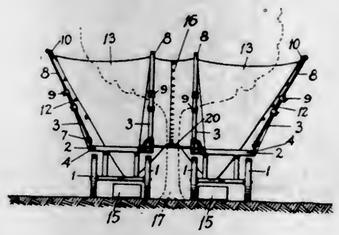
1. In a stop mechanism for knitting machines, a rack, a pinion engaging the rack, a normally stationary shaft carrying said pinion, yarn feeding gears, planetary gearing including crown gears fixed respectively to said shaft and to one of said gears, pinions engaging the crown gears, a ring supporting said pinions, hooks on said ring, a pivoted hook adjacent said ring, and a hook engaging the thread said last-named hook being connected to the pivoted hook to hold the same out of engagement with the hooks on said ring, substantially as set forth.

1,571,295. TENT-SECURING DEVICE. GENTRY DEVAN NEWMAN, Newark, N. J. Filed Aug. 12, 1925. Serial No. 49,812. 3 Claims. (Cl. 135—15.)



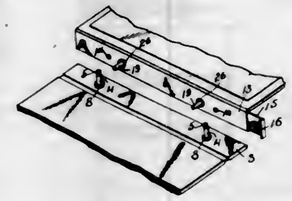
1. A tent securing device of the class described comprising a stake, an anchoring pin depending from the lower end thereof adapted to be driven into the ground, said anchoring pin being adapted to extend through an opening provided therefor in the bottom of the side of a tent, the upper end of the stake being reduced and extending through a similar opening provided therefor in the top portion of the side of the tent, and a plate carried by the upper end of the stake, the inner portion thereof being curved, said curved portion being in engagement with the side of the tent.

1,571,296. ATTACHMENT FOR SEWING MACHINES. PANTELEIMON I. PANKOFF, New York, N. Y. Filed Feb. 7, 1925. Serial No. 7,493. 9 Claims. (Cl. 117—9.)



1. In a device of the class described, the combination with a bobbin-holder, of a pin adapted for attachment thereto and rotation thereby, and thread-twisting means fastened to the free end of said bobbin holder and rotatable therewith.

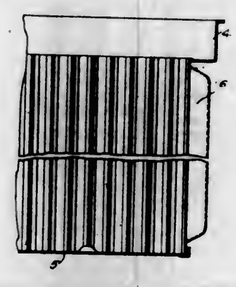
1,571,297. ASH-CAN HOIST. DONALD EVANS PARRISH, Buffalo, N. Y., assignor to Herbert Morris Incorporated, Buffalo, N. Y., a Corporation of New York. Filed Oct. 30, 1924. Serial No. 746,807. 5 Claims. (Cl. 268—3.)



5. In a hoistway closure for ash can hoists, sidewalk doors hinged above the cavity containing the ash can hoist, a stationary mast upon which the hoisting gear is slidably mounted, a sleeve slidable on the mast, door actuating rods depending from the sidewalk doors into the hoistway and having their lower ends pivotally connected to the sleeve, a counterpoise slide, a counterpoise slidable thereon, a pulley, a chain secured at one end to the counterpoise and passing over the pulley, and a pair of short chains, each secured at one end to the end of the counterpoise chain, and its other end secured to a rod intermediately of its length.

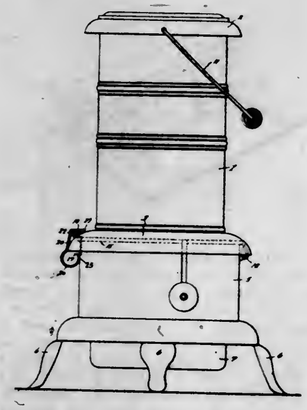
1,571,298. PRUNE GATHERER. STEPHEN PAVLOFF, Camas, Wash. Filed Aug. 26, 1922. Serial No. 584,462. 1 Claim. (Cl. 56—329.)

In a prune gatherer, the combination of a canvas hpoper, posts with extension legs supporting the upper edge of the hopper, a frame at the lower ends of the posts, a hinge between said frame and each post, said posts being pivotally connected to the upper half of each hinge, a curved slot in the upper half of each hinge said slot being concentric to the pivotal point between post and hinge, a thumb screw holding the posts to the hinge at the desired position within the slot, and a hand truck to support the frame.



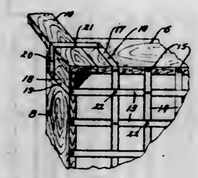
1,571,299. LOOSE-LEAF BINDER AND METHOD OF MAKING PARTS OF SAME. WILLIAM P. PITT, Kansas City, Mo., assignor to Irving-Pitt Manufacturing Company, Kansas City, Mo., a Corporation of Missouri. Filed June 2, 1921. Serial No. 474,426. 3 Claims. (Cl. 129—8.)

1. In a loose leaf binder of the kind described, a leaf-clamping member, a leaf-supporting post fastened at one end thereto and having in the other end a threaded hole, a screw fitted in said hole and having a head, a tubular leaf-clamping member, a leaf-supporting post fastened thereto, and a locking plate slidable in and projecting from one end of said tubular member to afford a finger hold, and having a slot, a portion of which is adapted to receive therethrough said head, the remainder of the slot being narrower than said head and adapted to receive the shank of the screw.



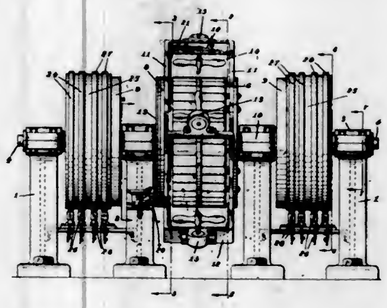
3. The method of attaching a leaf-supporting post to a leaf-clamping plate, consisting in forming in the plate a flaring boss having a hole therethrough, then inserting through the hole a leaf-supporting post having at one end a head and next to the head having a peripheral groove, the width of the groove being substantially the same thickness as the plate, and then flattening said boss so as to cause it to be forced into said groove, and forming in the plate a recess of a depth substantially equal to the thickness of said head with the latter substantially flush with the adjacent side of the clamping plate.

1,571,300. METHOD OF MAKING TRANSFORMER TANKS. EMERSON G. REED, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Dec. 30, 1920. Serial No. 434,008. 7 Claims. (Cl. 113—116.)



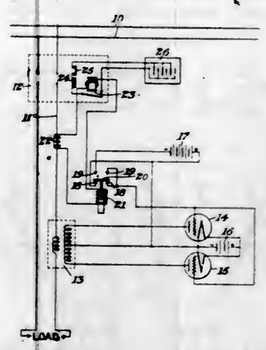
1. The method of making heat-radiating casings which consists of drawing the central portion of a sheet-metal blank to form a pocket, placing a plurality of the members thus formed in side-by-side relation to form a closed figure with the central portion projecting outwardly and then welding adjacent edges of said members.

1,571,301. PORTABLE OIL HEATER. MARC RESEK, East Cleveland, Ohio, assignor to Perfection Stove Company, Cleveland, Ohio, a Corporation of Ohio. Filed Apr. 30, 1924. Serial No. 710,014. 23 Claims. (Cl. 126—96.)



1. In a portable oil heater consisting of a base and a drum surmounting the base and hingedly connected thereto; latch mechanism including an element that is movably carried by the drum and by means of which the drum may be swung with respect to the base, said element being moved with respect to the drum during such operation, and a second latch element wherewith the former element coacts for securing the drum in operative relation to the base, the drum being released when the first-mentioned latch element is moved in one direction with respect to the drum, and being secured in operative relation to the base when said first-mentioned element is moved in a reverse direction with respect to the drum.

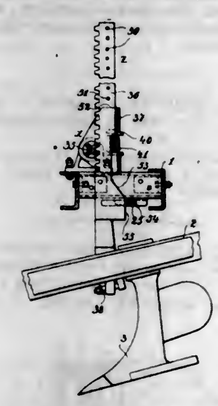
1,571,302. FURNITURE CONSTRUCTION. JOHN E. RILLING, Milwaukee, Wis. Filed Nov. 19, 1923. Serial No. 675,618. 4 Claims. (Cl. 155—179.)



1. In a furniture construction the combination with the bottom frame and leg joints thereof, of a non-yieldable seat foundation and reinforcing structure comprising a plurality of interwoven metallic strips secured to the said frame, certain of said strips being extended and having their ends bent and secured to the sides of said frame, and metallic reinforcing means spanning the leg joints and secured to the bent ends of said extended strips.

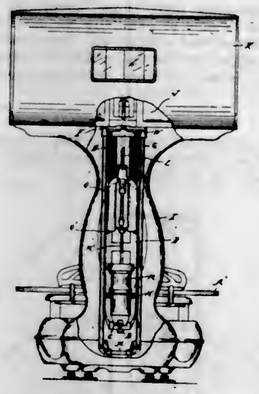
1,571,303. DUPLEX AIR ROTOR. ISAAC SCHAFRAN, New York, N. Y., assignor of one-half to Louis Bruger, Montreal, Quebec, Canada. Filed May 15, 1922, Serial No. 561,195. Renewed Nov. 28, 1925. 5 Claims. (Cl. 171—252.)

1. A motive mechanism comprising a movable body, a propeller rotatably supported by said body and adapted to actuate the same, a second movable body disposed in and adapted to be moved by the back stream of the said propeller, and means for combining the energy delivered by the two bodies.



1,571,304. ELECTRICAL SYSTEM. MAURICE L. SINDEBAND and JOSEPH W. MILNOR, New York, N. Y., assignors to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 28, 1923. Serial No. 621,716. 12 Claims. (Cl. 175—294.)

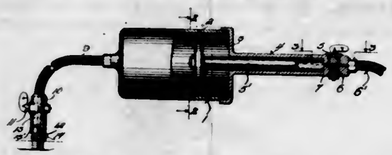
1. The method of controlling an alternating current electric power transmission system which comprises interposing in said system an impedance including a space charge device and varying said space charge device.



1,571,305. MOTOR PLOW. ROBERT SOHNER, Vienna, Austria. Filed Feb. 27, 1924. Serial No. 695,444. 10 Claims. (Cl. 97—50.)

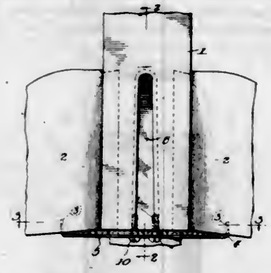
1. In a motor plow, the combination with a share frame, of means including a toothed member and disengageably operatively connected to the motor for lifting said frame, and means carried by said member for

automatically disengaging said first named means from said motor when the frame has been raised to a predetermined position.



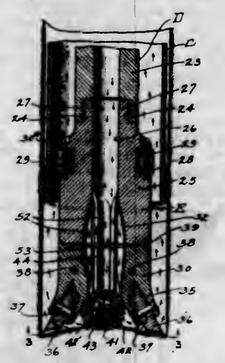
1,571,306. STEELYARD ROD AND SPRING CONNECTION FOR SCALES. WALTER F. STIMPSON, Louisville, Ky. Filed Oct. 3, 1923. Serial No. 666,398. 10 Claims. (Cl. 265—89.)

1. In a scale, the combination with a dash-pot, of a steelyard rod comprising a member having an offset portion to provide clearance for the dash-pot, and a portion on the opposite side of said offset and out of registration therewith for counterbalancing the same.



1,571,307. GREASE GUN. CHARLES W. TIKALSKY, Manitowoc, Wis. Filed Jan. 24, 1924. Serial No. 688,248. 1 Claim. (Cl. 221—474.)

A greasing device comprising a cylinder adapted to contain the grease, and having a discharge fitting at one end, and being open at the other end, a cylinder head for closing said open end, said cylinder head and said cylinder having interengaging parts, a piston mounted within said cylinder and having a rearwardly projecting piston rod passing through said cylinder head, said cylinder head having a tubular extension loosely receiving and guiding said piston rod and having a fitting at its outer end, and adapted to be connected to a source of fluid pressure, and a three way valve mounted within the tubular ex-

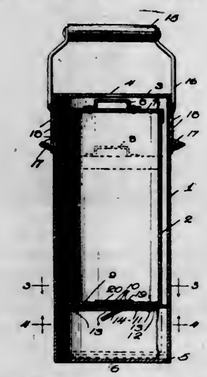


tension of said piston head, and adapted to connect said tubular extension either with said source of fluid pressure or with the external air.

1,571,308. COSTUMER OR COAT HANGER. JENS VAALER, Chicago, Ill., assignor to The Clemetsen Company, Chicago, Ill., a Corporation of Illinois. Filed May 15, 1922. Serial No. 561,170. 8 Claims. (Cl. 45—13.)

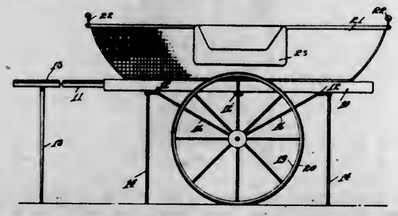
1. In a costumer, a standard, legs supporting said standard, said standard having upwardly tapering mortises to cooperate with tenons on said legs, said legs having narrow slots and a plate having upturned ends, said upturned ends adapted to fit into these slots in said legs.

1,571,309. WELL-DRILLING APPARATUS. ORLANDO B. WALL, Wichita, Kans. Filed Mar. 28, 1922. Serial No. 547,445. 5 Claims. (Cl. 255—76.)



1. A drill bit comprising a head having an axially disposed washing opening therethrough, the lower end of the head having grooves communicating with the opening, and pivoted cutters carried by the head having grooves formed in the inner surfaces for communicating with the first mentioned grooves.

1,571,310. PENETRATOR FOR TESTING PENETRATION HARDNESS. CHARLES H. WILSON, North Pelham, N. Y. Filed Feb. 14, 1924. Serial No. 692,830. 4 Claims. (Cl. 265—12.)

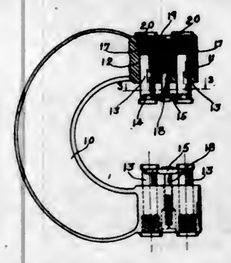


1. A penetrator for testing the penetration hardness of material, said penetrator comprising a spherical segmental penetrating tip with frusto-conical penetrating sides, said sides forming an obtuse angle and meeting the tip tangentially to the spherical surface of the segment, said tip and sides penetrating the surface of the metal whose penetration hardness is being tested.

1,571,311. POWDER DISTRIBUTOR. JOHANNES ANTON WITTJEN, Holly Springs, Miss. Filed Nov. 14, 1924. Serial No. 749,879. 2 Claims. (Cl. 43—147.)

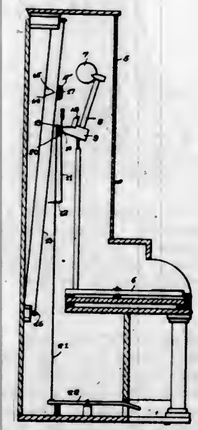
1. A device of the character described comprising a shell and a powder container mounted for reciprocation longitudinally within said shell, a flexible disk secured to the container and having its periphery contacting the inner wall of the shell, and means whereby downward movement of the device will expel powder from the container into the shell, and upward movement expel the powder from the shell.

1,571,312. LAUNDRY DEVICE. ORA B. ANDERSON, Deadwood, S. Dak. Filed Apr. 11, 1924. Serial No. 705,864. 1 Claim. (Cl. 280—53.)



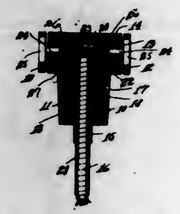
An ironing board stand comprising a pair of parallel channel members, the open sides of the channels being directed toward each other, an ironing board having its longer edges slidable in the channels of said channel members, transversely extending offset spacing bars between the channel members, a running gear including wheels supporting the channel members, and an axle carrying the wheels, and movable supporting legs on the ends of the channels.

1,571,313. INK REMOVER. HERBERT W. BECKER, Milwaukee, Wis. Filed May 13, 1925. Serial No. 30,084. 2 Claims. (Cl. 87—5.)



1. An ink remover consisting of 21 parts formic acid; 3 parts glycerine; 1 part sulphuric ether; $\frac{1}{8}$ part bay oil and $\frac{1}{8}$ part cologne.

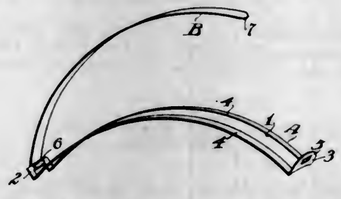
1,571,314. SNAP LIMIT GAUGE. BRYANT H. BLOOD, Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y., a Corporation of New Jersey. Filed Apr. 9, 1924. Serial No. 705,262. 4 Claims. (Cl. 33—163.)



1. An adjustable limit gauge comprising in combination, a frame, a pair of parallelly disposed anvils adjustably mounted at one side of the frame, means to independently adjust the anvils in one direction, and common acting means to force the anvils in the opposite direction.

1,571,315. MUSICAL INSTRUMENT. ALBERT BOOTHE, Colfax, Iowa. Filed Feb. 2, 1924. Serial No. 690,237. 5 Claims. (Cl. 84—234.)

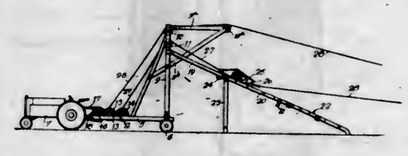
2. In a musical instrument, a hammer pivotally mounted to strike a string and operative to hold the string under pressure, a pendant, means for oscillatably mounting the pendant for movement into and out of engagement with the string, a detent for normally holding the pendant inoperative, mechanical means for moving the pendant holding means, a damper for engaging the strings when released by the hammer, and means carried by the hammer adapted to engage the pendant above its pivot, substantially as described.



1,571,316. PUSH BUTTON. JOSEPH H. BREMER, Tampa, Fla. Filed June 17, 1924. Serial No. 720,598. 2 Claims. (Cl. 200—159.)

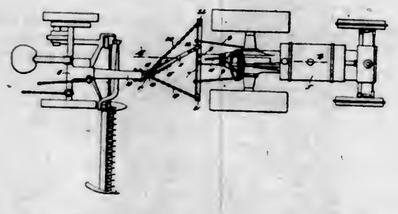
1. A circuit closer comprising a body having intersecting passages, a metallic sleeve in each of the passages and out of contact with the other sleeve, an electric conduit in the sleeve of one of the passages and including a metal sheath in metallic contact with the sleeve and wires therewithin and insulated therefrom, and a slidable metal member in the sleeve of the other passage and in metallic contact therewith said slidable member being movable in to and out of contact with said wires and sheath.

2. A circuit closer including a body having intersecting passages therein, a metallic sleeve within each of the passages and out of contact with the other sleeve, an electric conduit in the sleeve of one passage, means for securing the conduit in contact with the sleeve, the said conduit including a metal sheath and wires therewithin and insulated therefrom, certain ends of the wires extending into the other passage, and a slidable spring pressed contact member in the sleeve of the other passage and movable into contact with the said wire ends and sheath.



1,571,317. WATER WAVER. JOSEPHINE BRETTSCHNEIDER, St. Paul, Minn. Filed June 26, 1925. Serial No. 39,696. 3 Claims. (Cl. 132—41.)

1. A hair waving device of the character described, comprising a frame having a pair of longitudinally curved side members, upturned end portions extending radially outward from the curvature of said side members, a tongue pivotally connected to one of said up-turned end portions to swing downwardly intermediate said side members in spaced relation therefrom, and fastening means carried by the other of said up-turned end portions to engage the tongue upon being drawn upwardly between the side members to hold a strand of hair looped about said tongue to form a wave therein.



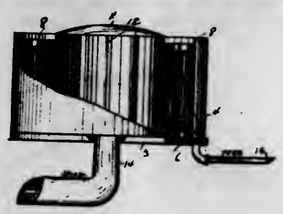
1,571,318. COLLAPSIBLE DERRICK. JOSEPH S. BURNETT, Macon, Ga. Filed July 28, 1925. Serial No. 46,619. 3 Claims. (Cl. 214—105.)

1. A collapsible excavating and dumping apparatus comprising a power-drawn platform or frame; a derrick mounted thereon; an inclined platform adjacent to and lowerable against said derrick; skid-members pivotally connecting the derrick and the upper end of said inclined platform; swinging stanchions secured to and foldable against the last named platform and adapted normally to support the latter in inclined position; a

scraper; hauling and backing cables for alternately moving the scraper in opposite direction and connectible to said inclined platform for raising and lowering the latter; pulleys on said derrick over which the cables are passed; and means on said first named platform by which the cables are controlled.

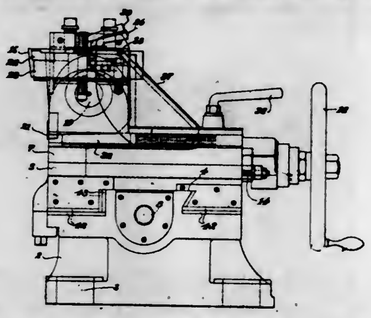
1,571,319. TRACTOR HITCH. CHARLES F. BYRNE, Janesville, Wis., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed June 6, 1921. Serial No. 475,357. 3 Claims. (Cl. 280—33.44.)

1. A tractor hitch of the class described comprising a transversely extending bar adapted to be secured to a tractor at the rear end thereof; a rigid draw bar the forward end of which is pivotally connected with said transverse bar adjacent the middle thereof; means at the rear end of said bar whereby a connection permitting pivotal movement between the parts connected in a horizontal plane only may be made between said rear end and an implement to be drawn; two tension members the rear ends of which are connected with the rear end of said draw bar, and the forward ends of which are connected with said transverse bar one adjacent each end thereof; and means whereby one only of said tension members is in operation at a time, according to the angular position relative to said transverse bar assumed by said draw bar when the device is in use.



1,571,320. PROCESS OF DYEING CELLULOSE ACETATES. RENÉ CLAVEL, Basel, Switzerland. Filed Oct. 5, 1922. Serial No. 592,602. 6 Claims. (Cl. 8—5.)

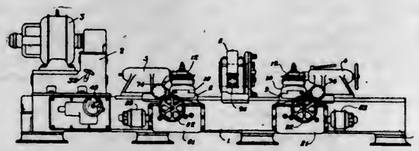
1. In a process for dyeing cellulose acetates in artificial silk, film or other form by production of development dyes on the material, applying two of the three dye-forming factors: base, diazotizing means, and developer in one bath and the other factor in another bath, a protective colloid being employed in at least one of said baths.



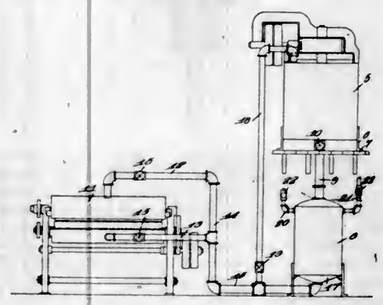
1,571,321. HYDROCARBON GENERATOR. SAMUEL B. CLARK, Harrah, Okla., assignor of one-half to Arthur Waner, Harrah, Okla. Filed Feb. 12, 1925. Serial No. 8,844. 1 Claim. (Cl. 158—92.)

In an oil burner, the combination of a cylindrical oil retaining member having a base, an opening centrally of the base, a drum concentric with said member having

a series of slits therein, means for feeding steam to said drum through said opening, an annular series of air inlet drums surrounding the steam drum, and equidistantly spaced and opening through the base of said oil retaining member, a series of longitudinal air inlets in the sides of the air inlet drums, and means to feed oil to the oil retaining member.

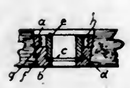


1,571,322. TOOL HOLDER. LYNDON C. COLE, Hamilton, Ohio, assignor to Niles-Bement-Pond Company, New York, N. Y., a Corporation of New Jersey. Filed Nov. 2, 1922. Serial No. 598,594. 11 Claims. (Cl. 29—49.)



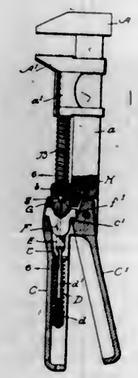
2. A turret tool holder comprising the combination of a slide and a tool turret mounted on a horizontal axis thereon and adapted to support two tools in alignment in a common vertical plane extending at right angles through the said axis, one of such tools being a formed roughing tool and the other being a formed finishing tool of the same contour, and the construction and arrangement being such that the finishing tool may be brought into correct tooling position to operate on the work after the operation of the roughing tool thereon merely by indexing the turret.

1,571,323. AXLE-TURNING LATHE. LYNDON C. COLE and OTTO PABST, Hamilton, Ohio, assignors to Niles-Bement-Pond Company, New York, N. Y., a Corporation of New Jersey. Filed Mar. 19, 1924. Serial No. 700,286. 21 Claims. (Cl. 82—8.)



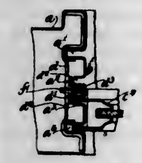
1. In a lathe, the combination of a bed having ways extending longitudinally therealong, means for rotatably supporting a work piece on the bed, a carriage slidable on the ways, a tool slide movable transversely of the ways on the carriage, a turret on the slide adapted to support a plurality of formed tools, a rotary cam having an undulatory cam path including a plurality of rises and falls, means engaging in the cam path and operatively connected to the slide, and a power element for rotating the work and cam, rotation of the cam being adapted to reciprocate the slide toward and from the work and the turret being adapted to be indexed and the carriage traversed between successive reciprocations.

1,571,324. GLUE MACHINE. FRANK DIEHL, Wabash, Ind. Filed June 6, 1923. Serial No. 643,790. 2 Claims. (Cl. 91—57.)



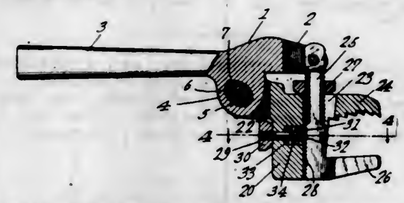
1. A device for supplying glue to a spreading machine comprising a mixing tank, a reserve tank disposed below the mixing tank, a pipe for establishing communication between the tank to allow material to pass into the reserve tank, a pipe leading from the botom of the reserve tank and communicating with the spreading machine, valves for controlling the passage of material to the spreading machine, a pipe establishing communication between the last mentioned pipe and the mixing tank, a valve for controlling the passage of material through the latter pipe, pipes for supplying air under pressure to the reserve tank to force material therefrom, and the valves for controlling the passage of fluid to the spreading machine adapted to be closed to permit the material from the reserve tank to be returned to the mixing tank.

1,571,325. BUNGHOLE SEAT OF METAL. CARL RICHARD DONNER, Wittensdorf, Germany. Filed Dec. 20, 1923. Serial No. 681,775. 1 Claim. (Cl. 217—9.8.)



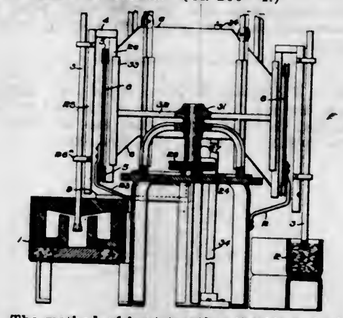
A metal bung hole seat with separate female thread for the reception of a threaded sleeve by means of which a packing disk of thin sheet aluminum, designed to be pierced by the lower end of the tap when the cask or barrel is being tapped, is tightly pressed on its bearing surface and whereby an absolutely air tight closing of the inner end of the bung hole seat is ensured, comprising in combination with the conical bung hole seat having the upper part of its inner threaded bore set off, a threaded sleeve to be screwed into the lower narrow part of said threaded bore, a square head of said threaded sleeve having a smooth outer surface projecting up to the upper end of said bung hole seat so that between its smooth outer surface and the upper wide part of the threaded bore of the bung hole seat a ring-shaped hollow space is formed, and a screw stopper composed of the top plate designed to bear upon the upper end of said bung hole seat and of a downwardly projecting threaded flange the thickness of which corresponds with the inner width of said ring-shaped hollow space of the bung hole seat.

1,571,326. ADJUSTABLE VISE WRENCH. ARTHUR B. FAULKNER, Williamsport, Pa. Filed Dec. 19, 1923. Serial No. 681,620. 13 Claims. (Cl. 81—87.)



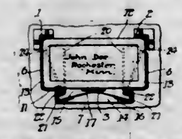
1. An adjustable vise wrench comprising in combination with an ordinary wrench having jaws and associated adjusting devices for bringing said jaws together, means for tightening the grip of the jaws consisting of a main handle member rigid with the shank of the wrench and an auxiliary handle member pivoted at one end beside and at an angle to said main handle member, and spring-actuated means and connections between the same and said adjusting devices tending to separate the jaws, said spring-actuated means and connections being arranged in the line of the longitudinal axis of said main handle member parallel with said shank and including a tilting element interposed in said connections and movable therewith in engagement with said pivoted handle member, for holding the latter normally in its inclined position under tension of the spring; said pivoted handle member being adapted when pressed toward the rigid member to move said element in opposition to the action of the spring, so as to tighten the grip of the jaws, and said spring being adapted to separate the jaws and restore said element and pivoted handle member to normal position when the pressure on the latter is released.

1,571,327. METAL WINDOW. ALPHONSUS FIEN, New York, N. Y., assignor to S. H. Pomeroy Company, Inc., New York, N. Y., a Corporation of New York. Filed Oct. 27, 1925. Serial No. 65,124. 3 Claims. (Cl. 189—75.)



1. In a hollow metal window having a jamb with a removable pulley stile, a heavy brace within the jamb, said brace being formed with a tongue bendable to support the pulley stile away from the plane of the brace.

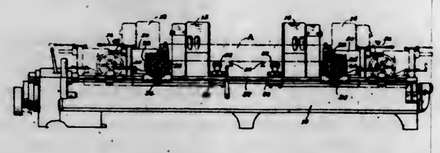
1,571,328. WRENCH. JOSEPH H. FLANIGAN, Sheffield, Ala., assignor of one-half to C. R. Sharp, Sheffield, Ala. Filed Jan. 24, 1925. Serial No. 4,553. 1 Claim. (Cl. 81—126.)



In a wrench, a handle portion having a forwardly extended arm and having a depending lug, a casting having a longitudinal bore and having an extension forming a jaw, a jaw having a threaded shank movable through the bore and having pivotal connection with the extension of the handle, said shank having teeth formed along its rear edge, means carried by the casting and adapted to engage the teeth to hold the jaw and its shank against movement, said shank having threads, a nut on the threads and engaging the casting to lock the shank against movement in one direction, and means for pivotally connecting the casting to the depending lug of the handle.

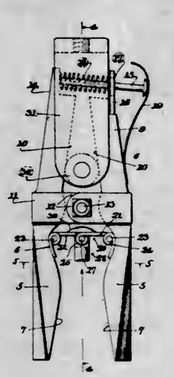
1,571,329. HEAT TREATING OF ARTICLES. GEORGE H. GILMAN, Boston, Mass. Filed Sept. 4, 1920. Serial No. 408,283. 57 Claims. (Cl. 266—4.)

57. The method of heat treating the bit end of a drill steel which comprises heating the said end, keeping the portion of said steel adjacent said end cool during said heating by subjecting it to a draft of cool medium directed along said steel toward said heated portion, then immediately hardening the cutting end of said bit by immersion in a cooling liquid of said cutting end only, and in finally quenching the remaining heated portion by gradually immersing said heated end in said cooling liquid.



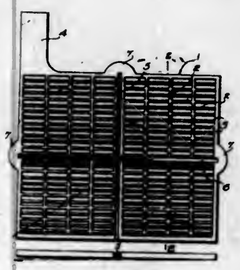
1,571,330. TRAY. PAUL A. GOLLNICK, Chicago, Ill., assignor to Spiegel, May, Stern Co., Chicago, Ill., a Corporation of Illinois. Filed Nov. 21, 1924. Serial No. 751,317. 10 Claims. (Cl. 101—47.)

1. In a device of the class described, the combination with a tray having a card-supporting ledge, of a follower comprising a substantially U-shaped member having a pair of spaced arms and a resilient base part, said arms



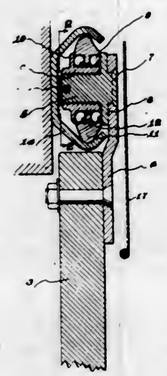
being yieldingly urged by said base part into frictional contact with opposed edges of said tray, said base part being spaced entirely below said ledge and away from the bottom of the cards to provide an unobstructed passage between said ledge and base part for the purpose specified.

1,571,331. AXLE CUTTING-OFF AND CENTERING MACHINE. WILLIAM J. HAGMAN, Philadelphia, Pa., assignor to Niles-Bement-Pond Company, New York, N. Y., a Corporation of New Jersey. Filed June 9, 1922. Serial No. 567,057. 8 Claims. (Cl. 29—27.)



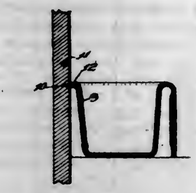
1. A metal cutting machine comprising in combination, a base, heads movably mounted on said base, work rotating chucks on said heads, means to simultaneously move said heads towards or from each other, transversely extending tracks to guide work blanks into operative position, whereby a work blank may be advanced to operative position on the base and said heads advanced toward each other to engage said chucks with said blanks, and cutting off and centering tools mounted on and movable with said heads, said centering tools being movable transversely on said heads into and out of operative position.

1,571,332. FISHING TOOL. LOUIS W. HERMINGHAUSEN, Mendon, Mo., assignor of one-half to James H. Staples, Shawnee, Okla. Filed Feb. 21, 1925. Serial No. 10,817. 3 Claims. (Cl. 294—110.)



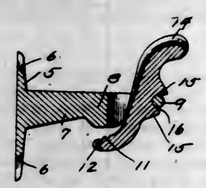
1. A fishing tool of the character described, comprising a pair of jaws carrying upwardly extending arms provided upon their inner faces with longitudinally extending cam faces, means pivotally connecting said jaws adjacent to the lower ends of the arms, a toggle trip arranged between the jaws and connected therewith, a spring for spreading said arms, a yoke straddling the arms, and a spreading element mounted within the yoke and arranged between the arms to engage the cam faces, the leverage of the device increasing as the spreading element moves upwardly upon said cam faces and away from said jaws.

1,571,333. GRID FOR STORAGE BATTERIES. RALPH A. HOFFMAN, Marshalltown, Iowa. Filed Oct. 2, 1923. Serial No. 666,174. 4 Claims. (Cl. 136—16.)



1. A storage battery grid comprising a frame, said frame being divided into sections, and flexible joints connecting said sections, each of said joints extending substantially entirely across said frame and intersecting substantially centrally thereof.

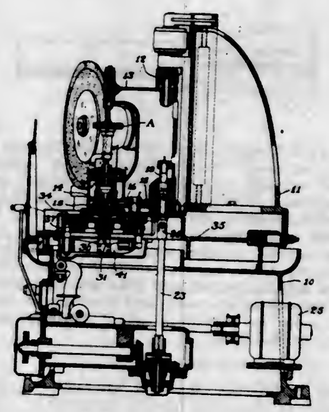
1,571,334. DOOR HANGER. FRANK E. HOWARD, Hartford, Conn., assignor to James L. Howard and Company, Hartford, Conn., a Corporation of Connecticut. Filed Aug. 25, 1924. Serial No. 734,087. 6 Claims. (Cl. 16—98.)



1. In a door-hanger, the combination of a plate, a threaded pin of relatively soft metal having one end riveted through the plate, said pin having an integral flange bearing against said plate, an interiorly threaded bushing of relatively hard metal threaded on said pin, and adjacent its outer end being provided with an integral circumferential flange, the outer surface of said bushing between the said flanges forming an inner ball race-way, a sheave of relatively hard metal surrounding and spaced from said bushing, and interposed between the flange on said pin and the flange on said bushing, and being provided with an inwardly extending web, and a double row of balls interposed between the sheave and bushing and between the flange on the pin and the flange on the bushing, and being separated by and bearing against said web, said bushing at its outer end being provided with notches, and a split pin extending through said notches and through an alined opening in said pin.

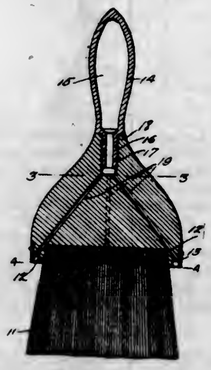
1,571,335. COVERING FOR PLUMBING FIXTURES AND THE LIKE. ROGER E. JARVIS, St. Louis, Mo., assignor of one-half to E. J. Blake, St. Louis, Mo. Filed May 23, 1925. Serial No. 32,811. 2 Claims. (Cl. 4—173.)

1. A protector for plumbing fixtures comprising a covering shaped to conform to the contour of the fixture and of sufficiently soft material as to protect the surface of the fixture, said covering having its one edge embedded in the wall for supporting the same in position and for protection to the fixture while finishing the interior of the room.



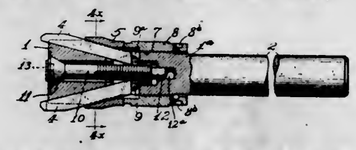
1,571,336. CLOTHESLINE HOLDER. WILLIAM L. KELLY, Olyphant, Pa., assignor to James D. Monie, Scranton, Pa. Filed Nov. 4, 1924. Serial No. 747,871. 1 Claim. (Cl. 24—133.)

The combination with a base having an arm extending therefrom, said arm having a vertical opening in its free end portion, the outer side of the opening being cylindrical and the rear wall of the opening being continued below the arm with a resultant gripping face, of a compound curved clamping dog disposed within said opening with one extremity underlying said arm and the continued wall of said opening, said underlying portion having transversely extending gripping teeth, said compound curved dog being longitudinally grooved from the teeth to and through its opposite end portion and said compound curved dog having longitudinally spaced ears extending from its face opposite of the curved portion, said ears pivotally embracing the cylindrical front side of said opening whereby movement of the upper end of the compound curved dog in a direction away from the bracket will swing the teeth in the direction of and beneath the gripping face of the continued wall of said opening and the eared face of the compound member against said cylindrical portion.



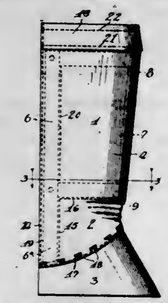
1,571,337. GEAR GRINDER. CARROLL KNOWLES, Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y., a Corporation of New Jersey. Filed Nov. 2, 1923. Serial No. 672,391. 9 Claims. (Cl. 51—52.)

1. A machine for generating the tooth curves of gears comprising in combination, a base, a cutting wheel rotatably mounted thereon, a work spindle supported on said base so that it may move in any direction while its axis is maintained in parallel positions, means to rotate



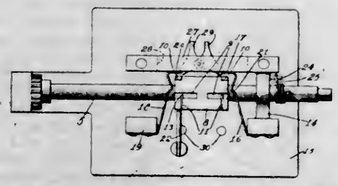
the work spindle comprising a gear on said spindle and driving gears in mesh therewith, and means to move the spindle about in a closed path.

1,571,338. PAINTBRUSH. JOSEPH KRATOCHVIL, Bridgeville, Pa. Filed Sept. 14, 1922. Serial No. 588,143. 1 Claim. (Cl. 15—248.)



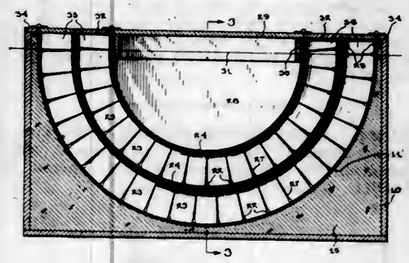
A brush having a tapered head formed with a bristle receiving recess in the larger end and stepped shoulders in the outer face of the wall of said recess, the other end of the head having a central threaded bore extending longitudinally thereinto for a short distance, a removable hollow handle having a nipple threaded in said bore and communicating therewith, a band secured to the head on one of the shoulders and outwardly of the other shoulder to form the outer wall of a channel of which the inner wall of the said other shoulder is the inner wall thereof, the head having oblique passages extending from the bottom wall of said channel into the inner end of the said threaded bore for discharging paint into said nipple.

1,571,339. ADJUSTABLE CUTTER DRILL. LOUIS J. MADDEN, Syracuse, N. Y., assignor of one-half to John L. Wagner, Syracuse, N. Y. Filed Apr. 17, 1922. Serial No. 553,705. 2 Claims. (Cl. 77—58.)



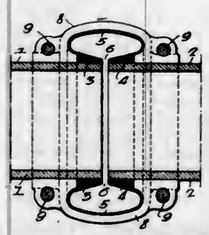
1. In an adjustable cutter drill, a body having longitudinally disposed divergent grooves and constructed with flat external faces, blades seated in said grooves with longitudinal adjustment therein, a yoke embracing said blades, confining them in said grooves and having flat cheeks embracing the flat faces of the body to hold the yoke against rotation while permitting it to slide longitudinally of the body, a rotatable follower threaded upon the body in rear of said yoke, an adjusting screw axially disposed in the body, and a wing nut threaded on said screw in position to afford abutment for the rear ends of the blades.

1,571,340. LEGGING. IRWIN W. MILLARD, Chicago, Ill., assignor to Industrial Gloves Corporation, Chicago, Ill., a Corporation of Delaware. Filed Sept. 21, 1925. Serial No. 57,483. 5 Claims. (Cl. 36—2.)



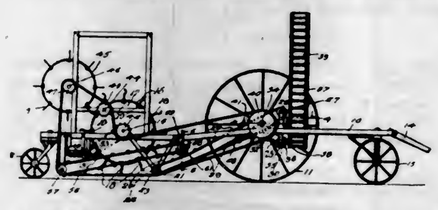
3. A legging having, in combination, a flexible covering, a flexible lining, a metal frame secured between said cover and lining, said frame comprising longitudinal stays an dtransverse spring clips and being adapted to stiffen the upper portion of the legging and to detachably secure the legging to wearer's leg, a flexible flare secured to the lower edge of said cover, there being a portion of said cover between said flare and the lowermost of said clips, which portion is adjacent the ankle and is stiffened only at the rear edges thereof, thereby providing a flexible covering about the ankle.

1,571,341. VENDING MACHINE. WILLIAM L. MOSER, Winston-Salem, N. C. Filed Feb. 3, 1922. Serial No. 538,915. 1 Claim. (Cl. 194—63.)



In a vending machine the combination with an actuating shaft and a table driven by the shaft, of a block rotatable with the shaft and having a coin receiving recess, said block being angular in cross sectional contour, a pivoted dog cooperating with the corner portions of the block for holding said block against retrograde movement, a spring strip yieldingly mounted adjacent one end of the block, a locking tongue extending laterally from the strip, a projection on the block for engagement with the tongue to hold the block against rotation, said strip having a laterally offset intermediate portion for engagement by a coin seated in the recess, thereby to shift the tongue out of the path of projection to release the block, and means engaging the tongue for shifting the strip and tongue to release the block independently of the use of a coin, a projection adjacent the shaft, and a spring finger rotatable with the shaft for intermittent wiping engagement with the projection, said finger and projection normally cooperating to hold the recess to the block in coin receiving position.

1,571,342. ICE BOX. CHESTER PAIGE, Nowata, Okla. Filed Sept. 19, 1925. Serial No. 57,415. 3 Claims. (Cl. 62—34.)

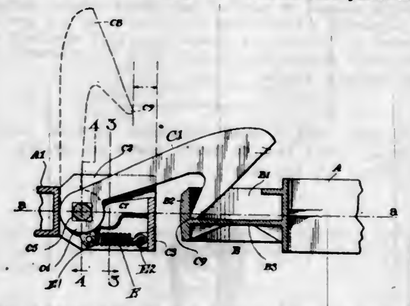


1. A refrigerator comprising a casing, a container in the casing and insulated from the casing, tubes mounted in the container to receive articles to be cooled, a chamber in the casing adapted to receive a refrigerating medium said tubes being provided with openings to permit the circulation of the cooling medium through the tubes, each of the tubes being formed of a single sheet of metal, having cut out portions along the opposite edges to provide fingers, opposite fingers on the edges of the shell being connected together, said tubes being bent to semicircular form in the container, the spaces between the fingers forming openings to permit the circulation of the cooling medium.

1,571,343. PIPE UNION. ALBERT L. REGISTER, Haverford, Pa. Filed Feb. 20, 1925. Serial No. 10,546. 3 Claims. (Cl. 285—194.)

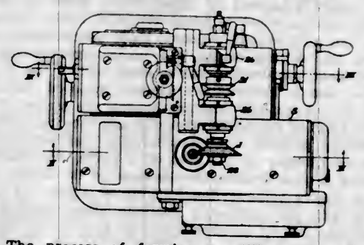
1. A connector for pipes comprising a pair of annular gaskets adapted to be passed onto the ends of pipes to be connected; a separately formed annular tubular member divided circumferentially at the inside to provide an aperture and adapted to encircle the pipe ends with the portions adjacent the aperture on both sides seating upon the respective gaskets, whereby the interior of the tubular member is in communication with the interior of the pipe; and a housing for said annular member enclosing the ends of the pipes.

1,571,344. POTATO HARVESTER. EDWARD SANDERS, Moorhead, Minn. Filed Oct. 27, 1924. Serial No. 746,172. 3 Claims. (Cl. 55—59.)



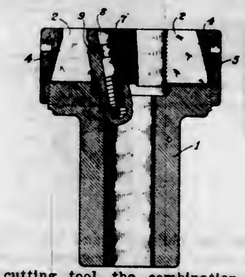
1. In a potato harvester, a traction wheel supported frame, a member rotatably mounted on the frame, potato displacing fingers carried by the said member, a member rotatable in operative relation to the fingers, elements on the second mentioned member projecting into the path of travel of the fingers for dislodging material from between the fingers, a transversely operable conveyer rearwardly of the first mentioned element for receiving potatoes displaced from the fingers, a longitudinally operable conveyer for receiving potatoes from the first mentioned conveyer, a longitudinally operable conveyer in front of the potato dislodging means in position to receive the dislodged potatoes, a transversely operable conveyer at the front of the second mentioned longitudinally operable conveyer, means for driving the aforesaid elements in unison from the traction wheels, and a chute for delivering potatoes from the first mentioned longitudinal conveyer to the second mentioned longitudinal conveyer.

2. In a potato bravester, a frame, traction wheels for supporting the frame, standards secured to the sides of the frame near the front thereof, shafts journaled in the ends of said standards, a sprocket chain for communicating motion of the traction wheels to the shaft on the lower end of the standards, a transversely operable conveyer at the front of the said standards, means for communicating the motion of the last mentioned shaft to the said conveyer, a longitudinally operable conveyer for delivering potatoes to the first mentioned conveyer, potato dislodging means rotatably supported on the frame at the rear of the second mentioned conveyer for delivering potatoes to the said conveyer, means for dislodging deposits from the potato dislodging means, a conveyer at the rear of the potato dislodging means for receiving potatoes removed from the potato dislodging means, a longitudinally operable conveyer for receiving potatoes from the last mentioned conveyer, a chute from the last mentioned longitudinally operable conveyer to the second mentioned conveyer, and means for driving the aforesaid parts in unison through power from the traction wheels.



1,571,345. MINE-CAR COUPLING. HUGH W. SANFORD, Knoxville, Tenn. Filed Mar. 23, 1922, Serial No. 546,050. Renewed June 23, 1925. 8 Claims. (Cl. 213—175.)

1. A mine car coupling structure comprising two bumpers, the first of said bumpers having an engaging face which is upright and extends transversely to the length of the car in a curved course in the below-mentioned plane, and a hook having a point and being hinged to the second of said bumpers on a horizontal axis and adapted to turn on said axis to move said point in an arc extending, when the first bumper is not in range, from below the horizontal plane of said hinge upward in an arc above said plane and above the height of said engaging face of the first bumper, whereby said point is adapted to engage said face in said plane and



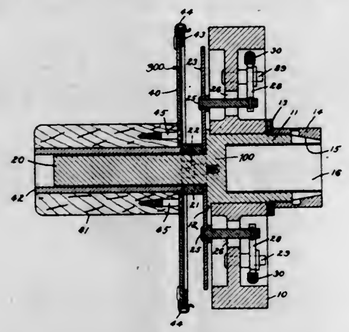
slide laterally along said face during changes in alignment of the cars which support said bumpers, substantially as described.

1,571,346. PROCESS OF FORMING MILLING CUTTERS. WILLIAM C. F. SCHRAMM, Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y., a Corporation of New Jersey. Filed May 24, 1921. Serial No. 472,080. 18 Claims. (Cl. 51—278.)

1. The process of forming a milling cutter from a blank which consists in rotating the blank, in rotating a cutting wheel in engagement with the rotating blank, in effecting relative movement between the blank and the wheel during rotation of the blank to produce a series of circumferential cuts on one face of each tooth of the blank, and in reversing the relative position of the blank and the wheel to produce a similar series of cuts on the opposite face of each tooth of the blank.

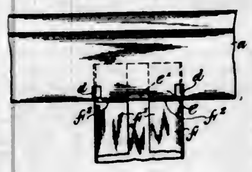
1,571,347. CUTTING TOOL. CARL SCHRAMM, West Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y., a Corporation of New Jersey. Filed July 14, 1922. Serial No. 575,028. 5 Claims. (Cl. 10—121.)

2. In a cutting tool, the combination comprising a body member, a cutting member fitted to a slot in said body member, a wedge member mounted on the body



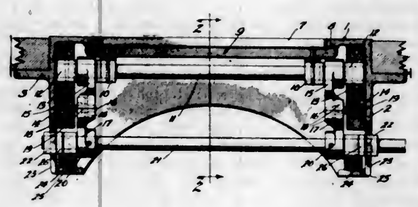
member in engagement with said cutting member, and a unitary fastening member for securing the wedge member to the body member and for holding the associated cutting member in position, said wedge member having a projecting portion fitted to a portion of the groove formed in the fastening member to compel movement of the wedge member in accordance with the movement of the fastening member.

1,571,348. DRILL BIT. CLARENCE O. STEB, Butte, Mont. Filed Dec. 13, 1923. Serial No. 680,534. 1 Claim. (Cl. 255—64.)



A drill having a shank and an enlarged head, said head comprising a pair of diametrically disposed concaved blades separated by diametrically disposed flaring grooves, said grooves forming with the blades reaming edges, and an inverted V-shaped blade diametrically connecting the cutting blades, the inner edges of the V-shaped blade terminating at the inner end of the flaring grooves, and a longitudinal passage disposed centrally within the shank and opening through the center of the cutting edge of the V-shaped blade and into the ends of the flaring grooves, the diametrically disposed cutting blades conforming to the arcs of a circle, the diameter of which is greater than the diameter of the shank, said cutting blades being cylindrical for a portion of their lengths and the remaining portions being directed inwardly and finally merging into the wall of the shank.

1,571,349. INDICATOR. CALEB E. SUMMERS, Dayton, Ohio, assignor to General Motors Research Corporation, Dayton, Ohio, a Corporation of Delaware. Filed Aug. 2, 1923. Serial No. 655,379. 16 Claims. (Cl. 234—1.)

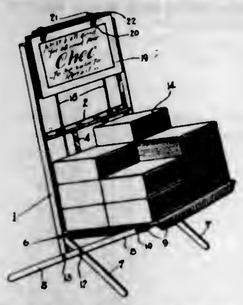


12. In means for indicating and recording torsional vibrations, an arbor having a concentric guiding spindle; an inertia mass journaled on the arbor and means for rotating said inertia mass steadily at the average angular speed of the arbor; a relatively light member rigid with said arbor and projecting therefrom adjacent the inertia mass; an indicating arm pivoted to said inertia mass and to said relatively light member and extending in a direction approximately perpendicular to a radial line therefrom to the axis of the arbor; a stylus projecting from said arm in the direction of the guiding spindle; and a record-receiving member comprising a plate having a record-receiving surface adapted to contact with the stylus; and an opening whereby it may be guided by the spindle and be moved toward and away from said stylus.

1,571,350. MUNTIN-BAR LOCK FOR METAL WINDOWS. LORING WASHBURN, Greenwich, Conn., assignor to S. H. Pomeroy Company, Inc., New York, N. Y., a Corporation of New York. Filed Oct. 27, 1925. Serial No. 65,140. 2 Claims. (Cl. 189—76.)

1. In hollow metal window construction, the combination of a sash rail slotted to receive the muntin bar and with an interlocking tongue, and a muntin bar formed to be engaged by and to interlock with the tongue of the sash rail, the tongue of the sash rail being capable of displacement by bending to permit the introduction of the end of the muntin bar and to be interlocked with the muntin bar.

1,571,351. VALVE. FRANK OWEN WATKINS, Cincinnati, Ohio. Filed Dec. 22, 1923. Serial No. 682,352. 10 Claims. (Cl. 137—21.)

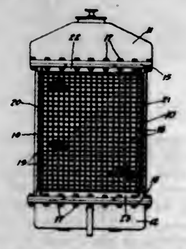


8. A valve mechanism comprising a casing formed with a valve port, a frame projecting from said casing, a guided valve member adapted to close the valve port, a rock shaft floating in said frame, toggle members operatively connecting said valve member and said rock shaft, and bowed springs having their ends disposed in the frame pressing said rock shaft toward said valve port, and shoulders on said toggle members forming an interlock or stop for the same at a predetermined position beyond a dead center.

1,571,352. DISPLAY STAND. EDWARD B. WESTON, Dayton, Ohio, assignor to The Weston Paper and Mfg. Co., Dayton, Ohio, a Corporation of Ohio. Filed Nov. 4, 1924. Serial No. 747,748. 3 Claims. (Cl. 211—24.)

1. A display stand comprising a back or main frame, and supports for holding the back and shelf spaced above the floor with the shelf extended, including a pair

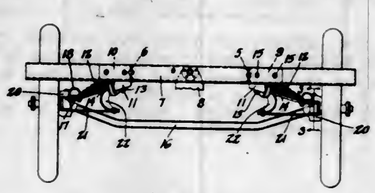
of legs pivoted to the back frame at each side thereof, the pivotal connection of the members of the pairs in



spaced relation, and a pair of stops on one leg of each pair for engaging the other leg and the shelf respectively to hold the parts in extended positon.

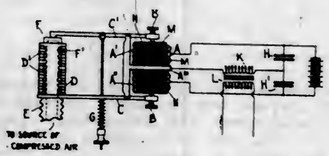
1,571,353. METHOD OF INDICATING THE COPE SIDE OF PATTERNS AND CASTINGS. LEE R. WETHERILL, Roxborough, Philadelphia, Pa. Filed Feb. 5, 1924. Serial No. 690,867. 2 Claims. (Cl. 22—190.)

1. The method of utilizing patterns in casting to indicate the position occupied by the casting in the mold during the casting thereof, which consists in providing the pattern at a selected point on the surface thereof, with a symbol of a character to be impressed on the mold surface, and to be reproduced on the casting, the symbol acting also as a guide to the placing of the pattern in the mold.



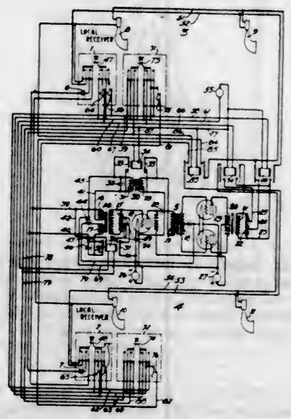
1,571,354. RADIATOR SHIELD FOR MOTOR VEHICLES. CLARENCE J. WHITACRE, Janesville, Wis., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed June 17, 1922. Serial No. 569,105. 5 Claims. (Cl. 293—54.)

1. In combination, a radiator having an intermediate core, an upper water chamber secured to said core by suitable fastening members, and a lower water chamber secured also to said core by suitable fastening members; and a foraminous shield or guard overlying the front of said core and the upper and lower edges of which extend along the joints between said core and said upper and lower water chambers and are held in place by the fastening members whereby the water chambers and the core are secured together.



1,571,355. FRAME AND SPRING SUSPENSION FOR MOTOR VEHICLES. CLARENCE J. WHITACRE, Detroit, Mich., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Oct. 11, 1923. Serial No. 667,954. 5 Claims. (Cl. 280—106.5.)

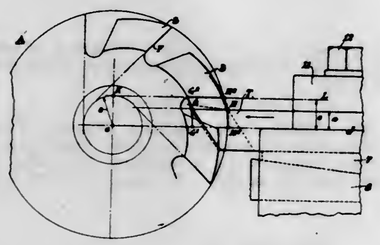
1. In a motor driven vehicle, a suitable frame; two quarter elliptic springs the front ends of which are fixedly secured to said frame adjacent the front end thereof, and which springs extend rearward and outward from their points of support; steering knuckles associated with the front wheels of the vehicle for steering the same; and



means whereby the load borne by said springs is transmitted through their free rear ends directly to said steering knuckles.

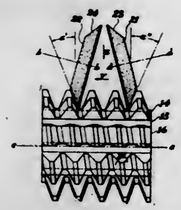
1,571,356. TELEPHONE. RICHARD HUBERT WHITE, London, England, assignor to Radio Corporation of America, a Corporation of Delaware. Filed Sept. 21, 1923. Serial No. 663,985. 17 Claims. (Cl. 179—106.)

1. A telephone in which the movements of the plates of a condenser control the flow of compressed air, substantially as described.



1,571,357. COMMUNICATION SYSTEM. DONALD F. WHITING and HUGH S. TAYLOR, Brooklyn, N. Y., assignors to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Dec. 24, 1924. Serial No. 757,802. 10 Claims. (Cl. 179—1.)

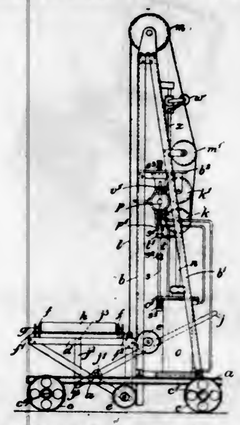
1. A system comprising a receiver, means for transmitting signals, switching means operable for preventing signals transmitted by said first means from returning to



said first means through said receiver, and means for causing operation of said receiver while said switching means is in its operated condition.

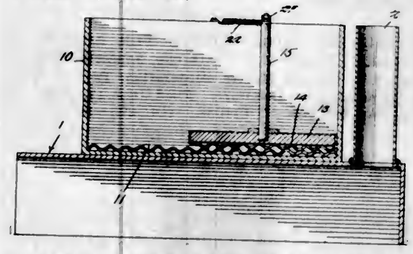
1,571,358. METHOD OF RELIEVING MILLING CUTTER BLANKS. ERNEST WILDHABER, Rochester, N. Y., assignor to Niles-Bement-Pond Company, New York, N. Y., a Corporation of New Jersey. Filed Nov. 25, 1921, Serial No. 517,753. Renewed June 27, 1925. 21 Claims. (Cl. 82—19.)

1. The method of shaping a milling cutter blank, having teeth provided with non-radially arranged cutting faces, to cut a contour other than a straight line parallel to the blank axis, which consists in providing a formed tool having an undistorted cutting contour, in effecting relative rotation between the tool and the blank, and in effecting relative translatory relieving movements between the blank and the formed tool for cutting a distorted contour on the blank teeth which is adapted to cut the undistorted contour of the tool.



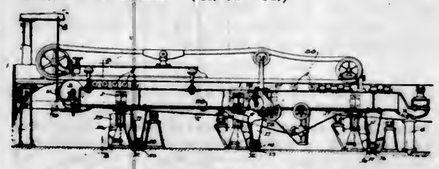
1,571,359. HOB. ERNEST WILDHABER, Brooklyn, N. Y., assignor to Niles-Bement-Pond Company, New York, N. Y., a Corporation of New Jersey. Filed Mar. 13, 1922. Serial No. 543,386. 15 Claims. (Cl. 29—103.)

1. A hob, comprising teeth arranged in the form of a thread, the sides of the teeth being ground to involute helicoids, the helicoids formed on the sides of the teeth having different leads, and the lead of each helicoid being different from the lead of the hob thread.



1,571,360. STACKING MACHINE. ARTHUR FREDERICK WILLIAMS, Leytonstone, England. Filed Aug. 28, 1923. Serial No. 659,701. 4 Claims. (Cl. 214—121.)

1. A stacking machine, comprising a table, means for guiding said table for vertical movement, a tray mounted upon said table, means connecting said tray to said table, said connecting means allowing said tray to tilt towards either of two opposite sides of said table on an axis adjacent to that side, a universally jointed lifting rod adapted to exert an upward thrust beneath the centre of



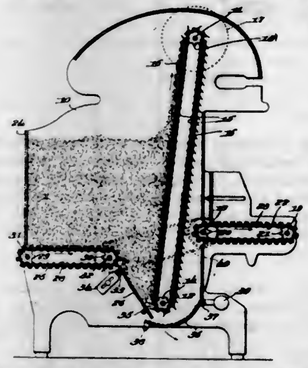
said tray to produce a lateral tilting movement, and a lever operating said lifting rod, said lever being actuated automatically by the ascent of said table.

1,571,361. WASHING MACHINE. JAMES WILLIAMS, Vienna, Ga. Filed Aug. 17, 1925. Serial No. 50,727. 1 Claim. (Cl. 68—20.)

In a washing machine, a water containing tank having a corrugated bottom forming a stationary rubber, a movable rubber mounted on said bottom and having a post rising therefrom and extending above the top of the tank, a lever fulcrumed on said tank intermediate the ends of the lever, the inner end of said lever having a slot and pin connection with said post, and a coiled spring connected with said post and with said tank to assist in the operation of the movable rubber.

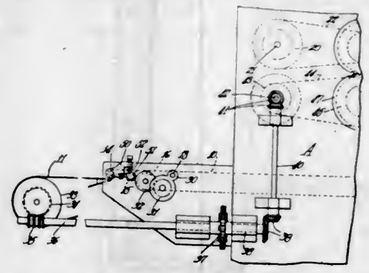
1,571,362. PAPER-MAKING MACHINE. ALONZO ALDRICH, Beloit, Wis. Filed Sept. 8, 1922. Serial No. 586,848. 8 Claims. (Cl. 92—44.)

1. A Fourdrinier machine having a laterally removable table, legs on the front edge of the table having their lower ends provided with rollers, tracks on which said rollers may travel, other rollers on the rear of the table,



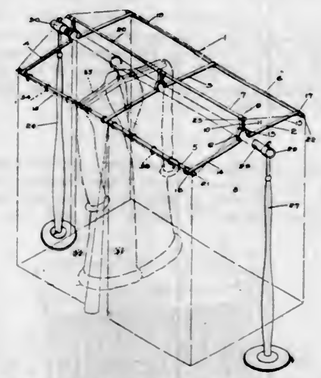
posts at the rear of the table for said rear rollers, other posts at the front end of the table and tracks for said rear rollers extended between said front and rear posts and supported by the same, said rear posts having slightly elevated surfaces for said rear rollers and inclines from said elevated surfaces to the level of said tracks.

1,571,363. FOUNTAIN PEN. JAMES BARKER, Kalamazoo, Mich. Filed Sept. 10, 1925. Serial No. 55,551. 6 Claims. (Cl. 120—42.)



1. In a fountain pen, the combination with the barrel provided with an annular groove spaced from the end thereof, of a cap adapted to telescope with said barrel, said cap having an annular groove and a hole therethrough registering with said grooves when the cap is engaged upon the barrel, an annular spring having overlapping ends arranged in said groove in said cap, and a headed detent secured to the outer end of said spring and arranged through an opening in the inner end thereof to project through said hole in said cap into said barrel groove for detachably securing the cap upon the barrel.

1,571,364. MACHINE FOR FEEDING FIBROUS MATERIAL. EDDO V. BATES, Lowell, Mass. Filed Dec. 5, 1924. Serial No. 754,154. 1 Claim. (Cl. 198—53.)



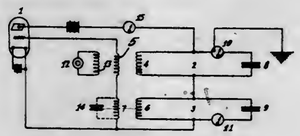
A machine for feeding fibrous material having a stock chest the bottom of which comprises an endless apron arranged to provide a relatively shallow portion of said chest and to support the major portion of the stock therein and move it towards a transferring apron in said chest, and a downwardly and rearwardly extending member arranged to receive stock from said endless apron and direct it into a pocket formed in part by said member; means to adjust the angularity of said member; a transferring apron in said chest arranged to remove stock directed towards it by said endless apron and said member; and means to drive said endless apron.

1,571,365. CONFECTION-COATING MACHINE. ALONZO LINTON BAUSMAN, Springfield, Mass., assignor to National Equipment Company, Springfield, Mass., a Corporation of Massachusetts. Filed Jan. 30, 1924. Serial No. 689,439. 3 Claims. (Cl. 198—20.)

1. In a confection coating machine, a conveyor on the upper stretch of travel of which freshly coated confections are carried and to which the later cling as the conveyor passes to its lower stretch of travel, whereby the coated articles hang upside down from the conveyor as it enters its lower stretch of travel, conveying means in part underlying said stretch to receive the confections therefrom, and means for successively removing the confections from said conveyor when the latter arrives at a predetermined point in its lower stretch of travel, and causing them to fall upon said conveying means in substantially the same sequence and arrangement in which they were carried by said conveyor.

1,571,366. PORTABLE WARDROBE. LILLIAN M. BENDER, San Francisco, Calif. Filed Mar. 9, 1925. Serial No. 14,011. 5 Claims. (Cl. 45—37.)

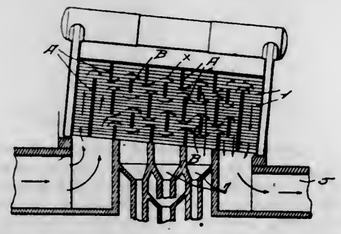
1. In a device of the character described, a supporting frame comprised of a plurality of spacing members, a plurality of longitudinals connecting said spacing members and adjustable as to their length, the said spacing members being provided with aligned gripping means adapted to embrace a supporting bar and to frictionally grip the same to hold said frame in position.



1,571,367. METHOD OF MAKING METAL CANS. RALPH E. BLACKFORD and CHARLES BUTTERFIELD, Middletown, Ohio. Filed Dec. 22, 1924. Serial No. 757,345. 2 Claims. (Cl. 113—116.)

1. The herein described method of making metal cans, which consists, first, in rolling a strip of metal into sub-

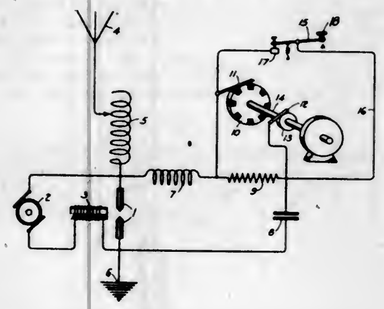
stantially cylindrical form, then welding it along its free longitudinal edges, then expanding it into substantially the desired form, then coating it against the action of air, moisture and chemicals, and then expanding it to a final set.



1,571,368. RELAY. HENRI CHIREIX, Paris, France. Filed Aug. 29, 1921. Serial No. 496,667. 9 Claims. (Cl. 179—171.)

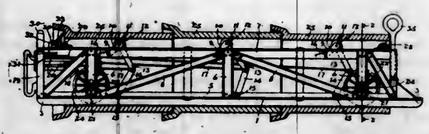
1. A relay for electric currents comprising an oscillation generator having two generating frequencies, means actuated by said currents for suppressing one of said frequencies and causing the generation of the other and contact means adapted to be actuated by the changes in the output of the oscillation generator.

1,571,369. WATER-TUBE BOILER. ALFRED COTTON, St. Louis, Mo., assignor to Heine Boiler Company, St. Louis, Mo., a Corporation of Missouri. Filed Mar. 15, 1920. Serial No. 365,808. 4 Claims. (Cl. 110—98.)



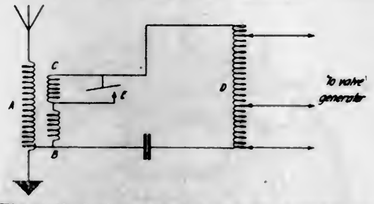
1. A water tube boiler provided with a tube bank composed of substantially horizontally-disposed water tubes, and vertically-disposed transverse baffle elements arranged transversely of the tube bank, one behind the other, and constructed to form solid portions and openings that are disposed so as to cause the gases to split up into a plurality of streams and flow in tortuous or sinuous paths approximately parallel to the tubes constituting said bank.

1,571,370. VARIABLE CONDENSER. GEORGE HOWARD CLARK, Brooklyn, N. Y., assignor to Radio Corporation of America, a Corporation of Delaware. Filed Mar. 3, 1921. Serial No. 449,393. 11 Claims. (Cl. 250—44.)



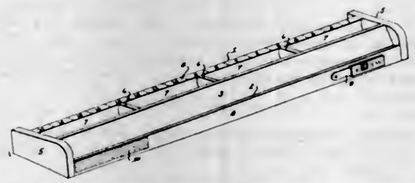
1. A variable electrical condenser, comprising spaced juxtaposed flat and parallel surfaces adjustable as to the area of the surfaces in juxtaposition and as to the distance between the surfaces by manipulation of a single means.

1,571,371. RADIO SIGNALING APPARATUS. GEORGE H. CLARK, Brooklyn, N. Y., assignor to Radio Corporation of America, a Corporation of Delaware. Filed Mar. 17, 1921. Serial No. 452,895. 6 Claims. (Cl. 250—19.)



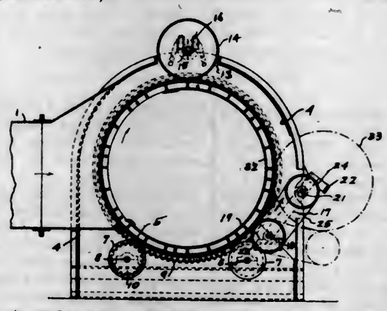
1. The method of signaling with high frequency continuous oscillations which consists in producing electrical oscillations of constant amplitude, diverting portions thereof to an absorbing means at an audio frequency during signaling periods, and diverting all thereof to the absorbing means during non-signaling periods.

1,571,372. PIPE-LAYING DEVICE. ARTHUR G. DALZELL, Toronto, Ontario, Canada. Filed Sept. 19, 1924. Serial No. 738,731. 10 Claims. (Cl. 72—128.)



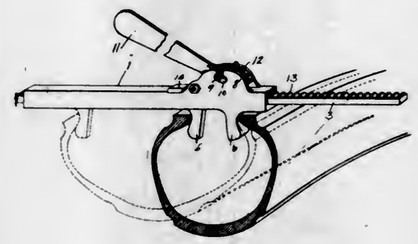
1. A pipe laying device comprising, a rigid frame having an aligning base, and individual means for lifting pipe lengths placed over said frame to hold the bottom inner surfaces in contact with the base.

1,571,373. WIRELESS TRANSMITTING APPARATUS. NORMAN EUSTACE DAVIS, Chene Bourg, near Geneva, Switzerland, assignor to Radio Corporation of America, a Corporation of Delaware. Filed Dec. 3, 1921. Serial No. 519,797. 11 Claims. (Cl. 250—19.)



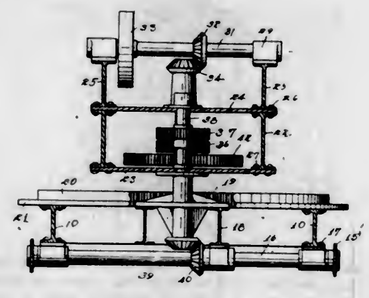
5. The method of operating a wireless telegraph transmitter having a coil in a tuned circuit coupled to an aerial which consists in uncoupling said coil from the aerial to produce a signal and coupling said coil to the aerial to produce a silence period while maintaining the radiated frequency constant.

1,571,374. PLAYING-GAME IMPLEMENT. LEROY L. RICHARD, Visalia, and ROBERT E. RICHARD, Coalinga, Calif. Filed Nov. 11, 1922. Serial No. 600,353. 2 Claims. (Cl. 173—150.)



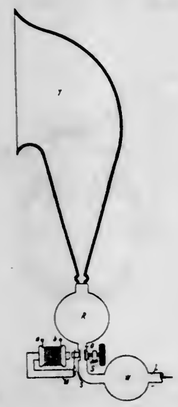
1. A playing-game implement comprising a structure adapted for bodily movement upon a table, said structure having a rear wall against the outer face of which playing pieces may be arranged in a row and the row advanced by the movement of the structure, the upper face of said wall having a scale indicative of the number of playing pieces comprising the row, said structure having also a front wall the outer face of which is formed as a rack to support and conveniently expose playing pieces drawn from the row, and having also a pocket between the two walls adapted for the reception of game counters, and said outer wall having an indicator denoting a personal relation with the player using the implement.

1,571,375. CONDENSER. JOHN C. ROGERS, Houston, Tex., assignor of one-half to Houston Blow Pipe & Sheet Metal Works, Houston, Tex., a Corporation. Filed Nov. 11, 1924. Serial No. 749,142. 9 Claims. (Cl. 19—156.)



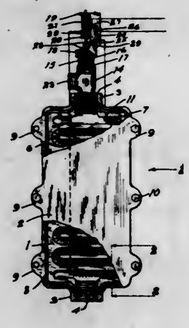
1. A condenser including a flue, a rotatable foraminated drum spanning the flue, a compression roller adjacent the drum, an endless traveling apron adjacent the drum and cooperating therewith to form a roll, the cooperating parts of the drum and apron being movable in opposite directions.

1,571,376. TIRE-SPREADING TOOL. JOHN F. ROGERS, Dayton, Ohio. Filed Mar. 18, 1925. Serial No. 16,482. 9 Claims. (Cl. 152—27.)



6. In a tire spreading tool, two telescopically arranged relatively adjustable bars, tire engaging projections carried by the respective bars and movable toward and from each other by the adjustment of one member telescopically relative to the other, an operating lever, a trunnion stud for said lever, a cam slot in one of the bars in which said trunnion stud engages, said stud being laterally adjustable within said cam slot to shift the lever into and out of engagement with the other bar, said lever being capable of oscillatory movement while engaged with said other bar to relative move said bars, and a detent for temporarily retaining the bars in adjusted relation.

1,571,377. GIRDER CONSTRUCTION FOR EXCAVATORS. GEORGE T. RONK, Des Moines, Iowa, assignor to Speeder Machinery Corporation, Fairfield, Iowa. Filed Mar. 24, 1924. Serial No. 701,518. 4 Claims. (Cl. 212—70.)

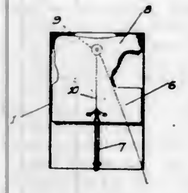


1. An excavator frame comprising spaced and parallel I-beams having the webs of said I-beams arranged vertically, a plate riveted to the lower flanges of said I-beams, a second plate on top of said I-beams, an I-beam on top of said plate and above each of the first said I-beams and in a common plane therewith, the lower flanges of the top I-beams and the upper flanges of the lower I-beams being rigidly secured together and to said second plate.

1,571,378. SOUND-REPRODUCING ARRANGEMENT. WILHELM SCHLOEMILCH, Berlin, Germany, assignor to Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany, a Corporation of Germany. Filed Oct. 23, 1923. Serial No. 670,223. 7 Claims. (Cl. 179—108.)

1. A sound reproducing arrangement comprising a flexible gas conduit and means for electromagnetically altering the cross-sectional area of the conduit in accordance with sound waves.

1,571,379. ELECTRIC WATER HEATER. WILLIAM A. SHARPE, Denver, Colo. Filed Oct. 23, 1924. Serial No. 745,360. 2 Claims. (Cl. 219—39.)

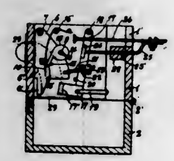


2. An electric water heater, comprising in combination, two complementary, substantially flat plates of insulating material, each of which is provided with a groove extending in a ziz zag from one end to the other, each of said grooves having a substantially semi-circular cross-section, said grooves being so related that when the plates are placed so that the grooved sides are placed face to face, the grooves will register so as to form a cylindrical zig zag opening, said opening terminating at opposite ends of said plates in an enlarged section, a bushing in said section, means for securing said plates together, a helical resistance member in said zig zag opening and exposed terminals electrically connected to the ends of the said resistance member.

1,571,380. ORNAMENT AND METHOD OF MAKING THE SAME. GROVER P. SHEARER, Chicago, Ill., assignor to A. L. Randall Co., Chicago, Ill., a Corporation of Illinois. Filed July 11, 1925. Serial No. 42,907. 10 Claims. (Cl. 41—10.)

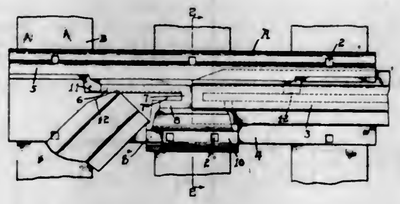
1. An ornament embodying a body portion of a ribbon like strip of flexible material looped and folded into shape upon and about itself and covered with a sizing to render the same stiff and comparatively rigid.

1,571,381. AMUSEMENT NOVELTY. ROY H. SHERMAN, Vallejo, Calif. Filed May 27, 1925. Serial No. 33,100. 3 Claims. (Cl. 46—37.)



1. An amusement novelty comprising an open topped envelope adapted to be placed in a coat pocket, a fanciful element slidable in the envelope, an elastic between the element and envelope for normally holding the former concealed in the envelope and connected to both members adjacent the lower ends thereof, a pull cord attached to the element adjacent its lower end and extending upwardly along the back of the same and a guide eye in the back of the envelope adjacent the upper end thereof through which the cord passes.

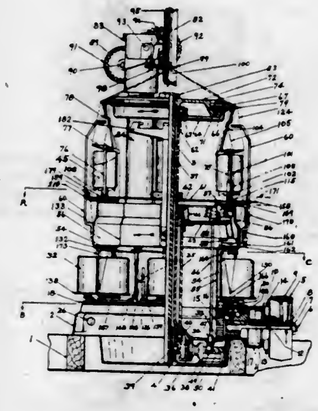
1,571,382. METHOD OF PRODUCTION OF ALLOYED STEEL AND IRON WITH CHROMIUM, MANGANESE, ETC. TORSTEN GEORG STIG and JOSEF EINAR LEONARD STIG, Odda, Norway. Filed Mar. 21, 1924. Serial No. 700,945. 3 Claims. (Cl. 75—1.)



1. Process of producing alloyed steel and iron which consists in bessemerizing an alloy until the carbon content is decreased to the desired degree but not lower than that required to retain a sufficient amount of silicon to avoid the formation of nitrides, pulverizing the product, mixing the pulverized product with a suitable quantity of pulverized metal oxides to oxidize the remaining silicon, introducing the mixture into melted iron or steel to form an alloy, and discharging the alloy thus formed.

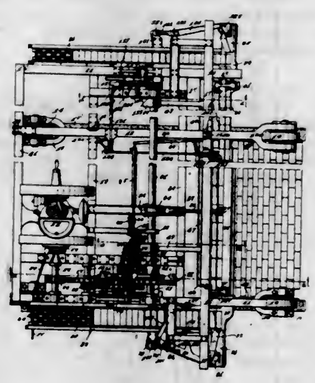
1,571,383. DEVICE USED TO COLLECT COINS. JOHN LOUIS STOWERS, Habana, Cuba. Filed Mar. 25, 1924. Serial No. 701,836. 5 Claims. (Cl. 194—78.)

1. A coin controlled starter, comprising, a casing, a coin slot in the casing, a driving and a driven member in the casing, a spacer rod interconnecting the members, a machine starter rod extending into the casing and bearing against the driven member, a coin chute formed in the drive member in registry with the coin slot, the chute being obliquely terminated at its inner end, a slotted part on the driven member cooperating with the inner end of the chute for retaining a coin of predetermined size between the driving and driven members, a crank rod extending into the casing, a cam on the inner end of the rod, a spring pressed pin on the drive member and in contact with the cam, rocking of the crank causing the driving member to move the driven member through the intermediary of a cam interposed between the members at the lower end of the chute, the driving and driven members being of a form to release the interposed coin on combined movement.



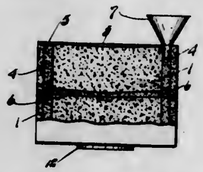
1,571,384. RAIL CONNECTER. NICK SOLTESZ, Toledo, Ohio. Filed Feb. 16, 1925. Serial No. 9,395. 3 Claims. (Cl. 238—225.)

1. A rail connecter comprising a base plate, a pair of side plates, one of said plates being integral with said base plate, an inwardly extending lip on said base plate in clamping relation with the other side plate, and a web integral with said side plates.



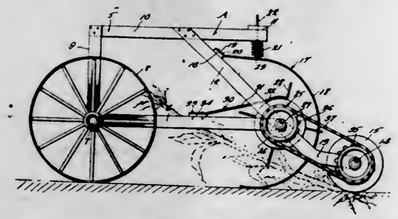
1,571,385. BRAIDING MACHINE. EDWARD K. STANDISH, Stoughton, Mass. Filed Feb. 13, 1924. Serial No. 692,518. 38 Claims. (Cl. 96—5.)

1. A braiding machine comprising a base having a stationary post rising therefrom; a tubular member enclosing said post between its upper end and said base; an independently mounted outer supply carrier; inner supply carriers movable about said post above said outer carrier; driving members for the inner carriers located between said tubular member and the outer carrier; yarn deflecting means attached to said post and to said tubular member and extending outward above said inner carriers; and driving means below said carriers whereby



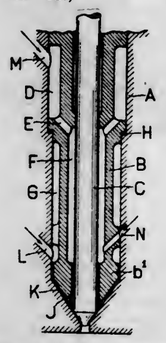
said tubular member and said outer carrier rotate in one direction and said inner carriers and their driving members move in the opposite direction simultaneously.

1,571,386. MACHINE FOR LAYING BRICK PAVING AND THE LIKE. HALVER R. STRAIGHT, Adel, Iowa. Filed June 15, 1922. Serial No. 568,385. 9 Claims. (Cl. 94—47.)



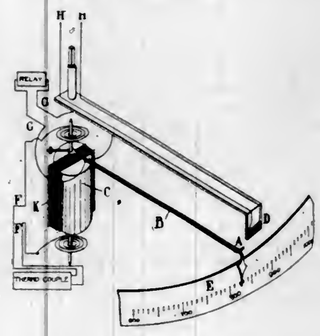
4. A brick laying machine comprising a frame, means for supporting said frame transversely above a road bed, means for adjusting said supporting means to and from each other to accommodate road beds of different widths, a feeding hopper supported at one end of said main frame, means for delivering bricks from said hopper to said road bed, in transversely arranged rows, and means for adjusting the last said means so that the length of the said transversely arranged rows of brick may be varied to meet rond beds of various widths.

1,571,387. CHIMNEY BLOCK. SAMUEL D. VOORHEES, Bay City, Mich. Filed Apr. 23, 1923. Serial No. 633,915. 2 Claims. (Cl. 72—92.)



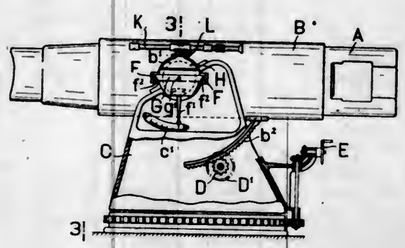
1. A chimney block comprising an outer shell having spaced apart vertically disposed openings therein, and communicating with a continuous channel formed in the top and bottom edges of the block, said channels being pitched from the said openings.

1,571,388. CORN-PICKING MACHINE. SAMUEL A. WALTER, Courtland, Kans. Filed Sept. 17, 1923. Serial No. 663,223. 4 Claims. (Cl. 56—11.4.)



1. In a machine for picking ears of corn from growing corn stalks, a wheeled frame, a ground roller carried by the frame for breaking down the cornstalks, a stripper carried by the frame in front of the roller including a plurality of spaced resilient tines extending longitudinally of the frame for engaging and pulling the ears of corn from the stalks, and means for normally urging the tines in engagement with the ground.

1,571,389. FUEL-INJECTING DEVICE FOR INTERNAL-COMBUSTION ENGINES. OTTO ALT and CURT HELSIG, Kiel, Germany, assignors to Fried. Krupp Aktiengesellschaft Germaniawerft, Kiel-Gaarden, Germany. Filed Mar. 27, 1922. Serial No. 547,324. 2 Claims. (Cl. 123—33.)

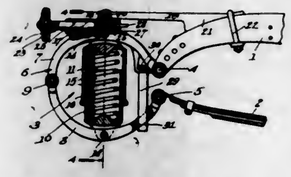


1. In combination with the cylinder of an internal combustion engine, a fuel injecting device in communication therewith, respective chambers in said device for a light auxiliary fuel and a heavy working fuel, a source of injecting air, means whereby on the operation of said device said light fuel is injected into said cylinder under the direct pressure of said injecting air, and means whereby said heavy fuel is injected into said cylinder under the expansive force of an air cushion developed in dependence upon the pressure of the injecting air.

1,571,390. ADJUSTABLE SENSITIVE ELECTRICAL REGULATING DEVICE. WILLIAM HERBERT APTHORPE, London, England, assignor to Cambridge and Paul Instrument Company Limited, Cambridge, England. Filed May 12, 1923. Serial No. 638,546. 1 Claim. (Cl. 171—95.)

In an adjustable sensitive electrical regulating device, a galvanometer having a needle and a scale, a heat emitting element arranged adjacent to a predetermined position on said galvanometer scale and a thermo-couple carried by the said galvanometer needle and capable of being energized when adjacent to said heating element.

1,571,391. SIGHTING DEVICE FOR GUNS. JULIUS BECKER, Essen, Germany, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Filed Nov. 25, 1924. Serial No. 752,159. 4 Claims. (Cl. 89—41.)



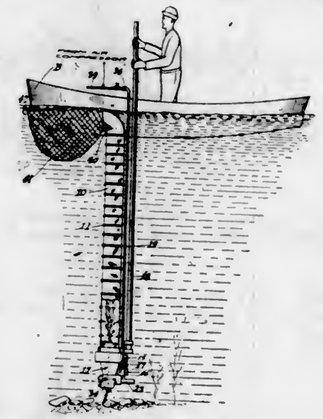
1. A sighting device for guns having a base subjected to rocking movements, such as naval guns, comprising a frame rotatable in lateral direction, an adjustable member rotatable on said frame about a horizontal axis, a gyroscope, a bearing member on which the gyroscope may rotate, a Cardan joint connecting said bearing member to the member adjustable relatively to the frame, the outer axis of said Cardan joint being arranged at right angles to the axis of rotation of said adjustable member, and sighting means carried by the bearing member of the gyroscope.

1,571,392. RAT TRAP. GEORGE W. BROTHERTON, ORLIE O. WEAVER, and NATHAN W. JOHNSON, Hartford City, Ind. Filed July 3, 1924. Serial No. 724,041. 1 Claim. (Cl. 43—76.)

In a rat trap, a body portion including a front compartment and a rear compartment, a closure for normally closing the rear compartment, a closure for the front compartment, means for normally holding the last mentioned closure in its open position, said holding means including a rod connected with the last mentioned closure and adapted to extend through the body portion, an arm carried by the rod and extending upwardly therefrom, a rod having an elongated eye adapted to engage the arm, said last mentioned rod having connection with the first mentioned closure to move the rod forwardly, when the last mentioned closure moves to its open position, said arm having one end thereof bent around one portion of the elongated eye to connect the rod and arm, and said rod adapted to move the arm to its active position and open the second mentioned closure.

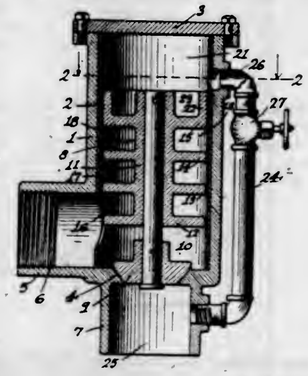
1,571,393. SHOCK ABSORBER. JACK CALDWELL, Los Angeles, Calif., assignor of one-half to Robert Nelson Ferguson, Pasadena, Calif. Filed July 22, 1925. Serial No. 45,230. 11 Claims. (Cl. 293—55.)

1. A shock absorber having a yoke with pivotally connected arms, means to connect the free ends of the arms to the frame and an element connected to the running gear and means inside the yoke between the arms to resist spreading and contraction of the yoke.



1,571,394. , RUNNER FOR CURTAIN RODS. ERNEST CHALMER, Surbiton, England. Filed Dec. 23, 1924. Serial No. 757,651. 11 Claims. (Cl. 156—21.)

1. A runner for a curtain-rod or pole comprising a frame consisting of two members hinged together each member adapted to partly surround the curtain rod, means for locking together the frame-members, a wheel revolubly mounted at the upper end of each frame member, each wheel being adapted to roll along parallel tracks on the curtain rod and means at the bottom of said frame-members for supporting a curtain.

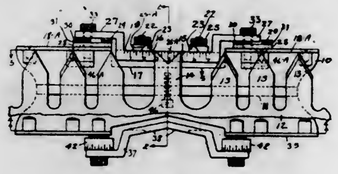


1,571,395. APPARATUS AND METHOD FOR COLLECTING SEAWEED. ANSEL R. CLARK, Los Angeles, Calif. Filed Nov. 6, 1924. Serial No. 748,112. 11 Claims. (Cl. 56—9.)

6. An apparatus for collecting submarine vegetation comprising a tube adapted to be lowered into the water, means for discharging a fluid into said tube adjacent the bottom thereof so as to produce an upward current of

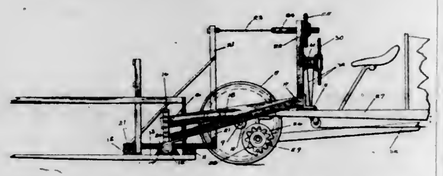
water therein thereby causing said vegetation to be drawn into said tube, and means for cutting off the vegetation disposed within said tube.

1,571,396. PRESSURE-EQUALIZER VALVE. HENRY EDGAR DARROW, Santa Barbara, Calif. Filed Mar. 24, 1924. Serial No. 701,513. 2 Claims. (Cl. 137—139.)



1. In a valve, a valve casing having a chamber, an inlet port, an outlet port and a valve seat between the chamber and the outlet port, a valve floatingly mounted in the chamber and adapted to fit the seat and close the outlet when the pressure is equalized said valve having a plurality of veins spaced apart, means forming a by-pass leading from the chamber above the floating valve member to the outlet below the seat, and means for opening and closing the by-pass.

1,571,397. SAW GAUGE. ARCHIE F. DOUGAN, Cochran, Oreg., assignor of one-half to Pete Hansen, Cochran, Oreg. Filed Feb. 14, 1925. Serial No. 9,179. 6 Claims. (Cl. 33—202.)

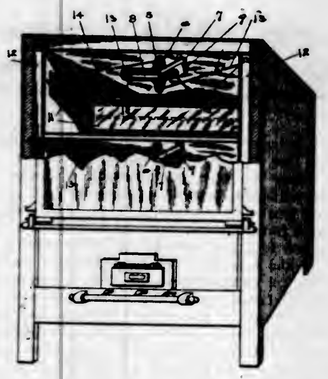


1. In a saw gauge, the combination of a frame; spaced plates on said frame adapted to engage saw teeth; a

guide means for tiltably supporting said guide on said frame between said plates; and swedging gauge arms

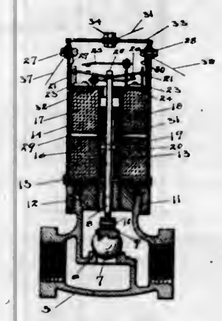
slidably mounted on said guide and adapted to gauge the height to which a raker tooth should be swedged.

1,571,398. HAY SWEEP. MARK W. DURGIN, Corvallis, Oreg. Filed Jan. 16, 1923. Serial No. 612,953. 3 Claims. (Cl. 56—396.)



1. In a hay sweep to be mounted upon a vehicle: a frame; bearing boxes to mount said frame upon the axle of said vehicle; vertical hangers upon the forward end of said frame; a shaft journaled in said hangers; radius rods connecting said shaft with the rearward member of said frame; a second frame supported upon said shaft; and rake teeth upon said second frame.

1,571,399. BOX PARTICULARLY FOR NEEDLE-SHAPED OBJECTS. ERNST CONNY EGELIN, Stockholm, Sweden, assignor to Aktiebolaget Autopins, Stockholm, Sweden, a Corporation. Filed Sept. 7, 1923. Serial No. 661,494. 10 Claims. (Cl. 211—44.)

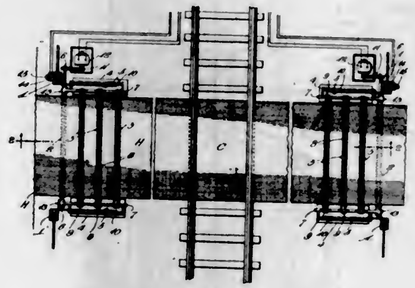


1. A box adapted particularly for needle-shaped objects, such as pins or the like, and for holding and projecting said objects singly into a position which adapts them to be conveniently seized, said box comprising in combination two relatively movable parts, means for forcing said parts apart, a holder for the objects within the box, said holder comprising a rotary member having seats for the objects, an abutment on one of said parts and upon the outer end of which the points of the objects will be caused to strike, means for rotatably and movably mounting the holder in said box, means for imparting rotary motion to said holder and for exerting a pressure on the holder so that it will always have a tendency to move toward said abutment, and a check device intermittently arresting said rotary holder in a position in which an object to be seized is located in front of said abutment, so that upon forcing the aforesaid movable parts of the box together the object is forced out of the holder proper and thus made easily accessible.

1,571,400. THERMOSTATIC OVEN REGULATOR. ARTHUR F. ERICKSON, Portland, Oreg. Filed Dec. 1, 1922. Serial No. 604,326. 2 Claims. (Cl. 236—15.)

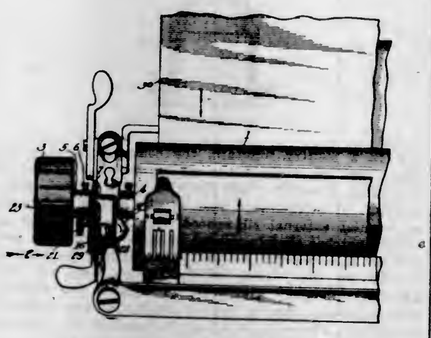
1. In an oven: a plurality of dampers; a rotatable pin; a member freely mounted upon said pin; yieldable connecting rods connecting each of said dampers with said member; a lever secured to said pin; a quadrant coacting with said lever; a thermostatic unit secured upon said pin; and means to connect the free end of said thermostatic unit with said member.

1,571,401. VALVE. ARTHUR F. ERICKSON, Portland, Oreg. Filed Jan. 31, 1924. Serial No. 689,796. 1 Claim. (Cl. 137—139.)



In a valve: a pair of axially alined solenoids; a casing containing said solenoids and projecting thereabove to form a chamber; a valve stem projecting through said solenoids into said chamber; toggle arms mounted within said chamber and adapted to operate said valve stem; and electric contact members adapted to contact with said toggle arms to close electric circuits operating said solenoids.

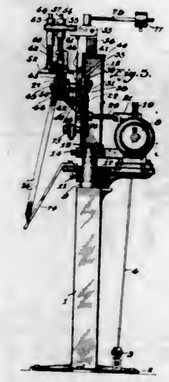
1,571,402. SAFETY GATE. ORA A. FLEMING, Lincoln, Me. Filed July 28, 1924. Serial No. 728,733. 4 Claims. (Cl. 39—6.)



1. A safety highway gate comprising a pair of posts for disposition at the sides of the highway, a rock shaft having its ends disposed at the lower ends of the posts, a pair of arms projecting from and connected to the ends of said rock shaft to be vertically swung thereby, horizontal members between and connected to said arms to

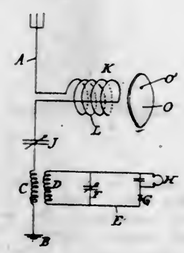
form therewith a gate, and braces for the aforesaid posts disposed in planes parallel to the planes in which the

arms are movable, said arms having portions engaging said braces to hold the arms against inward movement and consequently prevent loosening of the above-named horizontal members.



1,571,403. VERTICAL-SPACE REGISTER FOR TYPEWRITERS. LOYD R. FULTON, Huntington Park, Calif. Filed Apr. 2, 1924. Serial No. 703,690. 2 Claims. (Cl. 197—119.)

1. A space register for typewriters having a platen and a platen shaft, an indicating wheel rigidly mounted on a shaft, a loose gear rotatably mounted on the indicating wheel shaft, a gear drive from said gear to the platen shaft, and a frictional connection between the indicating wheel and the gear on the indicating wheel shaft whereby the indicating wheel may be set independent of the rotation of the platen.



1,571,404. MACHINE FOR PLACING FLIPPER STRIPS ON TIRE BEADS. WALTER GARDOCKY, Conshohocken, Pa. Filed Jan. 21, 1925. Serial No. 3,757. 12 Claims. (Cl. 154—9.)

1. A machine for placing a flipper strip about a tire bead comprising a plurality of rollers and means for driving the same, a tiltable carriage provided with rollers cooperating with the first of said mentioned rollers, a guide block positioned between two of the first mentioned series of rollers and a guide plate positioned above said guide block and extending angularly with relation

to the axes of said rollers for correctly positioning the flipper strip across the bead as it is fed through the rollers.

1,571,405. APPARATUS FOR WAVE CHANGING IN RADIOSIGNALING. ALFRED NORTON GOLDSMITH, New York, N. Y., assignor, by mesne assignments, to Radio Corporation of America, a Corporation of Delaware. Filed July 31, 1919. Serial No. 314,479. 8 Claims. (Cl. 171—242.)

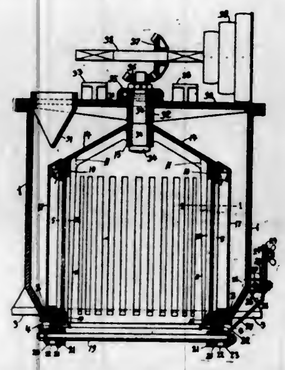
1. A variable inductance for high frequency currents comprising, a pair of spaced coaxial parallel air core coils connected together and a flat shield of conducting material located between said coils, said coils and shield being slidable relative to each other in a direction transverse to the axis of the coils.

1,571,406. INJECTOR. JOAQUIN MORET GONZÁLEZ, Marcane Termino, Palma Soriano, Cuba. Filed Oct. 14, 1924. Serial No. 743,627. 5 Claims. (Cl. 162—1.)

1. In an injector, the combination of a steam inlet, a water inlet, a steam chamber, a plurality of water chambers, an overflow chamber, a starting nozzle providing communication between the steam chamber and the overflow chamber, a steam nozzle providing communication between the steam chamber and the water chambers, and valve operating means adapted when in one position to shut off the supply of steam to the steam chamber, to open the steam nozzle and close the

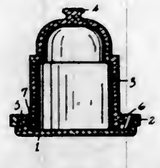
starting nozzle when in another position, and to establish communication between the steam inlet, steam chambers and overflow chamber when in a position inter-

mediate said other two positions the pressure in said overflow chamber being less than atmospheric pressure when said valve operating means is in its intermediate position.



1,571,407. PORTABLE LAMP. WALTER C. GREIST, New Haven, Conn., assignor to The Greist Manufacturing Company, New Haven, Conn., a Corporation of Connecticut. Filed Mar. 12, 1924. Serial No. 698,739. 6 Claims. (Cl. 240—52.)

1. A portable lamp having a base, a clamping member to engage said base, a plurality of pairs of slidably engaged members constituting the stem of the lamp, one pair of said members engaging the base and the other pair of said members engaging the clamping member, said pairs of slidable members being spaced apart and so arranged relatively to each other as to form a closed hollow stem of rectangular cross section, and yielding means enclosed by said stem for drawing the base and clamping member together.



1,571,408. UNIVERSAL GRAIN-CUTTING MACHINE. DAVID GUELBAUM, Syracuse, N. Y. Filed Apr. 15, 1925. Serial No. 23,300. 6 Claims. (Cl. 83—6.)

1. A universal grain cutting machine, comprising a cylindrical grain hopper with an open top and a tapered bottom flanged inside and having a fastened on cover on top, a stationary cylinder with an open top and a flanged bottom fastened to the bottom flange of said hopper and having longitudinal slots for passage of the grain and knives fastened inside along said slots, a ring on top of said stationary cylinder resting on ball bearings and a ring on bottom of said cylinder connected to said top ring by baffles, means for turning said rings with the fastened on baffles for regulating said grain passages, a rotor cylinder inside of said stationary cylinder with an open bottom and a closed dome on top with a hub in centre and having longitudinal slots with fastened on knives and baffles outside rotating in sliding contact over the knives and baffles on said sta-

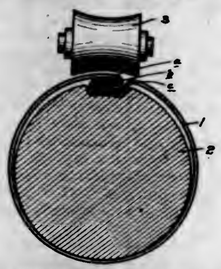
tionary cylinder, means for supporting and rotating said rotor cylinder, means for micrometrically adjusting and indicating the opening width of said grain passages, substantially as and for the purpose specified.

1,571,409. POULTRY FEEDER. IRA P. HAYES, Eckford, Mich. Filed Oct. 10, 1925. Serial No. 61,694. 2 Claims. (Cl. 119—52.)

1. In a poultry fountain, the combination of a pan-like trough of earthenware having spaced integral rests projecting inwardly from the side wall thereof, and a reservoir of earthenware open at the bottom and having an annular external rib spaced from its lower edge and having notches therein spaced to receive said rests when brought into register therewith permitting the reservoir to rest on the bottom of the trough, said rib being adapted to engage said rests to support the reservoir with its lower edge in spaced relation to the bottom of the trough, the rests engaging the sides of the reservoir constituting positioning means for the reservoir.

1,571,410. HOLDER FOR CIGARETTES AND CIGARS. OSCAR HENDLER, Vienna, Austria. Filed Dec. 4, 1923. Serial No. 678,506. 2 Claims. (Cl. 131—10.)

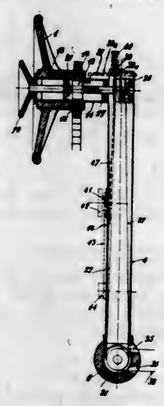
1. A holder for cigarettes and cigars, comprising in combination a hollow stem, an abutment surface at one end of the said stem, a cap having a central bore and capable of being placed on the said end of the stem



and moved axially with respect to the latter and an elastic annular packing member in the said cap capable of being pressed against the said abutment surface whereby the inner diameter of the annular packing ring is reduced and its inner surface is pressed firmly against the cigarette or cigar, whilst when the cap is removed the said inner diameter is again increased owing to the elastic properties of the ring so that the end of the cigarette or cigar can be easily removed, as and for the purpose set forth.

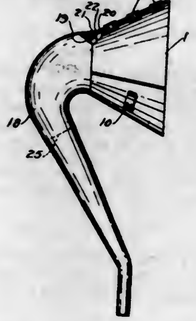
1,571,411. RESILIENT WHEEL. PINK D. HOLLAND, Saratoga, Tex. Filed May 26, 1924. Serial No. 715,935. 1 Claim. (Cl. 152—29.)

A resilient wheel including a hub, radiating spokes associated with said hub and whose inner ends are spaced from the hub, coil springs surrounding the inner ends of the spokes, one end of each spring being attached to the respective spoke and the other end of each spring being secured to the hub, the onter end of each spoke being formed with an arcuate notch forming a seat, a spiralled arcuate rib in each seat, a rim formed of spiralled spring wire mounted in the spoke seats, the ribs of said seats fitting between turns of said rim to prevent the rim from creeping on the spokes.



1,571,412. METHOD OF PRODUCING SHEET-METAL PIPE. RICHARD IRVIN, Knoxville, Pa. Filed Dec. 21, 1922. Serial No. 608,306. 1 Claim. (Cl. 29—188.)

The method herein described of producing sheet-metal pipe which consists in shaping from lead-clad metal a blank with interlocked edges and by pressure alone and without any addition of heat, other than that incident to pressure, welding together the interlocked edges.

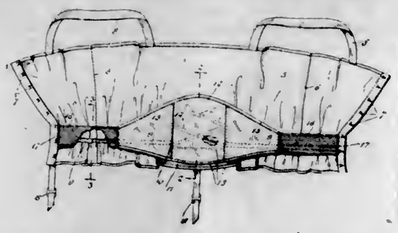


1,571,413. DOUBLE CONTROL OF THE COMBINED TYPE FOR AEROPLANES AND FOR LIKE PURPOSES. PAUL NICOLAS CLAUDE JAMES, Paris, France. Filed May 2, 1924. Serial No. 710,658. 6 Claims. (Cl. 244—29.)

1. An inter-related double steering device for airplanes having two inter-related steering stations, comprising: for each station control elements whereof each is mounted loose with respect to the corresponding steering mechanism, together with a clutching device for clutching the said control element with the said steering mechanism and disengaging the same; means connecting together all of the said clutching devices of the two

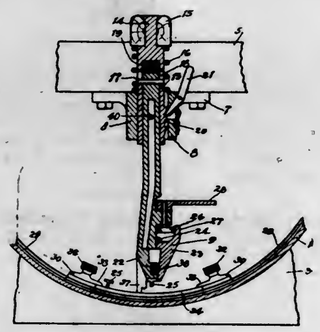
stations and so disposed that in the clutched position of the clutches of a given station, the clutches of the other station shall be in the unclutched position; and actuating means provided at each station for actuating the said connecting means from either of the stations at will, in order to effect the clutching of the clutches of the said station.

1,571,414. AMPLIFIER. VERNON W. JENSEN, Seattle, Wash. Filed Mar. 3, 1924. Serial No. 696,434. 1 Claim. (Cl. 181—27.)



In an amplifier, a plurality of sections conforming to the shell of a frustrum of a cone, said sections being hinged together at their edges with the edge of one section extending beyond the center of the hinge to form a lap joint and one of said joints having the hinges omitted and being provided with a snap for holding the sections together.

1,571,415. BRASSIÈRE. AUGUSTA S. JOHNSON, Brooklyn, N. Y., assignor to Model Brassiere Co., Inc., New York, N. Y., a Corporation of New York. Filed Feb. 21, 1923. Serial No. 620,423. 3 Claims. (Cl. 2—42.)

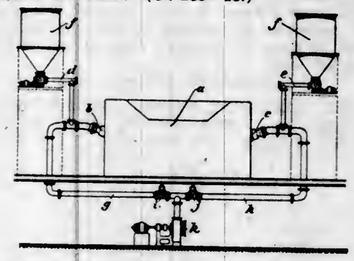


1. A garment comprising a body, a diaphragm reducing pad on the inside of said body at the front thereof and having its lower portion attached thereto and being other-

wise free from said body, flaps extending from opposite sides of said section and elastic bands extending from

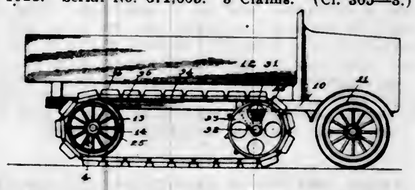
said flaps to the outer edges of said body and attached thereto, said flaps and bands being otherwise free from said body.

1,571,416. MULTIGRAPH RAIL-SOLDERING MACHINE. ALFRED PETER JOHNSTON, Winnipeg, Manitoba, Canada. Filed Aug. 11, 1922. Serial No. 581,201. 4 Claims. (Cl. 113—59.)



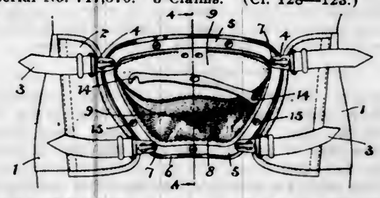
1. In a multigraph rail soldering machine, the combination with an electrotype or stereotype plate and a rail, of a suitably mounted partial drum adapted to receive the plate, means for releasably fastening the plate to the drum, a rotatably mounted shaft passing axially through the drum, a clamp carried by the shaft and supporting the rail, said clamp being movable towards and away from the plate and means for heating the rail carried by the clamp.

1,571,417. FILTERING MEDIUM. EDWARD M. KNIGHT, Brooklyn, N. Y. Filed June 9, 1922. Serial No. 567,226. 1 Claim. (Cl. 210—204.)



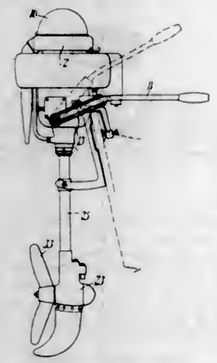
As a new article of manufacture a filter in which the layers of material are designed to be maintained in a vertical position, comprising three layers of material, consisting of two outer vertical layers of fibrous material and one interposed layer of carbon, the whole being pressed and indented along certain lines on one side, thereby forming cells on the opposite side, the walls of the indentations of the carbon layer following closely the indentations of the fibrous material whereby a contacting locking means is provided for the carbon layer so that the thickness of the combined layers is uniform throughout, a maximum filtering surface provided, and the carbon layers secured from displacement and disintegration.

1,571,418. COAL DUST AND AIR SUPPLY IN SIEMENS-MARTIN AND LIKE FURNACES. RICHARD KRAUSS, Frankfort-on-the-Main-Rodelheim, Germany, assignor to Firm of Fellner & Ziegler, Frankfort-on-the-Main, Germany. Filed May 10, 1924. Serial No. 712,391. 5 Claims. (Cl. 263—15.)



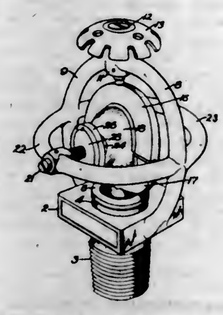
4. The combination with an open-hearth furnace having means to supply air to each furnace head and means to supply pulverized fuel to such air; in combination with air valves controlling the supply of air and means to connect the valve operating device and the fuel supply devices to compel a reversal of the furnace in the following order, first cut off the fuel supply and thereafter the air at one furnace head and simultaneously supply air to the other furnace head and then fuel, and means to maintain a scavenging flow of air through the air supply when in closed condition.

1,571,419. ATTACHMENT FOR TRACTION WHEELS. CHARLES R. LANUS, Pocahontas, Iowa. Filed Nov. 14, 1923. Serial No. 671,605. 5 Claims. (Cl. 305—8.)



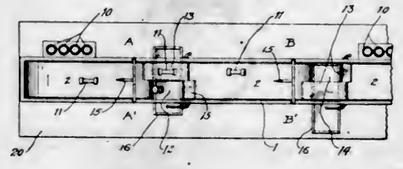
1. In combination, a pair of semi-annular traction members, each formed with an outwardly extending circumferential rib, the edges of said ribs terminating in laterally extending annular flanges, means for detachably securing the adjacent ends of said annular members together, a series of lugs for the laterally extending annular flanges, a linked tread member formed of a series of tread blocks, each provided with a curved plate designed to fit and receive the outer surface of said annular rib, each edge of said curved plate being provided with a link for connecting said tread blocks together, the upper edge of said links being designed to engage the outer surface of said laterally extending annular flanges, each of said links being provided with a laterally extending rib to engage the lugs of said laterally extending annular member.

1,571,420. ABDOMINAL SUPPORT. THOMAS J. LE CRAS, Toronto, Ontario, Canada. Filed Nov. 1, 1924. Serial No. 747,370. 3 Claims. (Cl. 128—123.)



1. An abdominal support, comprising a rigid padded frame of a substantially quadrangular form adapted to cover the main central region of the abdomen, a belt adapted to hold said frame to an adjusted position on the body, a pad hinged to the top of said frame to swing inwardly and of a shape adapted to raise the viscera, and means for rigidly securing the pad in the inward position.

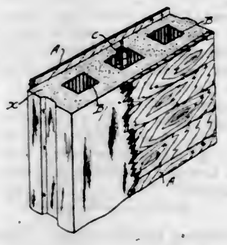
1,571,421. STARTING AND STEERING DEVICE FOR BOAT-PROPELLING APPARATUS. ARVID LIND, Stockholm, Sweden. Filed May 15, 1924. Serial No. 713,598. 5 Claims. (Cl. 715—18.)



1. A starting and steering device for boat propelling apparatus, comprising a tiller adapted to swing in two directions forming an angle with each other, a member adapted to be rotated by the tiller when the latter is moved in one direction and to remain inoperative when the tiller is moved in the other direction, a toothed sector on said member, an intermediate lever engaged by said sector, a toothed sector pivoted on said lever, a motor shaft, a pinion on the latter adapted to be engaged by the last mentioned toothed sector for starting the motor when the tiller is swung in one direction, a sleeve surrounding the motor shaft, a propeller hub on the lower end of the sleeve, a pinion secured to the upper end of said sleeve, a rack engaging said pinion and secured to the tiller so as to be operated by the latter for turning the propeller hub when the tiller is swung in the other direction.

1,571,422. SPRINKLER HEAD. OSWALD J. LUBBOCK, Alameda, Calif. Filed Nov. 26, 1923. Serial No. 676,927. 11 Claims. (Cl. 169—38.)

1. A sprinkler head having a yoke comprising a pair of rings lying in perpendicular planes, a strut disposed between opposite sides of one of said rings, and means for preventing the collapse of the strut impinged against the other ring.

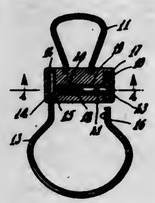


1,571,423. CARRIER-DISTRIBUTING APPARATUS FOR PNEUMATIC-DISPATCH SYSTEMS. JAMES G. MACLAREN, Mamaroneck, N. Y., assignor, by mesne assignments, to The Lamson Company, a Corporation of Massachusetts. Filed Feb. 24, 1921. Serial No. 447,463. 8 Claims. (Cl. 198—83.)

1. A conveyor system comprising means for moving articles along a path of substantial width, said path having a gap at a predetermined point, into which such articles may fall, means for dividing articles moving along said path into laterally separated groups, and independent members adapted respectively to bridge opposite lateral portions of the gap whereby to convey the corresponding group of articles across the gap.

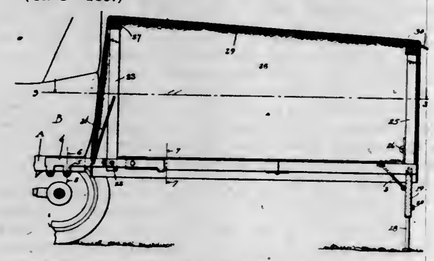
6. A conveyor system comprising a moving conveyor, means for delivering articles to the conveyor, means near the terminus of said conveyor for segregating articles carried thereby into distant groups, means actuable selectively to permit or to prevent delivery of one or more of said groups of articles at the terminus of the conveyor, and a receptacle movable transversely of the direction of movement of the conveyor and positioned to receive articles delivered at the terminus of the conveyor, said receptacle having a plurality of separated compartments.

1,571,424. MOLDING APPARATUS. FREDERICK A. K. MARX, St. Louis, Mo. Filed May 25, 1925. Serial No. 32,655. 3 Claims. (Cl. 25—128.)



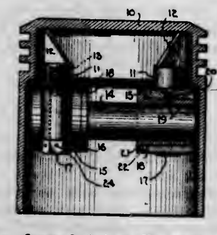
1. A molding apparatus for plastic substances, comprising a mold, and a core shell formed of corrugated cardboard or other inexpensive, non-rigid material arranged inside of said mold and adapted to be left in the article or structure formed in the mold.

1,571,425. KEY HOLDER. JOSEPH MATALONI, Mason City, Iowa. Filed May 5, 1925. Serial No. 28,108. 1 Claim. (Cl. 59—99.)



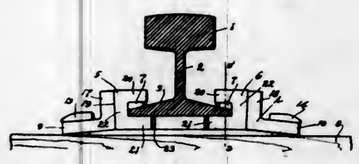
A key-holder comprising a block having two parallel transversal bores therein and a horizontally disposed bore, a wire loop having a circumferential groove in one of its shanks, and a notch in the other, a pin in said block engaging said groove for holding said loop in said block against withdrawal but permitting a rotation of the

same, a spring controlled pin in said horizontal bore adapted to engage the notch in said loop shank for locking the parts in their engaged positions and a means



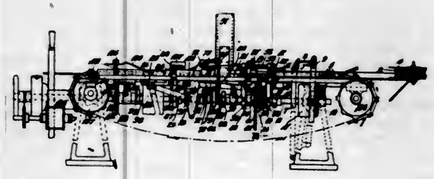
for breaking said engagement to allow an opening and rotation of said loop for the attachment and removal of keys.

1,571,426. COLLAPSIBLE BED AND TENT FOR AUTOMOBILES. MARK B. MITCHELL, Spring Prairie, Wis. Filed Sept. 14, 1923. Serial No. 662,707. 1 Claim. (Cl. 5—119.)



In a device of the class described, a folding bed and tent comprising a frame including head and foot sections hingedly connected together, brackets carried by the frame of an automobile and extending rearwardly therefrom, the forward ends of said brackets being U-shaped in cross-section and adapted to support the side bars of the head section of said frame, the aforesaid U-shaped portions of said brackets having their inner sides bent to form L-shaped supports, said last mentioned side bars being pivotedly connected to said brackets, vertical standards secured to said brackets, bracing means between said standards and brackets, additional standards pivotedly supported at the outer ends of the foot section of said frame, a canopy adapted to extend over said standards and supporting means for the foot section of said frame comprising a pair of pivoted tubular arms, bars adjustably received in said tubular arms and diagonal bracing elements between the frame and said arms, substantially as described.

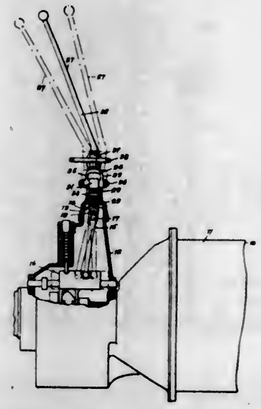
1,571,427. PISTON FOR ENGINES. TITTISANNA ALFRED MORRIS, Sugarloaf, Pa. Filed Oct. 14, 1922. Serial No. 594,571. 2 Claims. (Cl. 74—108.)



1. A piston formed internally with spaced integral bosses having threaded sockets, a pair of spaced wrist pin bearing boxes having spaced lateral ears engaged against said bosses, threaded securing members passing through said ears and into said sockets, a bushing within each bearing box, the adjacent ends of said bushings being formed with flanges adapted to bear against the opposite sides of a connecting rod mounted upon the wrist pin, whereby to prevent side slap.

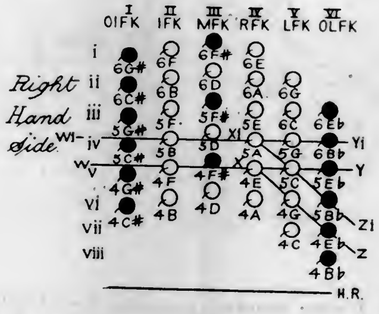
1,571,428. RAIL ANCHOR. EDGAR NALDRETT, Edmonton, Alberta, Canada. Filed Mar. 27, 1925. Serial No. 18,909. 10 Claims. (Cl. 238—304.)

1. The combination with a track rail and tie, of a tie plate underlying the rail and secured to the tie and provided with upstanding guides and members anchored to the edges of the rail base and slidably engaging the guides, said guides and members permitting of a movement of the rail in a vertical direction and preventing any lateral displacement thereof during such movement.



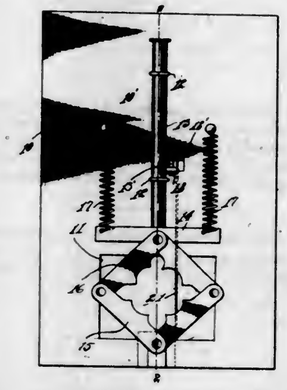
1,571,429. MEANS FOR ATTACHING HINGED LIDS TO RECTANGULAR METAL BOXES. ANDREW FRANCIS NEY, East Kew, Victoria, Australia, assignor to Bryant and May Proprietary Limited, Richmond, Victoria, Australia. Filed Oct. 9, 1922. Serial No. 593,397. 20 Claims. (Cl. 29—11.)

20. In an apparatus for hinging lids to metal boxes having pairs of alined pops, a box support, mechanism for intermeittently moving the support, a wire feed, means to guide one end of a wire into the forward pop of a box, means for severing the inserted wire to form a hinge, a spring actuated clamp adapted to move the pin into alinement with the rear pop of the box, a slide carrying the clamp, means to reciprocate the slide, a gripping member carried by the slide adapted to engage the forward end of the pin during the movement of the slide in one direction, means to raise and lower the gripping member, a lid support at one side of the box, means for elevating the lid support to bring one edge of the lid into engagement with the hinge pin, means to move the lid into open position, means to bend the engaged edge of the lid around the pin, and a guide mounted in the path of the lid to fold the latter onto the box.



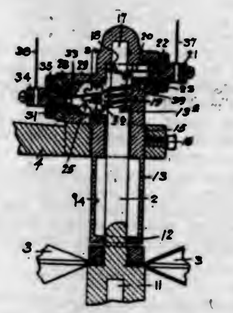
1,571,430. TRANSMISSION CONTROL. CECILIO S. PEREA, Brooklyn, N. Y. Filed Dec. 5, 1924. Serial No. 754,082. 10 Claims. (Cl. 74—39.)

1. The combination with the gear shifting bar of an automobile transmission, of an operating lever having its lower end detachably mounted on the bar, said lever pivotally supported in upstanding position for being shifted according to different selective adjustments and said lever having movably jointed parts connected to the bar for



operating with the operation of the lever to move the bar to operate the transmission without changing the standard adjustments of the transmission.

1,571,431. CONCERTINA KEYBOARD. FRANCIS STANHOPE PITT-TAYLOR, Blackpool, England. Filed Feb. 25, 1925. Serial No. 11,510. 8 Claims. (Cl. 84—376.)

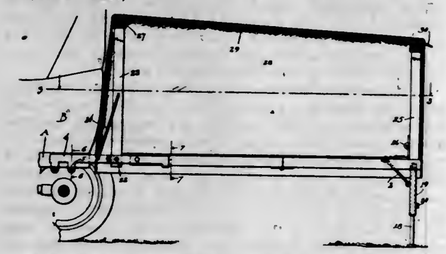


3. In a concertina having two chromatic keyboards, one keyboard particularly adapted to one hand, the other keyboard to the other hand of the player, having its keys grouped in parallel rows parallel to the handrail, the rows being placed one above the other so as to form six lines of keys which are perpendicular to the straight line of the handrail, each row in the body of the keyboard having six keys, the twelve different notes of each octave being sounded by two sets of six keys, one set being placed above the other, each set being distributed over three transverse rows of keys and each octave over four rows of keys, so that one note is sounded by one key in one transverse row, another note is sounded by another key in the second transverse row, and the remaining notes in the semi-octave are sounded by the remaining keys in the third transverse row, having one set of every pair to sound the notes B flat, C, A, D, B, and C sharp, and the other set of every pair to sound the notes E flat, G, E, F sharp, F, and G sharp, so that the keys of every alternate row sound
name and in the same position that on
do differ by belonging to octaves of h
tion in the treble or bass.

1,571,432. ANIMAL TRAP. HARVEY A. POWELL, Haleyville, Ala. Filed June 2, 1925. Serial No. 34,372. 3 Claims. (Cl. 43—85.)

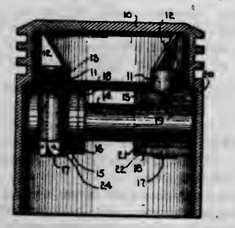
1. An animal trap including a housing having an opening, a frame disposed opposite the opening and including pivotally connected links, one of the pivotal connections being movably connected to the housing, a rod slidable on the housing and pivotally connected to another pivotal connection of the frame, means for normally urging the frame into collapsed position, trip means for holding the frame in open position, and a detent engaging with the rod for holding the frame in collapsed position after the trap has been sprung.

1,571,433. CURRENT METER. WILLIAM G. PRICE, Yakima, Wash., assignor to W. & L. E. Gurley, Troy, N. Y., a Corporation of New York. Filed Nov. 21, 1922. Serial No. 602,446. 4 Claims. (Cl. 200—19.)



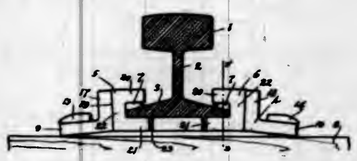
2. A current meter comprising an electric make-and-break device comprising an insulated gear wheel having an annular groove, a metal shaft carrying said gear wheel, a metal lug on said shaft projecting into said groove, and a resilient electric contact member resting in said groove and making and breaking electric contact with said lug as said gear wheel revolves.

same, a spring controlled pin in said horizontal bore adapted to engage the notch in said loop shank for locking the parts in their engaged positions and a means



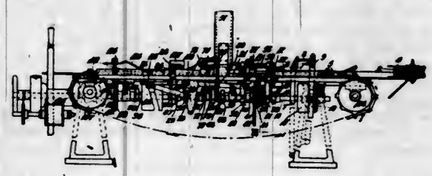
for breaking said engagement to allow an opening and rotation of said loop for the attachment and removal of keys.

1,571,426. COLLAPSIBLE BED AND TENT FOR AUTOMOBILES. MARK B. MITCHELL, Spring Prairie, Wis. Filed Sept. 14, 1923. Serial No. 662,707. 1 Claim. (Cl. 5—119.)



In a device of the class described, a folding bed and tent comprising a frame including head and foot sections hingedly connected together, brackets carried by the frame of an automobile and extending rearwardly therefrom, the forward ends of said brackets being U-shaped in cross-section and adapted to support the side bars of the head section of said frame, the aforesaid U-shaped portions of said brackets having their inner sides bent to form L-shaped supports, said last mentioned side bars being pivotedly connected to said brackets, vertical standards secured to said brackets, bracing means between said standards and brackets, additional standards pivotedly supported at the outer ends of the foot section of said frame, a canopy adapted to extend over said standards and supporting means for the foot section of said frame comprising a pair of pivoted tubular arms, bars adjustably received in said tubular arms and diagonal bracing elements between the frame and said arms, substantially as described.

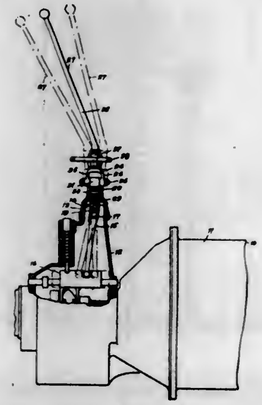
1,571,427. PISTON FOR ENGINES. TITTISANNA ALFRED MORRIS, Sugarloaf, Pa. Filed Oct. 14, 1922. Serial No. 594,571. 2 Claims. (Cl. 74—108.)



1. A piston formed internally with spaced integral bosses having threaded sockets, a pair of spaced wrist pin bearing boxes having spaced lateral ears engaged against said bosses, threaded securing members passing through said ears and into said sockets, a bushing within each bearing box, the adjacent ends of said bushings being formed with flanges adapted to bear against the opposite sides of a connecting rod mounted upon the wrist pin, whereby to prevent side slap.

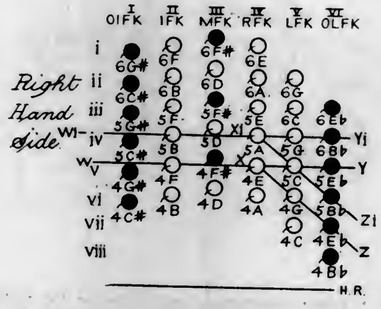
1,571,428. RAIL ANCHOR. EDGAR NALDRETT, Edmonton, Alberta, Canada. Filed Mar. 27, 1925. Serial No. 18,909. 10 Claims. (Cl. 238—304.)

1. The combination with a track rail and tie, of a tie plate underlying the rail and secured to the tie and provided with upstanding guides and members anchored to the edges of the rail base and slidably engaging the guides, said guides and members permitting of a movement of the rail in a vertical direction and preventing any lateral displacement thereof during such movement.



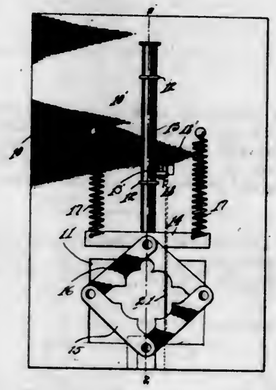
1,571,429. MEANS FOR ATTACHING HINGED LIDS TO RECTANGULAR METAL BOXES. ANDREW FRANCIS NEY, East Kew, Victoria, Australia, assignor to Bryant and May Proprietary Limited, Richmond, Victoria, Australia. Filed Oct. 9, 1922. Serial No. 593,397. 20 Claims. (Cl. 29—11.)

20. In an apparatus for hinging lids to metal boxes having pairs of alined pops, a box support, mechanism for intermittently moving the support, a wire feed, means to guide one end of a wire into the forward pop of a box, means for severing the inserted wire to form a hinge, a spring actuated clamp adapted to move the pin into alinement with the rear pop of the box, a slide carrying the clamp, means to reciprocate the slide, a gripping member carried by the slide adapted to engage the forward end of the pin during the movement of the slide in one direction, means to raise and lower the gripping member, a lid support at one side of the box, means for elevating the lid support to bring one edge of the lid into engagement with the hinge pin, means to move the lid into open position, means to bend the engaged edge of the lid around the pin, and a guide mounted in the path of the lid to fold the latter onto the box.



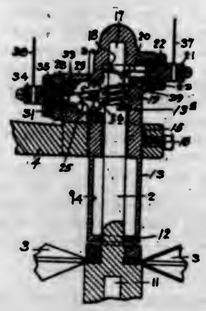
1,571,430. TRANSMISSION CONTROL. CECILIO S. PEREA, Brooklyn, N. Y. Filed Dec. 5, 1924. Serial No. 754,082. 10 Claims. (Cl. 74—39.)

1. The combination with the gear shifting bar of an automobile transmission, of an operating lever having its lower end detachably mounted on the bar, said lever pivotally supported in upstanding position for being shifted according to different selective adjustments and said lever having movably jointed parts connected to the bar for



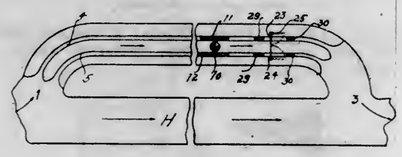
operating with the operation of the lever to move the bar to operate the transmission without changing the standard adjustments of the transmission.

1,571,431. CONCERTINA KEYBOARD. FRANCIS STANHOPE PITT-TAYLOR, Blackpool, England. Filed Feb. 25, 1925. Serial No. 11,510. 8 Claims. (Cl. 84—376.)



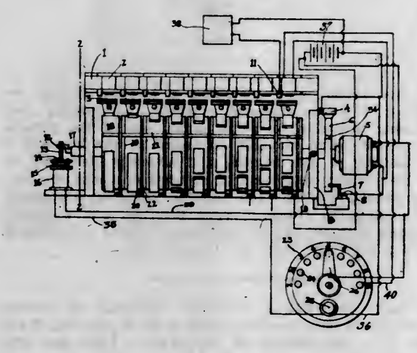
3. In a concertina having two chromatic keyboards, one keyboard particularly adapted to one hand, the other keyboard to the other hand of the player, having its keys grouped in parallel rows parallel to the handrail, the rows being placed one above the other so as to form six lines of keys which are perpendicular to the straight line of the handrail, each row in the body of the keyboard having six keys, the twelve different notes of each octave being sounded by two sets of six keys, one set being placed above the other, each set being distributed over three transverse rows of keys and each octave over four rows of keys, so that one note is sounded by one key in one transverse row, another note is sounded by another key in the second transverse row, and the remaining notes in the semi-octave are sounded by the remaining keys in the third transverse row, having one set of every pair to sound the notes B flat, C, A, D, B, and C sharp, and the other set of every pair to sound the notes E flat, G, E, F sharp, F, and G sharp, so that the keys of every alternate row sound notes of the same name and in the same position that only differ when they do differ by belonging to octaves of higher or lower position in the treble or bass.

1,571,432. ANIMAL TRAP. HARVEY A. POWELL, Haleyville, Ala. Filed June 2, 1925. Serial No. 34,372. 3 Claims. (Cl. 43—85.)



1. An animal trap including a housing having an opening, a frame disposed opposite the opening and including pivotally connected links, one of the pivotal connections being movably connected to the housing, a rod slidable on the housing and pivotally connected to another pivotal connection of the frame, means for normally urging the frame into collapsed position, trip means for holding the frame in open position, and a detent engaging with the rod for holding the frame in collapsed position after the trap has been sprung.

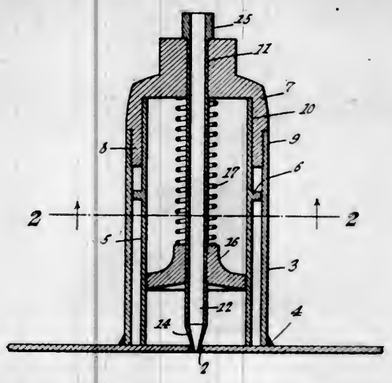
1,571,433. CURRENT METER. WILLIAM G. PRICE, Yakima, Wash., assignor to W. & L. E. Gurley, Troy, N. Y., a Corporation of New York. Filed Nov. 21, 1922. Serial No. 602,446. 4 Claims. (Cl. 200—19.)



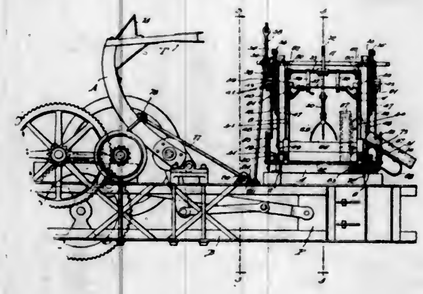
2. A current meter comprising an electric make-and-break device comprising an insulated gear wheel having an annular groove, a metal shaft carrying said gear wheel, a metal lug on said shaft projecting into said groove, and a resilient electric contact member resting in said groove and making and breaking electric contact with said lug as said gear wheel revolves.

1,571,434. AMUSEMENT TRACKWAY. WILLIAM RAY, Spokane, Wash. Filed July 20, 1925. Serial No. 44,751. 2 Claims. (Cl. 104—63.)

1. A fixed undulating roadway having depressions of sufficient depth as to obscure the forward vision of a car-driver, a removable obstruction in a depression, vehicle actuated means for removing said obstruction, and means for returning said obstruction to normal position.



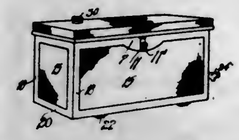
1,571,435. AUTOMATIC TELEPHONE RINGER. ELDRED THURSTON RICHEY, Le Blanc, La. Filed May 27, 1924. Serial No. 716,133. 1 Claim. (Cl. 179—84.)



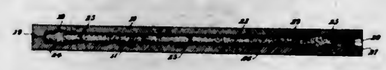
An automatic telephone ringer comprising a motor, a disk mounted upon the shaft of the motor, a plate mounted upon the periphery of the disk, contact members engaging said plate, a battery connected with the contact members and the motor, a telephone connected with the battery, a selective switch device connected with the battery, disks mounted upon the shaft of the motor and having spaced plates, contacts adapted to engage the last mentioned disks, a magnet for moving one of the last mentioned contacts and electrically connected with the point switch mechanism, a terminal located in the path of movement of said contact and electrically connected with the telephone instrument, and a magnet operatively connected with the shaft of the motor and electrically connected with the a push button and the battery.

1,571,436. GREASING AND OILING DEVICE. SAM SPARROW RUNDELL, Bogalusa, La., assignor of forty-nine one-hundredths to H. J. Cowgill and J. H. Slaughter, both of Bogalusa, La. Filed Jan. 11, 1924. Serial No. 685,670. 3 Claims. (Cl. 184—45.)

1. In a device of the class described, a casing provided in one end with an opening, a cap removably mounted on the other end of the casing, a sleeve within the casing and engaged with the first specified end of the casing, and with the cap, a tube carried by the cap and discharging into the opening, a follower slidable in the sleeve and on the tube, and a compression spring surrounding a portion of the tube, one end of the spring abutting against the follower and the other end of the spring abutting against the cap.



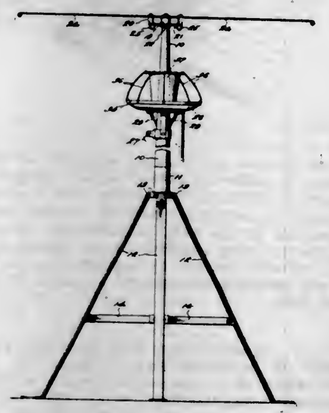
1,571,437. BALING-PRESS FEEDER. WILLIAM CHESTER RUTH, Gap, Pa., assignor of one-half to Howard L. Rutter, Gap, Pa. Filed June 18, 1925. Serial No. 38,033. 22 Claims. (Cl. 100—25.)



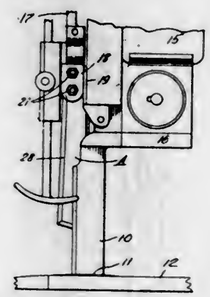
1. A feeder comprising a guideway for the material to be handled, a shaft extending transversely of said guideway out of the path of the material, feeding means operatively associated with said guideway, an arm on the shaft operatively connected with said feeding means for operating the latter, an oscillatory actuator mounted on said shaft adjacent said arm, means for oscillating said actuator, a latch member mounted movably on said arm and engaged with said actuator, and means connected to said latch for releasing the same from said actuator while the latter is in motion.

1,571,438. PROVISION SAFE. HENRY S. SCHOPF, Spokane, Wash. Filed Apr. 2, 1925. Serial No. 20,181. 8 Claims. (Cl. 62—9.)

3. The combination with a flanged rectangular, perforated bottom plate having exterior corner posts, intermediate posts, and an upper frame member supported on said intermediate posts, of a porous sheathing supported within the bottom plate and corner posts and exterior of the upper frame member, a lower rectangular frame member within the sheathing and fixed to the bottom plate, a rectangular food box having a top horizontal flange and vertical flange projecting therefrom fitted over the upper frame member for supporting said box and forming a water jacket within the sheathing, a lid hinged to the food box and fashioned with a water jacket, and a porous sheathing over said jacket.

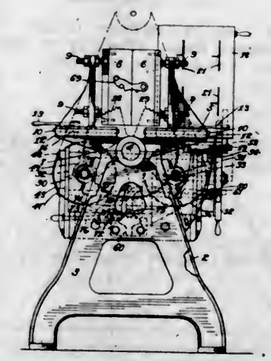


1,571,439. PERMANENT MOLD FOR CASTING RADIATOR SECTIONS AND THE LIKE. CHARLES BENJAMIN SEEM, Buffalo, N. Y. Filed Oct. 7, 1924. Serial No. 742,141. 1 Claim. (Cl. 22—184.)



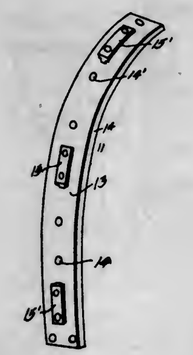
A permanent metal mold for castings comprising mating halves, clamps adapted to lock the halves together, a core, means for positioning the core in the mold cavity, said means including lugs on the core and corresponding pockets in the mating mold halves, the mold cavity including longitudinal recesses in the mold-halves and transverse depressions connecting the recesses, bracing elements for the casting walls inserted in the core and contacting with their ends the opposite sides of the mold cavity, said elements remaining in the finished casting.

1,571,440. RACK. GROVER C. SMITH, Ogden, Utah, assignor of one-half to James Rosborough Smith, Ogden, Utah. Filed Oct. 13, 1922. Serial No. 594,808. 12 Claims. (Cl. 34—26.)



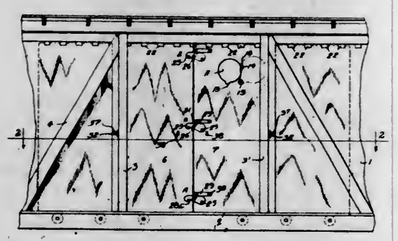
9. In combination, a tubular post, a folding support for said post, a collapsible clothes rack supported at the top of said post, a clamp surrounding said post and adjustable thereon, an electric heating element, and means supported from said clamp for positioning said heating element and for reflecting the heat therefrom upwardly and outwardly toward the clothes suspended on said rack.

1,571,441. KNIFE FOR CLOTH-CUTTING MACHINES OR THE LIKE. GEORGE E. ULRICH, Buffalo, N. Y., assignor to Eastman Machine Company, Buffalo, N. Y. Filed May 28, 1924. Serial No. 716,367. 4 Claims. (Cl. 164—75.)



1. In a cloth cutting machine of the character described, a standard having a knife guiding slot therein, and a reciprocable cutting knife the rear portion of which is shaped to remove the lint and other accumulations from all parts of said guide slot.

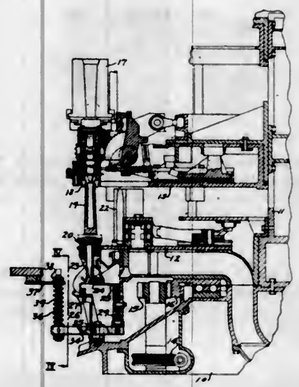
1,571,442. CORE-MAKING MACHINE. KNUT E. WAHLGREN, Valley Stream, and REINHART W. PITTMAN, New York, N. Y.; said Pittman assignor to said Wahlgren. Filed July 24, 1924. Serial No. 727,881. 10 Claims. (Cl. 22—10.)



1. In a core forming machine, a main frame, a pair of mold supports each movably mounted on the frame, whereby the molds can be swung independently to bring the faces together, and whereby the engaged molds can be swung together in fixed relative position, a driving member, and an automatic control member connecting the driving member with the mold supports and shiftable to a number of different positions, whereby control member will cause the molds to be first brought to opposite horizontal positions, then cause both molds to be swung to bring their faces together in a vertical plane, and then cause the engaged molds to be shifted to a position with said core faces horizontal and one mold inverted, and then cause the inverted mold to be shifted back to its normal horizontal positon, said operations being effected in said sequence by successive advance movements of the control member.

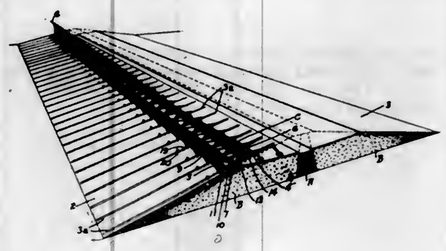
1,571,443. BRAKE LINING. CARL ANDERSON, Rosa, Wash., assignor of one-half to Thomas C. Doolittle, Rosa, Wash. Filed Dec. 12, 1924. Serial No. 755,438. 3 Claims. (Cl. 188—248.)

2. The combination with a slotted brake band having an integral abutment, an undergrooved lug and a bifurcated base flange on said lug, of a lining section having a grooved tongue adapted to engage said abutment and slidable in the slotted brake band, a second grooved tongue on said section, a spring latch on said base flange and a retaining hook on said latch adapted to engage the second tongue.



1,571,444. GRAIN-CAR-DOOR LATCH. PETER M. BOZICH, Spokane, Wash. Filed July 17, 1923. Serial No. 652,028. 1 Claim. (Cl. 292—108.)

In a latch for sliding doors, the combination with a keeper-socket and a transversely extending pin, of a pivoted latch comprising a pair of rigidly spaced hooks adapted to co-act with said pin and socket, and a spring detent for retaining said hooks in engaged position.

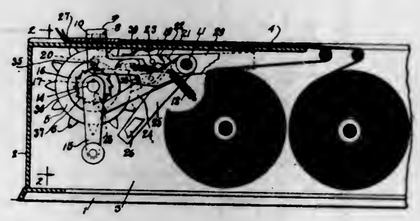


1,571,445. MACHINE FOR FORMING GLASS ARTICLES. ALBERT N. CRAMER, Toledo, Ohio, assignor to The Owens Bottle Company, Toledo, Ohio, a Corporation of Ohio. Filed July 21, 1923. Serial No. 652,922. 10 Claims. (Cl. 49—9.)

1. In a glass blowing machine, the combination of a traveling mold carriage, means thereon to support a bare parison in a depending position, a mold bottom beneath said parison arranged to engage the latter during the travel of the mold carriage, and means separate from the mold carriage and stationary during the travel

of the mold carriage for effecting a vertical adjustment of the mold bottom relatively to the parison supporting means.

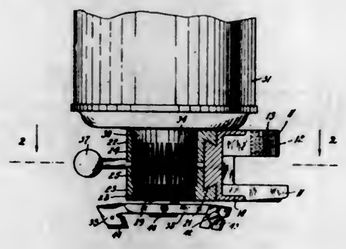
1,571,446. HYDRAULIC-FILL-DAM-BUILDING MACHINE. JULIUS M. HOWELLS, Oakland, Calif. Filed July 28, 1924. Serial No. 728,629. 6 Claims. (Cl. 61—30.)



1. A machine for building hydraulic-fill dams comprising a grade-establishing support disposed transversely of the dam and parallel with one slope face thereof, a superstructure mounted thereon and movable transversely of the dam, means carried by said structure for delivering material for the construction of the dam, and means carried by said structure for segregating and depositing the material at points longitudinally of the dam.

1,571,447. COMPOSITION FOR MOLDING AND PROCESS OF MAKING SAME. TREVOR S. HUXHAM, Bloomfield, N. J., assignor, by mesne assignments, to Carleton Ellis, Montclair, N. J. Filed Oct. 2, 1922. Serial No. 591,942. 11 Claims. (Cl. 106—22.)

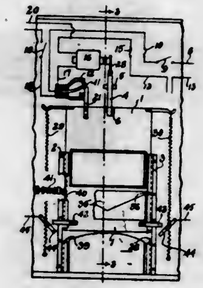
4. The process of making a molding composition which comprises intimately mixing a synthetic resin which exhibits a tendency to sticking during hot molding operations and a filler with a few per cent of a water insoluble metallic soap.



7. A molding composition comprising furfural resin, and a metallic soap.

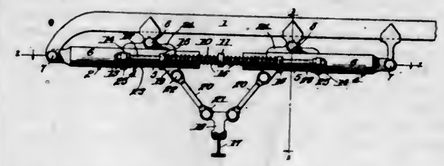
1,571,448. AUTOGRAPHIC REGISTER. ARTHUR A. JOHNSON, Bridgeport, Conn., assignor to The Egry Register Company, Dayton, Ohio, a Corporation of Ohio. Filed Feb. 9, 1924. Serial No. 691,787. 7 Claims. (Cl. 281—11.)

1. In an autographic register the combination of a platen over which webs are fed; pin-wheels for feeding said webs; a driver for said pin-wheels; a clutch for connecting said driver to said pin-wheels; and means under the control of the webs and operated by the driver for breaking the connection between said pin-wheels and driver.



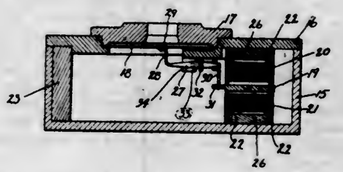
1,571,449. PLANER. JOHN KANDERA, New York, N. Y. Filed Dec. 2, 1924. Serial No. 753,441. 2 Claims. (Cl. 144—2.)

1. A portable surface treating machine comprising a rail, two clamping jaws shiftable longitudinally on said rail, an electric motor having a bearing member extending oscillatably through said jaws, the outer end of said bearing member being provided with screw-threads in mesh with threads on one of said jaws, a cutting tool associated with said motor disposed beyond said jaws, and coacting means on said bearing member and one of said jaws for oscillating said bearing member and thereby causing said screw-threaded clamping jaw to move toward or recede from the other one of said clamping jaws.



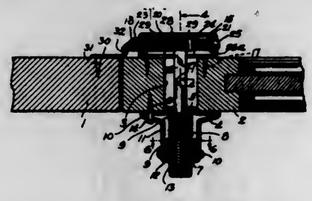
1,571,450. PROTECTIVE APPARATUS FOR BANK WINDOWS AND THE LIKE. DAVID KAUFMAN, New York, N. Y. Filed Mar. 10, 1925. Serial No. 14,584. 2 Claims. (Cl. 268—2.)

1. In protective apparatus for bank windows and the like, in combination, a bullet proof shield positioned at the rear of said window and slidable vertically, a latch member holding said shield in raised open position, electrically operated means for releasing said latch, means adapted to substantially instantly lower said shield to closed position upon release of said latch, a member hinged to the inner side of said shield adjacent the lower portion thereof, means normally holding said member folded upwardly against said shield, and means adapted



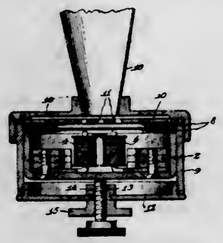
upon said shield moving downwardly to permit said member to swing downwardly away from the surface of said shield, said member having a surface adapted to deflect bullets.

1,571,451. AUTOMOBILE SPRING DEVICE. FRANK G. KRAKAN, Pittsburgh, Pa. Filed Mar. 7, 1925. Serial No. 13,795. 4 Claims. (Cl. 267—60.)



1. A spring of the class described having fixed cylinders, slidable cylinders telescoped therein, compression springs in said cylinders, a rod along which the slidable cylinders move, side rods, means on the slidable cylinders movable along said side rods, and compression springs on said side rods engaging the first rods and engageable by said means.

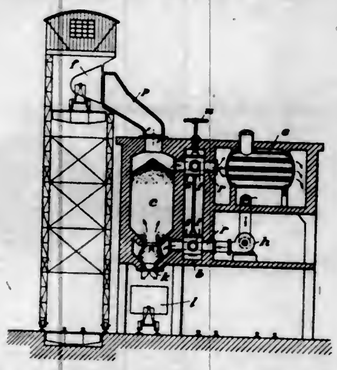
1,571,452. AMPLIFIER FOR RADIOPHONES. JOHN J. LOW, Santa Ana, Calif. Filed Oct. 21, 1922. Serial No. 595,934. 3 Claims. (Cl. 179—114.)



1. An ampilfier of the character described comprising a source of magnetism of constant flux density, a second source of magnetism of varying flux density, an armature operable by the sources of magnetism, a casing of diagrammatic material for preventing the first source of magnetism setting up counter-currents in the second source of magnetism, a diaphragm operable by the armature, and adjustable means for operatively connecting the armature and diaphragm for varying the intensity of the vibrations transmitted to the diaphragm from the armature.

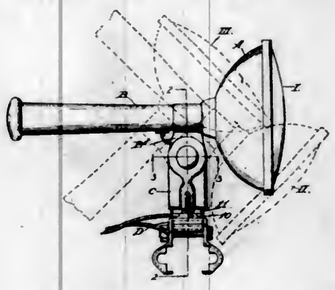
1,571,453. LATCH. CURTIS MAXON, Los Angeles, Calif. Filed July 7, 1924. Serial No. 724,622. 5 Claims. (Cl. 292—170.)

1. A latch adapted to be mounted upon a support having a hole therethrough, said latch comprising a bolt adapted for retraction and projection, operating mechanism movable in said hole, an actuating connection between said operating mechanism and said bolt, a member on said support having said operating mechanism projecting therethrough, said member having a projection extending into said hole for centering the operating mechanism therein, a casing on the projecting end of said operating mechanism, and attaching means extending through said casing and said centering member into said support.



1,571,454. TELEPHONE-RECEIVER UNIT. VAUGHN E. MORRISON, Detroit, Mich., assignor, by direct and mesne assignments, to Morrison Laboratories, Incorporated, a Corporation of Michigan. Filed Feb. 3, 1923. Serial No. 616,681. 7 Claims. (Cl. 179—115.)

1. A device of the character described comprising a casing having an open side, a shell within which the casing is slidable, an electro-magnet mounted within the casing and provided with pole pieces directed toward the open side fo the casing, a diaphragm supported across the open side of the casing and adjacent the pole pieces and free from engagement with the shell, an apertured cover plate secured to the shell and arranged to limit movement of the diaphragm in one direction, resilient means arranged between the diaphragm and casing, and means carried by the shell for moving the casing to compress the resilient means and so adjust the pole pieces toward the diaphragm.

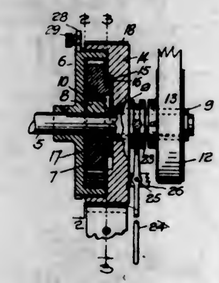


1,571,455. PLANT FOR COOLING HOT COKE AND UTILIZING THE HEAT LIBERATED THEREBY. ARNOLD MONTTELI, Oberwinterthur, Switzerland. Filed Jan. 19, 1922. Serial No. 530,487. 2 Claims. (Cl. 122—27.)

1. A plant for dry cooling hot coke comprising at least two coke cooling chambers, at least two heat exchanging devices, means for circulating cooling gases in a closed circuit through each cooling chamber and the corresponding heat exchanging device, and means whereby each cooling chamber may be selectively connected with any or all of at least two heat exchanging devices and each heat exchanging device may be selectively connected with at

least two cooling chambers, said means maintaining a closed circuit between the interconnected cooling chambers and heat exchanging devices.

1,571,456. SPOTLIGHT RANGE-LIMITING DEVICE. JOHN K. OLSEN, Chicago, Ill., assignor to Stewart-Warner Speedometer Corporation, Chicago, Ill., a Corporation of Virginia. Filed Dec. 29, 1924. Serial No. 758,526. 5 Claims. (Cl. 240—61.)

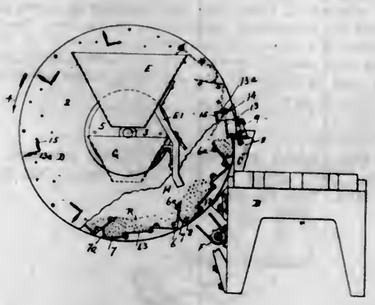


1. A lamp body and a supporting means for the same comprising a primary stem of the lamp body and a secondary stem on which the primary stem is pivotally supported, and a fixed support on which the secondary stem is pivotally mounted, each of said pivotal joints having about the pivot axis, a plurality of contacting disks comprised in the lamp energizing circuit carried by and insulated from the pivoted parts respectively, and having insulated areas of their respectively contacting surfaces of angular extent and relatively distributed for interrupting the current throughout a predetermined range of angular adjustment; whereby the lamp is automatically extinguished upon its adjustment about both pivots to any position within the ranges respectively predetermined by the angular extent and distribution of said insulated areas.

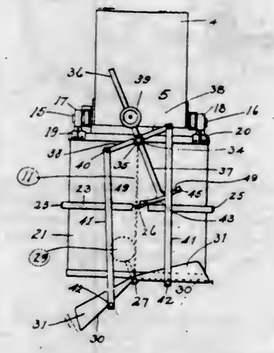
1,571,457. TRANSMISSION GEARING. FRANCIS LEONARD ORR, Denver, Colo. Filed Nov. 30, 1921. Serial No. 518,867. 5 Claims. (Cl. 74—34.)

1. In a transmission gearing, an internal gear-wheel, an external gear-wheel mounted to move eccentrically about the axis of the internal gear-wheel in the circle of the teeth thereof, a rotary drum adapted to guide the

external gear-wheel in its eccentric movement when held against rotation and to rotate with the same when released, said drum having a lateral movement to frictionally engage with the internal gear-wheel, a brake for locking the drum against rotation, and a lever to move the drum into engagement with the internal gear-wheel.

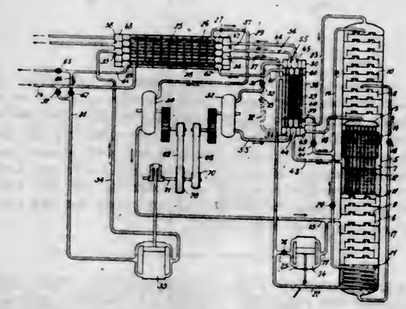


1,571,458. ELECTROMAGNETIC PRODUCTION OF DIRECT CURRENT WITHOUT FLUCTUATIONS. MICHAEL I. PUPIN, Norfolk, Conn., assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Dec. 31, 1915. Serial No. 69,566. 6 Claims. (Cl. 171—97.)



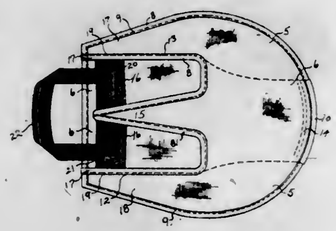
1. A dynamo electric generator producing uni-directional periodically fluctuating electromotive force and current, in series with an aperiodic pilot conductor made up of unit sections containing reactance and resistance so adjusted as to afford high attenuation power for fluctuations in the generated electromotive force and current.

1,571,459. AUTOMATIC MEASURING MACHINE. DAVID W. RIPLEY, Fresno, Calif. Refiled for abandoned application Serial No. 547,611, filed Mar. 29, 1922. This application filed June 1, 1925. Serial No. 34,251. 5 Claims. (Cl. 221—135.)



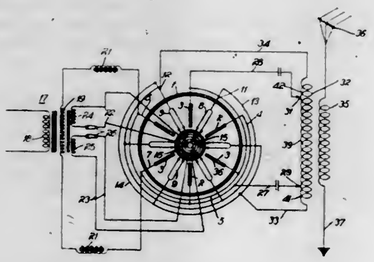
1. In combination with a measuring device having a revolvable container, openings within the container for placing merchandise therein, a pocket within the container positioned so it will be dragged through the merchandise with the mouth of the pocket forward on the line of travel, said pocket having a bottom adapted to be opened, means for normally holding the bottom in a closed position, and means for opening the bottom at a fixed point in the revolution of the container.

1,571,460. AUTOMATIC WEIGHING MACHINE. JAMES B. VAN DEREN, Hennessey, Okla. Filed Aug. 10, 1920. Serial No. 402,619. 7 Claims. (Cl. 249—29.)



1. In combination, a receptacle divided into two equal chambers, an oscillating feed-pan centrally pivoted to the bottom of the receptacle and comprising halves inclined at an angle to each other; an oscillating weighted arm mounted upon one side of the receptacle; and links connecting said arm with respective sides of said feed-pan.

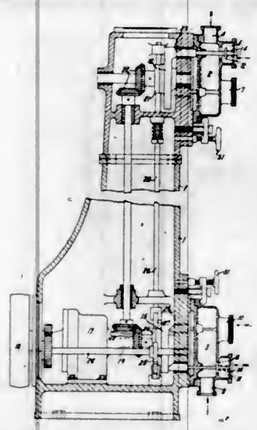
1,571,461. SEPARATION OF THE CONSTITUENTS OF GASEOUS MIXTURES. CLAUDE C. VAN NUYS, Cranford, and WALTER WILKINSON, Jersey City, N. J., assignors to Air Reduction Company, Incorporated, New York, N. Y., a Corporation of New York. Filed June 24, 1924. Serial No. 722,036. 33 Claims. (Cl. 183—115.)



1. The method of separating the constituents of gaseous mixtures, which comprises compressing, cooling and partially expanding the gaseous mixture, subjecting the expanded gaseous mixture to liquefaction, liquefying a gaseous medium at a pressure exceeding the initial pressure of the gaseous mixture and combining the liquids under rectifying conditions.

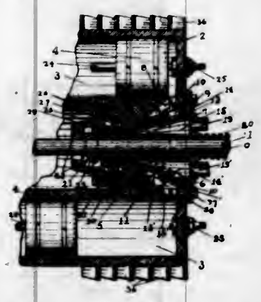
1,571,462. BATHING SHOE. CHARLES R. WALDRON and STEPHEN G. STEVENSON, Elyria, Ohio. Filed May 1, 1925. Serial No. 27,142. 5 Claims. (Cl. 9—21.)

1. A swimming shoe comprising an enlarged fabric upper, a sole portion, a wire frame attached to and extending substantially around the periphery of said upper, and elastic means secured to the said upper to firmly secure the shoe to the wearer's foot.



1,571,463. OSCILLATION-GENERATOR SYSTEM. VLADIMIR K. ZWORYKIN, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed July 19, 1921. Serial No. 485,948. 17 Claims. (Cl. 250—36.)

1. An electronic device embodying a plurality of serially disposed electrodes, the opposite sides of each electrode having such characteristics that they are maintained in different degrees of electron-emissivity by the passage of an arc current therebetween, and connections including a source of alternating potential whereby each electrode alternately serves as a cathode for the electrode on one side thereof and as an anode for the electrode on the other side thereof.

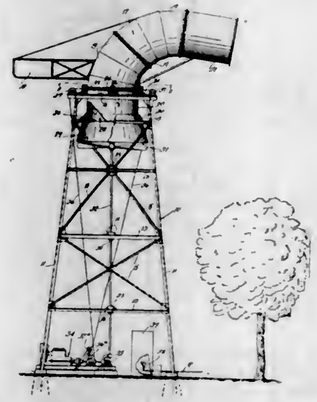


1,571,464. MEANS FOR CONTROLLING THE DELIVERY OF LIQUIDS. FREDERICK CHARLES AUGUST, Enfield, England. Filed July 3, 1923. Serial No. 649,204. 3 Claims. (Cl. 137—21.)

1. In combination with a plurality of holders for containing liquid, each holder having an inlet and an outlet, a valve box having connections with the inlets of said holders, inlet valves fitted to said box controlling said connections, a valve box having connections with the outlets of said holders, delivery valves fitted to said second box controlling said last named connections, a valve actuator for actuating said inlet valves successively, a valve actuator for actuating said delivery valves successively,

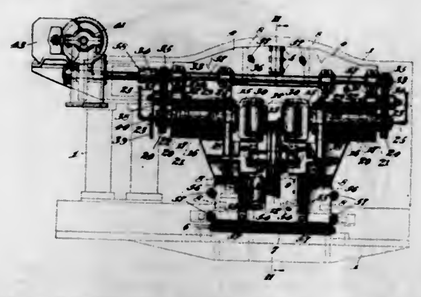
means for rotating said actuators, and intermittently operating means for imparting periodically a turning movement to each actuator.

1,571,465. ROTARY ENGINE VALVE. JOSEPH H. BAIR, Camp Hill, Pa. Filed Mar. 9, 1922. Serial No. 542,271. 6 Claims. (Cl. 123—43.)



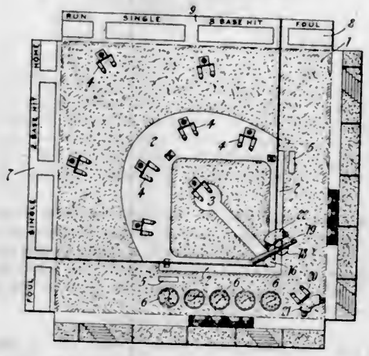
1. In a rotary engine valve the combination of an outer member, a stationary two chambered inner member and an interposed member all conforming together by means of a taper and cylindrical ends provided thereon and each member having ports to register successively, and a gear arrangement for controlling their speed, substantially as described.

1,571,466. HEEL PROTECTOR. EMIL BARTHES, Salinas, Calif. Filed Feb. 11, 1925. Serial No. 8,413. 1 Claim. (Cl. 36—72.)



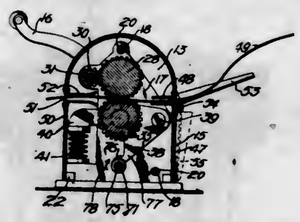
A heel protector comprising a casing having flexible side and rear portions formed in one piece and adapted to loosely fit over and about the heel and rear portion of a shoe and a bottom portion adapted to fit over the bottom of the heel, the top and front portion of the casing being open and circumscribed by the marginal portion of the protector at the top of the casing and at the front edges of the casing and heel portion thereof, and spring means carried by the casing and adapted to resiliently engage the sides of the shoe in a manner holding the casing against displacement from the shoe.

1,571,467. TEMPERATURE-REGULATING DEVICE FOR ORCHARDS. EDWARD S. COBB, Los Angeles, Calif., assignor to Cobb Temperature Regulator Co., Los Angeles, Calif., a Corporation of California. Filed June 24, 1924. Serial No. 722,177. 10 Claims. (Cl. 126—59.5.)



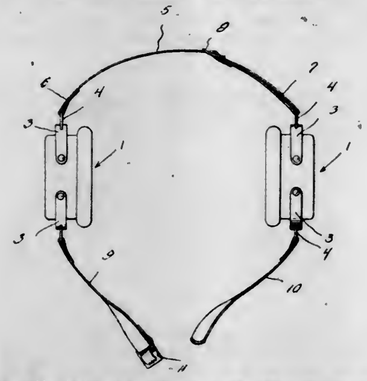
1. Plantation protecting apparatus of the character described, embodying a supporting structure extending to a point above the plantings to be protected, a director mounted at the top of the structure and having its inlet orifice opening to the atmosphere at a point above the base of the supporting structure, and means adjacent the inlet orifices and adapted to deliver unconfined air to the director and then force it through and out the director, said director being adapted to direct such air outwardly above the plantings to be protected.

1,571,468. WHEEL MILL. BENJAMIN F. FAUNCE, Johnstown, Pa. Filed Aug. 27, 1921. Serial No. 496,124. 14 Claims. (Cl. 80—16.)



13. In a wheel mill provided with a front frame, a rim edging roll rotatably mounted thereon in a fork, an internally screw-threaded shank forming part of said fork, a screw mounted in said thread, power operating means adapted to rotate said screw, a rotatable sleeve mounted in a socket in an integral bracket of the front frame in which said shank is mounted and adapted to be moved longitudinally thereof, a flange projecting from said sleeve and a corresponding flange on the bracket, and means for rotatably adjusting said sleeve and clamping it by the said flanges in position desired.

1,571,469. BASEBALL GAME. FRANK H. FREDETTE, Newark, N. J. Filed Nov. 6, 1924. Serial No. 748,124. 8 Claims. (Cl. 273—89.)

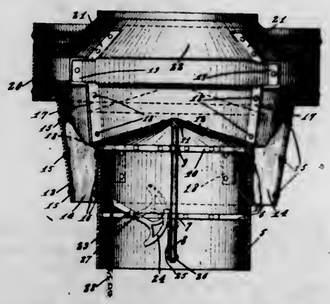


1. In a baseball game, the combination of a board having a marginal barrier thereon, a miniature baseball diamond laid out upon said board, manikin players distributed about said diamond in the usual stations occupied by such players, each player being movably secured in the station whereby said player may be faced in the direction of any other player on the field, each of said players having means for catching and holding a miniature ball, and also means for flipping said ball away from said player.

1,571,470. CHECK PROTECTOR. THOMAS R. GABEL, Los Angeles, Calif., assignor to Code, Check Guard Company, a Corporation of California. Filed Mar. 19, 1923. Serial No. 626,055. 12 Claims. (Cl. 101—24.)

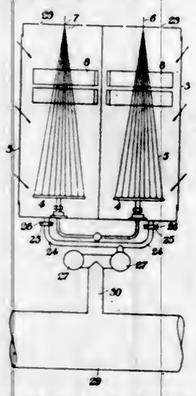
1. In a protective device of the class described, the combination of: a cylindrical die having extruder points formed substantially throughout the entire cylindrical face thereof: a cooperating roller having indentations formed therein into which said extruder points extend when said cylinder is rotated in conjunction with said cooperating roller; resilient means for holding said cylinder and said roller pressurably together; and releasing means for separating said cylinder and said cooperating roller so as to allow passage of a sheet therebetween without imprint of said extruder points.

1,571,471. RADIOHEADGEAR. MICHAEL FRANCIS GALAYDA, Pageton, W. Va. Filed JAN. 29, 1925. Serial No. 5,528. 3 Claims. (Cl. 179—156.)



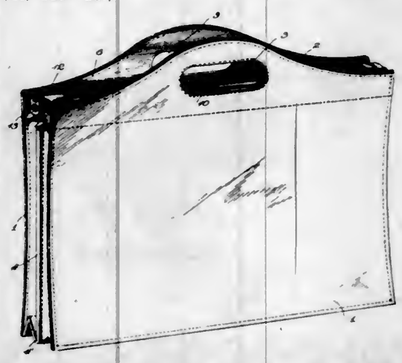
1. A radio head gear of the class described including a pair of ear phones, a pair of yokes, fastened to each phone on opposite sides thereof, a flexible and adjustable strap connected at its ends with the yokes at the tops of said phones, and a connection between the lower pair of yokes.

1,571,472. AEROPLANE KITE. PAUL A. GOURTOFF, Edgemere, Long Island, N. Y. Filed Aug. 23, 1923. Serial No. 659,001. 6 Claims. (Cl. 244—12.)



1. An aeroplane kite comprising three sticks fastened together and substantially in contact near their ends, said sticks being bowed out from each other at their intermediate portions, a pair of planes at the bowed out portions, one of which comes transversely across two of said sticks, the other plane coming transversely across the other of said sticks and bracing means extending from one stick to the other at their bowed out portions.

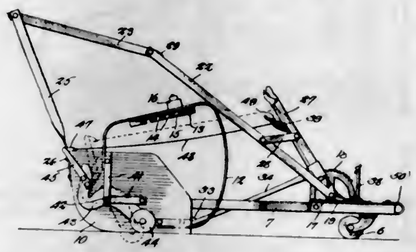
1,571,473. ROOF VENTILATOR. CHARLES C. GRIDLEY, Columbus, Ohio. Filed Oct. 4, 1924. Serial No. 741,746. 1 Claim. (Cl. 98—4.)



A ventilator comprising the combination of a pipe section, shields arranged at the upper end of the pipe section and disposed in spaced relation with each other, transversely disposed bars positioned within the pipe section and having central bearings, a rod extended through the bearings, a cap positioned on the upper end of the rod and adapted to normally close the upper end of the pipe section, a pivoted lever having a curved head arranged adjacent to the rod, a flexible member connecting one end of the curved head to the rod and means operatively connected to the lever for adjusting the rod vertically.

1,571,474. APPARATUS FOR THE MANUFACTURE OF ARTIFICIAL THREADS OR FILAMENTS. NICOLAS BENOIT GRILLET, Neuilly, France, assignor to Societe pour la Fabrication de la Soie "Rhodiaseta," Paris, France. Filed Mar. 5, 1924. Serial No. 697,029. 16 Claims. (Cl. 18—8.)

1. In the manufacture of threads by spinning a viscous fluid containing a volatile solvent into elementary fibres in a heated gaseous current passing through a cell, means for causing the said gaseous current to pass through the said cell and means for regulating the evaporation of solvent in a group comprising a great number of cells by acting on the temperature of the gaseous current, said means comprising a double series of temperature controlling elements identical to one another for the whole of each group and for each cell of the group, a current of temperature controlling fluid passing in each said series of elements in opposite directions.



1,571,475. BRIEF BAG. HENRY J. GUENTHER, New York, N. Y., assignor to Therman Leather Goods Co., Inc., New York, N. Y., a Corporation of New York. Filed June 19, 1925. Serial No. 38,176. 2 Claims. (Cl. 150—28.)

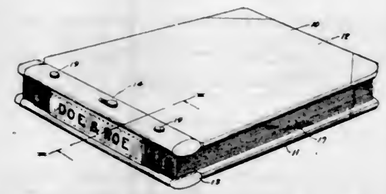
1. A brief bag comprising sides forming the confining walls for the main portion of the bag having integral upward extensions and provided with openings in the

extensions to form handles, flaps secured to the inner faces of the extensions, integral end and bottom members provided with bellows folds secured to the lateral and bottom edges of the sides, and fastening means secured to the longitudinal edges of said flaps.

1,571,476. RIDING FRESNO SCRAPER. THEODORE A. HARTUNG, Austin, Tex. Filed June 4, 1925. Serial No. 34,924. 2 Claims. (Cl. 37—140.)

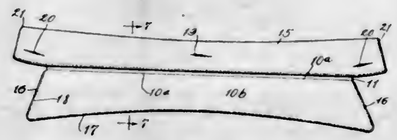
1. In a device of the character described, a platform, side members extending rearwardly from the platform, a scoop pivotally supported between the side members, curved arms pivotally mounted at the ends of the scoop, wheels carried by the arms and adapted to move to positions beyond the scoop to elevate the scoop, and means for moving the arms to move the wheels to their active positions.

1,571,477. SELF-FILLING FOUNTAIN PEN. CHARLES M. HAYNES, Chillicothe, Ohio. Filed Nov. 29, 1921. Serial No. 518,541. 1 Claim. (Cl. 120—47.)



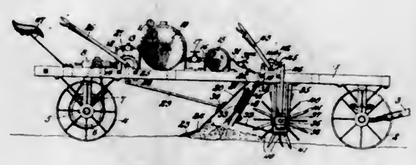
In a self-filling fountain pen, an ink barrel, a piston movable axially therein, the rear end of the barrel being open to admit a suitable member for advancing the piston, a cap for closing the rear end of the barrel, and a chain of open links connecting the piston and cap and swiveled to one of said members and adapted to extend out of the rear end of the barrel for retracting the piston, said cap being removably mounted on the rear end of the barrel and adapted to house the chain when the piston is in retracted position.

1,571,478. CARTRIDGE FOR BLASTING POWDER. ALFRED J. HIRTHLER and JOHN DREISTADT, Wilkes-Barre, Pa. Filed Oct. 8, 1924. Serial No. 742,413. 1 Claim. (Cl. 102—8.)



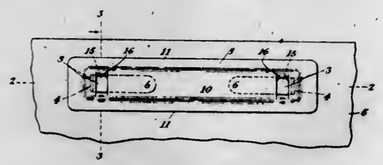
A cartridge for blasting powder including an inner and an outer flat tube formed of paper, the free edges of said tubes being cemented together in overlapping relationship, the outer end of one tube being disposed in an opposite direction from the outer end of the other tube, and the overlapping ends of the tubes being disposed on the same sides of the tubes.

1,571,479. INDEXING DEVICE. FREDERICK W. HUBER, San Francisco, Calif. Filed Apr. 22, 1924. Serial No. 708,261. 2 Claims. (Cl. 129—1.)



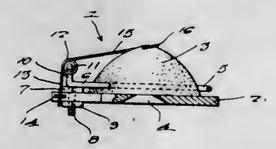
1. An indexing device comprising two U-shaped members nested together and having portions defining a receptacle for an index card, one of said members formed of transparent material to expose the indicia of said card, the parallel portions of the said members being adapted to be clamped inside the cover boards of a loose-leaf binder.

1,571,480. REVERSIBLE TURNDOWN COLLAR AND METHOD OF MAKING THE SAME. JULIUS JUHÁSZ, Madison, Conn. Filed Mar. 28, 1925. Serial No. 18,945. 9 Claims. (Cl. 2—143).



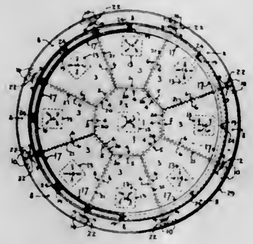
1. A collar of the class described comprising a turn down part and a neck band part, a strip for coupling said parts together in spaced relation, said strip being treated to prevent the starching thereof.

1,571,481. INSECT DESTROYER. JOHN KASMEIER, Beeville, Tex. Filed Jan. 14, 1925. Serial No. 2,327. 8 Claims. (Cl. 43—144.)



1. An insect destroyer to be drawn over the ground after it has been plowed and cultivated, comprising a wheeled frame, a fuel tank mounted on the frame, means to maintain pressure in the tank, a transversely disposed series of downwardly-directed burners in connection with the tank, means for independently controlling the burners, heat-confining shields depending from the frame in advance and in rear of the burners and extending transversely of the frame, and ground lifting means mounted transversely in advance of the heat-confining shields and adapted to lift and throw the loosened soil rearwardly in the space between the shields to subject the soil to the action of heat from the burners.

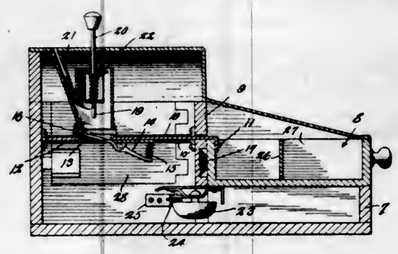
1,571,482. PAPER FASTENER. CHARLES D. KING, Rutherford, N. J. Filed May 23, 1924. Serial No. 715,274. 16 Claims. (Cl. 24—153.)



1. In combination, in a two piece paper fastener, a member having tongues to be pushed through papers and the projecting end portions bent down on the same, a member to be placed over and cover said bent down portions in such position, and means movable into position in the plane of the paper to secure them to said member.

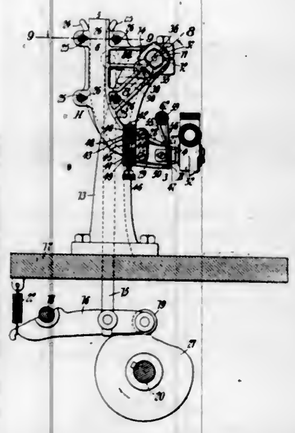
1,571,483. LINE-CHALKING DEVICE. GEORGE A. KLEINOW, Marquette, Iowa. Filed June 12, 1925. Serial No. 36,704. 3 Claims. (Cl. 33—87.)

1. A line chalking device of the class described comprising a base board, a line guide secured on said base board and adapted to encircle a piece of chalk supported on the base board, said base board having an opening formed therein, for facilitating the raising of the chalk from the base board, and a spring urged follower secured on the base board and engaging the top of the chalk for forcing the same downwardly against the base board.



1,571,484. TANK. HERBERT M. KNIGHT, Montclair, N. J. Filed Aug. 10, 1921. Serial No. 491,229. 17 Claims. (Cl. 72—13.)

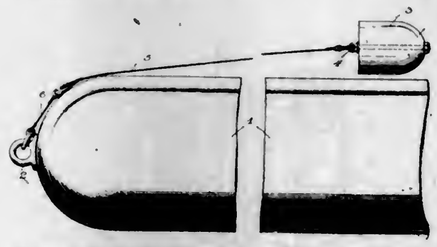
2. In a tank bottom composed of pre-cast units, circumferential units with an abutment cast thereon and depressed pockets in the exterior face of said abutment.



1,571,485. CASH REGISTER. OBED I. LAWRENCE, Pauls Valley, Okla. Filed Apr. 13, 1925. Serial No. 22,817. 2 Claims. (Cl. 194—58.)

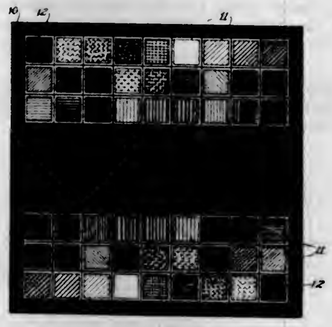
1. In a cabinet of the class described, a sliding cash drawer, a plate carried by the arm and having an opening, a locking arm having one end thereof extending into the opening to lock the plate and drawer against movement, means for directing a check to the arm, a plunger operating above the arm and adapted to be moved to

engage the check to move the arm to its inactive position, and a coiled spring for moving the drawer to its open position.



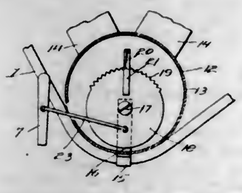
1,571,486. BLANK-FEEDING MECHANISM. BENJAMIN H. LONG, Brooklyn, N. Y., and WILBUR M. STONE, East Orange, N. J., assignors to American Bander Company, New York, N. Y., a Corporation of Wisconsin. Filed Oct. 26, 1922, Serial No. 596,994. Renewed July 14, 1925. 8 Claims. (Cl. 131—61.)

1. In blank feeding mechanism the combination of a blank hopper having an upwardly opening receiving end and a substantially horizontal delivery end, said hopper comprising opposite end frames each having front and back walls adjustably mounted thereon, said hopper end frames being carried on a shaft oscillatable in a fixed bearing above the delivery end of said hopper, a fixed platen for receiving the blanks one at a time from said hopper, and means for oscillating said hopper shaft for moving said delivery end toward and from said platen.



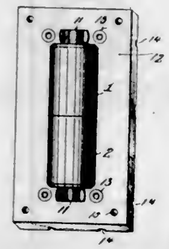
5. In blank feeding mechanism the combination of a blank hopper comprising opposite end frames each having front and back walls adjustably mounted thereon, opposite blank delivery guides carried by each end frame, said guides being mounted for movement toward and from each other, and means for thus moving said guides while maintaining their delivery ends always equidistant from a point therebetween.

1,571,487. TORPEDO. CHARLES B. MCVAY, Jr., Washington, D. C., assignor to The Government of the United States. Filed Apr. 6, 1923. Serial No. 630,388. 8 Claims. (Cl. 114—25.)



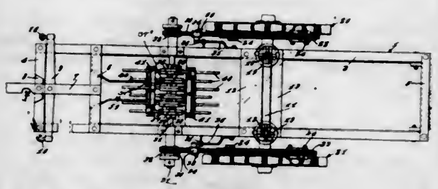
5. In combination with a torpedo, a detachable drogue connected with the forward end thereof adapted to prevent an abnormal initial dive.

1,571,488. EDUCATIONAL GAME. MITCHEL V. MOISAN and ANNA R. HEYWOOD, Central Square, N. Y. Filed July 16, 1925. Serial No. 44,012. 4 Claims. (Cl. 273—155.)



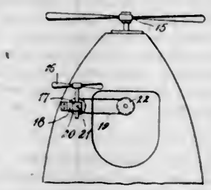
1. An educational game comprising a board having separate groups of spaces thereon with the spaces of each group contradistinguished by different colors, a plurality of games pieces having configurations thereon, said game pieces being colored in sequence according to the sequence of the colors on the spaces on said board, and a plurality of starter pieces having configurations upon one side adapted to be turned down and shuffled on the face of the board to determine the placing of different numbers of the groups of game pieces upon their respective spaces.

1,571,489. TOY VEHICLE. MATSUSUKE MORIHATA, Honolulu, Territory of Hawaii. Filed May 25, 1925. Serial No. 32,684. 2 Claims. (Cl. 208—18.)



1. In a toy motor vehicle of the class described, a wheel supported frame, an imitation fuel tank carried by said frame, an imitation motor carried by said frame, said motor embodying a hollow casing and dummy cylinders, said casing having a vibratory diaphragm, and means in said casing for vibrating said diaphragm to produce a popping noise.

1,571,490. AMPLIFIER COIL AND CONNECTION. ELMAN B. MYERS, Belleville, N. J., assignor to Radio Audion Company, Jersey City, N. J., a Corporation of Delaware. Filed Dec. 24, 1921. Serial No. 524,789. 13 Claims. (Cl. 175—360.)



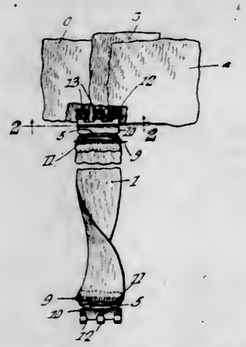
1. The combination with an amplifier coil, of a shell formed in two halves, enclosing said coil and hermetically sealing the same therein, and a terminal blade at the end of each shell-half secured to the coil terminals.

1,571,491. BEAN HARVESTER. GEORGE EDWARD PRITCHARD, Elizabeth City, N. C. Filed Sept. 6, 1922. Serial No. 586,472. 4 Claims. (Cl. 130—30.)

1. In a bean harvester, thrashing mechanism including a shaft having a plurality of removable castings mounted thereon adjacent each other, fingers carried by said castings, and arranged in different planes and means for clamping the fingers of the adjacent castings rigidly together.

1,571,492. PROPELLER-DRIVE CONTROL. BRUNO ROSENBAUM, Berlin, Germany, assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 2, 1921. Serial No. 498,181. 4 Claims. (Cl. 244—31.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

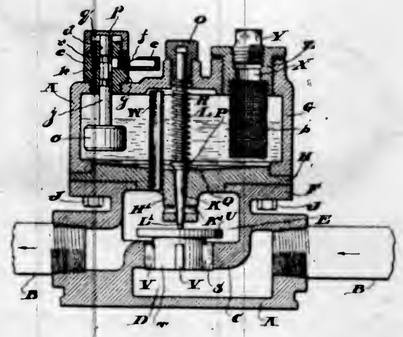
1. In combination with a propeller drive for wireless sending equipment on aircraft wherein the auxiliary propeller is driven by the air current from the main propeller, means for controlling the speed of the auxiliary



propeller independently of the speed of the main propeller, comprising a brake adapted to act on the shaft of the auxiliary propeller, and means for operating said brake.

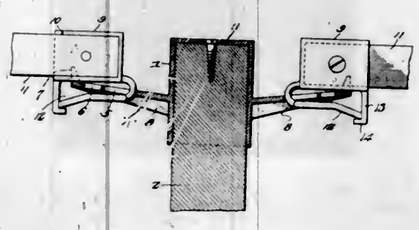
1,571,493. VEHICLE WHEEL. LUDWIG F. SCHUMACHER, New York, N. Y. Filed Feb. 26, 1925. Serial No. 11,805. 1 Claim. (Cl. 301—63.)

In a vehicle wheel structure of the class described, an inner relatively stationary disc provided at its center with a hub and at its outer peripheral edge with an arcuated flange extending laterally beyond both faces thereof, and a removable disc formed at its center with an opening through which is a portion of said hub projects, and provided upon its outer peripheral edge with an arcuated flange directed laterally from one face only, said last mentioned flange being formed at its point of connection with the removable disc with a groove for reception of the adjacent portion of the first named flange.



1,571,494. LINGERIE-STRAP FASTENER. NORA I. SCOTT and NATHAN G. HANES, Atascadero, Calif. Filed Mar. 2, 1925. Serial No. 12,729. 2 Claims. (Cl 24—73.)

1. The combination with a plurality of individual garments each having a fastener, said fasteners being arranged in longitudinal alinement when in use; and an elongated bar having attaching means for connection with a strap and provided with a plurality of longitudinally spaced fastening elements to cooperate with the individual elements on the garments whereby a plurality of garments may be suspended from a single strap.

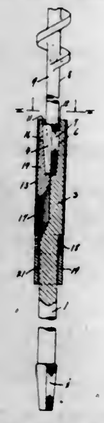


1,571,495. AIR-LINE LUBRICATOR. WILLIAM A. SMITH, Athens, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed Mar. 17, 1925. Serial No. 16,117. 5 Claims. (Cl. 184—76.)

1. An air line lubricator comprising an oil reservoir, a main pressure fluid passage, a spring pressed tapered valve for controlling the flow of oil from the oil reservoir to the main passage, and a float valve operated by pressure fluid for lifting the tapered valve to discharge oil from the main passage, and a tube within

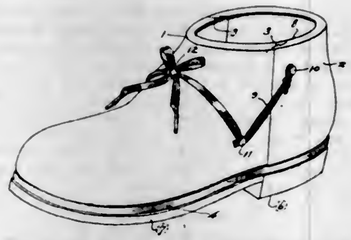
the lubricator for admitting pressure fluid from the main passage into the reservoir to create pressure above the surface of the oil for forcing the oil into the main passage.

1,571,496. CLOTHES DRIER. WILLIAM W. STERLING, Cambridge City, Ind. Filed May 7, 1924. Serial No. 711,641. 1 Claim. (Cl. 68—34.)



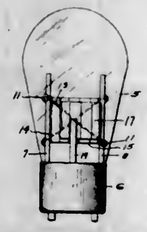
A clothes drier comprising a staff, a crown piece having a sleeve fitting upon the staff and provided with a flange, said flange having radially disposed slots formed at their outer ends with enlargements, lugs mounted upon the upper edge of the flange, and alternating with said slots, radially disposed ribs located at the under side of the flange and alternating with said slots, and rectangular oblong socket members, each formed in one side with a longitudinal recess and provided with a loop which passes through the corresponding slots, said socket members also provided with depending arms having right angularly bent lugs which engage the free ends of the loops and prevent casual disengagement of the latter with the crown piece.

1,571,497. EXTENSION BIT. GEORGE W. STALEY, San Francisco, Calif. Filed May 3, 1923. Serial No. 636,504. 1 Claim. (Cl. 279—82.)



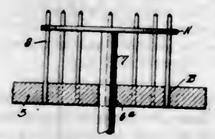
An extension for a bit having a shank and a tapered head forming a shoulder therewith, comprising an extension shank reduced in cross-section near its end having a groove therein forming a bed for the bit head with a shoulder at the front end encircling one-half of the bit shank and wings forming a continuation of said shoulder and with said shoulder providing a support

for the bit head so as to allow the latter to be freely suspended from the extension shank by its shoulder while the bit head is seated, and a sleeve slidable on



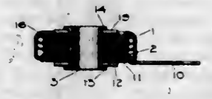
the extension shank having a block secured thereto engaging the exposed faces of the seated head for firmly locking the same when the sleeve is slid forwardly.

1,571,498. WOODEN SHOE. CHARLES J. SWANSTROM, Coronado Beach, Calif. Filed Oct. 6, 1924. Serial No. 741,987. 5 Claims. (Cl. 36—1.)



1. A shoe of the character described comprising separate forward and rear portions having sliding and interfitting engagement with one another through means of a substantially vertical joint extending from a point adjacent the forward edge of the heel.

1,571,499. ELECTRON-DISCHARGE DEVICE. JAMES HENRY THOMPSON, Hollidays Cove, W. Va. Filed Nov. 17, 1924. Serial No. 750,340. 3 Claims. (Cl. 250—27.)

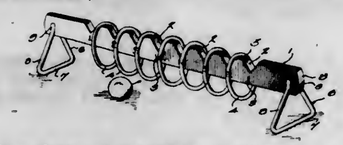


1. An electron discharge device comprising two separate filamentary cathodes adapted to emit electrons, a controlling electrode plate enclosed by said cathodes and within electron receiving relation thereto, said cathodes being so disposed as to form a double diagonal across the controlling electrode plate, upon the opposite sides thereof and extending from corner to corner and beyond the confines thereof.

1,571,500. DEVICE FOR WINDING SYMMETRICAL COILS. JAMES HENRY THOMPSON, Hollidays Cove, W. Va. Filed Apr. 24, 1925. Serial No. 25,635. 6 Claims. (Cl. 242—1.)

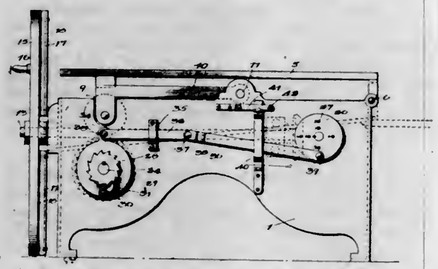
1. A device of the character described comprising a supporting base, a plurality of pegs extending therefrom, an inside squaring disc having a plurality of openings formed therethrough for the passage of said pegs, a freely movable, manually operable handle by which the inside squaring disc is carried, said base having an opening formed therethrough for the passage of said handle.

1,571,501. ELECTRICAL CONDENSER. HARRY R. VAN DEVENTER, New York, N. Y., assignor to Dubilier Condenser & Radio Corporation, New York, N. Y., a Corporation of Delaware. Filed June 25, 1923. Serial No. 647,682. 6 Claims. (Cl. 250—41.)



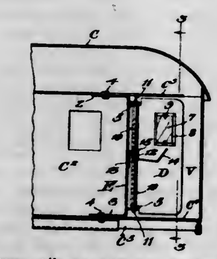
1. A condenser comprising a body containing sheets of electrically conductive material separated by sheets of dielectric, a ring extending around the periphery of said body and engaging portions of the opposite faces of the condenser adjacent said periphery to maintain said sheets under compression, said body having an aperture therethrough, and a tubular member passing through said aperture and having its extremities outside of the body of the condenser shaped to maintain compression upon said opposite faces and thus hold said sheets in firm engagement, part of the sheets of conductive material being electrically connected inside the condenser directly to said member.

1,571,502. METAL-EXTRACTION PROCESS. LIONEL VENN-BROWN, Longueville, New South Wales, Australia. Filed Sept. 23, 1924. Serial No. 739,432. 5 Claims. (Cl. 75—18.)



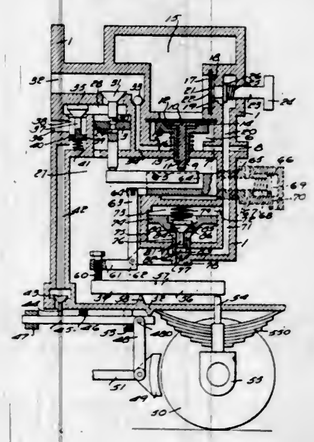
1. A process of extracting from their ores metals or metal salts capable of forming soluble chlorides, which consists in subjecting the ore in a fine state of division and in the presence of moisture to the action of hydrochloric acid gas to convert the metallic contents to soluble chlorides, drying the mass and heating it to a temperature sufficient to convert contained base metals (iron, arsenic) into compounds insoluble in non-acid solutions and to volatilize any uncombined arsenic, leaching out with a non-acid leach liquor the remaining soluble chlorides, and treating the chloride solution in known manner for the recovery of the metals and for the recovery of the acid radical (chlorine) in combination with iron as iron chloride.

1,571,503. GAME. ALLAN J. BARBER, Woonsocket, R. I. Filed Aug. 21, 1925. Serial No. 51,645. 6 Claims. (Cl. 273—127.)



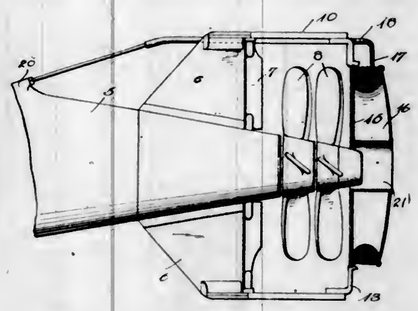
1. In a device of the character described, a bar, said bar being provided with recesses having denoted values, and endless members permanently mounted on said bar and adapted to be driven into said recesses by a projectile delivered toward said bar.

1,571,504. DOUGH-CUTTING MACHINE. JOSEPH BARON, New York, N. Y.; said Baron and Harry Baron administrators of said Joseph Baron, deceased. Filed June 3, 1922. Serial No. 565,519. 2 Claims. (Cl. 107—21.)



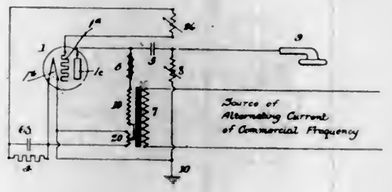
1. In combination, a table, a roller associated with the table for progressing a strip of dough thereacross, a ratchet wheel associated with the roller, a plate associated with the ratchet wheel, spring pressed dog on the plate engageable with the ratchet wheel, means for oscillating the plate so as to impart an intermittent motion to the roller, means for cutting the strip of dough into the form of noodles, a connecting rod attached at one end to the plate, a disk rotatably mounted and provided with a plurality of apertures situated at various distances from its periphery, a pin on the connecting rod engageable with the apertures, and means for imparting a rotary motion to said disk all in the manner and for the purpose specified, said connecting rod being formed in two hinged parts so that its ends may be readily engaged and disengaged with the apertures in said disk.

1,571,505. DOOR AND MOUNTING THEREFOR FOR TOY RAILROAD CARS. HARRY S. BECKER, Chicago, Ill., assignor to American Flyer Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 19, 1925. Serial No. 16,856. 6 Claims. (Cl. 46—48.)



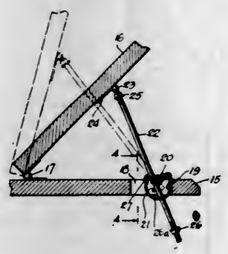
1. In a toy railway car, a car body including side members and having door openings in said side members, a support disposed transversely within the car body between the sides thereof, a door carried by said support and adapted to be moved into and out of closed relation to said door openings, and a spring for holding said door normally closed.

1,571,506. QUICK-ACTION TRIPLE VALVE. DOBRIVOJE BOŽIĆ Belgrade, Yugoslavia. Filed Oct. 4, 1923. Serial No. 666,458. 6 Claims. (Cl. 303—22.)



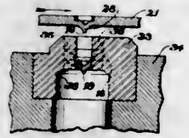
1. In a distributor for brakes, an interrupter piston, a compartment in which said piston works, a diaphragm dividing said compartment, one side of said diaphragm being exposed to a determinable pressure and the other in part to the pressure in the train pipe and in part to atmospheric pressure, a balancing piston, a lever adapter to be engaged by said pistons, a movable fulcrum for said lever, and means controlled by the load of the vehicle to be braked for varying the position of said fulcrum to effect variations in the relation of the efforts of said pistons, for the purpose stated.

1,571,507. TORPEDO. EDMUND S. R. BRANDT, Newport, R. I., assignor to the Government of the United States, represented by the Secretary of the Navy. Filed Oct. 17, 1923. Serial No. 668,985. 6 Claims. (Cl. 114—21.)



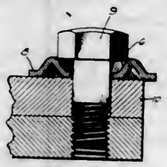
1. In a torpedo of the character described, in combination, an antenna reel and supports therefor mounted on the after-body of the torpedo, holding said reel in vertical position whereby it is released on launching of the torpedo.

1,571,508. ELECTROTHERAPEUTIC APPARATUS. WENDELL L. CARLSON and GLENN W. CARPENTER, Washington, D. C. Filed Mar. 24, 1921. Serial No. 455,106. 6 Claims. (Cl. 174—177.)



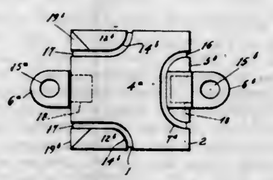
1. An electrotherapeutic apparatus comprising in combination a source of alternating current of relatively low frequency, a thermionic electron tube having an anode, cathode and grid electrode, an input circuit including said cathode and grid electrode, an output circuit including said anode and grid electrode, said circuits being electrically interlinked for the production of alternating current of relatively high frequency at which no bodily sensation is produced other than diathermic and a high frequency electrode connected with said output circuit for impressing said high frequency currents on the body of a patient.

1,571,509. ADJUSTABLE SUPPORT. THOMAS W. CONNOLLY, Los Angeles, Calif. Filed Aug. 16, 1924. Serial No. 732,498. 4 Claims. (Cl. 155—162.)



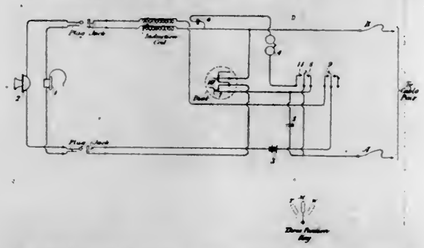
1. An adjustable support comprising a supporting member adapted for pivoted connection to a pivotal element, and a locking member adapted to be pivoted on a stationary element to normally gravitate to one position in which the supporting member is locked against movement to prevent lowering of the pivotal element and which is movable by the supporting member to another position in which the supporting member is freely movable to permit lowering of the pivoted element, and a latch associated with the locking member to secure the latter in the second mentioned position and thus allow lowering of the pivoted element, and abutments on the supporting member, one of which is adapted to engage the locking member as the supporting member reaches its uppermost position and move the locking member into engagement with the latch, and the other of which is adapted to engage the locking member when the supporting member reaches its lowermost position and move the locking member out of engagement with the latch.

1,571,510. METHOD OF MAKING ANVILS FOR AMMUNITION PRIMERS. JOHN A. DICKERMAN, Bridgeport, Conn., assignor to Remington Arms Company, Inc., a Corporation of Delaware. Filed July 3, 1923. Serial No. 649,338. 3 Claims. (Cl. 29—13.)



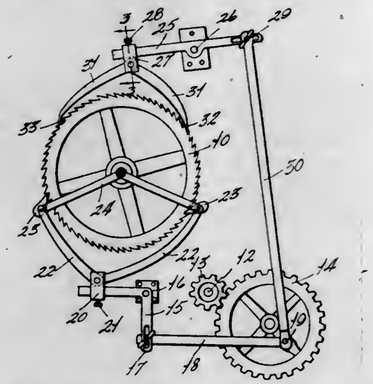
1. The method of making anvils for ammunition primers which comprises the steps of swaging the anvil point from a sheet of stock in a swaging machine, and cutting the anvil from said sheet stock in a separate subsequent operation of the machine.

1,571,511. LOCK WASHER. FARNUM F. DORSEY, Rochester, N. Y., assignor to North East Electric Company, Rochester, N. Y., a Corporation of New York. Filed Feb. 19, 1924. Serial No. 693,905. 1 Claim. (Cl. 151—3.)



In combination with a screw-threaded fastening device with a head of polygonal form; a lock-washer comprising a disc of sheet-metal, perforated to receive the body of said fastening-device and embossed to provide an annular hollow ridge with an inclined inner surface forming a conical socket for the reception of said head; said socket being greater in maximum diameter and less in minimum diameter than the head.

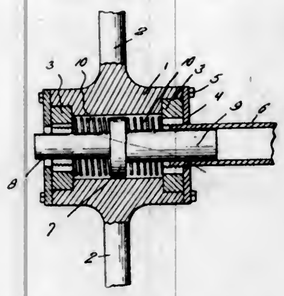
1,571,512. ELECTRICAL CONDENSER. WILLIAM DUBILIER, New York, N. Y., assignor to Dubilier Condenser and Radio Corporation, a Corporation of Delaware. Filed Jan. 31, 1924. Serial No. 689,756. 9 Claims. (Cl. 250—41.)



1. A condenser comprising a stack having corners and edges connecting the corners, a casing for the stack comprising a pair of sections engaging opposite faces thereof, each section gripping the corners of the stack and the edges between the corners, the said sections being spaced from each other and each having attached thereto a terminal for said condenser.

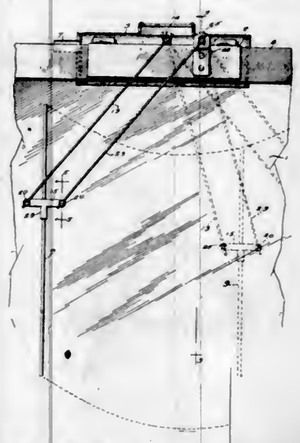
1,571,513. TELEPHONE SUBSTATION CIRCUITS. WILLIAM H. EDWARDS, Brooklyn, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Dec. 24, 1923. Serial No. 682,529. 1 Claim. (Cl. 179—81.)

A telephone substation set including a transmitter, a local battery therefor, a receiver, a condenser, an induction coil, an alternating current annunciator, a second condenser associated therewith, a dialing arrangement, and a three-position switching means, which switching means in the first position connects the receiver and the first condenser across the line and cuts out the transmitter; in the second position connects the receiver and the first condenser across the line, closes a circuit including the transmitter and the local battery, and prepares a dialing circuit; and in the third position connects across the line the alternating current annunciator and the second condenser.



1,571,514. COTTON-GIN FEEDER. GEORGE E. EVANS, Waco, Tex. Filed Aug. 28, 1923. Serial No. 659,733. 3 Claims. (Cl. 74—54.)

1. In a gin feeder, a ratchet wheel, a driving member, a pair of pawls engaging opposite sides of the lower portion of the ratchet wheel, a pitman connected with the driving member to actuate said pawls, in connection with a second pair of pawls engaging opposite sides of the upper portion of the ratchet wheel, a lever to which said second pair of pawls are connected by a common pivot at one side of its axis for movement toward and from the axis of the wheel, and a pitman connecting the last named lever with the driving member at substantially a right angle to the first named pitman.

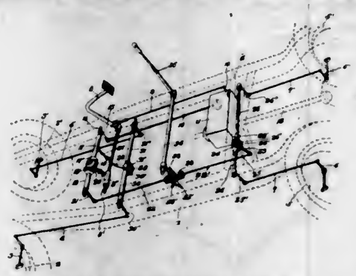


1,571,515. DIESTOCK. RICHARD C. FLEMING, Detroit, Mich. Filed Aug. 26, 1925. Serial No. 52,596. 1 Claim. (Cl. 10—127.)

In a structure of the class described, a die stock embodying a central bored hub having handles, said bore being enlarged at its outer end to provide counter-bores, cutting dies fitted in said counter-bores, retaining plates for said dies connected with said hub, a guide member having its central portion located in said bore and including axially aligned cylindrical guide extensions pro-

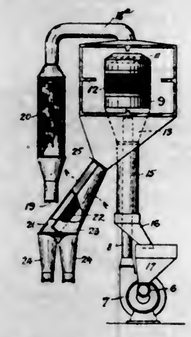
jecting through and beyond said counter-bores, and springs surrounding said extensions and bearing at their inner ends against the central portion of the guide member and at their outer ends against said dies.

1,571,516. WINDSHIELD CLEANER. FRED G. FOLBERTH and WILLIAM M. FOLBERTH, Cleveland, Ohio, assignors to Trico Products Corporation, Buffalo, N. Y., a Corporation of New York. Filed Mar. 4, 1922. Serial No. 541,209. 3 Claims. (Cl. 15—253.)



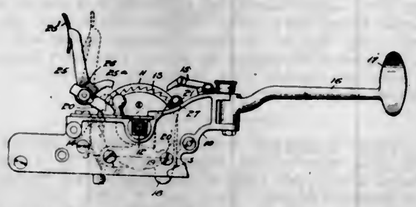
1. A windshield cleaner comprising a pair of pivotally mounted rods adapted to oscillate in parallelism, a cleaner support comprising a transverse arm pivotally connected to the lower ends of said rods at its opposite ends whereby said transverse arm will be retained in a substantially horizontal position, depending webs formed on said transverse arm forming a holder substantially V-shaped in cross section, and a cleaner element arranged in said holder.

1,571,517. HYDRAULIC BRAKE SYSTEM. GUIDO FORNACA, Turin, Italy. Original application filed Feb. 27, 1923, Serial No. 621,670. Divided and this application filed Mar. 6, 1924. Serial No. 697,868. 15 Claims. (Cl. 188—152.)



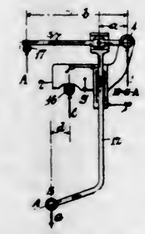
10. In a four-wheel brake system for motor cars, the combination, with the front and rear wheels and their individual brakes of front and rear differential operat-

ing mechanisms for the corresponding pairs of brakes, a third differential mechanism separate from the first two differential mechanisms but connected to operate



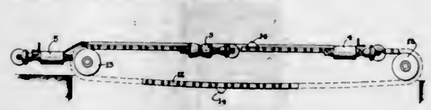
both of them, and a single fluid-operated piston connected to directly operate the third differential mechanism; substantially as described.

1,571,518. APPARATUS FOR REDUCING AND DRYING CASEIN CURD. ERNEST FOSTER, North Brunswick, Victoria, Australia, assignor to Vermont Casein Pty, Ltd., Melbourne, Victoria, Australia, a British Company. Filed Dec. 12, 1922. Serial No. 606,500. 3 Claims. (Cl. 83—9.)



1. In apparatus for drying casein, a blower including a fan and a casing, an air inlet duct leading to the casing, means to heat the air passing through said duct, a hopper on said ducts, a discharge pipe extending upwardly from the blower casing, a container at the upper end of said pipe into which the latter discharges, said separator being provided in its upper side with a concave disk and a return pipe leading downwardly from the container and arranged to discharge into the hopper.

1,571,519. REVERSE LINE-SPACING DEVICE FOR TYPEWRITING MACHINES. CARL GABRIELSON, Syracuse, N. Y. Filed Jan. 12, 1922. Serial No. 528,744. 12 Claims. (Cl. 197—114.)

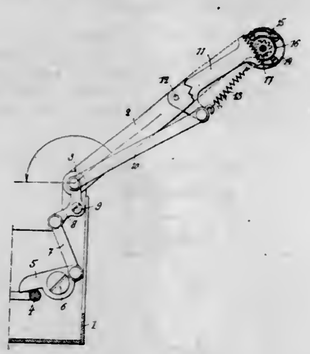


1. Reverse line spacing mechanism for typewriters, including in combination with the platen ratchet, a pivoted reverse line space lever, a pawl lever pivotally carried by said line space lever and having a portion adapted to engage the teeth of the platen ratchet and a second portion adapted to be engaged by the operator, and means for limiting the throw of the reverse line space lever in both directions.

1,571,520. AERIAL ROPEWAY. JOHANN GATZWEILER, Leipzig-Gohlis, Germany, assignor to Adolf Bleichert & Company, Leipzig-Gohlis, Germany. Filed July 2, 1924. Serial No. 723,657. 14 Claims. (Cl. 104—208.)

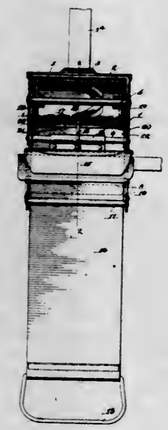
3. In combination in an aerial ropeway embodying a carrying rope and a traction rope, supporting members for said traction rope, load carriage means, and vertically reciprocal clip means so connecting said carriage to said traction rope that the latter bears a portion of the load when passing over said members.

1,571,521. CONVEYING MECHANISM. JEROME R. GEORGE, Worcester, Mass., assignor to Morgan Construction Company, Worcester, Mass., a Corporation of Massachusetts. Filed Mar. 18, 1921. Serial No. 453,411. 4 Claims. (Cl. 80—44.)



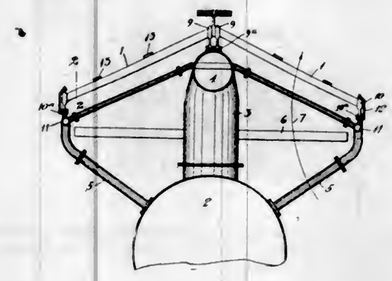
1. In rolling mill apparatus, a connecting table consisting of a series of alined conveyor rolls, each providing supporting surfaces oppositely inclined from and extending substantially at right angles to the normal central position of the stocks in its longitudinal travel on said rolls, the angle of inclination of said supporting surfaces being at or above the angle of sliding or moving friction and means for imparting to said rolls a surface speed different from the linear speed at which the stock is delivered thereto, whereby, in consequence of the slippage thus produced, said stock will seek the bottom of the incline afforded by said supporting surfaces.

1,571,522. PAPER-FEEDING MEANS FOR STENOGRAPHIC MACHINES. MARC GRANDJEAN, Paris, France. Filed Jan. 6, 1923. Serial No. 611,092. 1 Claim. (Cl. 197—133.)



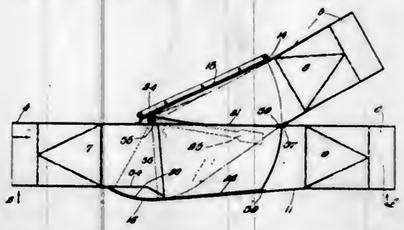
In a stenographic machine employing a paper band, the combination of a frame, an actuating member, a winding device for the said paper band, controlling means for the said winding device comprising a disc secured to the said winding device, pawls disposed upon said disc, a ratchet wheel driven by the said pawls, a pinion secured to the said ratchet wheel, an arm carrying the said winding device and pivoted to the said machine frame, a toothed sector engaging the said pinion, a spring adapted to rotate the said disc by the action of the toothed sector, of the pinion and of the pawls and adapted to bring again in position the said

toothed sector when the direction of rotation of the said winding device is reversed in order to draw the paper band to the rear and means for imparting the motion



of the actuating member to the said toothed sector, said means comprising a pivot joint whose axle is situated on the axis of the pivot connecting the said arm with the machine frame.

1,571,523. RAZOR STROPPER. HENRIK IPSEN, Brooklyn, N. Y., assignor to Maurice L. Brandt, New York, N. Y. Filed Sept. 8, 1920. Serial No. 408,848. 5 Claims. (Cl. 51—63.)

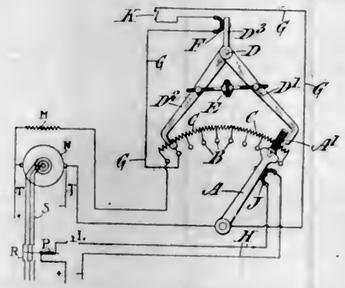


1. A device of the character described, comprising a strop, said strop being formed into a bight, a roller within the bight and adapted to be rotated in opposite directions by reciprocating movements of the strop, there being an endless peripheral groove in the cylindrical surface of the roller, a support for the roller, a blade holder pivoted in the support and adapted to oscillate transversely of the axial line of the roller and to be moved longitudinally of the roller, and a finger engaging a side wall of the groove and adapted to oscillate the holder, a spring for moving the holder to a position intermediate the extremes of oscillation, the engagement of the finger in the cam groove during rotation of the roller causing the holder to reciprocate in the direction at right angles to the direction of the oscillating movement.

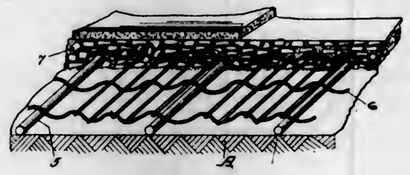
1,571,524. AIR-COOLED CONDENSER. FREDRIK LJUNGSTRÖM, Lidingo-Brevik, and BIRGER LJUNGSTRÖM, Stockholm, Sweden, assignors to Aktiebolaget Ljungströms Angturbin, Stockholm, Sweden, a Corporation. Filed Aug. 21, 1922. Serial No. 583,460. 5 Claims. (Cl. 257—25.)

1. A cooler for locomotive condensers, comprising two rows of collecting pipes, each pipe being provided with openings, cooling elements arranged side by side and extending between said rows of collecting pipes, the opposite ends of each cooling element being inserted in an opening of a collecting pipe of each row and communicating therewith, supporting stays arranged substantially parallel to the elements and between same, and means for maintaining said supporting stays in place between the elements.

1,571,525. CONVEYER SYSTEM. HARRY N. MIDDLETON, Westville, N. J., assignor to B. F. Sturtevant Company, Hyde Park, Mass., a Corporation of Massachusetts. Filed Feb. 18, 1921. Serial No. 446,000. 7 Claims. (Cl. 137—9.)



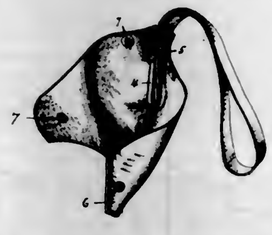
5. In a pneumatic conveyer system a supply pipe, a pair of delivery pipes, a closed section connecting the supply and delivery pipes and having side walls aligning with the outer or non-adjacent side walls of the pair of delivery pipes, a switch damper mounted within the section having top, bottom and side walls and open ends and providing a straight passage for the air and material, the receiving end of the damper fitting closely within the closed connecting section adjacent the supply pipe with the end of the supply pipe extending into the open end of the switch damper and the discharging end of the damper fitting closely one or another of the delivery pipes with a side wall of the damper engaging a side wall of the connection, and means for moving the switch damper to direct the material from the supply pipe into one or another of the delivery pipes.



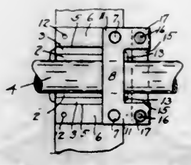
1,571,526. ELECTRIC SWITCH. RICHARD CALDWELL MINTON, East Boldon, England, assignor to A. Reyrolle & Company Limited, Hebburn-on-Tyne, England, a British Company. Filed Apr. 9, 1924. Serial No. 705,330. 4 Claims. (Cl. 172—179.)

1. In a resistance-regulating switch the combination of a resistance, a plurality of contacts connected to said

resistance in intervals or steps, a main contact-making member adapted to move over said contacts, an auxiliary switch adapted to be closed when the main contact-making member is in its initial position, and a second auxiliary switch adapted to be opened when the main contact-making member reaches the end of its travel and to be closed when the main contact-making member is in its initial position.

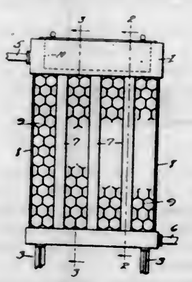


1,571,527. PAVEMENT AND METHOD OF MAKING SAME. ALBERT T. RHODES, Worcester, Mass. Filed July 7, 1923. Serial No. 650,142. 4 Claims. (Cl. 94—24.)



1. The method of making a pavement, which consists in providing means for supporting reinforcing material above a sub-grade, then applying a layer of stones, then withdrawing the supporting means to leave said material supported in said layer of stones, and finally applying grouting to unite the stones and the said material.

1,571,528. COIN AND KEY PURSE. MARY E. ROHR, Lynchburg, Va. Filed June 2, 1925. Serial No. 34,294. 6 Claims. (Cl. 150—28.)

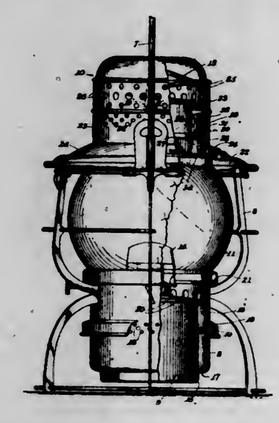


6. A hand bag composed of a plurality of layers of material, two adjacent of said layers secured near one end to form a pocket therebetween, the bottom of said pocket being convex from the other end of the hand-bag, the opening of the pocket being at the sides of the layers above said securement, and a handle secured at the said other end of the layers.

1,571,529. BEARING-RELINING CAP. LYMAN E. SHIPLEY, Carlton, Oreg. Filed Aug. 2, 1923. Serial No. 655,282. 3 Claims. (Cl. 22—123.)

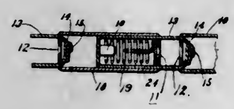
1. In a bearing relining device, a gage plate adapted to be secured to the bearing frame in predetermined position, and having a shaft gage groove therein wherein, when the shaft is drawn tight, it is brought to predetermined gage position and is separated from that portion of the bearing lying in the bearing frame, and providing a space through which molten bearing metal may be poured to fill the space thus formed between the shaft and the bearing lying in the bearing frame, whereby said metal, when cooled, forms an aligned and gaged bearing for the shaft in the bearing frame; in combination with means attached to and extending laterally from said gage plate and engaging the shaft to one side of the bearing and adapted to draw the shaft into said gage position and to support it therein while the bearing is being thus formed.

1,571,530. RADIATOR. WESLEY SIMMONS, Cleveland, Ohio. Filed Sept. 20, 1922. Serial No. 589,302. 3 Claims. (Cl. 257—139.)



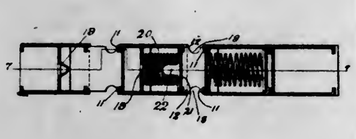
1. A radiator comprising an upper and a lower header and intermediate ducts connecting the same, tubular elements of conductive material interposed between adjacent ducts and having thermal contact therewith and with one another, said tubular elements being inclined to the horizontal to facilitate the circulation of air therethrough and therebetween, a trough formed within said upper header and wholly enclosed thereby and a valved connection between said trough and the interior of said upper header.

1,571,531. SIGNAL LANTERN. FURMAN D. SPEAR, New York, N. Y. Filed Apr. 24, 1925. Serial No. 25,513. 13 Claims. (Cl. 240—38.)



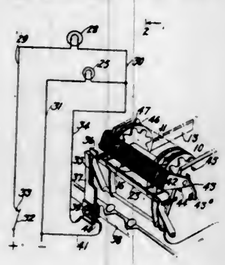
1. A signal lantern comprising a frame, a base secured thereto and having air inlets and a globe seat, a top member secured to said frame and having a dome with openings and a flaring reflector, a globe dome and holder mounted in said top and having a globe seat within said reflector and having air inlets communicating with some

of the openings in the top dome above said reflector and a baffling member between said domes for regulating the volume of air to be admitted into said globe dome the



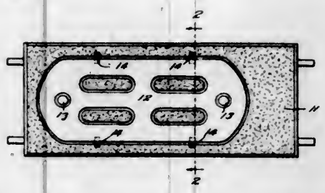
lower part of said globe dome being imperforate and substantially preventing the passage of air into said top member from below said reflector.

1,571,532. BRACELET. LOUIS E. VALCOURT, Providence, R. I., assignor to Louis Stern Co., Providence, R. I., a Corporation of Rhode Island. Filed Mar. 28, 1924. Serial No. 702,702. 12 Claims. (Cl. 59—79.)



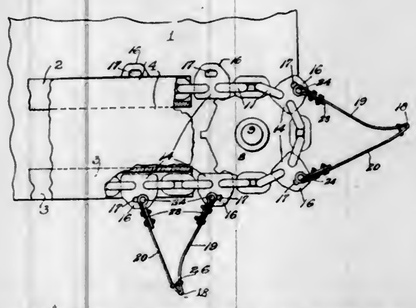
1. A bracelet structure comprising a series of box links, a slide link in each box link, inwardly-projecting fingers on the end of the box link pivotally connecting it to the next adjacent slide link, and a spring acting between said links for normally causing the ends of said box links to abut.

1,571,533. BRACELET. LOUIS EDMOND VALCOURT, Pawtucket, R. I., assignor to Louis Stern Co., Providence, R. I., a Corporation of Rhode Island. Filed July 31, 1924. Serial No. 729,273. 6 Claims. (Cl. 59—79.)



1. In a bracelet structure, a series of box-shaped links, a series of connecting links slidable in said box links, and integral members on the links of one series bent into position to extend laterally of said link for detachably engaging portions of the links of the other series.

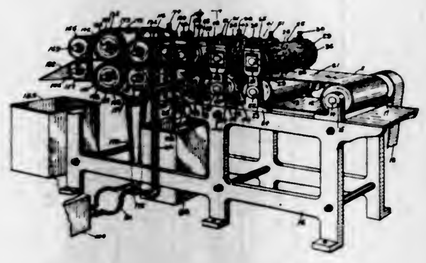
1,571,534. COMPUTING MACHINE. JOHN WALDHEIM, Elizabeth, N. J., assignor to Underwood Computing Machine Company, New York, N. Y., a Corporation of New York. Filed Dec. 14, 1920. Serial No. 430,609. 23 Claims. (Cl. 235—60.)



23. In a computing machine, a register comprising a set of number-wheels rotatable about a common axis and a shield having a sight-opening, and a transparent screen mounted to swing about said axis to and from a position across said sight-opening.

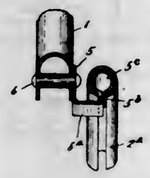
1,571,535. METHOD AND MEANS FOR SUPPORTING CORES. WILLIAM WASHINGTON, Dunkirk, N. Y. Filed Mar. 5, 1923. Serial No. 622,749. 2 Claims. (Cl. 22—184.)

1. The combination with the upper and lower mold sections, of a core held therebetween, said core having separate laterally projecting supporting members at opposite sides thereof adapted to contact with the edges of the mold section and support the core between said sections, said laterally projecting supporting members being of fusible metal which is absorbed during the casting operation.



1,571,536. CONVEYER. FRANK N. WILSON, Webster Groves, Mo. Filed July 7, 1922. Serial No. 573,429. 5 Claims. (Cl. 198—171.)

2. An endless conveyer having a chain consisting of a series of links provided with laterally extending lugs, which lugs are each provided with a slotted opening, a

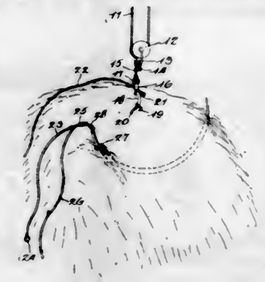


plurality of links connecting said first mentioned links, and a plurality of blades connected to the lugs of said first mentioned links by means of pins passing through the slotted openings.

1,571,537. TOBACCO-LEAF-STEMMING MACHINE. FREDERICK H. BEROLD, Cincinnati, Ohio. Filed Jan. 30, 1922. Serial No. 532,738. 21 Claims. (Cl. 131—57.)

2. In a tobacco stemming machine, the combination of stripping devices, and draw rolls acting to draw the stems between said stripping devices to strip said stems, said draw rolls comprising a suction roll acting on the stripped webs of the tobacco leaves to change the direction of travel of said webs.

1,571,538. FOLDING CHAIR. JULIUS L. CABLE, Boston, Mass. Filed Nov. 25, 1924. Serial No. 752,088. 5 Claims. (Cl. 155—147.)

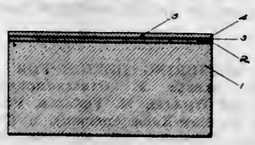


1. A folding chair comprising two pairs of pivotally connected crossed legs formed of semi-tubular metal, and arranged with their open sides facing downwardly, and a seat pivotally connected at its rear end to the rearwardly extending legs and at its front end to the forwardly extending legs, the pivotal connection between each pair of legs comprising a bracket having its base portion pivotally connected to the rearwardly extending leg and having a head slidably mounted in the middle portion of the forwardly extending leg, the edge portions of the latter being inturned to retain the head therein.

1,571,539. HAY-HANDLING METHOD AND DEVICE. JOHN W. CALLAHAN and GEORGE B. DUSINBERRE, Wellsboro, Pa., assignors to Callahan Distributor Company, Incorporated, Wellsboro, Pa., a Corporation of Pennsylvania. Filed Aug. 18, 1924. Serial No. 732,864. 16 Claims. (Cl. 214—5.)

1. The method of segregating a quantity of loose, interlaced material from a pile of the same which consists in introducing a flexible element in a curved path through said pile of material, and attaching the ends of said flexible element to an elevating means.

6. A needle for handling interlaced material having a curved pointed end adapted to leave the mass of interlaced material from the same side in which it is inserted.

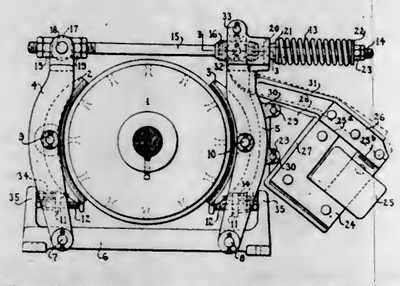


14. In combination a guide rope, a sling, a trip for the sling, and means for drawing the sling tightly around the enclosed material.

1,571,540. PLATED METAL AND METHOD OF PRODUCING THE SAME. VICTOR D. DAVIGNON, North Attleboro, Mass., assignor to General Plate Company, Attleboro, Mass., a Corporation of Massachusetts. Filed Feb. 27, 1924. Serial No. 695,520. 7 Claims. (Cl. 29—181.)

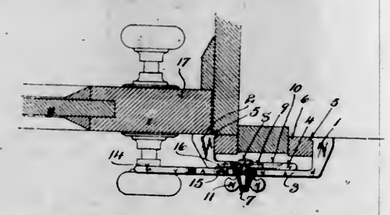
1. In composite plated metal product having a finely attenuated surface of precious metal, a thin backing of relatively hard, tenacious metal capable of resisting dilute nitric acid, and a relatively thick base of metal relatively soft as compared with the backing and relatively cheap as compared with the surface.

1,571,541. PLATED METAL. VICTOR D. DAVIGNON, North Attleboro, Mass., assignor to General Plate Company, Attleboro, Mass., a Corporation of Massachusetts. Filed July 25, 1924. Serial No. 728,134. 3 Claims. (Cl. 29—181.)



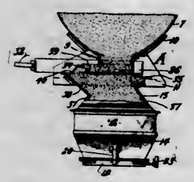
1. A composite plated metal having a finely attenuated surface of precious metal, a thin backing of steel, and a relatively thick base of metal relatively soft as compared with the backing and relatively cheap as compared with the surface.

1,571,542. BRAKE. BERNHARD E. FERNOW, Jr., Milwaukee, Wis., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis., a Corporation of Wisconsin. Filed July 2, 1921. Serial No. 482,070. 1 Claim. (Cl. 188—171.)



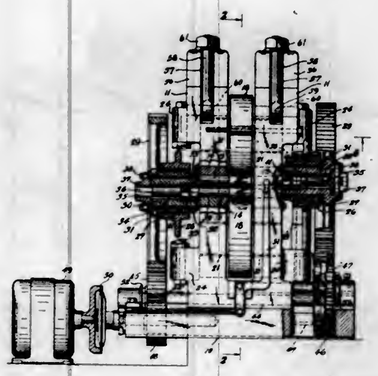
The combination with a brake drum, of a stationary supporting base to one side thereof, a pair of substantially parallel supporting arms pivoted to said base and arranged on opposite sides of said drum, brake

shoes pivotally secured to said arms, a rigid link extending between said arms, said link being pivotally and adjustably connected at one end thereof to the free end of one of said supporting arms, a brake operating member pivotally connected to said link and having one



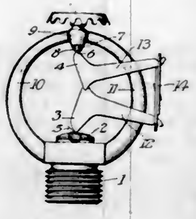
end thereof pivotally connected to the free end of the other of said supporting arms, an armature portion fixed to the free end of said operating member, an electromagnet including a field member fixed to said latter supporting arm and spring means associated with said link for effecting setting of said brake shoes.

1,571,543. PORTABLE DOOR LOCK. GUSTAV FRATZKE, Merrill, Wis. Filed Apr. 1, 1924. Serial No. 703,420. 2 Claims. (Cl. 292—258.)



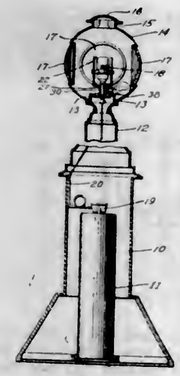
2. A portable lock comprising a pair of lugs adapted to grip opposite sides of a door casing, said lugs having slidably related arms, one of said arms being provided with ratchet teeth, a lever pivoted to the other of said arms and having teeth adapted to engage said ratchet teeth to draw said lugs towards each other when said lever is manipulated, and a bolt provided with a wing nut for locking said arms together.

1,571,544. MEASURING DEVICE FOR BULK MATERIALS. ALBERT F. GARLINGHOUSE, Aspinwall Borough, and WILLIAM M. VENABLE, Pittsburgh, Pa., assignors to Blaw-Knox Company, a Corporation of New Jersey. Filed Feb. 27, 1922. Serial No. 539,391. 8 Claims. (Cl. 214—1.)



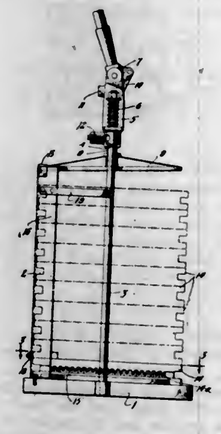
1. A device of the character described for handling bulk materials comprising, in combination, a discharge outlet whence discharged material forms one unbroken mass with that undischarged when said outlet is open; and a gate for said outlet permitting such unity of discharged and undischarged material when open and movable through the mass of material at a substantial interval from the outlet edge to close.

1,571,545. ROLLING MILL. CHARLES J. GIBBONS, Bridgeport, Conn. Filed July 14, 1924. Serial No. 725,857. 9 Claims. (Cl. 80—55.)



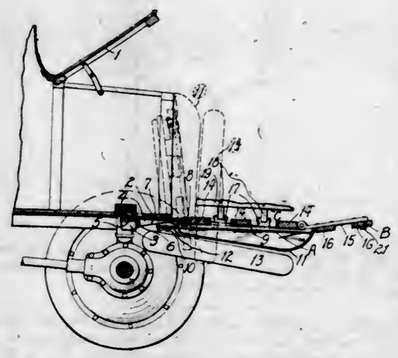
5. In a rolling mill, a pair of spaced housings, bearings in said housings, a roll mounted in said bearings, a driving gear substantially in axial alignment with said roll, said gear being provided with a central opening therethrough, a flexible connection from the end of the roll to the opposite side of said gear and located in said opening, a bearing for said gear, a support for said bearing, and means for so mounting the support that it and the gear may be moved awsy from the roll to allow removal thereof from the housings.

1,571,546. FIRE EXTINGUISHER. WILLIAM GRIMSHAW, Glen Ellyn, Ill. Filed Apr. 10, 1922. Serial No. 551,025. 1 Claim. (Cl. 169—39.)



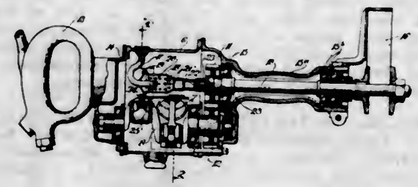
A means for stressing an automatic sprinkler comprising a sprinkler-frame having a portion adapted to be swaged and constructed with a hole to receive a stressing-pin, a stressing-pin adapted to fit said hole and provided with an elongated tapered portion decreasing in diameter towards its outer end, said tapered portion being adapted to lie in different positions in different sprinklers relative to the portion of the frame to be swaged, so that, when the exact stressing position of the pin is reached in different sprinklers, the swaged portion will engage some portion of the tapered portion of the pin and thus lock it in the stressing position.

1,571,547. SIGNAL APPARATUS. ARTHUR P. HAGAR, Newark, N. J., assignor to The Safety Car Heating & Lighting Company, a Corporation of New Jersey. Filed Feb. 21, 1924. Serial No. 694,823. 25 Claims. (Cl. 240—11.)



1. In signal apparatus, in combination, a gas light, means adapted to give light rays emitted therefrom a predetermined color, means adapted to give said light rays a second predetermined color, means actuated by the flow of gas to said light adapted to render said two coloring means effective alternately upon said light rays for predetermined periods of time, means for adjusting the length of said period of time during which said first coloring means is effective upon said light rays, and means for adjusting the length of said period of time during which said second coloring means is effective upon said light rays.

1,571,548. CIGAR-MOLD PRESS. THOMAS A. HORTON and ALBERT E. MASPONS, Kingston, N. Y. Filed Apr. 20, 1923. Serial No. 633,385. 6 Claims. (Cl. 100—57.)

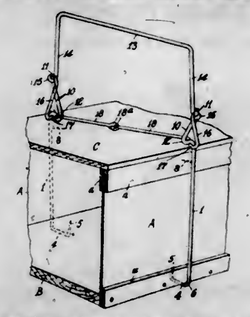


1. In a cigar mold press adapted to handle a plurality of forms, the combination of a frame having upright guide means flaring outwardly adapted to receive and position an end of the forms.

1,571,549. AUTOMOBILE BED. ARTHUR J. KERTP Clayton, Mo. Filed June 30, 1924. Serial No. 723,259. 5 Claims. (Cl. 296—26.)

2. In combination with an automobile body including a transverse frame member, brackets secured to said frame member, arms pivotally secured to said brackets, cross pieces secured to said arms, and an end extension and side members pivotally secured to said arms.

1,571,550. VENTING APPARATUS FOR MOTORS. THEODORE P. KINMAN, Cleveland, Ohio, assignor to Chicago Pneumatic Tool Company, New York, N. Y., a Corporation of New Jersey. Filed Jan. 3, 1922. Serial No. 526,652. 6 Claims. (Cl. 121—33.)

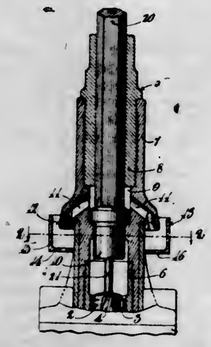


1. Means for venting the crank casing of a motor comprising a vent passage opening into a chamber within said casing, said chamber having a perforate wall adapted to be rotated when the motor is in operation whereby centrifugal force is utilized to restrain lubricant splashed about in the casing from entering said passage.

1,571,551. DETACHABLE HANDLE AND ATTACHING MEANS FOR WOODEN BASKETS. HENRY W. KRAMER, Kingston, N. Y., assignor of one-half to Ralph P. Young, Marlboro, N. Y. Filed Oct. 1, 1925. Serial No. 59,811. 8 Claims. (Cl. 217—125.)

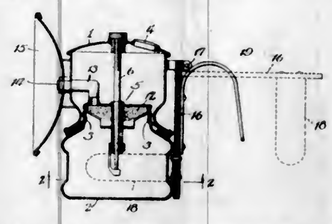
1. A handle for wooden baskets comprising side engaging members provided with vertically disposed portions adapted to extend above the top of the basket, and having a locking shoulder below the upper end thereof, of a separately formed bail member having guiding portions for engaging the vertically disposed projecting

portions of the side members, and hook portions adapted to engage said shoulders of the side members, where-



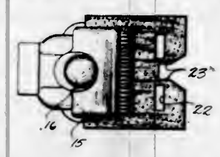
by said bail member when engaged with said side members, is rigidly connected thereto and maintained at all times in a substantially vertical position.

1,571,552. SAFETY RAZOR. LEANDER H. LA CHANCE and GEORGE BROWNING, Chicago, Ill., assignors to Lee Razor Manufacturing Company, Chicago, Ill., a Corporation of Delaware. Filed Jan. 21, 1921. Serial No. 438,860. 5 Claims. (Cl. 30—12.)



1. In a safety razor, in combination with a mount consisting of an integral plate having a blade-seating part, and a part struck back from the plane of said seat and folded forward, end portions forming a recessed connection from the blade seating portion to a guard-supporting terminal portion, said integral plate comprising also lugs folded back from the rear side of the blade seat, having end portions folded forward back of said seat for attaching the mount to a support which may thus be spaced back from said seat for accommodating blade-operating means behind the blade seat.

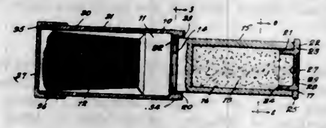
1,571,553. WATER-INTERCEPTING MEANS. EARLE A. LYNN, Spokane, Wash., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed June 18, 1920. Serial No. 389,975. 4 Claims. (Cl. 121—6.)



1. In combination with a rock drill having a rotating chuck and means for supplying cleansing fluid to a drill steel adapted to be received in said chuck, an attachment comprising a perforated annular portion in a plane transverse to said drill elastically gripping a stationary portion of said drill, and a portion coaxial with said drill and adapted to intercept liquid returning along said drill steel when the liquid is thrown by said chuck.

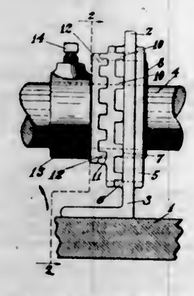
1,571,554. ACETYLENE LAMP. RAYMOND A. MULL, Benton Harbor, Mich., assignor to The Coolamp Company, Benton Harbor, Mich., a Corporation of Michigan. Filed Mar. 15, 1922. Serial No. 543,883. 8 Claims. (Cl. 48—4.)

1. In an acetylene lamp the combination of a water chamber, a carbide chamber, a feed tube extending downward from the water chamber and into the carbide chamber, carried by the bottom wall of the water chamber, in position to permit water to enter the upper end of the tube which bottom wall forms a removable cap for the top of the carbide chamber, a downwardly tapered valve member extending through said tube, means forming a screw adjustment for causing endwise movement of said member, comprising screw threads on the upper portion of said member, said member extending a distance below said tube, a stop on the lower end of said member to limit the upward movement thereof, said tube being tapered for its full length internally thereof at the same angle as said member, forming a valve seat for said member, whereby endwise adjustment of said member will vary the distance between the surface of said member and the surface of said tube, with one surface parallel with the other.



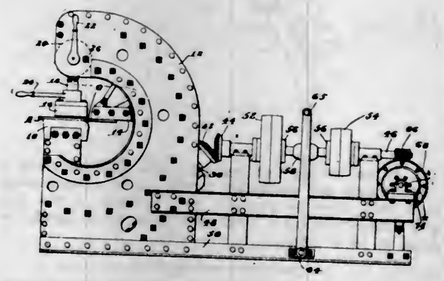
1,571,555. HONE FOR SHARPENING CLIPPERS. JACOB P. NIESEN, Chicago, Ill. Filed Aug. 27, 1924. Serial No. 734,375. 1 Claim. (Cl. 51—212.)

The combination with a hair clipper having a stationary and a reciprocating knife, of a reversible abrasive member adapted to be inserted between the knives having means engaging the clipper mechanism when inserted in one position to reciprocate the abrasive member over the stationary knife, and having means engaging the stationary knife when reversed to retain the same against movement.



1,571,556. BRUSH. BARNEY R. NYHAGEN, New York, N. Y. Filed June 3, 1924. Serial No. 717,519. 3 Claims. (Cl. 132—81.)

1. In a brush having an exteriorly threaded bristle head, a handle protruding from the head in an opposite direction to the bristles and the handle of less diameter than the head for providing an annular stop shoulder at its juncture with the head, a removable cap on the free end of the handle and having an outwardly projecting annular flange of a diameter similar to the diameter of the stop shoulder of said head, a movable tubular protective shell surrounding the head and bristles of the brush, said shell having an interiorly threaded end screwed on the threads of the bristle head and having adjacent the threads an inwardly protruding annular flange abutting against the top shoulder of the head,

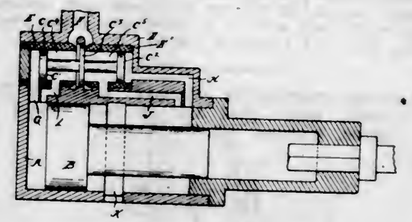


said shell also having exterior threads on its other end and the shell being slidably movable on the handle to and from its cap, and a threaded cap screwed on the second end of the shell.

1,571,557. SHAFT ADJUSTMENT. WILLIAM L. PAUL, Berkeley, Calif., assignor to Deere & Company, Moline, Ill., a Corporation of Illinois. Filed July 5, 1923. Serial No. 649,471. 4 Claims. (Cl. 308—62.)

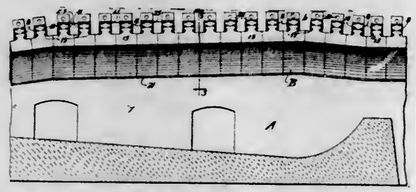
1. A shaft bearing, a shaft supported therein, sleeves on the shaft and in the bearing, one sleeve within the other eccentric to each other and to the shaft and rotatable to adjust the shaft in varying directions radial to its axis, means on the sleeves integral therewith and interlocking to hold said sleeves from independent rotation, and means on the bearing integral therewith and interlocking with means on one of said sleeves to hold the latter from rotation after the shaft is adjusted.

1,571,558. FLANGING MACHINE. JAMES G. RUSSELL, Dorchester, Mass. Filed Aug. 14, 1922. Serial No. 581,674. 9 Claims. (Cl. 153—16.)



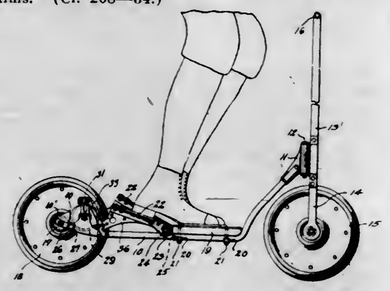
1. A flanging machine comprising means for holding material to be flanged, a bender adapted to operate upon material so held, and means for actuating said bender; the said holding means comprising a plunger movable toward and from the material along its own axis, and movable toward and from the material by rotation about an axis at right angles to its own axis, there being means to lock said plunger in different positions around the axis about which it rotates.

1,571,559. MILLING CUTTER AND PROCESS OF MAKING SAME. EDWARD F. SMITH, Chicago, Ill. Filed July 2, 1923. Serial No. 649,048. 4 Claims. (Cl. 76—101.)



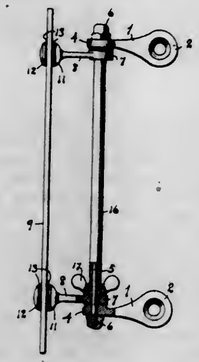
1. A milling cutter comprising a body portion consisting of a plurality of sheet metal blanks initially formed with marginal notches and secured together with the notches of different blanks in register with each other to form slots, and cutting teeth secured in said slots, the constituent elements of said cutter being brazed together to form a rigid, unitary structure.

1,571,560. PNEUMATIC TOOL. WILLIAM A. SMITH and CLARENCE H. DOCKHAM, Detroit, Mich., assignors to Chicago Pneumatic Tool Company, New York, N. Y., a Corporation of New Jersey. Filed June 6, 1921. Serial No. 475,535. 6 Claims. (Cl. 121—18.)



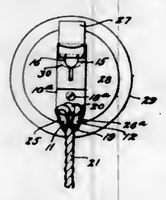
1. A valve construction for fluid-operated motors comprising a cylindrical casing, bushings therein spaced to form an annular port therebetween, a spool valve having end heads slidably fitting said bushings, and a central head or disk extending into said annular port and alternatively seating upon the opposite ends of said bushings, channels in said bushings surrounding said end heads and having exhaust ports connected thereto, said channels being seated by said heads respectively when said disk is seated upon the opposite bushing, a fluid supply passage communicating with said annular port, channels in said bushings leading from said supply passage to chambers at the ends of said valve, ports in said valve casing and bushing on opposite sides of said central disk alternatively in communication with said fluid supply passage and leading to the motor controlled by said valve, and an exhaust passage for the chamber at one end of said valve.

1,571,561. FURNACE-ROOF STRUCTURE. ENOCH P. STEVENS, Chicago, Ill.; Mary Ann Stevens executrix of said Enoch P. Stevens, deceased. Filed Apr. 12, 1923. Serial No. 631,650. 10 Claims. (Cl. 263—46.)



1. In a furnace having side walls, a roof structure comprising a plurality of removable bungs each including a supporting member adapted to be carried on the side walls, and a row of bricks carried by the supporting member with freedom of expansion and contraction.

1,571,562. SCOOTER. PHILO B. TINGLEY, New York, N. Y. Filed Mar. 13, 1924. Serial No. 698,875. 10 Claims. (Cl. 208—34.)



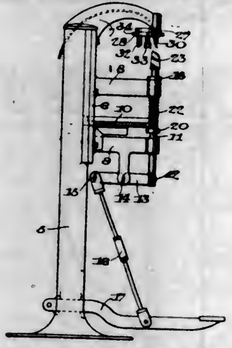
1. In a device of the character described, a stationary foot rest, a pair of treadles pivoted at the rear of said rest and each arranged for operation by the heel of a foot while the ball of the foot is on said rest, supporting wheels for said rest and an independent driving connection from each treadle to a wheel.

1,571,563. DEFLECTOR SUPPORT. HERBERT B. TRIX, Detroit, Mich. Filed Apr. 11, 1924. Serial No. 705,800. 5 Claims. (Cl. 296—84.)

4. In combination, two spaced supporting brackets, a clamping bracket in engagement with each supporting bracket, a rod connecting said brackets to limit the outward movement of the two outer brackets, a compression member extending between the two inner brackets and having a threaded end, and a nut on said threaded end in engagement with an inner bracket and adapted to press the opposite end of the compression member against the other inner bracket to press the inner and outer brackets together.

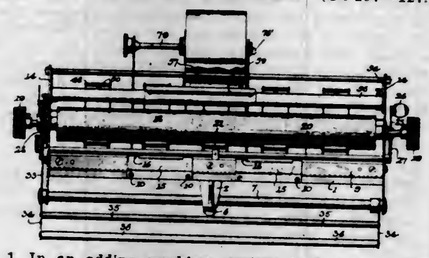
1,571,564. ATTACHING DEVICE FOR PICTURE AND MIRROR CORDS. ROBERT E. WALLISER, Chicago, Ill., assignor to H. F. Walliser Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 7, 1925. Serial No. 13,811. 5 Claims. (Cl. 24—115.)

1. A device of the character described, including a member having a socket; and a cord having a looped end fitting within said socket, said member having extensions curled around the opposite sides of said looped end of the cord.



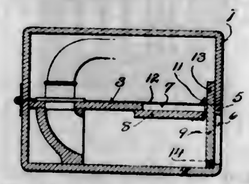
1,571,565. LETTERING INSTRUMENT. HUGO WEBBKIND, Nuremberg, Germany, assignor to Eugene Dietzgen Company, Chicago, Ill., a Corporation of Illinois. Filed Aug. 31, 1925. Serial No. 53,753. 5 Claims. (Cl. 120—110.)

1. A pen having four resilient nibs grouped about a common axis and means for forcing them outward away from each other to increase the thickness of the line, said means including a longitudinally movable element located in their midst.



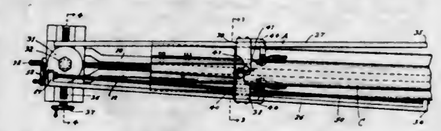
1,571,566. STITCH-DOWN LASTING MACHINE. SYLVESTER A. WEYENBERG, Milwaukee, Wis. Filed Dec. 15, 1922. Serial No. 607,068. 3 Claims. (Cl. 12—7.)

1. In a machine for making stitch down shoes wherein the upper is glued to the adjacent sole, the combination of a sole-engaging die, a plurality of upper-engaging dies, said upper-engaging dies being movable into cooperative relation, one at a time, with said sole-engaging die, and



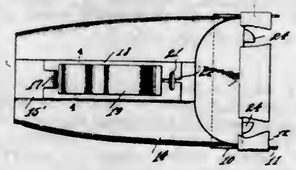
means for moving the cooperative dies relatively to each other to press the glued portion of the upper and sole into contact.

1,571,567. PAPER HOLDER FOR ADDING MACHINES. NELSON WHITE, Ithaca, N. Y., assignor to Peters Morse Manufacturing Company, New York, N. Y., a Corporation of New York. Filed Sept. 13, 1923. Serial No. 662,456. 15 Claims. (Cl. 197—127.)



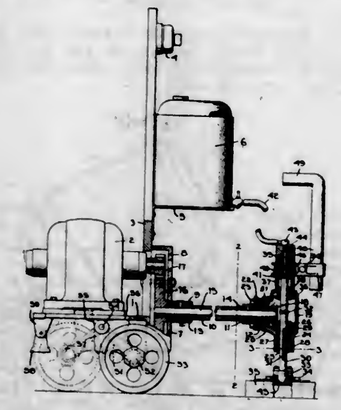
1. In an adding machine carriage having supporting castings, side frames, a platen, and paper roll holding means, a plurality of pressure rolls engaging said platen, a substantially rectangular shaft for pivotally mounting said rolls, a loosely mounted shaft secured between the side frames, and adapted upon rotation to release the pressure rolls from engagement with the platen, rock arms secured to said shaft, and a paper release bar secured to said rock arms.

1,571,568. PHONOGRAPH. DONALD T. ALLEN, Milwaukee, Wis., assignor to Prime Mfg. Co., Milwaukee, Wis. Filed Aug. 29, 1925. Serial No. 53,353. 3 Claims. (Cl. 45—52.)



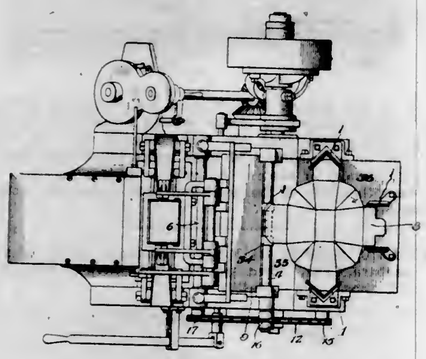
1. A portable phonograph comprising a body portion and a cover, said body portion having a top plate provided with a cutout and having a sound outlet opening in its front wall, and a slide positioned inwardly of said front wall and adapted to be drawn upwardly to uncover said outlet opening, and adapted to be moved rearwardly into the said cutout in the top plate.

1,571,569. RAIL CUTTER. DAVID E. ANDERSON, St. Paul, Minn. Filed Feb. 3, 1923. Serial No. 616,830. 18 Claims. (Cl. 266—23.)



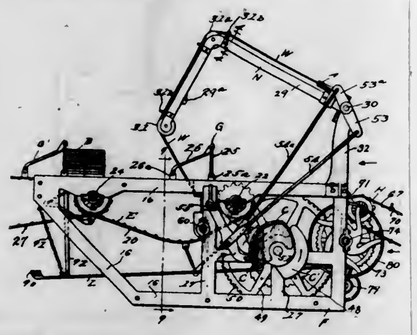
6. A rail cutter, comprising a rail clamping means, blow torch supporting means secured to said rail clamping means positioned on either side of the rail and means for operating said blow torch supporting means longitudinally of the rail whereby a portion may be cut from either side of the head and base of the rail simultaneously.

1,571,570. SAFETY STIRRUP. JOSEPH N. BURON, Santa Barbara, Calif. Filed Apr. 13, 1925. Serial No. 22,784. 3 Claims. (Cl. 54—49.)



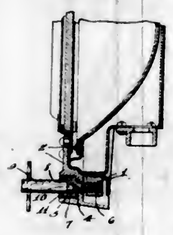
1. A stirrup including a foot receiving member having an opening in its upper portion, a rotatable member mounted on the said member and having a portion thereof projecting into the member through said opening, said rotatable member being arranged for contact with the rider's foot to facilitate the withdrawal thereof from the stirrup, and a covering means for the outer portion of said rotatable member.

1,571,571. BASE AND FLOOR BORDER POLISHING MACHINE. ERCOLE CAVICCHI, Quincy, Mass. Filed Oct. 17, 1924. Serial No. 744,136. 12 Claims. (Cl. 51—177.)



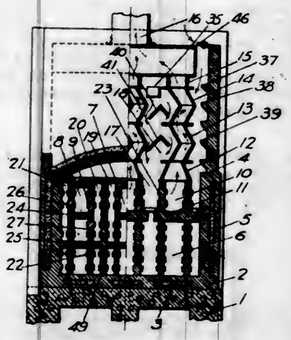
1. A portable surfacing machine comprising a frame having a lateral extension rigidly connected thereto, a motor mounted upon said frame, a tool-supporting head mounted on said extension and rotarily adjustable about the longitudinal axis thereof, a surfacing tool having a shaft rotatably mounted in said head and means operable by said motor for rotating said tool.

1,571,572. MACHINE FOR FEEDING SHEET MATERIAL. EDWARD CRAIG, St. Joseph, Mich. Original application filed Apr. 23, 1920, Serial No. 376,161. Divided and this application filed Aug. 19, 1921. Serial No. 493,573. 13 Claims. (Cl. 271—29.)



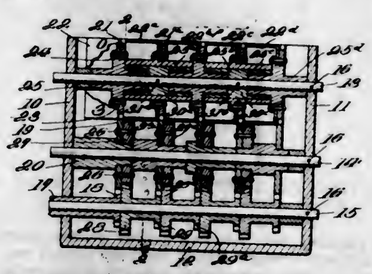
1. In a machine for making receptacles from sheet material, the combination of means for supplying the sheet material, and for supporting the front edge thereof, feed rolls to receive the sheet material from said means, a movable suction nozzle for pulling the edge portion of the sheet material downward into position to be engaged by said feed rolls, and guiding and supporting means to receive the sheet from said rolls, together with supporting and operating means whereby said nozzle is unaffected by the operation of said rolls, in combination with instrumentalities including a sprocket chain for operating said feed rolls, a second pair of feed rolls also operated by said sprocket chain, the second pair receiving the sheet material from the first pair, and means including a reciprocating member upon which said feed rolls are carried for reciprocating said rolls horizontally, a portion of said sprocket chain being disposed horizontally to facilitate the reciprocation of the feed rolls.

1,571,573. BINDING MACHINE. ALBERT EARL CRANSTON, Spokane, Wash., assignor to Alec J. Gerrard, Chicago, Ill. Filed Sept. 4, 1919. Serial No. 321,643. 16 Claims. (Cl. 100—31.)



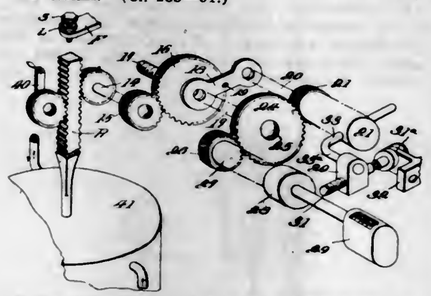
12. In a binding machine for binding integers of substantially fixed contour into a bundle; mechanism for advancing said integers irrespective of variations in their circumferential sizes, and without adjustment into binding positions; and mechanism for automatically binding and tying said integers with wire irrespective of variations in their circumferential sizes within the capacity of the machine.

1,571,574. LOCK. ROYAL E. CROSSLEY, Syracuse, N. Y., assignor to Crouse-Hinds Company, Syracuse, N. Y., a Corporation of New York. Filed Dec. 4, 1923. Serial No. 678,530. 4 Claims. (Cl. 70—14.)



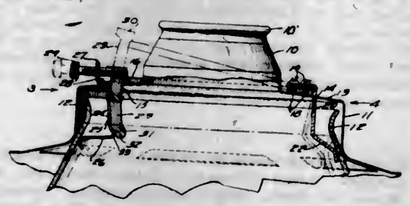
1. A lock for holding two parts together comprising a rotatable member having a head and axial shank extending through said parts and provided with means for interlocking therewith and unlocking therefrom upon the turning of said member, the head being formed with a socket and countersink concentric with the axis of the shank, the socket opening eccentrically through the bottom of the countersink, in combination with a key having a cylindrical body substantially fitting the countersink and an eccentric pin for entering said socket.

1,571,575. PROCESS OF HEATING GASES AND EQUIPMENT THEREFOR. WILLIAM A. DARRAH, Chicago, Ill. Filed Apr. 25, 1923. Serial No. 634,642. 11 Claims. (Cl. 263—20.)



1. A furnace for heating gases, which consists of combustion chambers having walls of relatively good conducting material, flues connecting said combustion chambers to a stack, spaces between said combustion chambers and flues for the circulation of said gases to be heated, and separating walls of lower heat conductivity than said chamber walls located in said spaces between said combustion chambers.

1,571,576. HEAVY-DUTY COUNTER. JAMES M. DAYTON, Hartford, Conn., assignor to Dayton Manufacturing Company, Torrington, Conn., a Corporation of Connecticut. Filed Aug. 6, 1925. Serial No. 48,600. 10 Claims. (Cl. 235—1.)



2. In a counter, a shaft, a plurality of wheels journaled about the axis of said shaft and bearing bushings attached to said wheels and supported concentrically with said shaft, some of said bushings overlapping each of the adjacent bushings.

1,571,577. COMPENSATOR. JAMES M. DAYTON, Hartford, Conn., assignor to The Dayton Manufacturing Company, Torrington, Conn., a Corporation of Connecticut. Filed Aug. 18, 1925. Serial No. 50,974. 10 Claims. (Cl. 235—91.)

8. The combination of a counting mechanism for a pump, a continuously oscillating lever actuated with the pump, a second oscillating lever in operative relation with the counting mechanism, a fixed fulcrum for said second lever in fixed relation thereto, said second lever being actuated directly by said first lever, and means to adjust said fixed fulcrum and said second lever.

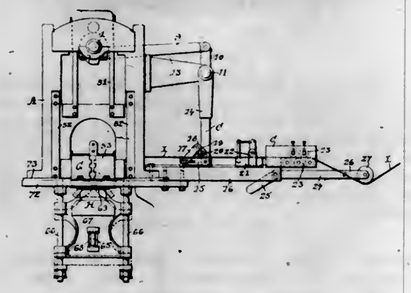
1,571,578. SHADE SUPPORT. LEROY C. DOANE, Meriden, Conn., assignor to The Miller Company, Meriden, Conn., a Corporation of Connecticut. Filed Mar. 31, 1925. Serial No. 19,575. 19 Claims. (Cl. 240—131.)

17. In a shade support, a normally horizontal ring having an arm depending from one side of the ring and arc shaped about a center at the opposite side of the ring.

1,571,579. ARTIFICIAL FABRIC. NINA L. DURYEA, Stockbridge, Mass. Filed Sept. 30, 1921. Serial No. 504,469. 1 Claim. (Cl. 154—52.)

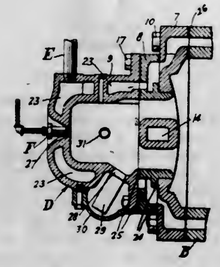
A fabricated material comprising a plurality of layers, each of said layers having fibres disposed longitudinally therein, but one only of said layers having its fibres disposed longitudinally of said material, the other layers being superimposed thereon so that the fibres of each superimposed layer are angularly disposed to said first mentioned layer and overlap the outside edges thereof.

1,571,580. AUTO WRENCH. MOSES P. FISHBURN, Carthage, Mo. Filed June 16, 1925. Serial No. 37,506. 1 Claim. (Cl. 81—121.)



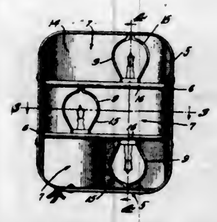
A tool of the class described comprising a strip of sheet metal, one end of the strip of sheet metal being bent upon itself and constructed to provide an octagonal socket member, said socket member having various sized openings in the wall thereof, and said strip of sheet metal being cut away to provide a handle portion.

1,571,581. HOLDER FOR FLAGS OR THE LIKE. DAVID FLIEGELMAN and HORACE M. BRIDGEWATER, Bridgeport, Conn. Filed Nov. 13, 1924. Serial No. 749,679. 1 Claim. (Cl. 248—37.)



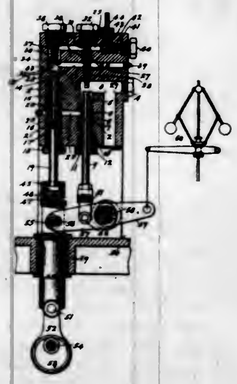
As an article of manufacture, a holder for staffs of flags or the like adapted for use upon automobiles or other vehicles, comprising a single piece of spring metal and including a longitudinally split laterally expansible and contractible resilient tubular portion having an unobstructed passage of uniform cross section therethrough permitting engagement of said staff to any desired extent in parallel relation to the axis of said tubular portion, said tubular portion adapted to be expanded to receive and to contract to clampingly secure the staff, the split being centrally at the rear of said tubular portion, the front of the holder extending below the rear of said tubular portion and being an integral continuation of the front part thereof whereby the tubular portion terminates in spaced relation to the base of the holder, spring arms at each side in integral continuation of said front part below the tubular portion, said arms being adapted for clamping the holder to a portion of the vehicle.

1,571,582. FLEXIBLE-SHINGLE-WIRING MACHINE. ALBERT ABBE GRISWOLD, Providence, R. I., and ALVIN CARROLL GODDARD, Richmond Hill, N. Y., assignors, by direct and mesne assignments, of one-half to said Griswold and one-half to John Francis Chevalier, Brookline, Mass. Filed May 12, 1922. Serial No. 560,481. 5 Claims. (Cl. 140—93.)



1. In a flexible-shingle wiring machine, a frame having a bed, a driving mechanism having a driving shaft, a wire staple forward carrying mechanism consisting of a cam on the driving shaft engaging with a roll in a vertical frame which is reciprocally supported in bearings in a fixed frame on the main frame of the machine, a bell-crank lever pivotally secured to a bracket on the main frame and having a vertical and a horizontal arm, a link on the horizontal arm adjustably secured to the lower end of a vertical connecting rod the upper end of which is adjustably secured to the reciprocating frame, means for adjusting the connecting rod, staple forward pushing plates on the bed of the machine and operatively connected with the upper end of the vertical arm of the bell-crank lever, and a spring on the connecting rod, whereby the spring will operate to move the staple forward pushing plates forward and the cam will move the staple forward pushing plates backward.

1,571,583. CYLINDER HEAD FOR INTERNAL-COMBUSTION ENGINES. LEON F. HOFFMAN, Franklin, Pa., assignor to Chicago Pneumatic Tool Company, New York, N. Y., a Corporation of New Jersey. Filed June 10, 1924. Serial No. 719,054. 12 Claims. (Cl. 123—173.)

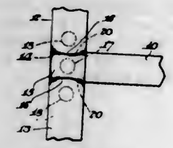


1. In an oil engine, in combination with the cylinder thereof, a three part cylinder head comprising a cylinder head ring engaging the cylinder and providing an opening of smaller diameter than the cylinder bore, a perforated partition member engaging said ring and closing said opening, and a combustion chamber member engaging said partition member, and means securing the parts of the head together and to said cylinder.

1,571,584. SAFETY STOP LIGHT. CLYDE M. JANES, Pawtucket, R. I. Filed May 4, 1923. Serial No. 636,647. 1 Claim. (Cl. 177—329.)

A signaling box including a body portion, partitioning members arranged within the body portion and providing an upper compartment, a lower compartment, and an intermediate compartment, curved partitioning members extending transversely of the compartments, the curved partitioning members in the lower compartment and intermediate compartment having flanges bent outwardly and inwardly to embrace portions of the first mentioned partitioning members and, the last mentioned partitioning members having cut out portions to receive lamp bulbs.

1,571,585. FUEL PUMP FOR INTERNAL-COMBUSTION ENGINES. OLAV ESKIL JORGENSEN, New York, N. Y., assignor to Worthington Pump and Machinery Corporation, New York, N. Y., a Corporation of Virginia. Filed Jan. 25, 1921. Serial No. 439,803. 7 Claims. (Cl. 123—140.)

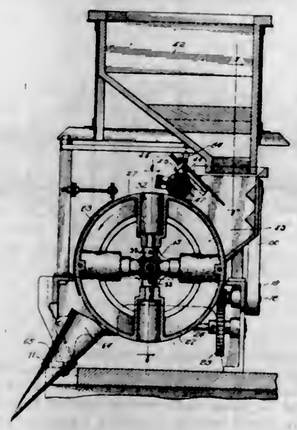


1. In a fuel injection pump, a plunger chamber having suction and discharge means, a plunger by-passing fluid during part of its pressure stroke, means actuated by said plunger for operating said suction means to relieve pump pressure, and speed responsive mechanism controlling said plunger actuated means to regulate the amount of fluid pumped per plunger stroke.

1,571,586. PILE-FORMING WIRE FOR PILE-FABRIC LOOMS. JACOB KAUFMANN, Elkins Park, Pa., assignor to Steel Heddle Manufacturing Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed May 29, 1925. Serial No. 33,641. 5 Claims. (Cl. 139—46.)

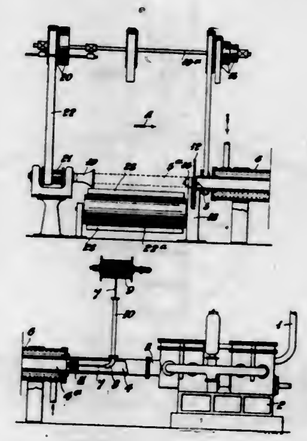
1. A pile forming wire, and a controlling heddle to which one end of said pile forming wire is attached,

said heddle comprising two strips of thin, flat metal or wire, the end of the pile forming wire being positioned between said strips, said strips being perma-



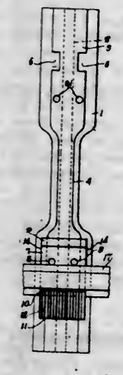
nently united to the end of the pile forming wire and being permanently united to each other adjacent the place of attachment of the pile forming wire.

1,571,587. BOBBIN HOLDER FOR BRAIDING MACHINES. KASPER KAZARIAN, Providence, R. I. Filed Oct. 31, 1925. Serial No. 66,090. 6 Claims. (Cl. 96—15.)



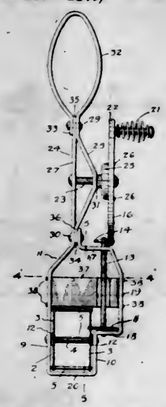
1. A braiding machine bobbin holder having a high tooth adapted to engage the teeth on a braiding machine bobbin and a low tooth adapted to engage the bobbin teeth, for the purpose as described.

1,571,588. MEASURING MACHINE FOR PEANUTS AND THE LIKE. GUSTAVE C. KELLING, Chicago, Ill. Filed Feb. 1, 1922. Serial No. 533,291. 4 Claims. (Cl. 221—107.)



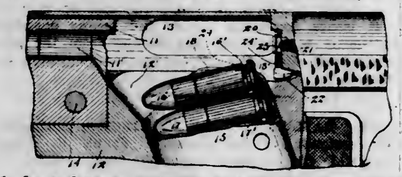
1. A measuring machine for loose material comprising a frame, a member rotatably mounted thereon of cylindrical form, a plurality of outwardly opening receptacles therein, means for filling said receptacles with said material at a given point in its rotation, means for retaining said material in the receptacles, means for rotating said receptacles in the member as the latter rotates, and means for releasing said material at a given point in the rotation of the member.

1,571,589. APPARATUS FOR THE MANUFACTURE OF CANDLES. ELIZABETH ANNA KERR, Dublin, Ireland. Filed June 8, 1925. Serial No. 35,801. 2 Claims. (Cl. 18—13.)



1. A unitary automatic apparatus for manufacturing candles comprising a mold, means for introducing a wick in said mold, means for forcing wax through the mold, a cutter arranged to shape the end of the wax after it issues from said mold, and means operating intermittently to sever the wax issuing from the mold following each operation of the cutter to shape the end thereof.

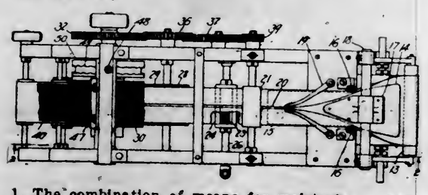
1,571,590. RAILWAY. JOHN M. KINCADE, Springfield, Ohio, assignor of two-fifths to Frank E. Snypp, Springfield, Ohio. Filed June 20, 1923. Serial No. 646,597. 6 Claims. (Cl. 238—65.)



1. The combination in a track equipment of a sleeper, a baseplate mounted thereon, a rail mounted on said baseplate and engaged thereby, means for locking said rail, baseplate, and sleeper to one another, means for preventing said locking means from becoming unlocked, and means for preventing access to said locking means.

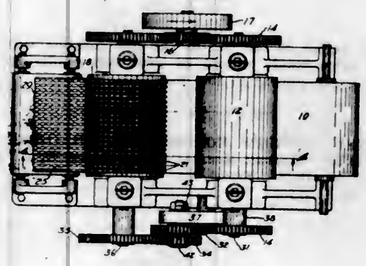
1,571,591. EGG BEATER. HARRY C. LOCKWOOD, Brooklyn, N. Y. Filed July 24, 1925. Serial No. 45,737. 17 Claims. (Cl. 259—137.)

17. An egg-beater having a beater rotor mounted on a substantially horizontal axis, and an impact member adjacent said beater rotor, against which the material carried upward is impinged.



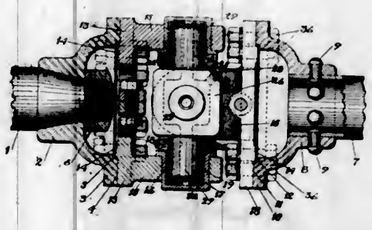
1,571,592. AUTOMATIC PISTOL. CRAWFORD C. LOOMIS, Ilion, N. Y., assignor to Remington Arms Company, Inc., a Corporation of Delaware. Filed Aug. 3, 1921. Serial No. 489,513. 14 Claims. (Cl. 42—7.)

1. In a firearm, a frame, a firing chamber, a breech block mounted for reciprocation on the frame, a magazine having a discharge opening adjacent said breech block, a downwardly extending feeding lug on the breech block and means formed upon the magazine whereby the cartridge is given a preliminary tilting movement during the forward movement of the breech block.



14. The process of transferring a cartridge from a magazine to a firing chamber, comprising imparting a forward and upward movement to the base of the cartridge to release said cartridge from an adjacent cartridge, tilting said cartridge so that its forward end is raised to facilitate its insertion into the chamber, and then moving said cartridge into said chamber.

1,571,593. PAPER CRINKLING. WILLIAM A. LORENZ, Hartford, Conn., assignor to The Otaka Fabric Company, Hartford, Conn., a Corporation of Connecticut. Filed Dec. 9, 1920. Serial No. 429,317. 32 Claims. (Cl. 92—69.)



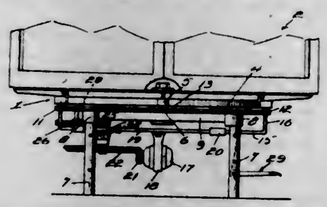
1. The combination of means for moistening a web of paper, and a pair of rolls having corrugations to cooperate to form longitudinal flutings or corrugations in the web, the corrugations in the rolls having wave-like configuration.

1,571,594. PAPER EMBOSSING. WILLIAM A. LORENZ, Hartford, Conn., assignor, by mesne assignments, to Otaka Fabric Company, Hartford, Conn., a Corporation of Connecticut. Filed Aug. 5, 1921. Serial No. 489,958. 19 Claims. (Cl. 154—30.)

1. A web-embossing machine comprising coupled power-driven embossing rolls and coupled power-driven feeding-in or drawing rolls geared to run at higher peripheral speed than the embossing rolls, and a supplementary set of power-driven indenting or embossing rolls through which passes the web that is indented or embossed by the first set of embossing rolls.

1,571,595. UNIVERSAL COUPLING. RALPH M. LOVEJOY, Meredith, N. H. Filed Oct. 28, 1921. Serial No 510,994. 20 Claims. (Cl. 64—102.)

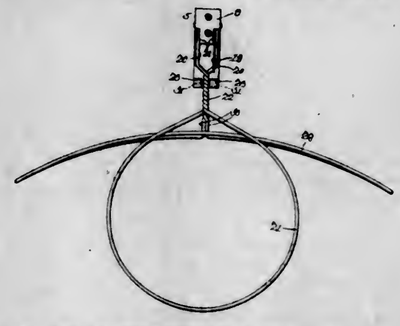
1. A universal coupling for a driving and a driven shaft comprising coupling means having trunnions, yoke members formed in complementary sections adapted to be assembled in pairs, each section having a socket provided with a closed base to receive a trunnion, means for securing the sections of a pair together after assemblage upon the trunnions of the coupling member and means for securing the assembled pairs of sections respectively to said driving and driven shafts.



1,571,596. MEASURING INSTRUMENT. ANNA MILLER, Dallas, Tex. Filed Aug. 1, 1925. Serial No. 47,591. 2 Claims. (Cl. 33—2.)

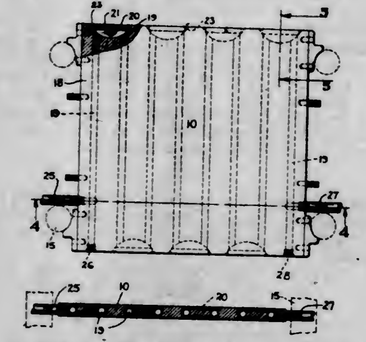
1. A measuring instrument of the class described including a rigid rule, a coupling pivotally engaged with one end of the rule, a tape looped at one end about the coupling, said tape being formed of flexible material

folded over upon itself along two spaced longitudinally dimensions so as to provide a three-ply structure.



1,571,597. ROTARY SHOW-CASE STAND. CHARLIE E. NICHOLS, Augusta, Ga. Filed Dec. 29, 1924. Serial No. 758,657. 4 Claims. (Cl. 211—20.)

4. In a structure of the class described, a relatively stationary table embodying standards, radiating arms connected to the tops of said standards, a circular track mounted upon said table, a pair of spaced parallel guide rods carried by and disposed beneath said track, a rotary head mounted for rotation upon said track, said head embodying radially disposed spider arms carrying a depending circular frictionally driven band, a plate slidably mounted between the aforesaid guide rods, intermeshing gearing carried by said plate, driving means for said gearing carried by said plate, a friction pulley in association with said gearing and in frictional driving contact with said band, spring means for normally maintaining said pulley in frictional contact with the band, and a bell crank fulcrumed upon said table and connected with said plate for sliding it in a direction upon said guide rod against the tension of said spring means.

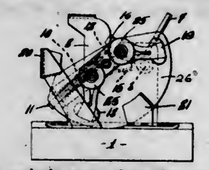


1,571,598. GARMENT HANGER. CHARLES E. NORDENDALE and HARRY W. NORDENDALE, Chicago, Ill. Filed Aug. 26, 1925. Serial No. 52,632. 2 Claims. (Cl. 211—13).

1. In a device of the class described, the combination with a plate and a casing secured to one end thereof, of upwardly extended spaced lugs at the other end of said plate, said end of the plate adjacent said casing, and said casing secured to a support, said casing having a pair of spaced guide-ways between its sides, a hat holding ring having strands twisted together and extended radially therefrom, the said strands being separated near their free ends and pivotally connected to the interior of the casing so as to operate in said guide-ways, a coil spring mounted transversely in said casing and having one of its ends in contact with one of said strands and

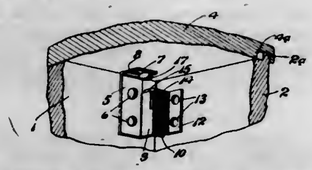
its other end in engagement with said casing, a coat hanger having extended therefrom at about its middle, a shank provided at its free ends with arms to engage said lugs, the said strands of the hat ring being adapted to normally rest slightly above and between said lugs.

1,571,599. PLATEN FOR VULCANIZING PRESSES AND THE LIKE. J. FRANK NORTH, Ansonia, Conn., assignor to Farrel Foundry & Machine Company, Ansonia, Conn. Filed Mar. 7, 1922. Serial No. 541,839. 28 Claims. (Cl. 18—17.)



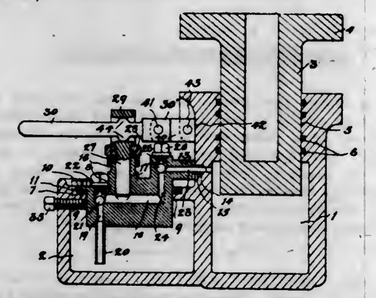
1. A platen for presses and the like, adapted to be heated or cooled by an interiorly circulating fluid, and composed of a rolled steel plate having a plurality of suitably interconnected drilled bores, forming a sinuous duct, the passages interconnecting adjacent bores being formed by recesses cut through opposite edges of the plate, but shut off from the exterior of the plate, and said bores terminated at said passages.

1,571,600. ELECTRIC SWITCH. EDWIN A. OLLEY and FLOYD C. SMITH, Syracuse, N. Y., assignors to Crouse-Hinds Company, Syracuse, N. Y., a Corporation of New York. Filed Mar. 28, 1921. Serial No. 456,248. 8 Claims. (Cl. 200—67.)



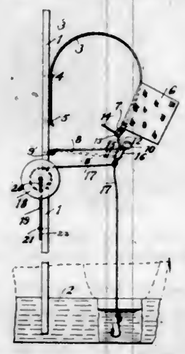
1. In a switch, a base, a support rising from the base, a switch arm pivoted to the support, and an operating lever pivoted to the support on an axis at one side of and parallel to the axis of the switch arm, the operating lever having an arm extending crosswise of the axis of the switch arm and movable across such axis, a compression spring interposed between the arm of the lever

and the switch arm to throw the switch, the switch arm being also formed with spaced apart shoulders and the arm of the lever being also formed with a shoulder extending between the former shoulders to engage the same



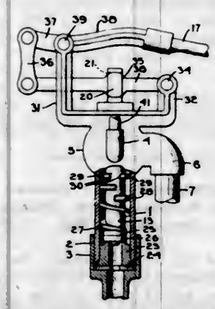
and throw the switch arm when the operating lever has been moved far enough to tension and position the spring to throw the switch arm and the spring fails to act, substantially as and for the purpose set forth.

1,571,601. BOOKCASE CONSTRUCTION. JAMES A. RICHARDS, Grand Rapids, Mich., assignor to The Gunn Furniture Company, Grand Rapids, Mich., a Corporation of Michigan. Filed Apr. 7, 1924. Serial No. 704,734. 6 Claims. (Cl. 45—48.)



1. In a book case construction, end members, front and rear upper rails located horizontally between the end members, interengaging connecting devices attached to the said rails and end members, said devices connected to the end members having horizontally located upper sections having upper sides in the same plane with the upper edges of the said end members, said upper sections being slotted, a top over the said end members and rails, and headed members attached to and depending from the under side of the top, the shanks thereof being received in said slots in said upper sections of said devices, substantially as and for the purposes described.

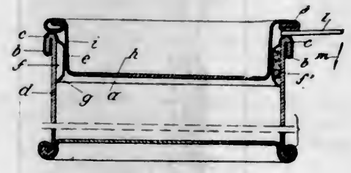
1,571,602. HYDRAULIC JACK. JAMES ROBERTS, Toronto, Ontario, Canada. Filed Mar. 20, 1924, Serial No. 700,488. Renewed Dec. 11, 1925. 2 Claims. (Cl. 138—9.)



1. An hydraulic jack comprising a base having a ram chamber and a separate fluid receptacle; a ram operating in said ram chamber; a pump secured to said fluid receptacle and connected with the ram chamber, and embracing a plunger having a slotted head, the upper end of said slot being curved downwardly, and the lower end thereof being curved upwardly, and the apexes of said curved surfaces being substantially in alignment with the longitudinal axis of said plunger; a lever extending through said slotted head and provided at its upper and lower sides with aligned bossea projecting therebeyond which operate in contact with the curved upper and lower ends of said slots, and means fixedly carried by said base and projecting laterally therebeyond and to the outer end of which the inner end of said lever is pivoted so that the fulcrum for said lever will be substantially in alignment with the longitudinal axis thereof, said pump through the movement given to said plunger through the medium of said lever drawing fluid from said fluid receptacle and forcing it into said ram chamber.

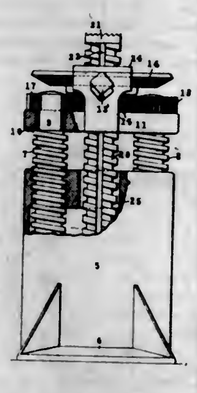
1,571,603. FISHERMAN'S TYPE. CHARLES S. RUGOLES, Quincy, Mass. Filed Sept. 27, 1924. Serial No. 740,386. 4 Claims. (Cl. 43—16.)

1. In a fisherman's type, the combination with a post or bar member, an elastic member slidably attached thereto, an attaching ring in the outer end of the elastic member, a trip-arm pivotally attached to the bar comprising a short piece of wire having its outer end formed with a closed loop to provide a substantially deep exteriorly located recess on its upper side for receiving the loop of the line which supports the hook, said arm having its extreme outer end bent to form an obtuse angular shaped portion to receive the said attaching ring of the elastic member, the construction and arrangement of the trip device being such that when the line and arm are pulled downward the ring is readily disengaged from the angular shaped portion of the arm and the loop of the line is disengaged from the said recess, and a reel attached to the bar on which the line is wound.



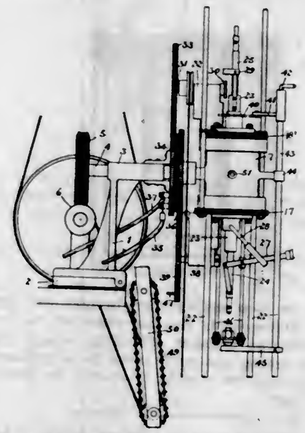
1,571,604. BALL COCK FOR USE UPON HIGH AND LOW PRESSURE SYSTEMS. THOMAS W. RYAN, Concord Junction, Mass. Filed Feb. 14, 1924. Serial No. 692,722. 11 Claims. (Cl. 137—104.)

8. A ball-cock comprising a casing having a relatively long cylindrical chamber with inlet and outlet openings, a valve seat at said inlet opening, a piston reciprocably



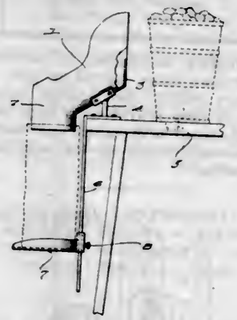
mounted in said chamber having a valve co-operating with said valve seat, a spiral deflector on a portion of said piston and a series of baffle plates alternately arranged at intervals and overlapping at their adjacent ends and acting to divide the stream beyond said spiral deflector into a plurality of streams and to cause the same to flow in sinuous paths.

1,571,605. MEANS FOR CLOSING RECEPTACLES. EDMOND LOUIS ROMAIN SALLES, Paris, France. Filed July 16, 1921. Serial No. 485,232. 7 Claims. (Cl. 220—42.)



1. Means for closing containers comprising two elements fitting one into the other when they are forced one into the other, a ferrule interposed between the two elements, the said ferrule being fixed by one of its edges on to one of the elements, and having its body substantially parallel to an engaging portion of the other element, and extending from the point of attachment out of contact with a wall of the element on to which it is fixed, the other edge of the ferrule being bent back towards but unattached to the wall of the element onto which it is fixed to permit a yielding action when the elements are fitted one into the other.

1,571,606. JACK. KENNETH H. SAUNDERS, Brattleboro, Vt., assignor to Millers Falls Company, Millers Falls, Mass., a Corporation of Massachusetts. Filed Jan. 12, 1925. Serial No. 1,815. 18 Claims. (Cl. 254—102.)

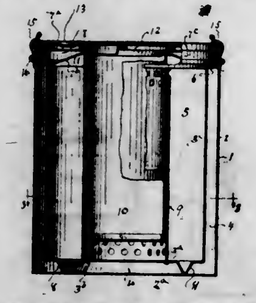


18. In a jack, in combination, a plurality of intermeshing gears, a support therefor, gear-operating mechanism carried by said support, a screw threadedly connected to one of said gears, a keyway formed in said screw, a key carried by said support and extending into said keyway, a base, and a further screw arranged beside said first-named screw and threaded into said base, said further screw being rotated by another of said gears.

1,571,607. METHOD OF AND APPARATUS FOR THE MANUFACTURE OF HOLLOW WARE FROM REFRACTORY MINERAL SUBSTANCES. CYRIL C. SCHNUR, Toronto, Ontario, Canada. Filed May 16, 1923. Serial No. 639,436. 9 Claims. (Cl. 204—64.)

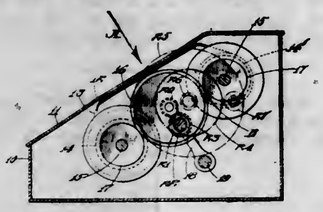
1. A method of manufacturing hollow ware from refractory mineral substances, consisting in first fusing a quantity of the substances into a tubular billet with an electric arc, then extinguishing the arc and then drawing the fused material into an elongated tubular form.

1,571,608. BAG HOLDER AND FILLING DEVICE. RAYMOND H. STILLMAN, Eatontown, N. J. Filed Nov. 22, 1924. Serial No. 751,613. 1 Claim. (Cl. 83—26.)



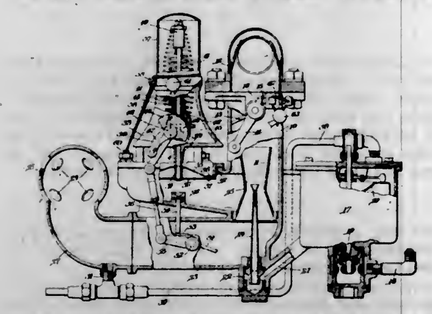
In combination, a horizontal support, a standard rising from the horizontal support adjacent one end thereof, an inclined hopper mounted on the standard and disposed to extend over said end of the horizontal support, the lower end of said hopper being disposed vertically, and a bag holder supported from said end of the support and disposed below the lower vertical portion of the hopper.

1,571,609. ICE-CREAM FREEZER. FRANK A. STIERUP, Westfield, N. J. Filed Oct. 20, 1923. Serial No. 669,657. 3 Claims. (Cl. 220—9.)



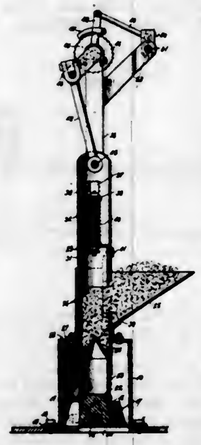
1. An ice cream freezer comprising a casing having an open end and double walls spaced apart and provided with a member closing the outer end of the space between said walls, the outer wall extending beyond the inner wall, a perforated cylinder secured at its inner end to a wall of said casing and having an open outer end opening

through the open end of said casing, a cover for the open end of the casing adapted to be supported upon the inner wall of the casing within the outer end of the latter, said cover having an opening, and a chamber depending from said cover adapted to fit within said cylinder, said cham-



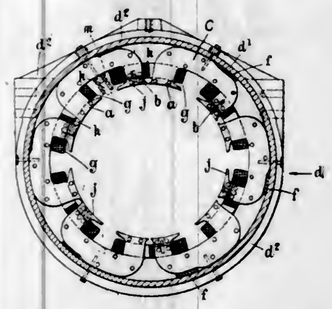
ber having an open end opening through said opening in said cover, and a cover for said chamber, the outer end of the perforated cylinder extending beyond the inner wall of the casing, the main cover being recessed on its inner side around its opening to receive the adjacent end of the cylinder.

1,571,610. WEB-WINDING MECHANISM. PHILO B. TINOLEY, New York, N. Y. Filed Feb. 6, 1923. Serial No. 617,219. 6 Claims. (Cl. 40—93.)



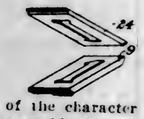
1. In a winding mechanism, in combination, a pair of rollers, friction disks carried by said rollers respectively, a single friction disk located between said first named disks in close proximity to both and bodily movable into engagement with either, and means for rotating and simultaneously bodily moving said last named disk in either direction.

1,571,611. CARBURETOR. JESSE G. VINCENT, Detroit, Mich., assignor to Packard Motor Car Company, Detroit, Mich., a Corporation of Michigan. Filed Jan. 13, 1916. Serial No. 71,936. 2 Claims. (Cl. 231—46.)



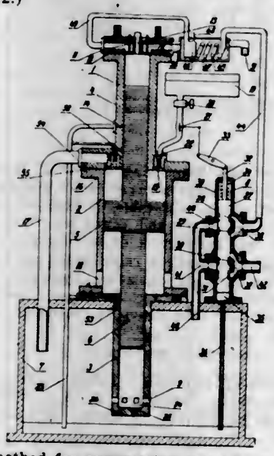
1. In a carburetor, the combination of a mixing chamber, means for supplying fuel thereto, main and auxiliary air intakes, a butterfly valve in the main intake provided with a cam surface, a valve in the auxiliary air intake, and a continuous rod extending through the walls of said intakes between said valves arranged to engage said cam surface and restrict the opening of the auxiliary intake valve in accordance with the position of the butterfly valve.

1,571,612. STOKER. WILBURT WARD, Ste. Genevieve, Mo. Filed Aug. 24, 1925. Serial No. 52,002. 4 Claims. (Cl. 214—35.)



1. A stoker comprising, in combination, a hollow reciprocating member adapted to deliver successive charges of fuel to a grate, and having a fuel receiving opening, means to deliver fuel to said opening, means in the path of said member adapted to telescope therewith to prevent escape of gases while said opening is receiving fuel and other means telescoping with said member to close said opening while said member is delivering fuel to the grate.

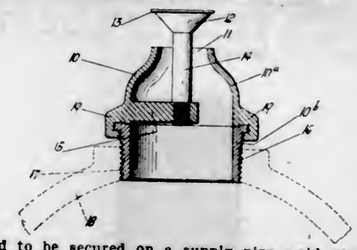
1,571,613. DYNAMO-ELECTRIC MACHINE. HAROLD KENNETH WHITEHORN, Maidstone, England, assignor to Tilling-Stevens Motors Limited, Maidstone, England. Filed Aug. 6, 1924. Serial No. 730,488. 4 Claims. (Cl. 171—228.)



1. A dynamo-electric machine having a field magnet including the combination of a plurality of magnets each having one pole of comparatively large and one of comparatively small sectional area, a large pole and a small pole from adjacent magnets forming two separate sections of each main pole of the complete field magnet and a series winding spanning each small pole section.

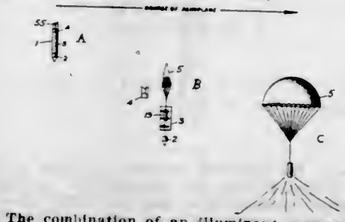
1,571,614. STAMPING MACHINE WITH TRANSFERABLE DIES. THEODORE R. WILLWERSCHEID, St. Paul, Minn. Filed June 19, 1925. Serial No. 38,169. 4 Claims. (Cl. 101—18.)

1. A mechanism of the character described, having a fixed element and a movable element, a die holder affixed to the stationary element, and a die holder slidably connected to the movable element, said second die holder having die retaining means therein to be moved adjacent the movable element during an operation thereof to lock a die in the die holder, and to be moved laterally beyond the movable element when said movable element is returned to an unoperated conditon, to free the die for removal.



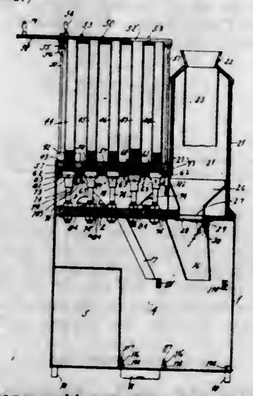
1,571,615. METHOD AND APPARATUS FOR COMPRESSING GAS. JULES BABIN, Paris, France. Filed July 12, 1922. Serial No. 574,413. 6 Claims. (Cl. 123—2.)

1. A method for compressing gases by means of a free flying piston travelling in a cylinder consisting in introducing a charge of a compressed explosible mixture into the cylinder, igniting said charge when the piston has travelled over a part of its stroke, utilizing the working of the piston produced by the introduction of the said charge and by the explosion, to reduce the volume of a supply of compressed gas whose pressure is kept constant, using the same working of the piston for the suction of a given charge of the gas to be compressed, using the expansion of the said supply of compressed gas for producing the working of the piston in an opposite direction, using the said opposite working of the piston for compressing and then forcing at a constant pressure, the charge of gas to be compressed, using said opposite working of the piston for expelling the exhaust gases, and equalizing the quantity of motive power produced by the expansion of the compressed gas and the quantity of resisting power invested in the compression of the gas and its forcing at a constant pressure, so that the free flying piston will reach its starting point with a speed equal to zero.



1,571,616. SPRAY NOZZLE. ALVIN B. BACKHERMS, Akron, Ohio, assignor of one-half to Elmer J. Green, Akron, Ohio. Filed Apr. 6, 1925. Serial No. 20,891. 3 Claims. (Cl. 299—121.)

3. A sewage spray nozzle including a two part dome of non-corrodible material, one of said parts having a discharge orifice therein and carrying an arm having a sprender thereon and the other of said parts being

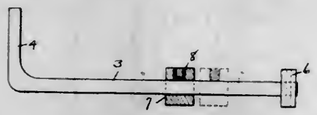


adapted to be secured on a supply pipe, said parts being detachably connected together adjacent the arm, and means on said parts for securing them together.

1,571,617. AERIAL FLARE BOMB. PRESTON R. BASSETT, Brooklyn, N. Y., assignor to Elmer A. Sperry, Brooklyn, N. Y. Filed Sept. 22, 1917. Serial No. 192,776. 17 Claims. (Cl. 102—20.)

17. The combination of an illuminant, means for supporting said illuminant in the air, a casing for said illuminant and said supporting means, said casing comprising a plurality of sections, means connecting said sections operable to release said sections, time-controlled mechanism in one of said sections for operating said connecting means to release said sections, said illuminant being positioned in another of said sections, and a connection between said time mechanism and said illuminant whereby separation of the respective sections ignites said illuminant.

1,571,618. CHANGE-MAKING MACHINE. SAMUEL J. BELL, Springfield, Mass., assignor to Bell Register, Inc., Woonsocket, R. I., a Corporation of New York. Filed Oct. 4, 1921. Serial No. 505,433. 16 Claims. (Cl. 133—4.)

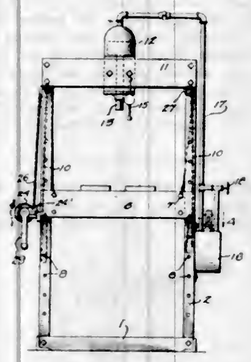


2. In a change-making machine, a container for coins, a container for objects, other than coins, of the same shape and size, and means for simultaneously dispensing a plurality of said coins and transferring one or more of said objects.

1,571,619. DEVICE OR IMPLEMENT FOR KILLING OR DISABLING INSECTS, FLIES, AND THE LIKE. JOHN L. BENNETT, Decatur, Ill., assignor to U. S. Manufacturing Corporation, Decatur, Ill., a Corporation of Illinois. Filed Feb. 9, 1923. Serial No. 617,956. 1 Claim. (Cl. 43—137.)

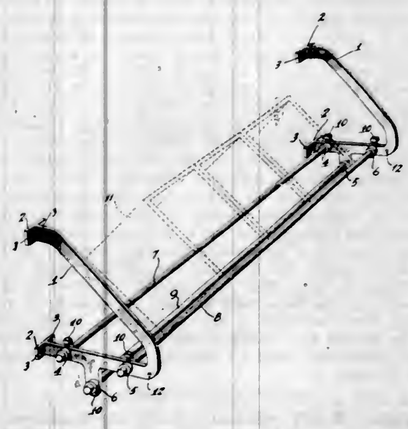
A device of the character described including in combination, a flexible body of substantially rectangular shape having its lower corner portions folded upon the body along lines which converge toward a point and form a triangular extension, a handle member having diverging portions positioned between the body and said folded portions at the said triangular extension and fitting closely within the folds and securing means passing through the body and the folded portions and positioned between the diverging portions, additional securing means passing through the body and the folded portions and located above the said diverging portions, and a binding element secured to the outer end and side edges of the body and having transverse terminal portions extending across the body at the triangular extension and extending beyond the said folded portions.

1,571,620. DRILL HOLDER. FRED M. BETTES, Erie, Pa., assignor to Erie City Iron Works, Erie, Pa., a Corporation of Pennsylvania. Filed May 22, 1922. Serial No. 562,579. 2 Claims. (Cl. 77—59.)



1. In a drill brace, the combination of a bar; a support extending at an angle to the bar; and spaced collars fixed on the bar adapted to engage the walls of a flue, one collar being pressed into engagement with a wall of the flue at one side of the axis of the flue and the other collar pressing the wall of the flue at the opposite side of the axis through the canting action of the support.

1,571,621. DUSTLIKE FUEL. FRIEDRICH WILHELM BRANDES, Solvesborg, Sweden. Filed July 3, 1924. Serial No. 723,940. 3 Claims. (Cl. 44—1.)



1. The method of preparing naturally unagglomerated coal for transportation and subsequent use in a pulverized fuel burner, which comprises comminuting said coal, temporarily forming the comminuted coal into briquettes for transportation, and subsequently comminuting the briquettes for use in the burner.

1,571,622. PRESS. PETER A. BRIGGS, Spokane, Wash. Filed July 30, 1923. Serial No. 654,728. 3 Claims. (Cl. 138—10.)

1. A hydraulic press comprising a pair of standards, a table slidably mounted between said standards, a cylinder arranged above said table, a plunger mounted in said cylinder, a plunger rod connected thereto and extending below said cylinder, a drum rotatably mounted on one of said standards, a cable coiled around said drum and having its ends extending upwardly, means for securing the ends of said cable to said table, and a spring mounted on said drum to normally prevent rotation thereof.

1,571,623. DISPLAY DEVICE. LOUIS CHARTOFF and JOSEPH SUMERSPITZ, Brooklyn, N. Y. Filed June 8, 1922. Serial No. 566,736. 1 Claim. (Cl. 211—17.)

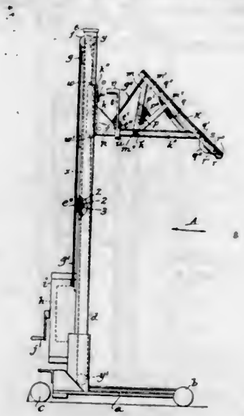
A display device embodying a pair of brackets adapted to be secured to a fixed vertical support so as to extend in juxtaposed parallel relation and each of which

is provided with a plurality of holes through which bars are adapted to extend, three bars extending between the brackets and through said holes with two of the bars in substantially the same horizontal plane and the third bar between and below the other two bars so as to form a V-shaped trough having an angular cross section of greater than 90 degrees in which boxes are adapted to be received and supported with one face of each box engaging with two of the bars and another face of such box engaging with only one of the bars, and locking means associated with each hole to lock the bars against longitudinal shifting but permitting adjustment of the distance between the brackets when the locking means is released.

1,571,624. PURIFICATION OF GAS. JOHN WILLIAM COBB and HENRY JAMES HODSMAN, Leeds, England. Filed Jan. 5, 1925. Serial No. 658. 1 Claim. (Cl. 23—3.)

The improved process of purifying fuel gases which comprises subjecting the fuel gases to the action of contact materials, adapted to secure the partial oxidation of the hydrogen sulphide under conditions of temperature and humidity which will ensure that the free sulphur formed shall be carried forward from the contact material and that the latter maintains its activity and utilizing ammonia to enable the removal of sulphur dioxide present in the gas after partial oxidation of the hydrogen sulphide to be effected by condensation and washing operations, the ammonia content of the fuel gases being adjusted to ensure that under the conditions in which the treatment with the contact material and the further treatment of the gas is carried out, the acidic oxygen containing sulphur compounds may be effectively removed.

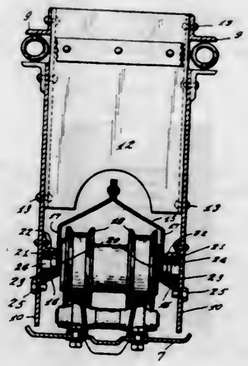
1,571,625. FLAKED SOAP AND PROCESS OF MAKING THE SAME. GEORGE F. DAWES, La Crosse, Wis. Filed Feb. 26, 1921. Serial No. 448,168. 7 Claims. (Cl. 87—16.)



1. A step in the process of making granular soap which consists in submitting soap containing a great amount of water to a dry heat at a temperature of approximately 250° F. to 400° F., and at atmospheric pressure to thereby raise the water in the soap to steam and cause its expulsion suddenly from the soap and thereby render the soap porous.

1,571,626. PROCESS OF OBTAINING MILK SUGAR. HENRY V. DUNHAM, Mount Vernon, N. Y., assignor to The Rosemary Creamery Company, New York, N. Y., a Corporation of New York. Filed Jan. 30, 1923. Serial No. 615,951. 2 Claims. (Cl. 127—31.)

1. A process which comprises boiling whey at atmospheric pressure, by direct fire heat, while preventing excessive foaming by blowing currents of air against the surface of the boiling liquid, continuing the heating of the whey at atmospheric pressure until the whey has reached a concentration of at least 20° Bé., measured at 190° F., whereby the bulk of the albumen of the whey has been precipitated and has assumed a readily filterable condition, separating such precipitated albumen from the whey and thereafter further concentrating the whey by boiling the same at atmospheric pressure.

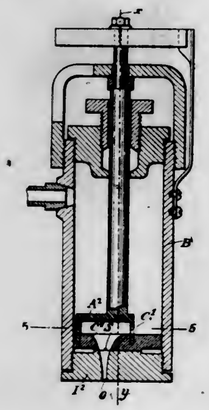


1,571,627. PORTABLE ELEVATOR. HENRY SHELDEN GERMOND, Jr., Bayonne, N. J. Filed May 23, 1924. Serial No. 715,330. 2 Claims. (Cl. 214—121.)

1. A structure of the class described, including a load-carrying platform comprising a carriage arranged to travel up and down, a cable-controlled load-receiving table mounted on the carriage free to be thrown from and to travel-position to and from load-receiving position and load-discharging position, a load-retaining device for holding the load on the table and mechanism for controlling the position of the load-retaining device;

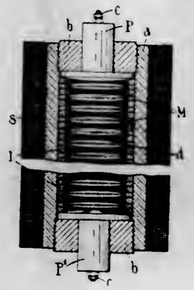
and mechanism by which the carriage may be locked against up-and-down travel during said change of position of the table.

1,571,628. TRACTOR. ROBERT O. HENDRICKSON, Racine, Wis., assignor to Belle City Manufacturing Company, Racine, Wis., a Corporation. Filed July 25, 1925. Serial No. 46,054. 2 Claims. (Cl. 305—9.)



2. In a tractor, a demountable unitary track-guide, comprising a frame having an inclined deflector at its top, side walls extending therefrom, rollers mounted in said frame, retainers extending from said side walls, keepers in said tractor, yielding means mounted between said retainers and keepers in which said rollers are mounted, and removable means for permitting the insertion and withdrawal of said track-guide.

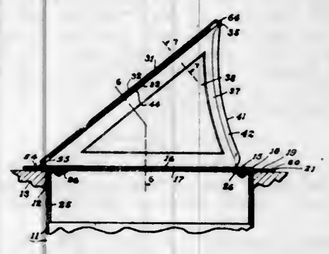
1,571,629. SPRAYER. ETIENNE HUGÉ, Judret, France. Filed July 13, 1923. Serial No. 651,439. 22 Claims. (Cl. 299—114.)



1. A liquid sprayer comprising a hollow body, a chambered outlet for said body having an axially curved surface, and means in said body for directing liquid into said outlet tangentially to the curvature of said surface in the direction of the axis.

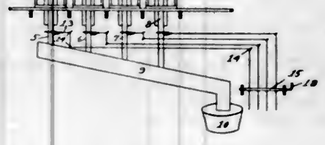
6. A liquid sprayer comprising a hollow body having an axially curved outlet, means at the entrance end of said outlet for directing liquid from the hollow body into the outlet tangentially to the interior surface thereof, and means controlling the flow of liquid from the hollow body through said outlet.

22. In a liquid sprayer, relatively rotatable hollow parts having openings formed to provide a hyperbolically curved outlet when the openings in said parts are registered, the wall of one part having a passage therein tangential to the hyperbolically curved wall of said outlet.



1,571,630. HIGH-TENSION CIRCUIT BREAKER. NICOLAS JAPOLSKY, London, England. Filed Apr. 20, 1925. Serial No. 24,532. 3 Claims. (Cl. 200—87.)

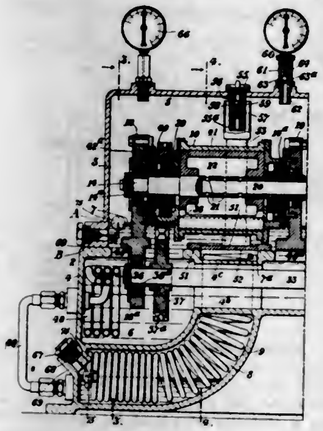
1. A high tension electric circuit breaker comprising in combination a number of capsules each of which consists of a ring of magnetic material and metal plates of electric conducting and magnetic material separated by said ring, distance pieces of dielectric material, terminals connected to the outers of the conducting surfaces, and electromagnetic means that enables deformation between plates of adjacent capsules whereby contact is established to close an electric circuit.



1,571,631. COMBINED DEFLECTOR AND COVER FOR HEATED-AIR REGISTERS. CARL W. KRUEGER, Norwood, Ohio. Filed Jan. 17, 1924. Serial No. 686,911. 3 Claims. (Cl. 98—50.)

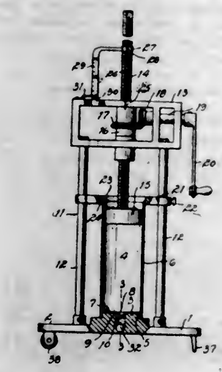
3. In combination with a register-plate provided with marginal shoulders, a combined deflector and cover comprising a body having downwardly turned marginal flanges, and end-walls pivoted to said body within said flanges, said body and said end-walls provided with strengthening beads, said end-walls arranged to be folded inwardly within said flanges and to be supported by the

upper face of said register-plate and said body supported by said end-walls, with the lower ends of said flanges received about said marginal shoulders of said register-plate when said combined deflector and cover is in collapsed relation.



1,571,632. SAMPLING DEVICE FOR BEANS AND THE LIKE. JOHN H. MCFARLAND, Merrill, Mich. Filed Nov. 3, 1922. Serial No. 598,818. 4 Claims. (Cl. 73—21.)

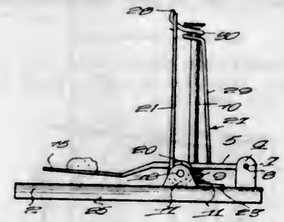
1. In combination, a plurality of bean sorting machines, each having a sampling device and a sample delivery spout with a self-closing gate therein, a collecting spout communicating with all of said delivery spouts and extending to an inspector's station, operating cords secured to each gate respectively and extending to said inspector's station and a cord-actuating device at each station adapted to simultaneously actuate all of said cords without interfering with the otherwise independent operation of each cord.



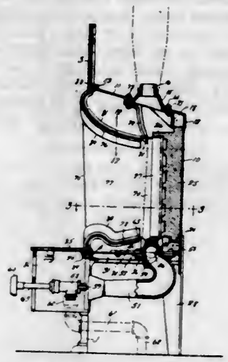
1,571,633. REFRIGERATING SYSTEM OR APPARATUS. WILLIAM ALEXANDER MCNUTT, Stamford, England, assignor to The Kitson Engineering Company (London) Limited, Westminster, London, England. Filed Dec. 12, 1923. Serial No. 680,236. 4 Claims. (Cl. 62—115.)

1. A refrigerating apparatus employing a condensible fluid as a refrigerant, comprising a casing made up of two parts, the lower part being divided to present an upper reservoir for a sealing liquid, and a lower chamber sealed against the reservoir and adapted to contain a condenser, the sealing liquid in the reservoir being adapted to seal the juncture between the two parts of the casing, a compressor arranged in the upper part of the casing, an operating shaft for the compressor working

in said reservoir, and means to convey the refrigerant in a gaseous state from the compressor to the condenser without permitting it to mix with the sealing liquid.



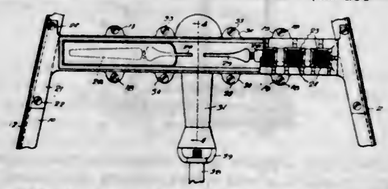
1,571,634. GREASE PUMP. AURELIOUS M. MCSPADDEN, St. Louis, Mo. Filed Jan. 11, 1922. Serial No. 528,515. 2 Claims. (Cl. 221—47.1.)



1. In a grease pump, the combination of a base-plate, a cylinder supported thereon, a hose connected with the lower end of the cylinder, a frame, a plunger guided in the frame, means for forcing the plunger down into the cylinder, including a crank mounted to swing in a substantially vertical plane, and rollers carried by the base-plate for supporting the same on the floor, and mounted to rotate in a plane transverse to the plane of rotation of the crank.

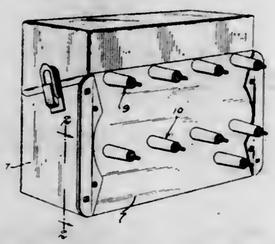
1,571,635. TRAP. JOE NAIDUL, West Allis, Wis. Filed Jan. 27, 1925. Serial No. 5,114. 3 Claims. (Cl. 43—81.)

1. In combination in a trap, a base member provided with a cylindrical post mounted at right angles to the base member, a spring jaw carried by the base member, the base member serving as a second jaw, a wire bent around the post and provided with a tripping finger adapted to engage the spring jaw, a bait receiving member pivotally mounted to the base plate and provided with a socket, the other end of said wire adapted to engage the socket.



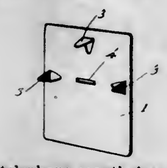
1,571,636. HEATER. FRANK A. NIEBERDING, Cleveland, Ohio; Margaret H. Nieberding administratrix of said Frank A. Nieberding, deceased. Filed Aug. 8, 1921. Serial No. 490,574. 16 Claims. (Cl. 126—127.)

1. In a heater of the character set forth, the combination of an open front casing, a burner within the casing, a back wall insertable through the open front and engaging parts of the casing to sustain the back wall against rearward dislodgment, a reflector also insertable through said open front and cooperating with the back wall to prevent forward displacement of the latter the reflector having a part cooperating with a part of the casing to assist in holding the reflector in place, and a fender detachably connected to the front of the casing and serving when in place to secure the reflector within the casing.



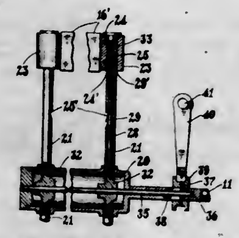
1,571,637. GAS BURNER. FRANK A. NIEBERDING, Cleveland, Ohio; Margaret H. Nieberding administratrix of said Frank A. Nieberding, deceased. Filed Jan. 30, 1922. Serial No. 532,551. 10 Claims. (Cl. 158—104.)

1. A burner of the class set forth comprising elongated top and bottom shells, means for drawing said shells together with a leak-proof joint, a mixing tube carried by



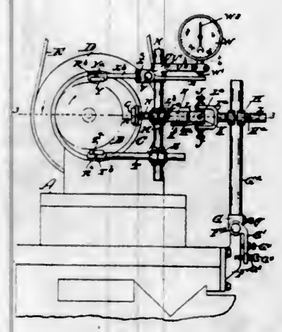
the lower shell, the top shell having a series of jet openings, and means within the burner and retained in place by cooperation with the top and bottom shells for uniformly distributing the gas from the mixing tube to all jet openings.

1,571,638. SPARK-COIL TERMINAL. OLE N. OLSON, Chicago, Ill. Filed Jan. 12, 1925. Serial No. 1,842. 7 Claims. (Cl. 175—361.)



1. The combination with a spark coil and a box having in the inner face of one of its sides channels and terminal bolt holes extending through the bottom of said channels, said holes being located transversely off center in one direction in certain of said channels and in an opposite direction in the other channels, and reversible duplicate insulating plates adapted to be laid in said channels, each of said plates having a terminal bolt hole that is off center, and arranged to be brought into alignment with the holes in the bottoms of the channels.

1,571,639. TELEPHONE COVER. JOHN H. WILLIAM PFLUEGER, Covington, Ky. Filed Apr. 12, 1923. Serial No. 631,733. 1 Claim. (Cl. 179—185.)



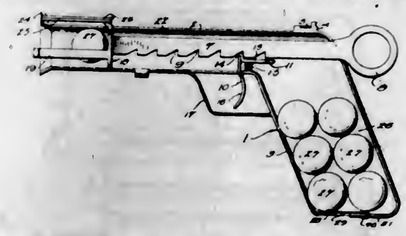
A cover for a telephone mouthpiece comprising a plate, the face of said plate being provided with a series of substantially V-shaped slits to form three radial fingers, two of which are diametrically opposite each other and the third spaced between said two so that when the said fingers are bent out of the plane of said plate they are adapted to engage at the top and sides of said mouthpiece to secure the plate thereon.

1,571,640. BOAT-PROPELLING MEANS. JOHN PLONKA, Chicago, Ill. Filed Feb. 10, 1925. Serial No. 8,122. 5 Claims. (Cl. 170—144.)

1. In a ship, a paddle wheel comprising spokes, sleeves slidably mounted on said spokes, paddles attached to said sleeves, pawls on said sleeves for retaining the same in radially adjusted positions on said spokes, and devices for releasing said pawls.

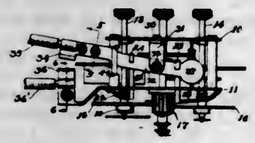
1,571,641. GAUGE FOR DETERMINING INTERNAL DIAMETER OF ELEMENTS BEING GROUND. FREDERICK JACKSON PRATT, Detroit, Mich. Filed Jan. 17, 1924. Serial No. 686,938. 4 Claims. (Cl. 33—148.)

1. In a device of the character described, a frame comprising a plurality of adjustable elements connected together to form a unitary structure including a plurality of independently adjustable arms secured to the frame at one end, means connecting the arms to the frame for oscillation into and out of an element to be internally ground, a gem stone mounted adjacent the other end of the respective adjustable arms and adapted to impinge upon the internal periphery of the element being ground, resilient means adapted to act upon the frame, whereby the gem stones may be held in impinging contact with the surface of said element while being ground, an indicating device and means for actuating the indicating device, whereby a gauge reading may be obtained to determine changes made in the diameter of the bore of the element being ground while being acted upon by a grinding wheel.



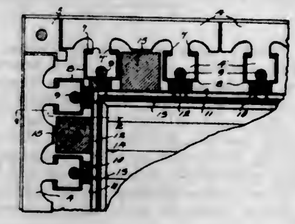
1,571,642. METHOD OF FORMING MOLDS. JOHN A. RATHBONE, Detroit, Mich., assignor to Rathbone Machine Company, Cleveland, Ohio, a Corporation of Ohio. Filed Apr. 28, 1924. Serial No. 709,639. 2 Claims. (Cl. 22—197.)

2. The method of forming molds in molding machines, comprising the ramming of the sand within a resiliently yieldable mold flask against a pattern warped to compensate for the springing of the flask, whereby the contraction of the flask upon removal from said pattern will restore the unwarped form.



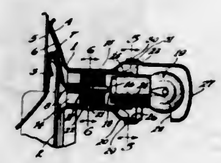
1,571,643. TOY. TOMMIE M. RENICK, Morgantown, W. Va. Filed Feb. 5, 1925. Serial No. 7,095. 4 Claims. (Cl. 124—13.)

1. In a toy pistol, a barrel, a plunger mounted in said barrel, said plunger being provided with a plurality of notches on its lower face, a trigger adapted to engage one of said notches to retain the plunger in retracted position, a cage mounted on the end of said plunger and adapted to retain a marble, said cage comprising a disk having a pair of arms extending forwardly therefrom, the top of said barrel being provided



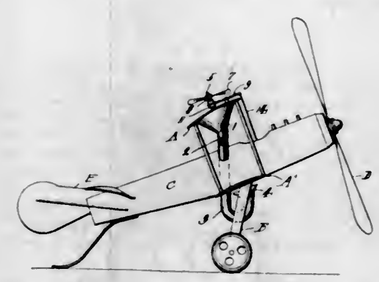
with a slot, a hooked arm carried by said cage and extending through said slot, and an elastic member secured to said arm and to said barrel to place said plunger under tension when it is retracted.

1,571,644. TIME-CLOCK ELECTRICAL SWITCH. HUGH E. ROBERTSON, Oakland, Calif., assignor of one-half to Stanford B. Nickels, Oakland, Calif. Filed Jan. 26, 1925. Serial No. 4,722. 2 Claims. (Cl. 200—38.)



1. In a time switch, the combination of a housing comprising a pair of spaced housing plates, a switch lever pivoted intermediate its length to one of said housing plates and a socket member secured to the other of said housing plates, clock mechanism within said housing, a hooked arm member actuated by said clock mechanism and adapted to engage said lever for closing said switch and a second hooked arm member actuated by said clock mechanism and adapted to engage said lever for opening said switch.

1,571,645. BUILDING CONSTRUCTION. IVAN ROČIĆ, New York, N. Y. Filed Apr. 2, 1920. Serial No. 370,841. 8 Claims. (Cl. 72—16.)

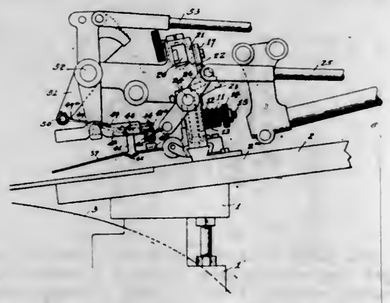


1. A building construction comprising a plurality of superposed blocks, projections upon one face of each block, said projections falling into vertical alignment when the blocks are properly assembled defining a plurality of vertical columnar arrangements, said projections having vertical passages therethrough, rods passed through said passages to hold the vertical series of blocks against dislodgement, furring strips applied to said projections, penetrative elements passing through said furring strips and into the rods, and a plaster foundation applied to said furring strips.

1,571,646. DASH LAMP. CHARLES D. RYDER, Covington, Ky., assignor to The Cincinnati Victor Company, Cincinnati, Ohio, a Corporation of Ohio. Filed June 12, 1924. Serial No. 719,687. 4 Claims. (Cl. 240—8.16.)

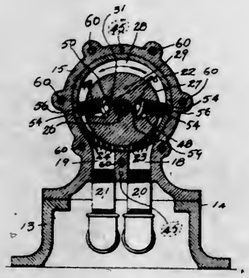
2. In a device of the class described, a base, two hook-shaped clips extending from said base, a yieldable finger extending outwardly from said base, a tubular member secured in said base, a circumferential slot in said tubular member, a socket member rotatively mounted on said base and tubular member, a pin extending through said socket member into said circumferential slot, terminals provided with yieldable electric contacts inside of said tubular member, an incandescent electric light bulb mounted in said socket member having terminals adapted to engage said contacts in the tubular member and complete an electric circuit when rotated into alignment with the same, a flat insulated electric connection secured to one of said terminals, said other terminal being electrically connected to the base.

1,571,647. COMBINED HELICOPTER AND AEROPLANE. ANTONIO V. SANTARSIERO, New York, N. Y. Filed Dec 5, 1923. Serial No. 678,759. 10 Claims. (Cl. 244—15.)



1. In an aeroplane of the class described, a fuselage, a wing on the fuselage, a helicopter mechanism associated with the aeroplane including a propeller mounted on the wing, and means for downwardly conveying the current of air set up by said propeller and delivering it upwardly against the bottom of the fuselage.

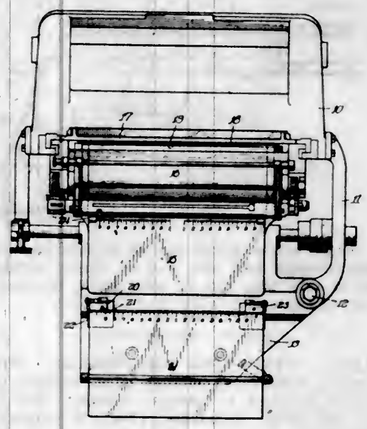
1,571,648. PROCESS FOR OBTAINING HYDROCHLORIC ACID FREE FROM ARSENIC. ERWIN SCHMIDT, Mannheim-Waldhof, Germany, assignor to the Firm Gesellschaft für Chemische Produktion m. b. H., Mannheim-Waldhof, Germany, a Corporation of Germany. Filed May 2, 1924. Serial No. 710,619. 1 Claim. (Cl. 23—154.)



A process for making hydrochloric acid free from arsenic acid by bringing arsenic-containing hydrochloric acid into contact with activated charcoal.

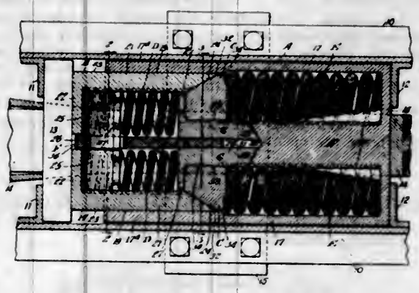
1,571,649. SHEET DETECTOR FOR PRINTING PRESSES AND LIKE MACHINES. HERMAN J. SCHULTZ, Chicago, Ill. Filed Feb. 14, 1920. Serial No. 358,630. 3 Claims. (Cl. 192—126.)

1. In a sheet detector for printing presses and like machines having means for feeding sheets into the press and means for laterally guiding said sheets, the combination of a means operating in conjunction with the lateral guide means comprising a vertical contacting pin and rocker arm adapted to extend over the margin of the sheets, means whereby the arm is caused to vibrate and the pin to continuously contact the sheets as the latter advance on the press, whereby a failure of contact between the pin and the sheet will cause a stoppage of the press or machine.



1,571,650. ROTARY PUMP. ARTHUR E. SIMPSON, West Frankfort, Ill., assignor to H. L. Webb, J. M. Harris, B. H. Webb, T. M. Silkwood, R. P. Blake, and C. E. Pitchford, all of West Frankfort, Ill. Filed Nov. 21, 1923. Serial No. 676,022. 6 Claims. (Cl. 103—140.)

1. In a rotary pump, a casing, a fixed sleeve located in said casing, heads secured to said casing, cylindrical projections formed integral with said heads and concentric to said sleeve, pistons rotatably mounted on said projections, a shaft extending through said projections and heads and eccentric thereto, a rotor concentrically mounted on said shaft in said casing and adapted to engage with and rotate said pistons, and means for placing the rotor in operation.

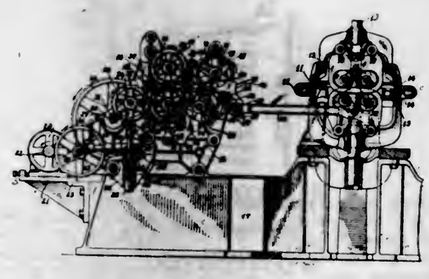


1,571,651. WORK-SETTING MEANS. BURT D. STEVENS, Evanston, Ill., assignor to Miehle Printing Press & Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 22, 1922. Serial No. 555,948. 5 Claims. (Cl. 271—61.)

1. In printing press work setting means, the combination of a transfer table having a scale thereon, and a feed pile table having a scale thereon having a definite offset relation with respect to said other scale whereby a sheet of material lined up marginally with the type

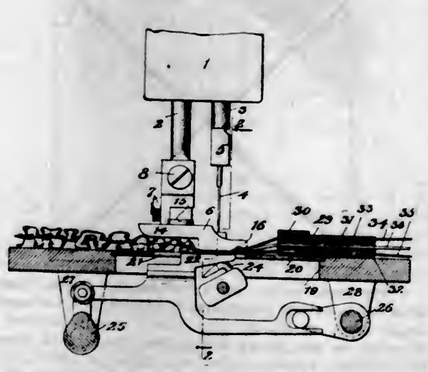
while extending over the scale on the transfer table indicates the position at which the sheet material should be positioned on the pile table.

1,571,652. FRICTION SHOCK-ABSORBING MECHANISM. SVEN J. STRID, Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc., a Corporation of Delaware. Filed July 19, 1922. Serial No. 575,981. 12 Claims. (Cl. 213—22.)



1. In a friction shock absorbing mechanism, the combination with a friction shell; of tandem arranged spring resistances; and a plurality of friction elements, some of which cooperate directly with the shell and others of which with each other, one said last named elements having coacting friction surfaces disposed longitudinally of the mechanism, and said first named elements having wedge engagement with certain of said last named elements of the tandem arranged spring resistances being disposed within certain of said friction elements.

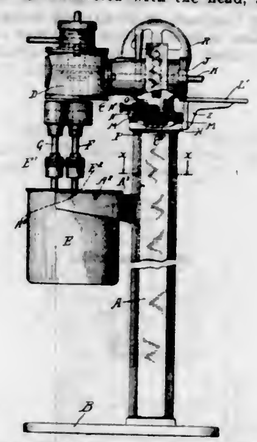
1,571,653. MACHINE-OPERATING MECHANISM. KNUT O. B. TEXTORIUS, New York, N. Y., assignor to Tex Engineering Corporation, New York, N. Y. Filed Sept. 27, 1921. Serial No. 503,677. 6 Claims. (Cl. 74—41.)



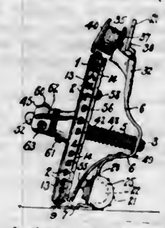
1. Mechanism for sequentially operating a plurality of machine parts in timed relation to each other including a plurality of motion transmitting shafts, other shafts constantly geared to each other, a common drive means for said shafts, means on each of the latter

shafts, a common means on one of the first named shafts with which said means on the latter shafts coacts at different times to rotate the latter in opposite directions, a third series of shafts constantly geared to each

other, and means actuated by the means on one of said second named shafts through the medium of said third series of shafts for rotating each of the remainder of said motion transmitting shafts in timed relation to said first named shaft.



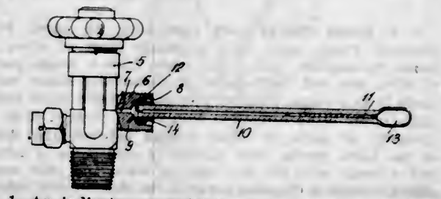
1,571,654. MACHINE FOR MAKING SHIRRED RIBBONS. HENRY F. TIEDEMANN, New York, N. Y., assignor to Theo. Tiedemann & Sons, Inc., New York, N. Y., a Corporation of New York. Filed Oct. 10, 1925. Serial No. 61,664. 4 Claims. (Cl. 112—132.)



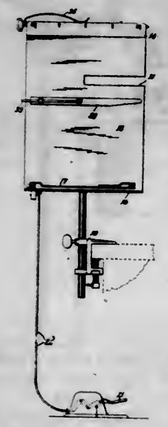
1. A machine of the class described having a guide provided with a plurality of separate guide-ways for supplying a pair of ribbons and a narrower tape between the ribbons, a presser foot under which said ribbons and tape are moved, gripping means operative under said foot for engaging with parts of the ribbon and gathering the same independently of the tape, and a groove in the underface of the foot in which the tape is located during the gathering operation.

1,571,655. SUPPORTING AND ACTUATING MECHANISM FOR MIXING AND BEATING MACHINES. HENRY TRUST, Park Ridge, N. J., and FRANK M. ASHLEY, Brooklyn, N. Y.; said Ashley assignor to Josephine Trust, Park Ridge, N. J.; Josephine Trust administratrix of said Henry Trust, deceased. Filed Dec. 16, 1919. Serial No. 345,345. 8 Claims. (Cl. 259—1.)

1. In a device of the class described, a column having a smooth cylindrical face adjacent its upper end, a head swivelly mounted on the upper end of the column, a shelf removably associated with the head, a bracket carried by the shelf, and riding on the cylindrical face whereby the shelf is supported.

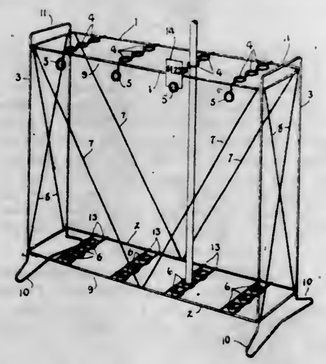


1,571,656. STAMPING DEVICE. HENRY EMERSON WETHERILL, Phoenixville, Pa. Filed Aug. 30, 1924. Serial No. 735,109. 6 Claims. (Cl. 197—47.)



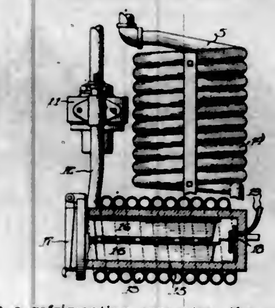
1. A stamping device comprising a frame, a disk rotatably mounted upon the frame, type upon the periphery of the disk adapted to be brought into operative position by rotating the disk, an annular flange upon the disk having notches formed therein, a spring plate upon said frame adapted to enter said notches and center of the type in relation to the operative position of the disk, and said spring plate having two lips extending longitudinally in relatiton to the length of said plate adapted to retain a lubricant upon the portion of said plate which comes in contact with said flange.

1,571,657. INDICATOR. WALTER WILKINSON, Jersey City, N. J., assignor to Air Reduction Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Feb. 14, 1925. Serial No. 9,150. 3 Claims. (Cl. 73—51.)



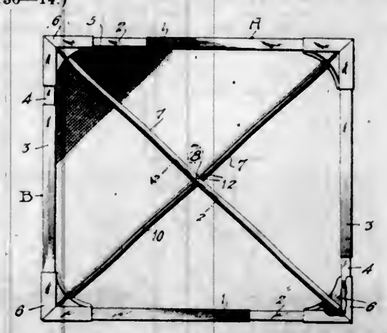
1. An indicator comprising a tube having a capillary passage open at one end and containing a liquid index and a cap at the open end of the tube adapted to form a substantially gas-tight joint with a surface surrounding a gas outlet.

1,571,658. COPYHOLDER. HOWARD B. COLES, Brooklyn, N. Y., assignor to Coles Copyholder Company, a Partnership composed of Howard B. Coles and Ernest H. Stolz, both of New York, N. Y. Filed June 1, 1925. Serial No. 33,905. 7 Claims. (Cl. 120—34.)



1. In a copy holder: a supporting plate or back for the copy, a clamping bar at the top for securing copy thereto, means movable over the back of said plate, a rule member carried thereby and operable downwardly over the front of the plate, and means controlled by said rule member to allow for returning said movable means to its uppermost position by correspondingly moving the rule member.

1,571,659. DISPLAY RACK. LEE S. CONKLIN, Grand Rapids, Mich. Filed Mar. 10, 1924. Serial No. 697,991. 2 Claims. (Cl. 211—14.)

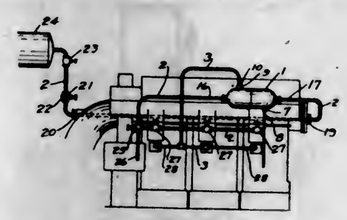


1. A broom display rack comprising an upper rectangular frame made from a single piece of wire, a lower rectangular frame also made from a single piece of wire, two end frames also of rectangular shape each made from a single piece of wire and suitable brace rods, said frames being connected together to form a rack, a plurality of pairs of wires located between the sides of the lower frame, cups carried by said pairs of wires and a single wire for each pair of wires and cups associated therewith disposed between the sides of said upper frame, each of said single wires being formed into a plurality of coils, one for each cup, said pairs of wires being secured to the sides of said lower frame and said single wires being secured to the sides of the upper frame.

1,571,660. REFRIGERATING APPARATUS. FRENCH E. DENNISON, Beloit, Wis., assignor to Lipman Refrigerator Car & Manufacturing Company, Beloit, Wis., a Corporation of Delaware. Filed Sept. 10, 1923. Serial No. 661,742. 3 Claims. (Cl. 62—95.)

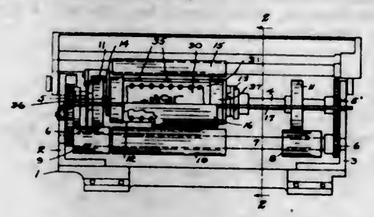
1. In a refrigerating apparatus, the combination of a thick walled metal chamber, a refrigerating coil embracing the exterior of said chamber, and a thermostatic control for said apparatus located within said chamber.

1,571,661. ROD OR TUBE COUPLING. ADELARD J. DESCOTEAU, Newark, N. J., assignor to The Foster Screen Co. Inc., a Corporation of New Jersey. Filed Feb. 14, 1924. Serial No. 692,662. 6 Claims. (Cl. 156—14.)



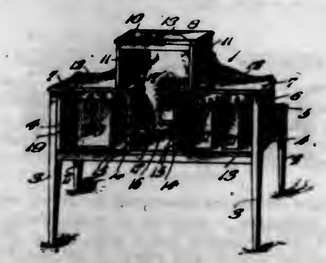
4. The combination of a rectangular frame having sides and ends each longitudinally adjustable, a rectangular single sheet of woven wire fabric loosely secured at its edges to said frame and having the strands thereof disconnected relatively to each other at their intersections and at their ends and running diagonally to permit said sheet to be stretched longitudinally and transversely, whereby said sheet may be adjusted in length and width simultaneously with said frame, two crossed brace members each having its ends fulcrumed in diagonally opposite corners of said frame, and a coupling element connected to both of said members to pivotally connect said members, said coupling element being free to move longitudinally of both said brace members, whereby said brace members may automatically adjust themselves to said frame and to each other to prevent binding of the frame during adjustment.

1,571,662. CASEIN WATERPROOF GLUE. ANDREW A. DUNHAM, Bainbridge, N. Y., assignor to The Casein Manufacturing Company, New York, N. Y., a Corporation of Vermont. Filed Apr. 28, 1924. Serial No. 709,688. 1 Claim. (Cl. 87—17.)



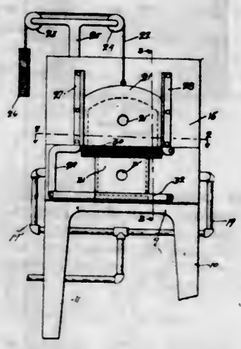
As a composition of matter, a casein water-proof glue having incorporated therewith from 5% to 20% by weight of wood-flour substantially as and for the purpose described.

1,571,663. OIL ENGINE HEATER. CARL FOSS and SIMON O. FOSS, Seattle, Wash. Filed Sept. 4, 1923. Serial No. 660,717. 4 Claims. (Cl. 123—25.)



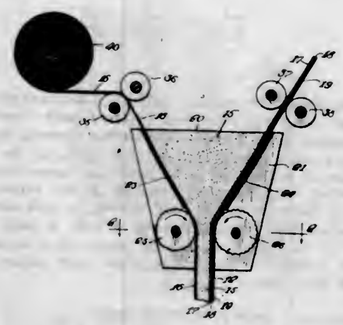
1. A fuel oil heater for internal combustion engines having an intake manifold, an exhaust manifold, and a carburetor, a tank having pipe coils in it, means for supplying crude oil to the tank, other means for conveying the oil from the tank to the intake manifold, and suitable means for generating steam by passing a small amount of water through the exhaust manifold and conveying it through the pipe coil to raise the temperature of the oil in the tank.

1,571,664. ATTACHMENT FOR REPRODUCING FACSIMILE SIGNATURES. CHARLES E. GILBERT, Fort Wayne, Ind. Filed Jan. 31, 1924. Serial No. 689,599. 6 Claims. (Cl. 101—375.)



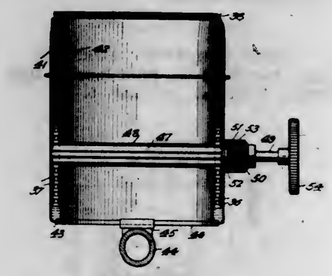
1. In a printing mechanism a revolubly mounted member, a fac-simile signature carrier, means on the member for clamping the carrier thereto, a second revolubly mounted member parallel to the said first named member and adjustable means having connection with one of said members for causing relative body movement of said members.

1,571,665. RADIOCABINET. ALFRED H. HAAG, Baltimore, Md., assignor of fifteen one-hundredths to E. HAYWARD FAIRBANKS, Merchantville, N. J. Filed Feb. 27, 1925. Serial No. 11,998. 2 Claims. (Cl. 45—52.)



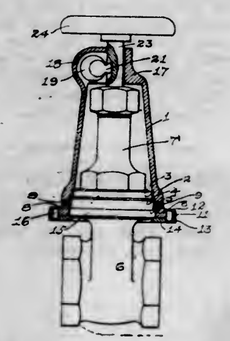
1. A radio cabinet, comprising a main body portion having an upstanding cabinet section surmounted thereon, a fixed horizontal table section extending forwardly from the base of said body portion, the said body portion, cabinet section and table section being open at the rear and closed at the top, front, end, and bottom portions thereof to form a single open compartment in the rear of said cabinet, a shelf for said body portion, means for vertically adjusting said shelf to accommodate horns of different heights, and a grill in the front of said cabinet section.

1,571,666. HEAT-TREATING FURNACE. HENRY HALVORSEN, Detroit, Mich. Filed June 30, 1924. Serial No. 723,264. 6 Claims. (Cl. 263—9.)



1. A heat-treating furnace, comprising a housing; a horizontally extending partition mounted in said housing for dividing the same into a pair of chambers, said partition projecting exteriorly of and beyond the forward wall of said housing and the lower of said chambers being smaller than the upper of said chambers; and means for heating said chambers, said heating means being adapted to direct the heat inward into the lower of said chambers, said chambers communicating through flues.

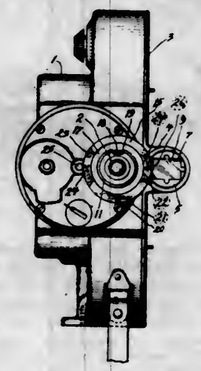
1,571,667. BUILDING BOARD AND METHOD OF MAKING IT. OTTO A. HEPPES, Chicago, Ill., assignor to The Richardson Company, Lockland, Ohio, a Corporation of Ohio. Filed Apr. 17, 1920. Serial No. 374,677. 1 Claim. (Cl. 154—45.9.)



As a new article of manufacture, a rigid building board comprising outer layers of asphalt saturated fibrous material and asphalt saturated felt surfaced with flaked slate-like material embedded in asphalt, and an intermediate layer of comminuted fibrous material imbedded in asphalt.

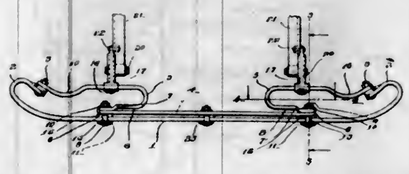
1,571,668. WICK HOLDER. WILLIAM C. HOMAN, Meriden, Conn., assignor to Lewis T. Wilcox, Peekskill, N. Y. Filed May 28, 1925. Serial No. 33,335. 6 Claims. (Cl. 67—69.)

1. A wick holder comprising a body member having oppositely disposed longitudinal slots therein, and means associated with the corresponding edges defining said slots for simultaneous engagement with an actuating device for imparting a uniform movement to all parts of said body member.



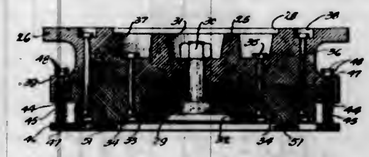
1,571,669. VALVE LOCK. ROBERT W. HOMPE, Cleveland Heights, Ohio. Filed Sept. 6, 1924. Serial No. 736,236. 1 Claim. (Cl. 70—124.)

An attachment comprising a valve lock unit adapted to be applied about the stem and adjacent body structure of a standard valve beneath the handle thereof, having in combination a casing, a base plate forming the bottom closure of said casing and adapted to engage beneath the shoulder of the valve coupling, a set screw for preventing the rotation of said casing, a lock carried at the upper part of said casing, a bolt in said lock adapted to be projected toward said valve stem to engage a notch in said valve stem, and means for operating said lock.



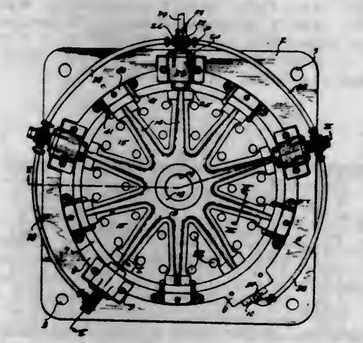
1,571,670. PHOTOGRAPHIC CAMERA. ALBERT S. HOWELL, Chicago, Ill., assignor to The Bell & Howell Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 17, 1924. Serial No. 707,203. 10 Claims. (Cl. 95—64.)

1. In a photographic camera the combination with an adjustable photographic lens of a view finder coordinated with the lens, and means indicating adjustment of the photographic lens and adapted to be observed through



the view finder to determine the adjustment of the lens as and for the purpose described.

1,571,671. BUMPER FOR MOTOR VEHICLES. CHARLES J. IVEN, Rochester, N. Y., assignor to J. H. Sager Company, Rochester, N. Y., a Corporation of New York. Filed Dec. 27, 1924. Serial No. 758,322. 8 Claims. (Cl. 293—55.)



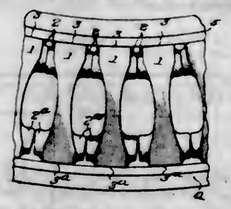
1. A bumper comprising an impact member, supporting means for the impact member embodying a central portion and spring portions, at opposite ends of the central portion, each having two arms lying in a horizontal plane behind the central portion, one of said arms being connected to the central portion by a bend, and attaching means secured to the other arm of each spring portion.

1,571,672. PUNCH AND DIE CONSTRUCTION. AMES R. JAYNE, Chicago, Ill., assignor to American Steel Wheel Corporation, Chicago, Ill., a Corporation of Illinois. Filed Nov. 12, 1924. Serial No. 749,480. 12 Claims. (Cl. 164—25.)

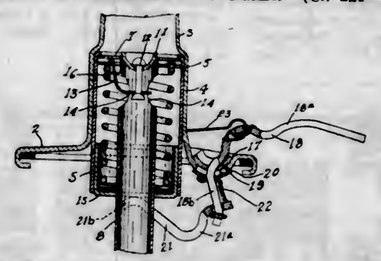
1. A rapid production punch and die device comprising a punch mechaniam, a plurality of punch blocks secured thereto, a die mechanism and a plurality of die blocks rigidly secured thereto, said punch blocks and die blocks having the side walls thereof at perfect right angles with respect to their end walls without any relieving clearance between the punch blocks and the die blocks to cause a crowding effect of stampings to take place in the die mechanism between the die blocks.

1,571,673. AUTOMOBILE WHEEL-FORMING PUNCH AND DIE. AMES R. JAYNE, Chicago, Ill., assignor to American Steel Wheel Corporation, Chicago, Ill., a Corporation of Illinois. Filed Feb. 27, 1925. Serial No. 11,914. 17 Claims. (Cl. 113—49.)

1. A rapid production vehicle wheel forming device comprising a die mechanism and a punch mechanism for coaction therewith, pneumatic means associated with said die mechanism for automatically centering a vehicle wheel blank both circumferentially and radially on said die mechanism, means on said punch mechanism for simultaneously punching a center hole in the wheel blank and forming the spokes of said wheel blank to provide a finished wheel half, and a plurality of spring controlled strippers on the punch mechanism to strip the wheel half therefrom.



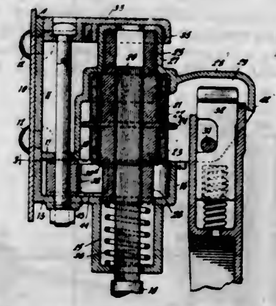
1,571,674. MECHANICAL TOY. HAROLD T. KINGSLEY, Detroit, Mich. Filed Mar. 16, 1922. Serial No. 544,289. 9 Claims. (Cl. 46—40.)



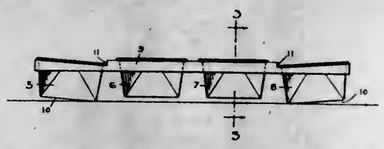
5. In combination, a toy person, a toy musical instrument with a slide member held thereby, and a mechanical means encased in said person adapted to move said slide member of the musical instrument in one direction and a spring member bearing upon the aforesaid slide adapted to move it in the opposite direction.

1,571,675. GRATE BAR FOR PULVERIZING MACHINES. HERVEY S. KNIGHT, Evanston, Ill., assignor to American Manganese Steel Company, Chicago, Ill., a Corporation of Maine. Filed Feb. 21, 1925. Serial No. 10,731. 3 Claims. (Cl. 83—11.)

1. A grate bar, constructed with two load-bearing marginal portions extending longitudinally of the bar, and spacing lugs associated with each marginal portion so that the bars may be supported in either of two positions; the lugs at opposite marginal portions being of different length.

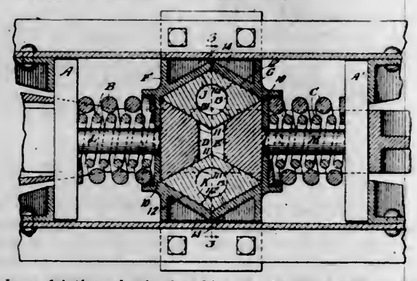


1,571,676. COMBINED PUMP AND FORCE-FEED OIL CAN. GUSTAVE LIDSEEN, Chicago, Ill. Filed Feb. 14, 1924. Serial No. 692,636. 6 Claims. (Cl. 221—47.)



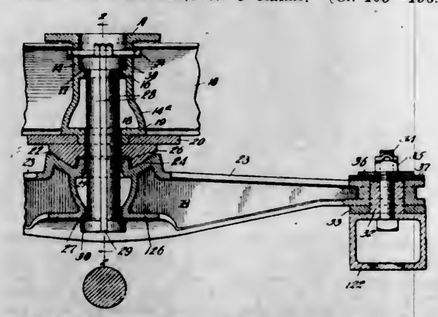
1. In an oil can embodying a lubricant container, a closure therefor having a nozzle terminating in a lower cylindrical portion, a partition in the upper end of said cylindrical portion, an oil feed pipe connected to said partition and extending into said container, valves in the upper and lower ends of said pipe, said pipe having means therein for communicating with said cylindrical portion below said partition, a spring controlled piston slidably mounted around said feed pipe and adapted for entering the cylindrical portion of said nozzle and means for controlling and operating said piston.

1,571,677. HAND BRAKE. THEODORE H. LINK, Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc., a Corporation of Delaware. Filed Mar. 14, 1924. Serial No. 699,181. 11 Claims. (Cl. 74—116.)



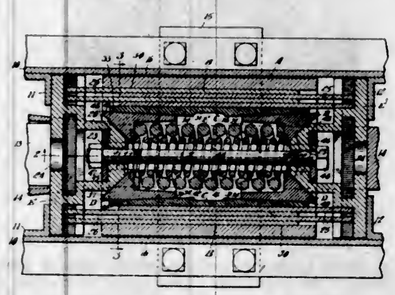
1. In a hand brake for railway cars, the combination with a brake staff; of a ratchet member movably connected thereto and normally held in inoperative position to permit free unwinding of said staff; a holding pawl adjacent said member to coact therewith when the latter is in operative position; and an operating lever coacting with said ratchet member and arranged to move it into operative position.

1,571,678. BAKING UTENSIL. VERNON J. MORRIS, Seattle, Wash. Filed July 2, 1925. Serial No. 41,047. 8 Claims. (Cl. 53—6.)



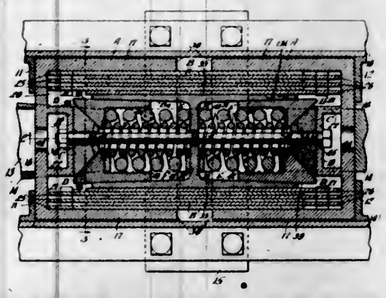
1. A baking utensil comprising a plurality of pans arranged in a row and means for holding them together, the pan at each end of the row being inclined upwardly and outwardly relative to the portion of the utensil between said end pans so that its bottom is inclined in the same direction.

1,571,679. FRICTION SHOCK-ABSORBING MECHANISM. JOHN F. O'CONNOR, Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc., a Corporation of Delaware. Filed Dec. 10, 1921. Serial No. 521,300. 1 Claim. (Cl. 213—26.)



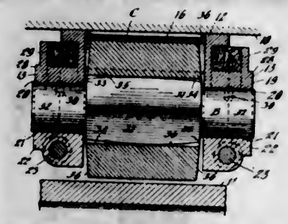
In a friction shock absorbing mechanism, the combination with end followers; of oppositely disposed wedges normally separated longitudinally of the mechanism; columns between each end follower and respective adjacent wedge; wedge friction shoes, each cooperable with both of said wedges; friction shells coacting with said friction shoes, said shells providing a substantially complete enclosure for all of the friction shoes and wedges when the mechanism is in full release and arranged to hold them in operative position, said shells separating during a compression stroke; and cushioning means disposed between the respective end followers and friction shells.

1,571,680. CAR CONSTRUCTION. JOHN F. O'CONNOR Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc., a Corporation of Delaware. Filed Jan. 30, 1922. Serial No. 532,617. 5 Claims. (Cl. 105—196.)



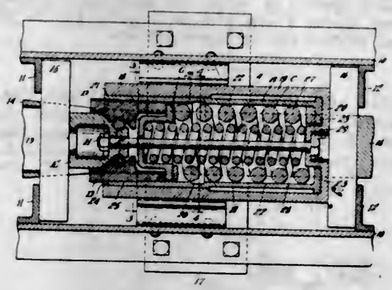
1. In a car construction, the combination with a body bolster; of a six-wheel truck bolster; an arch member having its ends adapted to be supported on said truck bolster; and shims adapted to be interposed between the ends of said arch member and said truck bolsters for adjusting the height of said arch member relative to said truck bolsters.

1,571,681. FRICTION SHOCK-ABSORBING MECHANISM. JOHN F. O'CONNOR, Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc., a Corporation of Delaware. Filed Aug. 31, 1922. Serial No. 585,449. 15 Claims. (Cl. 213—33.)



1. In a friction shock absorbing mechanism; the combination with a friction shell; of a plurality of sets of intercalated relatively longitudinally movable friction plates within said shell; front and rear followers movable with reference to the shell and relatively movable with reference to each other co-acting with said plates; a spring resistance disposed between said sets of plates; and means between the opposite ends of said spring resistance and the followers for creating pressure on said sets of intercalated plates during the compressive action of the mechanism, whereby friction resistance is created between said relatively movable intercalated plates.

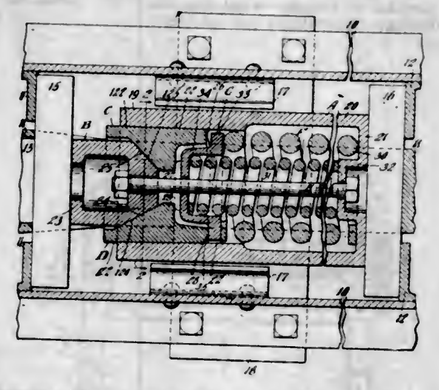
1,571,682. FRICTION SHOCK-ABSORBING MECHANISM. JOHN F. O'CONNOR, Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc., a Corporation of Delaware. Filed Sept. 16, 1922. Serial No. 588,572. 9 Claims. (Cl. 213—33.)



1. In a friction shock absorbing mechanism; the combination with a plurality of groups of intercalated friction plates; front and rear followers for relatively moving said plates; a spring resistance between said groups of plates; a tapered friction element interposed between each group of plates and the spring resistance and adapted to be moved by said spring resistance; and means for placing said plates under lateral pressure, said means including wedging means at opposite ends of said spring resistance co-acting with said elements, each of said wedging means being interposed between a follower and the adjacent end of the spring resistance whereby said intercalated plates are subjected to wedging pressure during the compressive action of the mechanism.

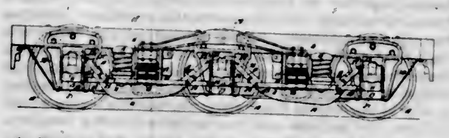
1,571,683. ANTIFRICTION SIDE BEARING. JOHN F. O'CONNOR, Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc., a Corporation of Delaware. Filed Jan. 5, 1923. Serial No. 610,756. 4 Claims. (Cl. 308—226.)

1. In an anti-friction bearing adapted for attachment to the bolster of a car, the combination with a retaining member; of a shaft rotatably mounted in said retaining member, said shaft being provided with a portion of non-circular cross section; and a roller having an opening of non-circular cross section adapted to receive said portion of the shaft with rotary driving relation, said roller and shaft also having limited relative rocking movement.



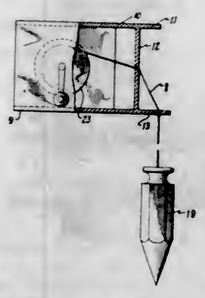
1,571,684. FRICTION SHOCK-ABSORBING MECHANISM. JOHN F. O'CONNOR, Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc., a Corporation of Delaware. Filed Jan. 8, 1923. Serial No. 611,236. 5 Claims. (Cl. 213—32.)

1. In a friction shock absorbing mechanism, the combination with a hollow outer casing open at one end and provided with a wall at the opposite end; of a liner within said casing consisting of a plurality of sections, each section having an inner friction surface at the open end of the casing and a portion thereof extended inwardly and rearwardly of the casing to and bearing upon said wall thereof and abutment means on each of said sections; a friction system within the casing co-operating with the friction surfaces of the liners; a retainer bolt anchoring said friction system to said casing; and a main spring resistance interposed between said friction system and said abutment means of said sections.



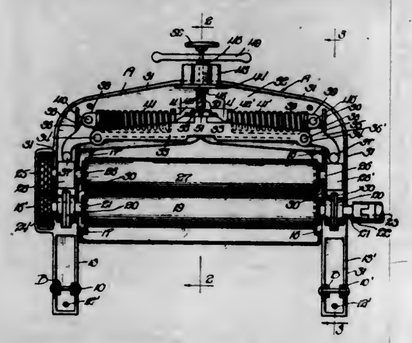
1,571,685. FRICTION SHOCK-ABSORBING MECHANISM. JOHN F. O'CONNOR, Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc., a Corporation of Delaware. Filed Feb. 28, 1923. Serial No. 621,729. 9 Claims. (Cl. 213—32.)

1. In a friction shock absorbing mechanism, the combination with a friction shell having interior friction surfaces arranged circularly; of a series of friction shoes within and cooperable with said shell and arranged in a circular series; a spring resistance; a spring follower; spreader means cooperable with said shoes, said shoes and spreader means having a plurality of cooperable sets of faces, part of which are arranged at a relatively keen wedge acting angle and others at a relatively blunt releasing angle, said shoes having the blunt faces having



contact with said spring follower at widely spaced intervals only more than a half circumference of said cap being embraced between the extreme intervals of contact of the shoes and said cap.

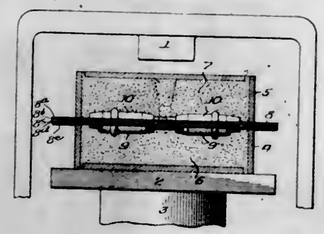
1,571,686. ALIGNING DEVICE FOR PEDESTAL JOURNAL BOXES. JOHN F. O'CONNOR, Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc., a Corporation of Delaware. Filed Oct. 25, 1923. Serial No. 670,714. 7 Claims. (Cl. 105—195.)



1. In a truck, the combination with a plurality of journal boxes on each side thereof; of pedestals for guiding said journal boxes for vertical movement; and means tying said boxes at each side of said truck together for preventing relative tilting movement of the same.

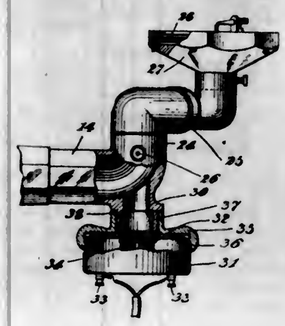
1,571,687. PLUMB-BOB CARRIER. THOMAS C. O'LOUGHLIN, Detroit, Mich. Filed Apr. 17, 1922. Serial No. 553,861. 4 Claims. (Cl. 33—216.)

1. A plumb-bob carrier comprising means for suspending a plumb-bob, said means having a plurality of suspension points; and a member having a marking point in vertical alignment with each of said points of suspension, when in operative position.



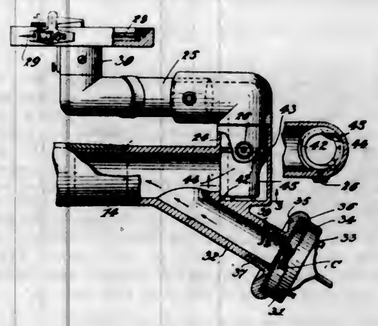
1,571,688. LAUNDRY WRINGER. ARTHUR J. PETERSON and ROY E. MELVIN, Chicago, Ill., assignors, by mesne assignments, to Apex Products Company, a Corporation of Illinois. Filed Dec. 11, 1922. Serial No. 606,247. 6 Claims. (Cl. 68—32.)

1. In a wringer two like hollow separable frame members, each member having a pair of legs hinged together at the lower ends of the legs; means to hold the frame members together and roller controlling mechanism enclosed between the walls of the frame members and bodily removable therefrom as an operative unit.



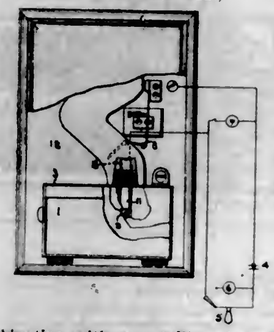
2. A wringer having a pair of relatively movable rolls geared together in combination with a hollow wringer frame comprising two like separable members enclosing two vertical chambers and a communicating transverse horizontal chamber; roll bearing members in each vertical chamber, one pair of which is vertically movable and guided in their movement by the side walls of the frame; a pair of springs in the transverse chamber; connections between the springs and the movable bearing members, respectively independently of the frame, and means outside of the frame casing for varying the tension of the springs.

1,571,689. PATTERN FOR SNAP MOLDING. HENRY C. PFEIL, Chicago Heights, Ill., assignor to American Manganese Steel Company, Chicago, Ill., a Corporation of Maine. Filed May 23, 1925. Serial No. 32,255. 3 Claims. (Cl. 22—164.)



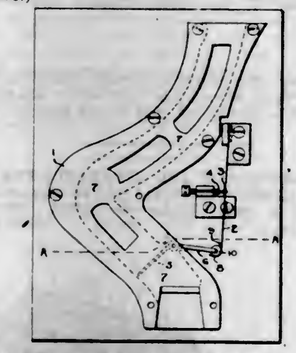
1. In foundry work, a snap board pattern, comprising a board composed of a plurality of plies of wood arranged with their grain extending alternately at substantial angles one to another, and pattern sections mounted upon said board.

1,571,690. COMBINED PHONOGRAPHIC AND TELEPHONIC APPARATUS. WILLIAM PHILLIPS, New York, N. Y., assignor to Eureka Radio and Phono Parts Co., a Corporation of New York. Filed Nov. 14, 1923. Serial No. 674,615. 1 Claim. (Cl. 179—100.1.)



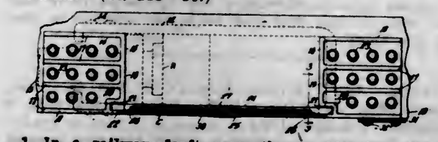
In a tone arm for a combined phonograph and radio receiving apparatus, in combination, a pair of support tubes extending in axial alignment horizontally from opposite sides of the outer end of said tone arm a sound box neck attached to one of said tubes and a telephone receiver having a cap with an integral hub in telescoping relation with the other said tube.

1,571,691. COMBINED PHONOGRAPHIC AND TELEPHONIC APPARATUS. WILLIAM PHILLIPS, New York, N. Y., assignor to Eureka Radio and Phono Parts Co., a Corporation of New York. Filed Jan. 29, 1924. Serial No. 689,217. 6 Claims. (Cl. 179—100.1.)



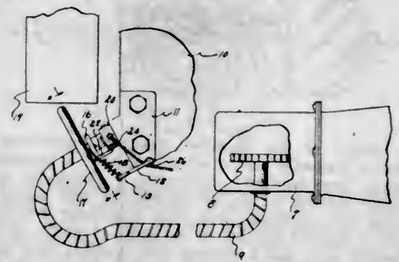
2. In a combined phonograph and radio receiving apparatus, in combination, a tone arm having a pair of nipples, a sound box pivotally mounted at one of said nipples, and a telephone receiver mounted at the other of said nipples, said sound box and receiver in sound vibration-communicating relation with the tone arm, and means for automatically interrupting communication between said telephone receiver and said sound box, when the latter is moved to idle position, thereby affording direct communication from the telephone receiver to and through the tone arm.

1,571,692. COIN-BOX MECHANISM FOR COIN-IN-THE-SLOT MACHINES. PETER GYSBERT THOMAS DE VILLIERS, Pretoria, Transvaal, South Africa, assignor of one-half to Arthur Rogers-Jenkins, Durban, Natal, South Africa. Filed Dec. 3, 1920. Serial No. 427,954. 1 Claim. (Cl. 177—311.)



The combination with a metallic coin collecting box, having a coin receiving slot, of a rod arranged beneath said slot to distribute coins inserted therethrough, said rod being insulated from the box, and an electric signaling circuit including the box and said rod.

1,571,693. COIN-ACTUATED SIGNALING APPARATUS. PETER GYSBERT THOMAS DE VILLIERS, Pretoria, Transvaal, South Africa, assignor of one-half to Arthur Rogers-Jenkins, Durban, Natal, South Africa. Filed Dec. 3, 1920. Serial No. 427,950. 4 Claims. (Cl. 194—16.)

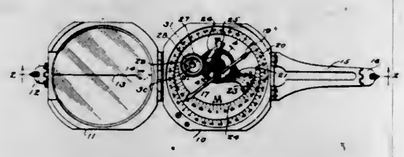


1. In a coin actuated signal apparatus, a coin chute, signal producing means including in part a vibratile reed, means for locking said reed against vibration and means for vibrating it, and means, responsive to the passage of a coin through the chute, for releasing said locking means.

1,571,694. RAILWAY DRAFT RIGGING. HARLEY E. ANDERSON, Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc., a Corporation of Delaware. Filed Feb. 12, 1923. Serial No. 618,444. 9 Claims. (Cl. 213—50.)

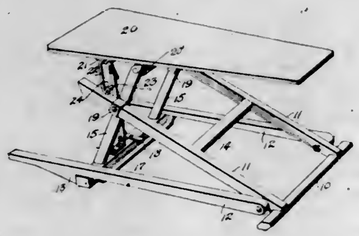
1. In a railway draft gear, the combination with a shock absorbing mechanism; of a yoke associated therewith; and readily detachable means for removably supporting said mechanism and yoke in operative position between the draft sills of a car, said means being retained in position by the yoke.

1,571,695. MOTOR-HORN-OPERATING MECHANISM. ULRIC BELIVEAU, Detroit, Mich. Filed June 15, 1925. Serial No. 37,181. 3 Claims. (Cl. 116—59.)



3. A motor horn operating mechanism comprising a bracket having a base adapted for mounting on a motor; a flange projecting upwardly from said base, adjacent one side thereof and having a slot formed therein; an arm depending from said base; a rockable arm mounted on the lower end of said depending arm; a disc rotatably mounted on said rockable arm intermediate its ends and adapted for movement into engagement with the periphery of the flywheel of said motor, said disc being inclined toward said fly wheel; resilient means for normally retaining said disc free from said fly wheel; a flexible shaft connected to said disc and adapted, upon rotation of said disc, for effecting an operation of a horn mechanism with which used; a swingably mounted arm mounted on said depending arm and having its lower end angularly turned and adapted for engagement with said rockably mounted arm, said swingably mounted arm being adapted for moving said disc into engagement with said fly wheel, upon movement in one direction; and a cord attached to said swingably mounted arm, adjacent its upper end and projected through said slot for effecting the swinging of said arm at will.

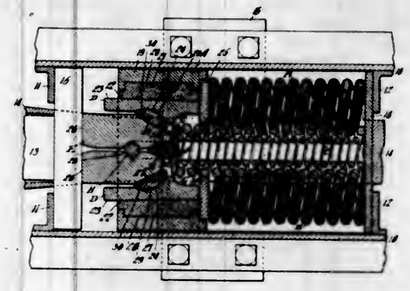
1,571,696. CURRENT TAP. REUBEN B. BENJAMIN, Chicago, Ill., assignor to Benjamin Electric Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Jan. 12, 1922. Serial No. 528,670. 5 Claims. (Cl. 173—334.)



1. A current tap comprising a plug portion for insertion into a screw shell socket, a receptacle portion to receive a plug-in device of the screw shell type, and a receptacle portion to receive the contact blades of a cap member, said receptacle portions comprising an insulating base, a threaded shell receptacle contact mounted on said base, receptacle contacts for engaging contact blades, an insulating cover provided with openings affording access to said blade-engaging contacts, said cover having a hole therethrough, and a screw extending through said hole and cooperating with said threaded shell contact to hold said threaded shell contact and insulating cover in place.

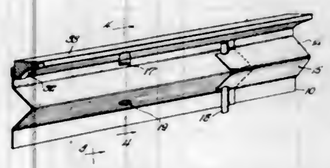
1,571,697. TRANSIT. CARL M. BERNEGAU, Hoboken, N. J., assignor to Keuffel and Esser Company, Hoboken, N. J., a Corporation of New Jersey. Filed Apr. 7, 1923. Serial No. 630,504. 1 Claim. (Cl. 33—46.)

A transit of the character described comprising a casing, a magnetic needle carried thereby, a graduated compass ring associated therewith, a clinometer arm pivotally secured to the bottom wall of said casing, a leveling tube mounted upon said clinometer arm and curved in a plane parallel to the plane of motion of the clinometer arm, and a leveling vial mounted upon said clinometer arm, and having a dome-shaped cover provided with a centralized reference mark thereon, said dome-shaped cover being so positioned that when the bubble registers with the reference mark thereof the plane of motion of the clinometer arm will be horizontally level whereby the clinometer arm and the transit may be levelled independently of the said leveling tube of the clinometer arm.



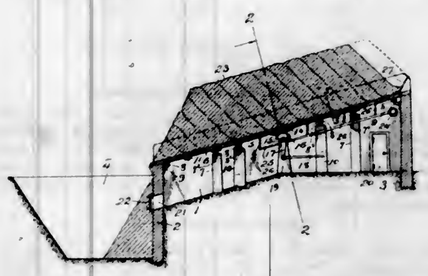
1,571,698. IRONING TABLE. ANTON BETTINARDI, Jersey City Heights, N. J. Filed May 2, 1922. Serial No. 557,957. 1 Claim. (Cl. 68—10.)

A foldable ironing table including a top, floor engaging members, supporting bars connected with one of the floor engaging members and with the top, supporting bars connected with the other floor engaging member and with the first supporting bars, arms pivotally connected with the last-named supporting bars and having lugs on the other ends for engagement with the first named floor engaging member, a transverse bar secured to and extending between the said arms in spaced relation to the lugs, and a latch plate pivotally carried by the upper face of the first-named floor engaging member and having one end extended horizontally from one side of the floor member for engagement over said transverse bar to limit upward movement of the arms and prevent disengagement of the lugs from the floor member, the other end of the latch plate being extended upwardly from the body thereof at an obtuse angle to provide a handle whereby to rotate the latch plate.



1,571,699. FRICTION SHOCK-ABSORBING MECHANISM. ARILD M. BRENNE, Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc., a Corporation of Delaware. Filed Dec. 26, 1922. Serial No. 608,825. 14 Claims. (Cl. 213—34.)

1. In a friction shock absorbing mechanism, the combination with a friction shell; of a spring resistance; friction shoes cooperable with said shell; a collapsible pressure transmitting wedge including rocker parts; and



angularly adjustable bearing elements between said parts of said wedge and said shoes.

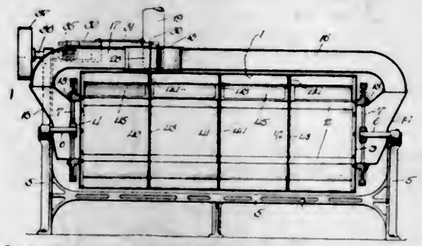
1,571,700. PARTING STRIP FOR CEMENT STRUCTURES. WILLIAM C. BURRELL, Kankakee, Ill. Filed Sept. 27, 1924. Serial No. 740,252. 9 Claims. (Cl. 94—18.)

8. A parting strip having a laterally extending channel and having two openings out of vertical alignment to receive a pin to anchor the strip to the ground.

1,571,701. METHOD OF AND APPARATUS FOR BURNING BALLAST. HENRY G. BUTLER, Houston, Tex. Filed July 6, 1925. Serial No. 41,534. 35 Claims. (Cl. 25—158.)

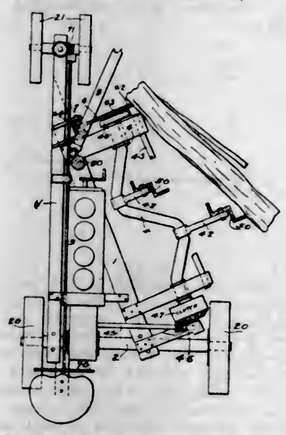
1. The method of burning ballast consisting in forcing air under pressure through a pile of raw earth in contact with burning fuel and employing gravity to feed the pile along.

1,571,702. FUSE PLUG. NATHAN C. BUTLER, Cleveland, Ohio. Filed Oct. 8, 1920. Serial No. 415,628. 8 Claims. (Cl. 200—130.)



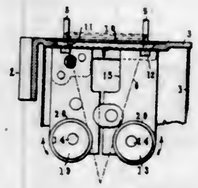
1. A fuse plug comprising a socket engaging member formed with an interior chamber having openings through the ends of said member, a closure for one end of said

member and positioned within the same, and means normally providing a gas vent from said chamber past said



closure, a fuse member removably secured in the other end of said chamber and provided with electric connections through said members.

1,571,703. DRIER. OTTO BUTZBACH, Chicago, Ill., assignor to The Invincible Blow Pipe Co., a Corporation of Illinois. Filed Aug. 21, 1922. Serial No. 583,102. 10 Claims. (Cl. 34—5.)



6. A clothes drier comprising a rotatable receptacle for receiving and holding the clothes, a valve casing, an air inlet pipe communicating with the valve casing, an air outlet pipe communicating with the valve casing, a pair of air passages interconnecting the valve casing and opposite ends of the receptacle, a valve within the valve casing and movable to direct air from the inlet pipe through the passages and receptacle to the outlet alternately in opposite directions and also to close the outlet pipe with both passages open to the inlet pipe, and means for automatically operating the valve.

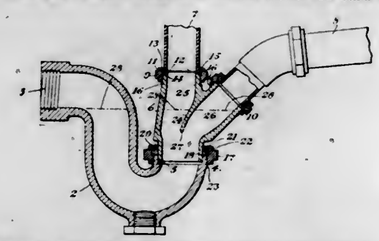
1,571,704. LAND-CLEARING MACHINE. JOHN H. CALDWELL, Seattle, Wash. Filed Apr. 15, 1924. Serial No. 706,667. 5 Claims. (Cl. 214—1.)

1. A land clearing device comprising a self-propelled vehicle having a series of rams mounted for recurring movement in directions extending transversely of the direction of movement of the vehicle, and means for applying power to the movement of said rams.

1,571,705. CUP DISPENSER. HAROLD CABLE, Buffalo, N. Y., assignor, by mesne assignments, to Vortex Mfg. Co., Chicago, Ill., a Corporation of Illinois. Filed Jan. 12, 1924. Serial No. 685,784. 5 Claims. (Cl. 211—8.)

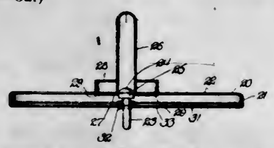
1. A dispensing apparatus of the character described including, in combination, a support for a column of nested cups, a pair of cup drawing friction rolls rotatable on axes extending transversely of the cup path and adapted to cooperate to grip and draw the end cup of said column from said support, a pair of roll shafts with which said rolls rotate, bearings for said shafts, one of said bearings being movable to effect relative approaching and receding movement between said rolls transversely of the cup, means including a spring for effecting relative movement between said bearings to cause approaching movement of said rolls, a driving member, and driving connections between said roll shafts and driving member.

1,571,706. PROCESS OR METHOD OF MAKING WATERPROOF PAPER TUBES. JAMES H. CARMICHAEL, Lowell, Mass., assignor to U. S. Cartridge Company, Lowell, Mass., a Corporation of Massachusetts. Filed Feb. 18, 1925. Serial No. 9,957. 3 Claims. (Cl. 93—94.)



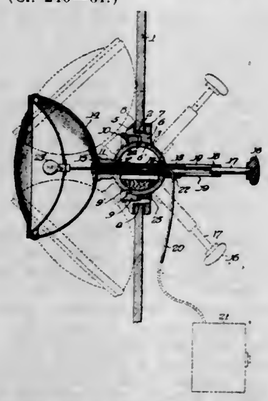
1. The process of making water resisting paper tubes which consists in applying a coating of polymerizable oil to one side of a sheet of paper, such coacting terminating short of the marginal edge and extending substantially parallel to the edge for a width slightly less than the circumference of the tube to be formed, applying adhesive to the sheet, rolling it up to form a tube with the oil coated portion on the outside, drying the paste, and simultaneously gelatinizing the oil and subjecting the tube to a sizing operation.

1,571,707. DRAIN TRAP. GEORGE D. CASPER, New York, N. Y., assignor of one-half to William W. Schusky, Long Island City, N. Y. Filed Apr. 9, 1923. Serial No. 630,710. 1 Claim. (Cl. 182—18.)



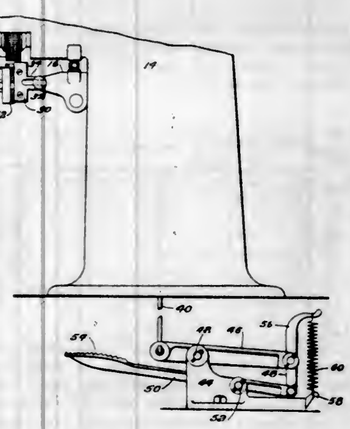
A self-cleaning drain trap having a water seal and embodying a member having an outlet and a juncture portion on the inlet part thereof below the water seal surface, a member having a portion to fit said juncture portion of the first-mentioned member, adapted to be secured thereto in different positions both axially and vertically, and having two pipe connections both above the water seal, joining passages separated by a single wall that is above said juncture portion and whose lower

edge is below the water seal surface and whereby the inlet pipes are water-sealed from each other, and in which inlet member the area of the lower orifice thereof exceeds any single cross section of either of said branch



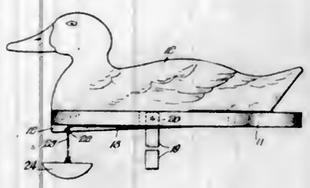
passages, and means below the water seal surface whereby the first-mentioned member and the member having said pipe connections are joined together at said juncture portion.

1,571,708. TOP. JULIUS N. CAYO, Buchanan, Mich. Filed Feb. 23, 1922. Serial No. 538,464. 2 Claims. (Cl. 46—32.)



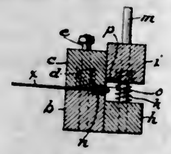
1. A top comprising a disk having its peripheral edge turned laterally and inwardly to form an annular pocket; a cup-shape inverted housing secured to the center of the disk and centrally perforated for a stem handle; a stem extending thru said housing and said disk and secured to the latter; a spinning pin secured to said disk and extending axially with said stem handle; a disk loosely supported on said spinning pin and extending into the aforesaid annular pocket provided by the first mentioned disk, said first mentioned disk having perforations thru which the inner disk may be seen.

1,571,709. SPOT OR SEARCH LIGHT ASSEMBLY. OLIVER H. CLARKE, Washington, D. C., assignor to The Clymer Manufacturing Company, Rockford, Ill., a Corporation of Colorado. Original application filed Mar. 17, 1920, Serial No. 366,683. Divided and this application filed July 14, 1924. Serial No. 725,843. 11 Claims. (Cl. 240—61.)



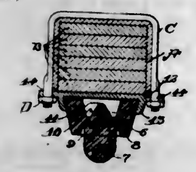
1. In combination, a windshield having an opening therein, a spot light having a shank extending through said opening, and means for mounting said shank in said opening with capacity of angular movement, said mounting means including windshield gripping means and a removable element permitting withdrawal of the spot light shank through said opening without removing the rest of said mounting means for the windshield.

1,571,710. CEMENTING MACHINE. JOHN W. COSGROVE, Medford, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Sept. 8, 1923. Serial No. 661,692. 9 Claims. (Cl. 91—49.)



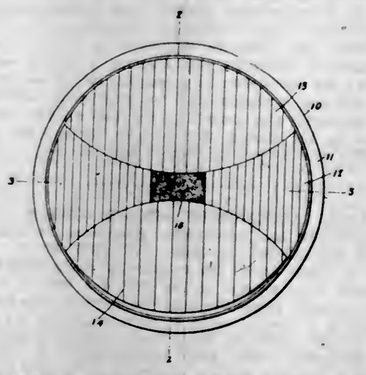
1. In a cementing machine, a rotatable support, a work-engaging member mounted upon the support, and a relatively stationary member in proximity to which the work-engaging member turns, one of the members being provided with a depression and the other member having a projection entering the depression during the rotation of the support.

1,571,711. DECOY. CLARENCE L. DEWEY, Elkhart, Ind. Filed Feb. 29, 1924. Serial No. 696,056. 1 Claim. (Cl. 43—3.)



A decoy simulating a swimming bird, comprising two like buoyant members spaced apart to provide an open slot therebetween; a plate overlying said members bridging the slot and secured to both members to hold them in spaced relation; a relatively thin member vertical to the buoyant members having a slot in its rear end to receive said plate when said member is slid into position between the separated buoyant members; a ballast rod, normally retained in said slot between the buoyant members and pivoted at one end thereto near the longitudinal center thereof and arranged to swing on said pivot into a position vertical to said buoyant members and a latch to hold said rod and said vertical member in place.

1,571,712. PROCESS AND MACHINE FOR VARIABLY CUTTING ROOFING SLATE. JAMES H. EMACK, Philadelphia, Pa. Filed Oct. 9, 1922. Serial No. 593,341. 3 Claims. (Cl. 125—23.)

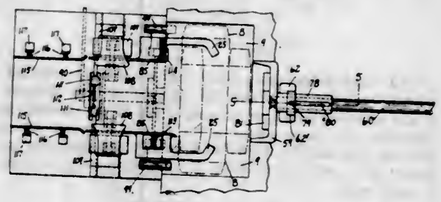


1. The process of manufacturing slabs of slate with edges having an indefinite variety of contours which comprises subjecting the slabs to the action of a cutting tool having a cutting edge of substantially greater length than the width of the individual slab and of such irregular broken contour that any substantial portion of its length is of different contour from any other substantial portion of its length, and presenting the slabs to the cutting tool at a variety of lateral positions along the length thereof to produce slabs with trimmed edges having a variety of different contours.

1,571,713. BUFFER. ELIAS J. EMERY, Lynn, Mass. Filed Dec. 8, 1921. Serial No. 520,888. 13 Claims. (Cl. 267—30.)

1. Shock absorbing mechanism comprising a resilient buffer having therein an integral projecting plug of a length greater than the length elsewhere of said buffer, said plug being resiliently supported for movement with respect to the remainder of the buffer, and means for supporting said buffer on an element between which and a second element shock is to be absorbed.

1,571,714. LENS FOR VEHICLE LAMPS. ROBERT N. FALGE and WILBER M. JOHNSON, Cleveland, Ohio, assignors to General Electric Company, a Corporation of New York. Filed May 1, 1922. Serial No. 557,672. 2 Claims. (Cl. 240—48.4.)

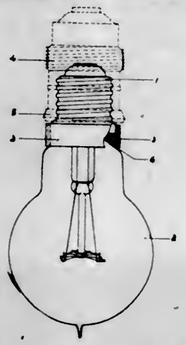


1. A lens for vehicle head lamps having focusing reflectors which comprises upper, lower and intermediate zones provided with means for refracting downwardly light transmitted therethrough from the reflector, all portions of said upper and lower zones being of higher refracting power than said intermediate zone and said intermediate zone being symmetrically disposed with reference to the transverse axis of said lens and being wider at the periphery of said lens than at the center thereof.

1,571,715. METHOD AND MEANS FOR FORMING WATERMARKS IN PAPER. JOSEPH LEA FEARING, Greenwich, Conn., assignor to International Paper Company, a Corporation of New York. Filed Nov. 11, 1925. Serial No. 68,439. 4 Claims. (Cl. 92—48.)

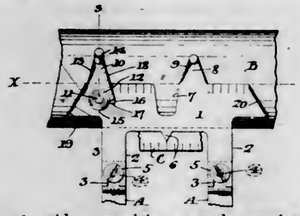
1. The method of forming watermarks in paper, which consists in subjecting the traveling pulp layer to the action of indenting projections constituting the watermark formative design and disposed substantially solely in the general direction of the travel of the pulp layer.

1,571,716. CARTON-FILLING MACHINE. VICTOR S. FISHWICK, Cincinnati, Ohio. Filed Mar. 30, 1925. Serial No. 19,227. 5 Claims. (Cl. 93—6.)



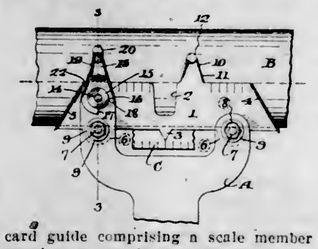
1. In a carton filling machine of the character described, comprising vacuum means for temporarily placing a carton into a extended position, means for placing the article into the carton, in combination with pusher means for closing the vertical flap ends of the carton at one end, part of said pusher means, after the vertical flaps have been folded into position at said one end, continuing to push the carton until it engages means for closing the vertical flaps at the opposite ends, and means for folding and closing the remaining horizontal flaps.

1,571,717. PROCESS FOR MANUFACTURING METAL CAPS FOR ELECTRIC INCANDESCENT LAMPS. LADISLAUS PETER GRÄNER, Eindhoven, Netherlands, assignor, by mesne assignments, to General Electric Company, a Corporation of New York. Filed Nov. 17, 1923. Serial No. 675,400. 3 Claims. (Cl. 18—59.)



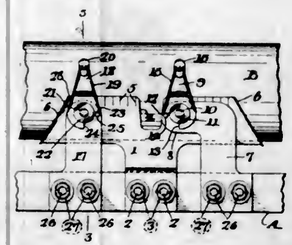
3. The process of applying a protecting ring and insulation about the base of the cap of an electric lamp or the like which consists in applying a layer of paper

over the base of the cap after the paper has been immersed in liquid containing "bakelite," allowing the paper to dry in position and thereafter applying "bake-



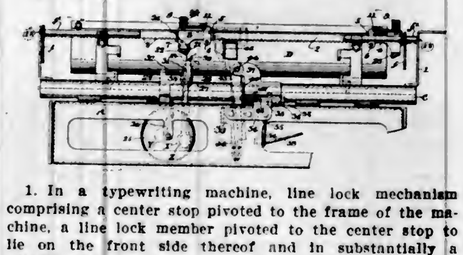
lite" solution again to the paper, placing the protecting ring over the paper and insulation while in a heated condition and thereafter heating the aggregate to dry and harden.

1,571,718. TYPEWRITING MACHINE. EDWARD B. HESS, New York, N. Y., assignor to Royal Typewriter Company, Inc., New York, N. Y., a Corporation of New York. Filed Sept. 25, 1925. Serial No. 58,548. 13 Claims. (Cl. 197—135.)



1. A card guide comprising a scale member having a central opening to permit the passage of the type bars to the printing point, an integral rigid finger immediately adjacent the type opening, a movable finger at the extreme end of the scale, and means for stopping said finger in a position wherein it constitutes an extension of said scale.

1,571,719. TYPEWRITING MACHINE. EDWARD B. HESS, New York, N. Y., assignor to Royal Typewriter Company, Inc., New York, N. Y., a Corporation of New York. Filed Sept. 25, 1925. Serial No. 58,549. 9 Claims. (Cl. 197—135.)

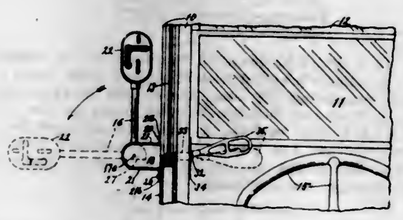


1. A card guide comprising a scale member having a central opening to permit the passage of the type bars to the printing point, an integral rigid finger immediately adjacent the type opening, a movable finger at the end of the scale mounted independently thereof, and means for stopping said finger in a position wherein it constitutes an extension of said scale.

1,571,720. TYPEWRITING MACHINE. EDWARD B. HESS, New York, N. Y., assignor to Royal Typewriter Company, Inc., New York, N. Y., a Corporation of New York. Filed Sept. 25, 1925. Serial No. 58,550. 10 Claims. (Cl. 197—135.)

1. A card guide comprising a scale member having a central opening to permit the passage of the type bars to the printing point, and two fingers mounted independently of said scale member, one of said fingers being adjacent said central opening and the other being mounted at the extreme end of the scale.

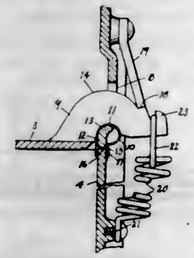
1,571,721. TYPEWRITING MACHINE. EDWARD B. HESS, New York, and LEWIS C. MYERS, Freeport, N. Y., assignors to Royal Typewriter Company, Inc., New York, N. Y., a Corporation of New York. Filed June 11, 1925. Serial No. 36,465. 9 Claims. (Cl. 197—112.)



1. In a typewriting machine, line lock mechanism comprising a center stop pivoted to the frame of the machine, a line lock member pivoted to the center stop to lie on the front side thereof and in substantially a parallel plane for its entire length, the upper end of said line lock member also having an offset portion overlying the edge of the center stop, a margin stop having a projection to contact with the offset portion and swing the line lock member so that its lower end overlies a portion of the universal bar frame and prevents further printing.

9. In a typewriting machine, bell ringing mechanism comprising a bell, a bell striker normally out of contact therewith and pivotally supported by a pivot passing through an elongated slot therein, a spring normally holding the bell striker in a position out of contact with the bell, and a margin stop for rocking the bell striker, the elongated slot permiting the bell striker when released by the margin stop to pass through its normal position into momentary contact with the bell.

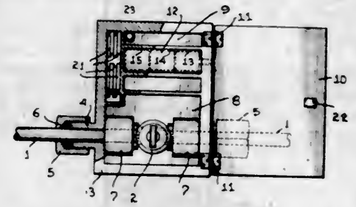
1,571,722. AUTOMOBILE SIGNAL DEVICE. JULIUS J. HOLLEY, La Crosse, Wis. Filed June 13, 1924. Serial No. 719,805. 1 Claim. (Cl. 177—327.)



In a signal device for vehicles, a mechanism housing adapted to be secured on the side of a vehicle, a signal arm pivotally secured in said housing and adapted to be swung in a vertical plane at right angles to the side of the vehicle; said arm comprising a tubular member with an elongated hollow head, quadrangular in cross section, on its free end, an electric bulb in said head and in an electric circuit, means for closing the circuit, means in said head for projection of light forwardly and rearwardly, simultaneously, when the circuit is closed; means

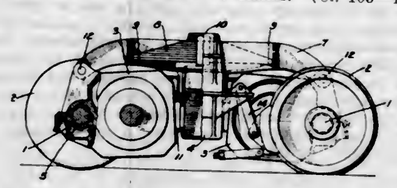
for manipulating the signal arm to and from a horizontal position comprising an operating rod having a universal joint connection with the signal arm adjacent its pivot and movable in a common plane with the movement of the signal arm, and in which said circuit closing means comprises a fixed electro-conductive element within said mechanism housing, a radial electro-conductive arm in friction contact with said fixed element and oscillated

by the movement of the signal arm, an opening being provided in said fixed element in the path of said radial arm to break the circuit when the signal arm is in idle position, and means for conducting electric current from said arm to the electric bulb in the head of the signal arm; and auxiliary means for holding the signal arm in non-signaling position comprising a fixed stud within the mechanism housing, in the path of the radial arm and adapted to engage and yieldingly hold said arm.



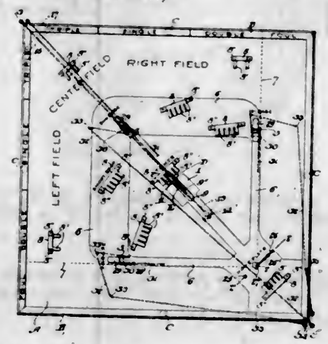
1,571,723. STOVE. GEORGE W. HOWES, Dowagiac, Mich., assignor to The Beckwith Company, Dowagiac, Mich. Filed Oct. 16, 1925. Serial No. 62,796. 7 Claims. (Cl. 126—194.)

7. In a door, the combination of a casing having an inset door jamb and comprising a downwardly curved bottom member and inwardly facing channeled upright members having recesses at their lower ends, the recesses having slots therein, and a floor having laterally projecting portions at its lower edge adapted to close into said recesses and provided with inwardly projecting hinge arms disposed through said slots.



1,571,724. SAFETY LOCK FOR MOTOR VEHICLES. CHARLES L. HUBBS, San Diego, Calif. Filed Mar. 23, 1925. Serial No. 17,732. 4 Claims. (Cl. 70—124.)

1. The combination with a gas line between a source of supply and a carburetor, said gas line including a stop cock, of a casing mounted on the gas line and housing and stop cock and having a closure and a compartment, the closure having a catch, the casing having a keeper for the reception of the catch, and means mounted in

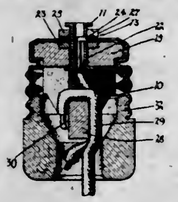


said compartment consisting of a plurality of slides for cooperating with the catch for holding the catch in the keeper.

1,571,725. LOCOMOTIVE OR CAR TRUCK. OLE K. KJOLSETH, Scotia, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Sept. 5, 1924. Serial No. 736,150. 6 Claims. (Cl. 105—135.)

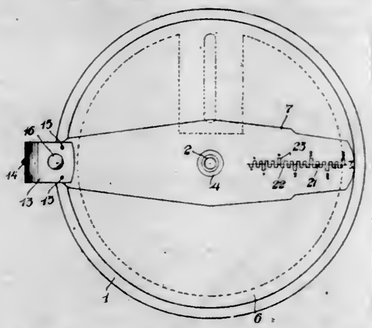
1. A locomotive or car truck comprising wheels, axles therefor, a truck transom, electric motors geared to said axles, each of said axles having a bearing in the frame of its respective motor, each of said motors being also supported on said transom, equalizers having their ends pivoted to the frames of said motors, and spring supports for said transom on said equalizers.

1,571,726. GAME APPARATUS. JOHN B. KRUG, Philadelphia, Pa. Filed Nov. 19, 1921. Serial No. 516,309. 4 Claims. (Cl. 273—89.)



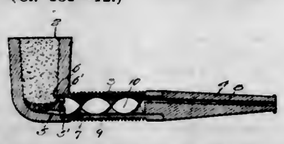
1. In a game apparatus of the character described, a board representing a ball field, ball delivering and batting mechanism connected with said board, a device representing a player pivotally connected to said board and extending through a slot therein, a member connected with said device for moving it to an upright position, and tripping mechanism for engaging and holding said device in an upright position.

2. In a game apparatus of the character described, a board representing a ball field, batting mechanism carried upon said field, a ball seat, and means for delivering said



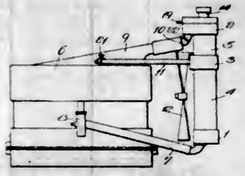
ball from said seat to said batting mechanism and comprising a housing, a plunger reciprocable in said housing, elastic means for normally retracting said plunger in said housing, manually operable means for actuating said plunger to strike said ball.

1,571,727. ATTACHMENT PLUG. STANLEY MCCLATCHIE, Cambridge, Mass., assignor to Benjamin Electric Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed July 3, 1920. Serial No. 393,972. 3 Claims. (Cl. 173—359.)



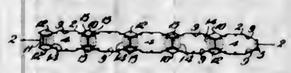
2. An attachment plug comprising a side contact, an insulating body within said side contact, a tubular metal member extending through said body, said tubular member having a portion forming a center contact, the bore of said tubular member affording a passage for the conductor, said tubular member being provided with a lateral passage for the conductor, and means for securing the end of said conductor, comprising a nut threaded on said tubular member.

1,571,728. CALCULATOR. SAMUEL J. MACFARREN, Washington, D. C. Filed Nov. 9, 1922. Serial No. 599,826. 10 Claims. (Cl. 235—83.)



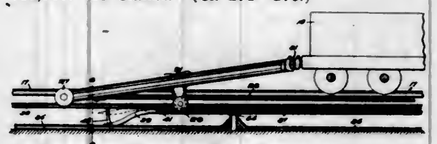
1. In a calculator, a dial adapted to be read from one direction only and having thereon a spiral scale oriented.

1,571,729. TOBACCO PIPE. ARTHUR B. MODINE, Racine, Wis. Filed Dec. 6, 1923. Serial No. 678,901. 4 Claims. (Cl. 131—12.)



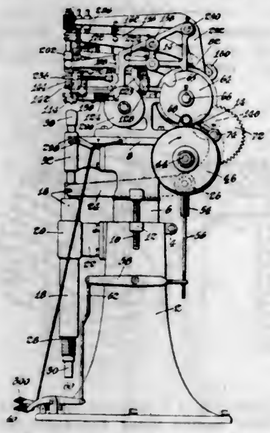
1. A tobacco pipe comprising a bowl, a metallic stem having fins for radiating the heat therefrom, and means for swirling the smoke outwardly against said stem during its passage therethrough.

1,571,730. RADIATOR. ARTHUR B. MODINE, Racine, Wis. Filed Dec. 29, 1923. Serial No. 683,402. 8 Claims. (Cl. 123—174.)



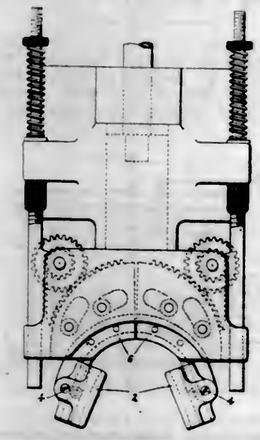
1. In a device of the kind described and in combination, a radiator provided with upper and lower tanks and a core connecting the same, one of said tanks provided with an inlet and the other with an outlet for the circulation of a fluid medium, a condenser arranged to receive, condense and return vapors discharged from the system, and means for closing said inlet to direct the fluid through the condenser.

1,571,731. JEWELRY CHAIN. ALMYR L. NEWMAN, Warwick, R. I., assignor, by mesne assignments, to A. L. Newman Company, Cranston, R. I., a Corporation of Rhode Island. Filed Nov. 6, 1923. Serial No. 673,050. 5 Claims. (Cl. 59—80.)



4. In an article of the type specified, the combination of a series of main links having relatively flat top-plates provided with depending loops at their ends, base-plates secured in spaced relation below the top-plates, and intermediate connecting-links formed with lateral crossbars connected at their ends by raised abutments, the crossbars of the connecting-links being received within the loops of adjacent main links and the edges of the raised portions at their ends abutting the outer edges of the main links to hold the latter in alinement and prevent them from twisting or skewing out of position.

1,571,732. CAR-HAULAGE PLANT. ALMON E. NORRIS, Brookline, Mass. Filed May 5, 1924. Serial No. 710,960. 16 Claims. (Cl. 104—176.)

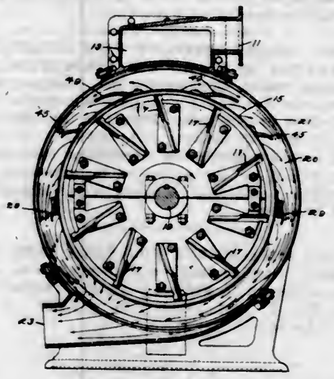


2. A car haulage system having a pusher car provided with a pusher head, a main track provided with a transfer station of substantial length whereat the pusher car is adapted to pass beneath a car on the main track, a pusher car guide comprising a main pusher car track extending lengthwise the main track, a guiding device on the pusher car comprising a main truck engaging the pusher car track, a separate auxiliary guide comprising an auxiliary track also extending lengthwise the main track, an auxiliary guiding device on the pusher car comprising a second truck engaging said auxiliary track, the pusher head being elevationally controlled by the elevational variation of said second truck, a branch auxiliary guide at the transfer station comprising a branch track elevationally separated from the auxiliary track, said second truck engaging with one of said auxiliary tracks when the pusher car is moved in one direction, and a switch for transferring the auxiliary guiding truck to the other auxiliary track when the pusher car is moved in the opposite direction.

1,571,733. MACHINE FOR SHAPING UPPERS OVER LASTS. ARTHUR F. PYM, Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Jan. 7, 1921. Serial No. 435,636. 15 Claims. (Cl. 12—51.)

1. A machine for operating at the sides of a toe to improve the shape of an upper secured in substantial conformity to the contour of its last having, in combination, wiping means constructed and arranged to engage the secured upper at the side portions only of the toe while leaving the portions of the upper round the end of the toe free from wiping pressure, and operating means for forcing said wiping means inwardly over the bottom of the shoe in engagement with the upper.

1,571,734. METHOD OF MAKING SHOES. ARTHUR F. PYM, Marblehead, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Original application filed Jan. 7, 1921, Serial No. 435,636. Divided and this application filed Mar. 21, 1924. Serial No. 700,843. 7 Claims. (Cl. 12—142.)

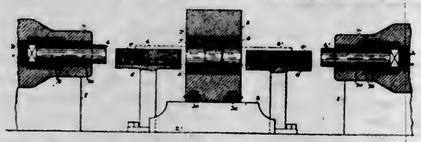


1. That improvement in methods of making shoes which consists in lasting the toe of a shoe including the fastening of the upper in the angle between the feather and the rib of the insole, and thereafter working the upper over the toe of the last toward the edge of the insole and then inwardly into the angle between the feather and the rib of the insole to tighten the upper and conform it more closely to the last and to the contour of the insole.

1,571,735. IMPELLER. CHARLES F. QUEISSER, Cleveland Heights, Ohio, assignor to Electric Vacuum Cleaner Company, Inc., Cleveland, Ohio, a Corporation of New York. Filed Sept. 28, 1923. Serial No. 665,469. 7 Claims. (Cl. 170—168.)

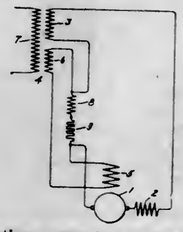
1. An impeller comprising a sheet metal disk having integral radial blades cut from the disk and bent outwardly, an integral rim, a reinforcing disk which closes the openings in the blade disk and fits the inside of the rim, and means for uniting the web of the reinforcing disk with those portions of the web of the blade disk which are situated between the blades.

1,571,736. SCREEN. HAROLD J. REED, Nashua, N. H., and CLAUDE L. SPAFFORD, Sherbrooke, Quebec, Canada, assignors to Improved Taper Machinery Company, Nashua, N. H., a Corporation of Maine. Filed Apr. 7, 1925. Serial No. 21,285. 14 Claims. (Cl. 92—34.)



1. In an apparatus of the class described, the combination with a casing, of a screen drum within the casing and providing a screened-stock chamber between the casing and the drum and a screening chamber within the drum, impelling devices within the screening chamber, and means in the screened-stock chamber to deflect away from the lower adjacent portion of the screen drum the gravitating stock passed through the upper part thereof.

1,571,737. METHOD OF CONDENSING METALS. CHAPMAN SCHANANDOAH, Nedrow, N. Y. Filed Apr. 1, 1925. Serial No. 19,902. 5 Claims. (Cl. 78—81.)

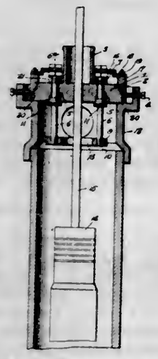


3. In a metal condensing apparatus, a metal holder formed to receive and engage the major part of a body of metal to be condensed and to leave the ends of the body free, a pair of explosive guns arranged in spaced relation to and on opposite sides of the holder and having their bores alined with the body of metal, and solid heavy

rams received in the gun bores and adapted upon igniting of the explosives to be projected through the space be-

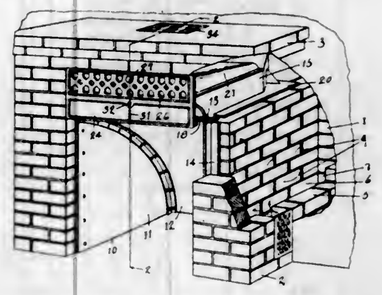
tween the guns and metal body and simultaneously against opposite ends of the body of metal thereby to condense the latter.

1,571,738. COMPOUNDING ALTERNATING-CURRENT MACHINE. LUCIEN SCHOMBOURGER, Paris, France, assignor to General Electric Company, a Corporation of New York. Filed Sept. 24, 1924. Serial No. 739,704. 4 Claims. (Cl. 172—276.)



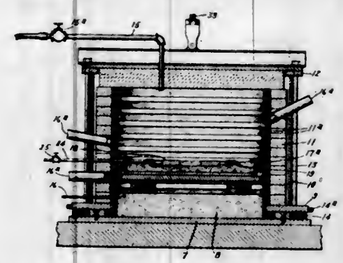
1. An alternating current commutator machine comprising a field winding and an armature circuit, means for impressing a shunt component voltage on said field winding, and means connected in said armature circuit exterior of said motor for impressing on said field winding a component voltage which is proportional in value to the load current of said machine.

1,571,739. HARD, RESINOUS VULCANIZATION ACCELERATOR AND PROCESS OF MAKING SAME. WINFIELD SCOTT, Wilmington, Del., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a Corporation of Delaware. Filed Dec. 19, 1922. Serial No. 607,883. 28 Claims. (Cl. 260—3.)



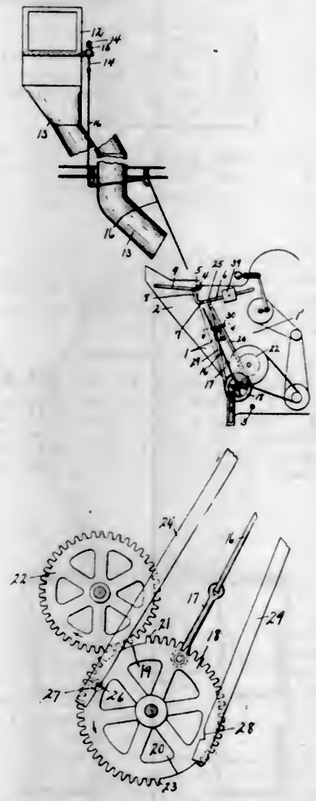
23. A rubber vulcanization accelerator comprising the product formed by the action of formaldehyde on the condensation product of 3 moles of acetaldehyde and 2 moles of aniline.

1,571,740. ATTACHMENT FOR SAND CAPS OR OIL SAVERS. GUY A. SEGUINE, Fredonia, Kans., assignor of one-sixteenth to Frederick A. Ost, Fredonia, Kans. Filed Feb. 7, 1924. Serial No. 691,233. 3 Claims. (Cl. 166—14.)



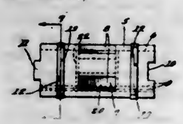
1. The combination with an oil well casing head, of a cap seated thereon, radial screws carried by the head, lugs engageable between said screws and the periphery of the cap, and a carrier movable with respect to the cap and provided with a tool impacting element, the lugs being supported by the carrier and movable in a direction parallel with the axis of the cap for withdrawal between the cap and the screws upon movement of the carrier.

1,571,741. FIREPLACE. GEORGE F. SMITH, Sturgis, Mich. Filed Apr. 20, 1925. Serial No. 24,471. 6 Claims. (Cl. 126—12.)



1. The combination in a fireplace comprising sides and a top, the sides having inner and outer walls spaced to provide air inlet chambers at each side of the fireplace, the outer side walls having air inlets opening to said chambers, the inner side walls having air distributing openings therethrough, the top having a hot air delivery opening therein, a combustion chamber member comprising side walls and a forwardly inclined back wall, a smoke flue member disposed above the combustion chamber and having an inlet opening at the front of said combustion chamber back wall, said smoke flue, combustion chamber and inner wall coacting to provide a hot air chamber at the sides and top of said combustion chamber, said smoke flue member having a plurality of air flues therethrough opening to said hot air chamber, and a hot air flue member disposed horizontally above said smoke flue member and coacting therewith to provide a hot air delivery flue delivering at its front end, there being an opening in said air flue member registering with said delivery opening in said top.

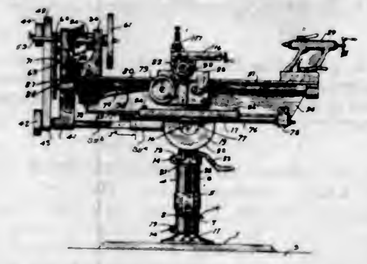
1,571,742. CLOSED FURNACE AND METHOD OF OPERATING THE SAME. CHRISTIAN STEENSTRUP, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Dec. 20, 1923. Serial No. 681,864. 20 Claims. (Cl. 204—64.)



1. In a furnace, the combination of a closed container adapted to contain the charge, means for maintaining a supply of selected gas within the container to prevent oxidation of the surface of the charge during the working period, means for heating the container and its charge, and means acting independently of the heating means for controlling the temperature of a selected portion of the charge.

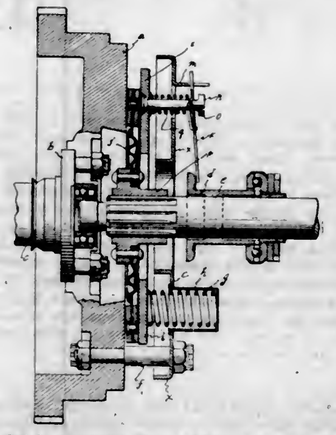
1,571,743. GARNETT MACHINE. HARRY W. TROUT, Syracuse, N. Y., assignor to Cotswold Comfortable Company, Syracuse, N. Y., a Corporation of New York. Filed Feb. 17, 1923. Serial No. 619,780. 14 Claims. (Cl. 19—69.)

1. In a Garnett machine, a hopper including a movable part, hopper-supplying means, a continuously rotating part, and a second rotary part rotarily actuated by the continuously rotating part only at predetermined positions of said movable part for varying said supplying means.



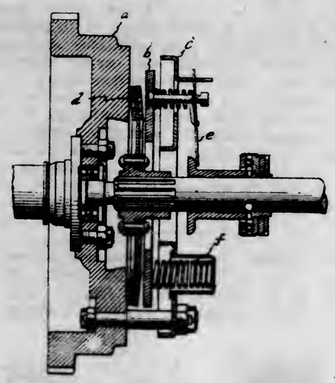
1,571,744. ENGINE VALVE AND PROCESS OF MAKING THE SAME. FRANK VOREL, Cleveland, Ohio, assignor of one-half to Joseph E. Moravec, Cleveland, Ohio. Filed Aug. 13, 1921. Serial No. 491,979. 10 Claims. (Cl. 29—156.7.)

1. A hollow valve shaft having peripheral grooves thereabout, a longitudinal slit to permit slight expansion or contraction thereof and alined apertures in its walls, tubular elements having their ends welded to the inner surface of said walls with the end openings in such elements registering with said apertures to form positively directed valve channels for the passage of gases therethrough, and yielding rings sprung into said grooves.



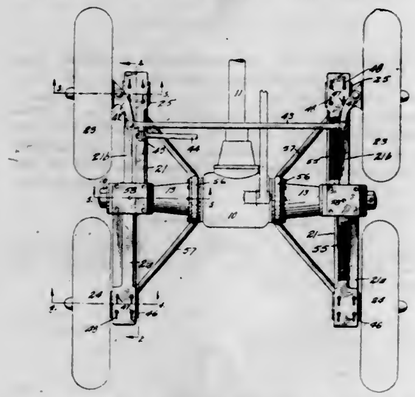
9. The method of making hollow rotary metallic valve sections for internal combustion engines comprising making a split cylinder section having a cylindrical bore and two apertures in its wall in transverse alinement, providing a hollow metallic piping or boxing having parallel face walls and open ends, the said ends of the piping fitting accurately the curved inner surface of the said section and their openings having the same size and contour as the said apertures, inserting the said piping within the said section, positioning it therein with its openings registering with the apertures in the section so that said piping will provide a suitable valve channel, and welding the pipe ends gas-tight to the section wall so that the said channel will have no communication whatever with the interior of the section.

1,571,745. LATHE. HARVEY J. WARNER, Denver, Colo., assignor of one-third to Albert S. Carter and one-third to W. J. Cattell, both of Denver, Colo. Filed June 23, 1924. Serial No. 721,753. 4 Claims. (Cl. 82—2.)



1. A lathe comprising, in combination, a vertical support, a sleeve slidably attached thereto, means for moving said sleeve along said support, means for clamping the sleeve to the support in adjusted position, a lathe bed support pivotally attached to the upper end of said sleeve, means for rotating said lathe bed support about its pivot, a lathe bed slidably connected to the lathe bed support, and means for moving said bed in said support.

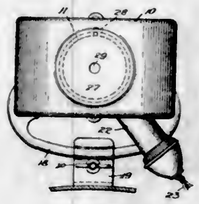
1,571,746. CLUTCH. ERNEST E. WEMP, Detroit, Mich. Filed Dec. 24, 1923. Serial No. 682,445. 10 Claims. (Cl. 192—68.)



1. In a clutch, a clutch disc which is substantially equally radially extensible and contractible along all of its radii and in which the outer zone of the disc is arranged to be deformed from its natural condition when the clutch is engaged.

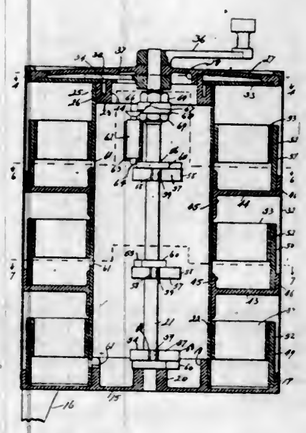
1,571,747. CLUTCH DISK. ERNEST E. WEMP, Detroit, Mich. Filed July 25, 1924. Serial No. 728,056. 6 Claims. (Cl. 192—107.)

1. A clutch disk for use in the plate type of clutch comprising a spoked metal disk in which the spokes terminate at their ends with packing portions in the form of segments of cones.



1,571,748. AXLE AND WHEEL STRUCTURE. GEORGE W. WILSON, Henderson, Iowa. Filed Oct. 20, 1924. Serial No. 744,636. 3 Claims. (Cl. 180—22.)

1. In a wheel and axle structure, a differential and axle housing, a differential and two-part axle mounted therein, wheel supports mounted on the opposite ends of said housing and having parts extending in one direction from the housing and non-aligned parts extending in the other direction from the housing forming casings, a pair of wheels journaled on those projecting parts of the wheel supports which form the pair most widely separated, a pair of wheels steerably mounted on the other projecting members of said wheel supports in alignment with the wheels of the first pair, means for imparting motion from the axle to the first pair of wheels, and means for imparting motion from the axle to the second pair of wheels.



1,571,749. DETACHABLE, STOP SIGNAL, PARKING, AND TROUBLE AUTOMOBILE LAMP. GEORGE J. WOHLTMAN, Newburgh, N. Y. Filed Jan. 27, 1922. Serial No. 532,244. 5 Claims. (Cl. 177—329.)

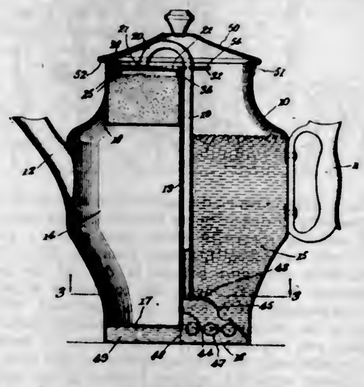
5. In a lamp as described, a portable casing provided with a carrying handle, means for detachably mounting said casing on an automobile in signal position, said means comprising a clamp for engagement over said handle, a lateral extension on said casing forwardly of the automobile, a lamp in said casing and

means for extensible connection of said lamp with a distant source of current, a lens in said extension, and a peep-hole apertured cover detachably mounted on said extension over the lens, the peep-hole when positioned serving as a telltale for the lamp.

1,571,750. VENDING MACHINE FOR COMPRESSED GASES AND FLUIDS IN CONTAINERS. JOHN E. CARROLL, Philadelphia, Pa., assignor to C-2 Products Company, Philadelphia, Pa., a Company existing under a Declaration of Trust. Filed June 21, 1923. Serial No. 646,808. 7 Claims. (Cl. 194—85.)

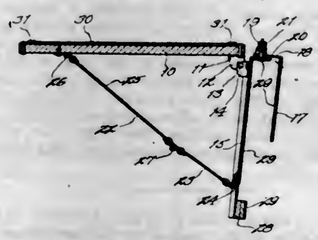
1. A machine for vending merchandise in returnable containers comprising a plurality of supports arranged above one another each having a single communication with the support beneath, the communication between alternate supports being in staggered relation, and means to move containers resting on the supports toward the communications between supports, said means being placed in operative conditions by the insertion of a coin and a container in the machine.

1,571,751. FISH GUN. GIULIO CASTELLAN, San Luis Obispo, Calif. Filed Nov. 10, 1923, Serial No. 674,023. Renewed Sept. 28, 1925. 4 Claims. (Cl. 43—6.)



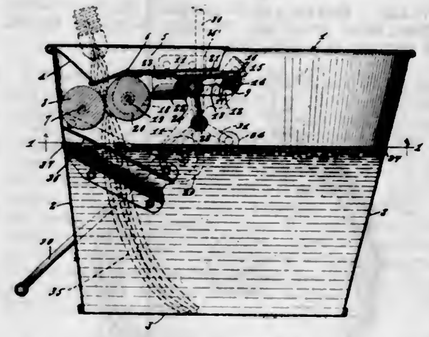
1. A fish gun comprising a barrel mounted upon a stock, a pulley journaled upon the stock, a trigger mechanism carried by the stock, a bait line threaded through the barrel and trained around the pulley and connected with the trigger mechanism and carrying a bait hook, a

member slidably mounted on the barrel, and engageable with the trigger mechanism, a member fixed to the barrel, a member slidably mounted upon the barrel and carrying



spears, a coil spring interposed between the fixed member and the last mentioned slidable member and means connecting the first and last mentioned slidable members.

1,571,752. AUTOMATIC DRIP COFFEEPOT. GRACE GERMAN CHAMBERLAIN, New Orleans, La., assignor of one-fifth to Walter W. Fife, New Orleans, La. Filed Oct. 8, 1925. Serial No. 61,285. 6 Claims. (Cl. 53—3.)



1. A coffee pot comprising a pot body, a partition for dividing the same into water and coffee compartments, said partition having a false bottom extending thereof in the coffee compartment, a generator at the base of the water compartment having a flat wall fitting against the lower part of the partition, a top wall adjoining the partition and a curved diagonal wall sloping toward the bottom of the coffee pot and having perforations therein to admit the water to the generator a spout rising from the top wall of the generator close to the partition and having a discharge end disposed above the coffee compartment, a receptacle for the coffee grounds held by said partition above the coffee compartment, and means for distributing the boiling water received from said spout evenly to the coffee grounds in said receptacle.

1,571,753. AUTO UTILITY TABLE. JOHN L. CHRISTIAN, Pinnacle, N. C. Filed Apr. 30, 1924. Serial No. 710,147. 1 Claim. (Cl. 45—51.)

A device of the character described, comprising a table, a pair of inverted L-shaped clamping members adapted to be straddled upon the upper edge of an automobile door, said table being hinged upon one clamping member, and a brace pivotally connected with said clamping member and with the table and provided with a rule joint whereby the brace may be broken to permit the table to swing down into substantially vertical position, and adjustable means on the lower end of said clamping member for engagement against the inside of the door for varying the position of said clamping member to brace the table into horizontal position.

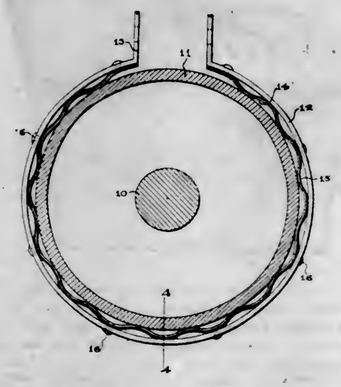
1,571,754. MOP PAIL AND WRINGER. WILLIAM M. CHRISTOPHER, Tonawanda, N. Y. Filed Apr. 1, 1925. Serial No. 19,965. 11 Claims. (Cl. 15—262.)

1. In a device of the character set forth, a pail, a stationary roller positioned therein, a bail having the ends thereof extended through the sides of said pail, and a roller carrying means suspended in said pail for pivotal and reciprocating movement, the ends of said pail cooperating with said roller carrying means to shift said means to cause the roller carried thereby to move toward the stationary roller upon depression of the bail.

1,571,755. FACIAL-MUSCLE-LIFTING DEVICE. SUSANNA COCROFT, New York, N. Y. Filed Sept. 2, 1924. Serial No. 735,473. 1 Claim. (Cl. 128—76.)

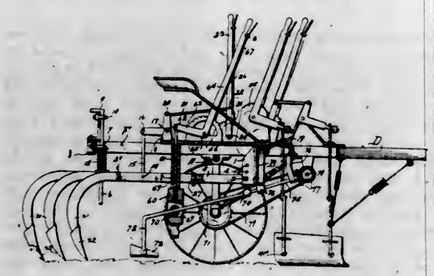
A device for the purpose set forth comprising a carrier formed of a fabric head piece and a lining concealed by and having its rear edge and ends secured to the rear edge and upper and lower ends of said head piece and further opposing the rear portion of the inner face of said head piece, said lining having its forward edge free of the head piece, a face adhering member free of, concealed by and opposing the forward portion of the inner face of the head piece, said member projecting forwardly from said lining, means for detachably connecting the forward portion of the lining to the rear portion of said member, and a pair of securing tapes projecting rearwardly of said head piece and having their forward terminal portions spaced from each other and secured against said lining.

1,571,756. MANUFACTURING PROCESS OF BLANKS FOR WATCH MOVEMENTS PROVIDED WITH JEWEL-INSETTING OR PLUG HOLES. HENRI COLOMB, Tavannes, Switzerland. Filed Oct. 5, 1922. Serial No. 592,642. 2 Claims. (Cl. 29—160.6.)



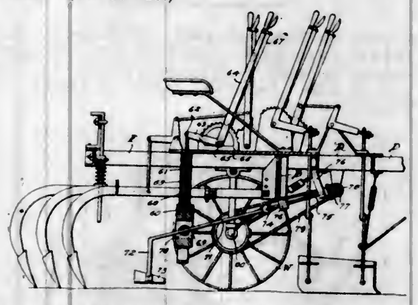
1. In a manufacturing process for blanks of watch movements provided with holes for settings and bushes

the procedure of establishing the interchangeability of each piece by first putting-in all the holes according to suitable guide marks and then of rectifying all the holes



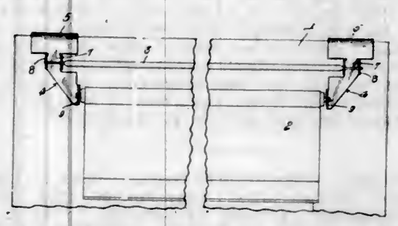
of each piece simultaneously by means of one and the same punch which is likewise guided by suitable but particular marks.

1,571,757. BRAKE-BAND LINER. PEARL COMPTON, Flint, Mich. Filed Sept. 10, 1923. Serial No. 661,921. 2 Claims. (Cl. 188—259.)



2. A brake band liner comprising an inner friction strip, a contracting member, and a transversely corrugated spring interposed between the friction strip and the contracting member and adapted to support the friction strip for contact with a drum at spaced points thereabout, and anchoring means securing the spring at spaced points throughout its length to said contracting member.

1,571,758. AGRICULTURAL IMPLEMENT. RUBIN L. DIAMOND, McHenry, Miss., assignor of one-half to John S. Adkison, McHenry, Miss. Filed Sept. 6, 1924. Serial No. 736,341. 1 Claim. (Cl. 97—159.)

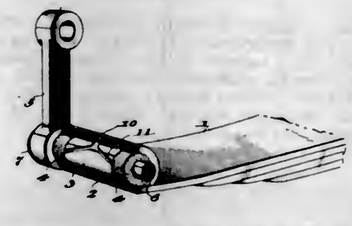


An agricultural implement comprising, in combination, a portable body, a beam pivotally engaged therewith for movement in a vertical direction, a rigid link carried by the rear portion of the beam, a vertically disposed rod freely disposed through said link, an arcuate member carried by the body, the upper portion of the rod overlying said member, a member adapted to be selectively engaged at different points with the arcuate member and straddling the rod, a guide member carried by the body through which the rod is directed, an expansible member surrounding the rod between the beam and the guide member for constantly urging the beam downwardly, and ground engaging means carried by the beam.

1,571,759. AGRICULTURAL IMPLEMENT. RUBIN L. DIAMOND, McHenry, Miss., assignor of one-half to John S. Adkison, McHenry, Miss. Original application filed Sept. 6, 1924, Serial No. 736,341. Divided and this application filed May 14, 1925. Serial No. 30,331. 1 Claim. (Cl. 97—15.)

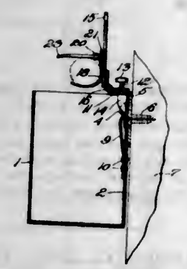
An agricultural implement comprising a portable body, a substantially U-shaped guide depending from said body, a block slidably supported within said guide, a rod secured to and extending upwardly from the block, means coacting with the upper portion of the rod for raising and lowering the block, means for constantly urging the block downwardly, said block being provided with an opening in its central portion, a rock bearing carried by said block and disposed across said opening, a shaft disposed through and rotatably supported by said rock bearing, a ground engaging member carried by the shaft, a driven shaft, and a universal connection between both of said shafts.

1,571,760. CURTAIN AND SHADE SUPPORTING BRACKET. SEWARD J. DICK, Clymer, Pa. Filed Sept. 13, 1924. Serial No. 737,556. 1 Claim. (Cl. 156—24.)



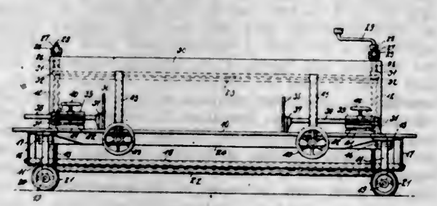
As a new article of manufacture, a bracket for a shade and pendent drapery comprising a body having a reduced intermediate imperforate portion and a laterally extending portion below and at one side of said intermediate reduced portion, pendent barbs at the upper end of the body, slotted arms reaching forwardly from the opposite vertical edges of the reduced portion of the body, and an arm reaching forwardly from the outer end of the lateral portion of the body and adapted to support a shade.

1,571,761. SELF-LUBRICATING SPRING HANGER, BOLT, AND EYE. ARZENO J. DILLEY, River Forest, Mich. Filed May 7, 1921. Serial No. 467,704. 8 Claims. (Cl. 267—54.)



1. A self-lubricating spring hanger, bolt and eye including a leaf-spring having an eye formed at one end

thereof, means of support for said eye, a bolt extending through the eye for fastening said means thereto, a bushing through which the bolt extends and having an

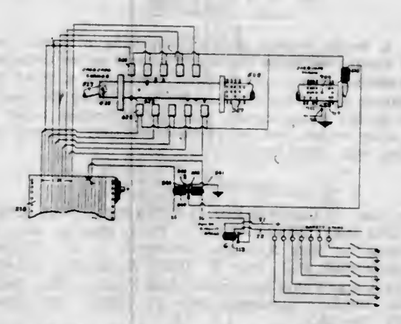


external groove for receiving and distributing lubricant, and the eye having a hole for lubricant leading to the external groove in the bushing.

1,571,762. COMBINED ASH RECEPTACLE AND CIGAR HOLDER. JOHN S. DRISCOLL, Boston, Mass. Filed Dec. 11, 1923. Serial No. 679,908. 5 Claims. (Cl. 131—51.)

1. An article of the character described comprising a box provided with a hinged lid adapted to occupy an open upstanding position; a shelf upon the inner side of said lid for supporting a cigar or the like directly above said box when the lid is in its open position; a bracket adapted to be permanently attached to a supporting fixture; means separably connecting said box and bracket, and a manually operated latch normally locking said box and bracket against separation.

1,571,763. DIMENSION STONE AND SILL MACHINE. SAMUEL R. EDMONDS, Washington, D. C. Filed June 2, 1925. Serial No. 34,437. 15 Claims. (Cl. 25—121.)

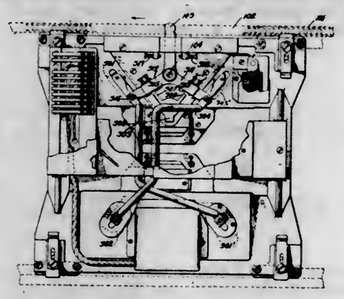


1. In a device of the kind described, a back plate having a normally horizontal upper edge, and independent means at each end of said back plate for vertically adjusting said plate whereby the upper edge thereof may be inclined relative to the horizontal.

1,571,764. CHAIN-APPLYING DEVICE. CHARLES EDWARDS, Lansford, Pa., assignor of one-fourth to Richard Harvey Grenfell and one-fourth to John F. Grenfell, Beaver Meadows, Pa. Filed May 6, 1925. Serial No. 28,441. 2 Claims. (Cl. 152—14.)

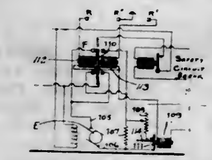
1. Means for facilitating the application of an anti-skid chain on the tire of the drive wheel of an automobile, comprising an arched spring clamp, the ends of which exert a tension toward each other, said clamp designed to be arranged over a tire of a wheel for gripping engagement with the sides of the tire, permanently fixed lateral projections providing tire gripping elements on the inner sides, adjacent to the ends of the clamp, said projections being of a length at least equalling that of the width of the clamp and means on the outer sides of the spring clamp arranged centrally and directly opposite the lateral projections for attaching the end links of the side members of an anti-skid chain to the clamp.

1,571,765. PATTERN-CHANGE MECHANISM FOR KNITTING MACHINES. WILLIAM FELS, Elizabeth, N. J., assignor to Max Nydegger, Elizabeth, N. J. Filed July 8, 1920, Serial No. 394,678. Renewed Sept. 10, 1925. 9 Claims. (Cl. 66—30.)



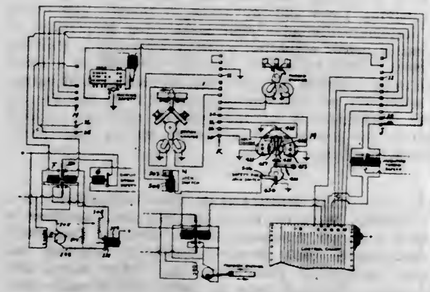
1. In a knitting machine, the combination of a needle bed having jacks slidably arranged therein and means for automatically advancing jacks from inoperative to operative needle actuating position, including a plurality of rows of jack advancing members mounted on a rotatable carrier, means for arresting rotation of said carrier to selectively position any one of said rows opposite the jacks independently of the relative positions of said rows on the carrier, and means for moving said carrier toward the jacks.

1,571,766. CAM MECHANISM FOR KNITTING MACHINES. WILLIAM FELS, Elberta, Ala., assignor to Max Nydegger, Elizabeth, N. J. Original application filed July 8, 1920, Serial No. 394,678. Divided and this application filed Aug. 31, 1921, Serial No. 497,233. Renewed July 11, 1925. 15 Claims. (Cl. 66—29.)



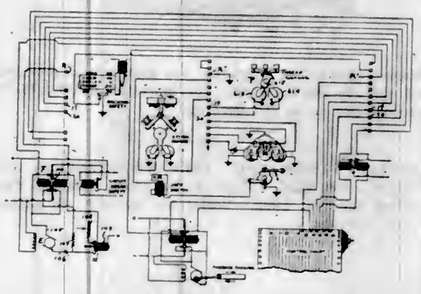
1. Cam mechanism for knitting machines having a cam carrier and reciprocating carrier actuating means, com-

prising cams slidably mounted on said carrier, and cam moving means including a rocking member secured to



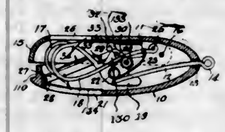
said cams and actuated by the reciprocating carrier actuating means.

1,571,767. MOTOR-CONTROL SYSTEM. WILLIAM FELS, Elberta, Ala., assignor to Max Nydegger, Elizabeth, N. J. Original application filed July 8, 1920, Serial No. 394,678. Divided and this application filed Sept. 3, 1921, Serial No. 498,309. Renewed Dec. 7, 1925. 6 Claims. (Cl. 172—240.)



1. A motor control system comprising a motor, current control means in the circuit of said motor including a reversing switch and variable resistance, a relay for actuating the switch and a relay for varying the resistance in the motor circuit, both of said relays being in the same circuit, and means for alternately opening and closing said relay circuit.

1,571,768. CAM-CONTROL MECHANISM FOR KNITTING MACHINES. WILLIAM FELS, Elberta, Ala., assignor to Max Nydegger, Elizabeth, N. J. Original application filed July 8, 1920, Serial No. 394,678. Divided and this application filed Sept. 3, 1921, Serial No. 498,311. Renewed July 21, 1925. 10 Claims. (Cl. 66—28.)

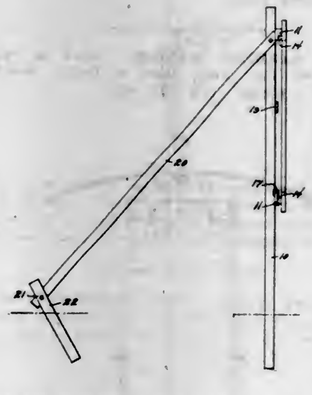


7. Cam control mechanism for knitting machines having a reciprocating cam carriage, comprising a cam actuating member on said carriage, means for operatively moving said member including an armature, a magnetic circuit, and means for closing said circuit at the end of a run of the carriage to effectively move the armature.

1,571,769. SELECTIVE-THREAD-CHANGE MECHANISM FOR KNITTING MACHINES. WILLIAM FELS, Elberta, Ala., assignor to Max Nydegger, Elizabeth, N. J. Original application filed July 8, 1920, Serial No. 394,678. Divided and this application filed Sept. 3, 1921, Serial No. 498,312. Renewed July 21, 1925. 9 Claims. (Cl. 66—12.)

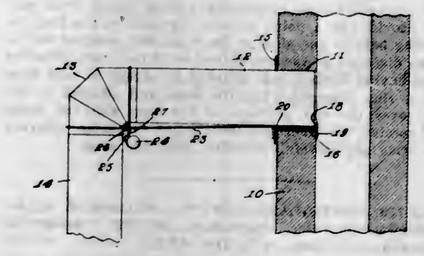
4. In a knitting machine, the combination of a reciprocatable cam carriage, a plurality of thread carriers, carrier engaging members on the carriage, means at the end of each run for moving said carrier engaging members out of carrier engaging position and a selectively operated detent on the carriage for retaining some of said members in disengaged position.

1,571,770. ARTIFICIAL BAIT. GEORGE E. FENNER, Oxford, Wis. Filed Apr. 2, 1925. Serial No. 20,235. 2 Claims. (Cl. 43—36.)



1. In an artificial bait, a housing comprising a body and a section pivoted to the body to collapse or expand the housing, a hook pivoted to the body, the body having an opening through which the hook may pass to an outer exposed position for engaging in a fish taking the bait or to a position within the housing, an element pivotally connected with said hook and adapted to connect with a fish line, a spring-pressed lever pivoted to the housing and having a slot-and-pin connection with said hook, a cam on the pivoted housing section, a member on said lever in contact with said cam and adapted to ride along the same for releasing said hook, and a second hook pivoted to the housing, the pivoted housing section having an opening through which said second hook may be projected, and a spring connecting the first hook with the shank of the second hook.

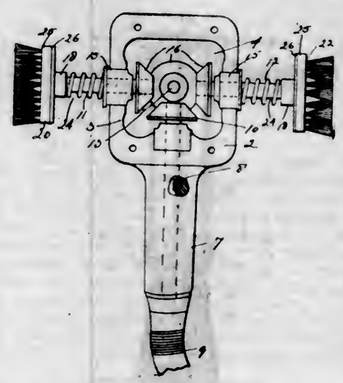
1,571,771. SIGN. FRANK H. FISCHER, Atlantic City, N. J. Filed Oct. 2, 1925. Serial No. 60,098. 5 Claims. (Cl. 40—64.)



1. A device of the character described comprising an easel including spaced supporting legs and spaced upper

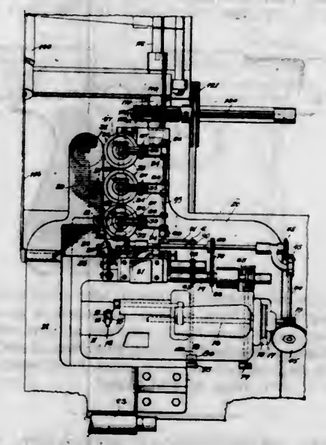
and lower parallel rails, a frame having its top and bottom members secured to said rails and spaced from

the legs and a display panel removably positioned between the legs and frame.



1,571,772. STOVEPIPE FASTENER. JOHN M. FISHER, Salt Lake City, Utah. Filed Dec. 31, 1924. Serial No. 759,130. 2 Claims. (Cl. 126—318.)

1. The combination with a flue wall having an opening therein, of a pipe section entering said opening, an elbow connected with the pipe section, a retaining device engaging the inner end of the pipe section and engaging the inner surface of the flue adjacent to the opening for the pipe, an apertured angle element alongside of the pipe and projecting outwardly through the flue opening, one arm of the angle element acting to prevent said element from being drawn into the flue, and a tension element connecting the retaining device with the angle element, passing through the opening, and secured to the elbow.



1,571,773. PORTABLE SHOE-POLISHING MACHINE. HAROLD H. FORCE, Philadelphia, Pa. Filed Jan. 9, 1924. Serial No. 685,094. 2 Claims. (Cl. 15—28.)

1. A portable shoe polishing machine comprising a frame open at two opposite sides, a handle for said frame, plates normally closing the open sides of the frame, a power shaft journalled in the frame and handle, a friction gear on the inner end of said power shaft and housed within the frame, a pair of spindles slidably and revolubly mounted in two opposite sides of the frame in endwise alignment, another pair of spindles slidably and revolubly mounted in the plates, in endwise alignment, friction gears fixed to the inner ends of said spindles for engagement with the power shaft gear when the spindles are forced inward, springs for normally forcing said spindles outward, a detergent device for

each of said spindles, and means for removably mounting said detergent devices on the outer ends of said spindles.

1,571,774. MACHINE FOR FORMING TUBULAR FABRICS. PERCY GARDNER, East Orange, N. J., assignor to H. M. Bunker & Company, Inc., New York, N. Y., a Corporation of New York. Filed Sept. 19, 1925. Serial No. 57,416. 15 Claims. (Cl. 112—2.)

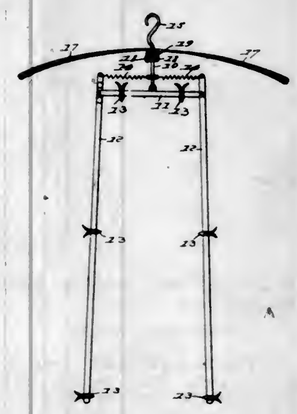
1. A machine for forming tubular materials from a strip comprising, in combination, means for joining the edges by a stitched seam, means for applying an adhesive to the free edges of the seam, and means for opening up and securing the free edges of the seam against the body of the strip.

1,571,775. DISPENSING DEVICE. BERNARD J. GARRIS, Wilmington, Del., assignor of one-half to Leo Samel, South Stirling, N. J. Filed MAY. 18, 1925. Serial No. 15,290. 1 Claim. (Cl. 221—79.)

A device of the character described, comprising a cylindrical body open at both ends, end caps internally threaded into the body, a screw journaled in one of the caps and having a spout forming a continuation thereof,

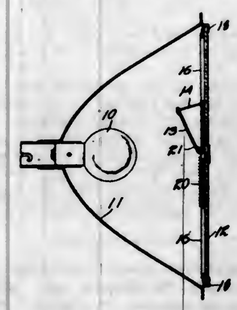
said screw having a lateral by-path in its inner end registering with said spout, a follower threaded on the screw and slidably engaged with said body to prevent rotation, a head telescoped over the body and having connection with the screw for the manual turning thereof, and a collar encircling the spout at the point of joinder thereof with the screw.

1,571,776. MAGAZINE FOR FIREARMS. JOHN E. GLASER, East Hartford, Conn. Filed June 28, 1922. Serial No. 571,525. 5 Claims. (Cl. 42—50.)



1. A firearm magazine follower bent from sheet metal and comprising a floor, a flange arranged at an angle to said floor, and a breech-bolt retainer of less width than said flange and projecting as an extension therefrom and with its flat surface on both sides flush with the flat surface of both sides of said flange.

1,571,777. CIRCLE-WORKING IMPLEMENT. CHARLES FREMONT GOLDEN, Denver, Ind. Filed Apr. 24, 1925. Serial No. 25,660. 2 Claims. (Cl. 33—27.)

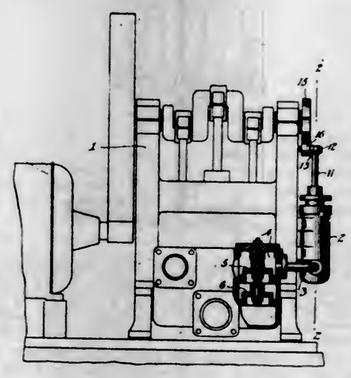


1. A device of the class described comprising a suction cup having a headed screw embedded in the apex thereof and extending outwardly, a post or plunger having threaded engagement with said screw, a cup-shaped hub encompassing a portion of said cup and plunger, an arm extending radially from said hub, a beam fixedly secured to said arm and provided with a scale having a plurality of apertures registering with the graduations of said scale, and means for holding said hub frictionally engaged with said cup.

1,571,778. GARMENT HANGER. ALVA M. RIFFLE, Queens, W. Va. Filed Mar. 9, 1922. Serial No. 542,390. 1 Claim. (Cl. 223—63.)

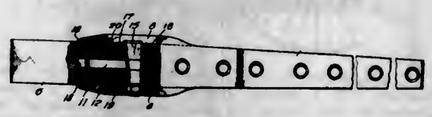
A garment hanger comprising a stem formed from wire and provided at a point between its ends with a loop extending beyond one side of the stem and merging into a hump disposed at the opposite side of the stem, shoulder arms having hooked ends adapted to engage in said loop, and a ring mounted upon the stem and adapted to engage over the end portions of the loop and the hump and receive the inner end portions of the arms, whereby the arms are loosely connected with the stem.

1,571,779. ANTIGLARE DEVICE. WILLIAM S. ALLEN, Birmingham, Ala. Filed Sept. 19, 1925. Serial No. 57,435. 8 Claims. (Cl. 240—48.4.)



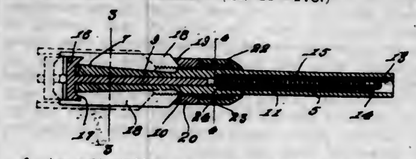
1. An anti-glare device for headlights comprising a colored translucent disk of thin material folded along its diameter rearwardly upon itself and adapted to be supported adjacent the central portion of the lens of the headlight in inverted position with one wing of the disk substantially parallel to the lens and the other wing extending to the lens and the other wing extending at an angle thereto, and means for supporting said disk, substantially as set forth.

1,571,780. COLLAR BUTTON. JOHN F. AHRENS, Brooklyn, N. Y. Filed Oct. 2, 1925. Serial No. 60,083. 5 Claims. (Cl. 24—90.5.)



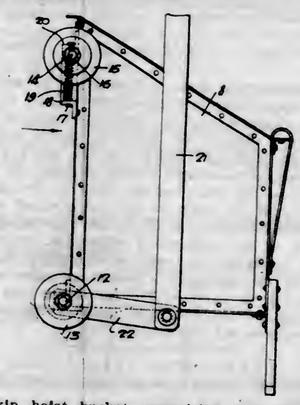
1. A collar button which comprises a base, a shank pivoted thereto, a head on said shank, fabric-engaging means on the base adapted to be disposed closely adjacent to the head when the shank lies flat against the base.

1,571,781. COMPENSATING DEVICE FOR PUMPS. ROSCOE HILTON ALDRICH, Allentown, Pa. Filed Dec. 22, 1924. Serial No. 757,550. 5 Claims. (Cl. 103—11.)



1. A compensating device for pumps, comprising a compensating cylinder, a plunger extending into said cylinder, means for connecting one end of said cylinder to the discharge of the pump, a cam for causing said plunger to move into the compensating cylinder at the proper time for increasing the flow from said pump to maintain said flow substantially at its vertical discharge point.

1,571,782. DIPPER TOOTH. CHARLES B. ANDREWS, High Bridge, N. J., assignor to Taylor-Wharton Iron and Steel Company, High Bridge, N. J., a Corporation of New Jersey. Filed Feb. 14, 1925. Serial No. 9,230. 16 Claims. (Cl. 37—142.)



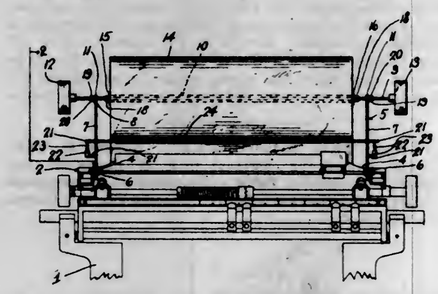
1. A dipper tooth embodying a base bifurcated for the reception of a point, a point capable of reversal thereon, and means for tightening the point, the point and base having relative clearance at the extreme nose portion of the base for the purpose and with the result of insuring correct seating of the point in response to tightening effort.

1,571,783. ADJUSTABLE GAUGE. JAMES ROY AULENBACK, Worcester, Mass. Filed Feb. 16, 1925. Serial No. 9,001. 2 Claims. (Cl. 33—178.)

1. An adjustable gauge comprising a shank, having one end tapered from a point intermediate its ends to its outer end and further provided with grooves extending longitudinally of the shank and inclined to the axis thereof, a series of blades adjustable in the grooves and having notches at their outer ends, adjusting elements threaded on the shank and having one end bearing against the inner ends of the blades, a longitudinally movable rod slidably carried by the shank, a head carried thereby and engaging the outer ends of the blades and an expansible coil spring normally urging the rod in a direction to cause the head to engage the blades.

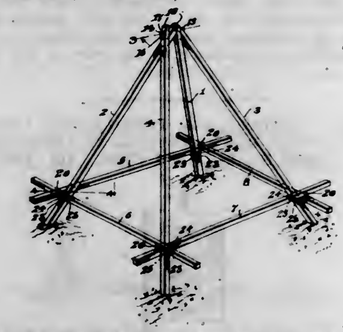
1,571,784. SKIP-HOIST BUCKET. ROBERT H. BEAUMONT, Radnor, Pa., assignor to R. H. Beaumont Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed May 19, 1921. Serial No. 470,753. 3 Claims. (Cl. 105—224.)

1. A skip hoist bucket comprising a body, an axle, means for securing the axle to the body against movement in all directions except one and yieldable means for resisting the movement of the axle in the direction in which it is free to move.



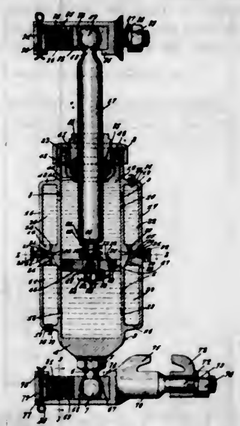
1,571,785. HEATING AND VENTILATING APPARATUS. PRESTON BELVIN, Richmond, Va. Filed June 1, 1925. Serial No. 34,134. 1 Claim. (Cl. 126—67.)

In a structure of the character described, a stove including a body having fire-box and ash pit doors and means to support the body in spaced relation to a floor, a drum disposed about said stove in spaced relation



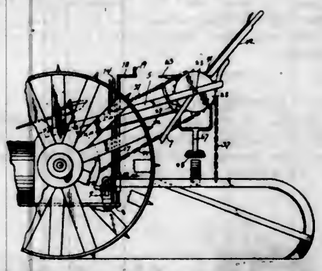
thereto and open at its top and of a height to extend above the stove, said drum having an opening formed therein of a size to expose the portion of the stove provided with the fire-box and ash pit doors, plates extending inwardly from the sides of said opening in converging relation to each other and having close fitting engagement with the stove, and plates extending inwardly from the upper and lower ends of said opening and respectively having close fitting engagement with the stove above the fire-box door and below the ash pit door, the side plates constituting reflectors for directing heat outwardly from the stove.

1,571,786. ROLL-HOLDING ATTACHMENT. RAYMOND A. BIRMINGHAM, Buena Vista, Va., assignor of one-half to George Fred Baker, Lexington, Va. Filed Jan. 15, 1924. Serial No. 686,360. 1 Claim. (Cl. 197—133.)



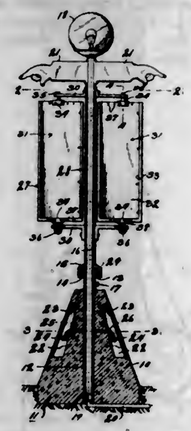
The combination with a typewriter or similar machine, of spaced uprights adjustably secured to the rear of the carriage thereof, a shaft journaled in bearings at the upper ends of the uprights, means securing the shaft in the bearings, means on the shaft preventing the longitudinal movement thereof through the bearings, knurled operating disks on the ends of the shaft, said shaft designed to have wound therearound a roll of paper which is to be fed to the platen roll of the machine and to be typed upon, adjustable means on the shaft for engaging the ends of the paper roll, a bar slidable on the uprights, a socket on each upright, a coiled spring in each socket contacting the ends of the bar for forcing the same against the paper roll, for the purpose set forth.

1,571,787. HAY-STACKING FRAME. ALLEN BRADLEY, Herndon, Va. Filed June 24, 1925. Serial No. 39,298. 3 Claims. (Cl. 130—20.)



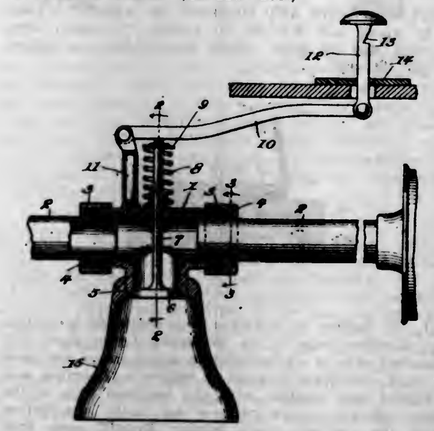
1. A foldable hay stacking frame comprising two pair of upstanding foldable supporting bars extendible at an inclination to the vertical, and pivotally connected together at their upper ends, a foldable brace bar pivotally connected at a point in proximity to one end thereof to a supporting bar in proximity to the lower end of the latter and shiftable to extend horizontally when the supporting bar is extended, said brace bars arranged exteriorly of the supporting bars and of a length to project laterally therefrom when the supporting bars are extended, each of said brace bars when shifted to a horizontal position having its free end seating on and supported by the pivoted end of an adjacent brace bar, and means carried by said brace bars for maintaining the non-pivoted ends thereof against the supporting bars when these latter are extended.

1,571,788. SHOCK ABSORBER. ANDREW J. BRAMLETTE, Jr., Huntington Park, Calif., assignor of one-third to J. C. Craig, Los Angeles, Calif. Filed Apr. 23, 1925. Serial No. 25,337. 8 Claims. (Cl. 188—88.)



1. In a shock absorber of the fluid displacement type, a fluid displacing element comprising a piston rod having a reduced inner end providing a shoulder, a piston head slidably mounted on said inner end and provided with ports for the passage of the fluid, reversely acting valves controlling said ports, and resilient means on said rod between said shoulder and head for cushioning the latter.

1,571,789. HOISTING DEVICE. CHARLES C. BUSSINGER, Modesto, Calif. Filed Mar. 9, 1925. Serial No. 14,217. 2 Claims. (Cl. 97—50.)

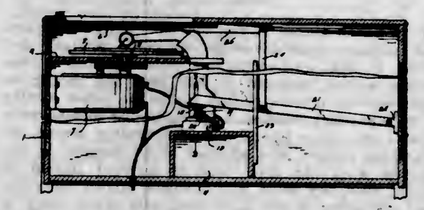


1. In a device of the character described, the combination with a tractor and a cultivator, of a frame secured to said tractor, a shaft rotatably mounted in said frame and adapted to raise the cultivator when said shaft is rotated, a sprocket mounted on said shaft, a sprocket mounted on said tractor, a chain extending between said sprockets, a clutch adapted to engage said sprocket, spring means adapted to normally cause said clutch to engage said sprocket, a latch for retaining said clutch out of engagement with said sprocket, means for releasing said latch, and a yoke adapted to be moved by said cultivator when said cultivator is raised so as to return said clutch to its latch position.

1,571,790. TRAFFIC INDICATOR AND ADVERTISING SIGN. ANDREW B. CAMDEN, Durant, Okla., assignor to Joseph W. Allen and S. H. Allen, both of Temple, Tex. Filed Oct. 21, 1924. Serial No. 744,977. 1 Claim. (Cl. 40—39.)

In a device of the character described, a base formed in its outer face to define chambers, transparent panes covering said chambers, incandescent lamps mounted within said chambers, a tubular member secured stationarily within said base in upright position and provided with a bearing at its upper end, a tubular conduit stationarily mounted through said tubular member and projecting thereabove, an incandescent lamp carried by said second-named tubular member, said member having feed wires extending therethrough for all of said lamps and a rotatable windwheel journally mounted on said second named tubular member and having a bearing seating upon said first named bearing.

1,571,791. CUT-OUT. MAC ALBERT CAMPBELL, Knoxville, Tenn. Filed Apr. 12, 1924. Serial No. 706,179. 1 Claim. (Cl. 116—138.)

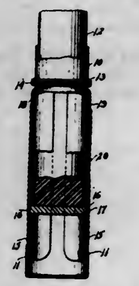


A cut-out for a motor vehicle comprising a casting having screw threaded ends, threaded caps engaging the ends for holding the casting to the exhaust pipes of a vehicle, packing rings engaged by the caps, a spring pressed valve for closing the exhaust of the casting, a foot lever pivoted to a part on the casting and having a part resting on the top of the valve stem for opening the valve and a bell-shaped member connected with the outlet of the casting.

1,571,792. LAUNDRY-MARKING TAG. CHESTER W. CANINE, Norwood, Ohio. Filed Apr. 19, 1921. Serial No. 462,565. 7 Claims. (Cl. 40—2.)

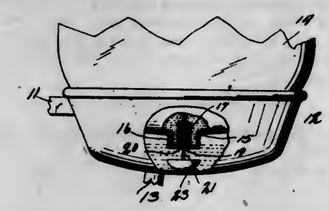
1. A marking tag, comprising essentially strips of tape mounted upon opposed faces of an article to be identified and fastened together through the article by suitable fastening passing through the tape and the article, whereby the strips may be torn apart with the strain of the fastening confined to the tape and leaving the interlying article free.

1,571,793. COIN-CONTROLLED PHONOGRAPH. JACEY S. MAXFIELD, Grand Saline, Tex. Filed Feb. 14, 1924. Serial No. 692,817. 5 Claims. (Cl. 194—15.)



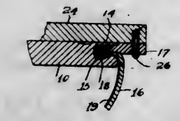
1. In a structure of the character described, an electric controlling switch, a member manually movable toward and from said switch, a coin actuated member adapted to be shifted by the insertion of a coin into operative relation to the switch and in the path of movement of said manually operable means to thereby cause the actuation of the switch, upon the engagement of the manually operable means therewith; and means permitting the displacement of the coin from engagement with said coin actuated member when said member has been engaged by said actuating member.

1,571,794. HOLDER. EDWARD H. PINKHAM, North Andover, Mass. Filed Mar. 12, 1925. Serial No. 15,124. 2 Claims. (Cl. 206—56.)



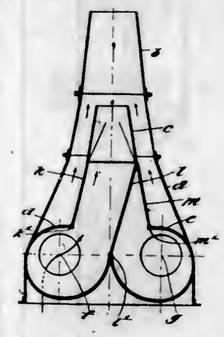
1. In combination, a container having threads, a shaving stick holder including relatively movable resilient portions adapted to be wholly positioned within the container, and a tubular portion projecting therefrom, and an annular groove at the point of juncture between the tubular portion and the relatively movable portion, and upper end of said container being fitted to

said groove, whereby said parts are rotatably associated, a follower arranged to align within the holder and upon which said stick reposes, and means associating



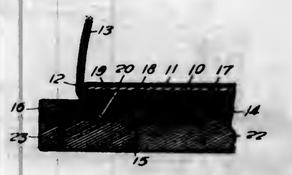
the follower with the threads on the container, whereby the follower is operated incident to the rotation of the container with relation to the holder.

1,571,795. AUTOMATIC FEED VALVE FOR OIL STOVES. GRADY A. POSS, Augusta, Ga. Filed June 4, 1925. Serial No. 34,960. 2 Claims. (Cl. 158—41.)



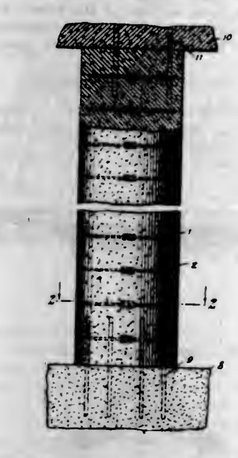
1. In an oil burner of the character described, a sub-tank, a main tank invertible upon the sub-tank and having a neck surrounding an outlet opening, a supporting member mounted in said neck and having an outlet opening, a valve seating within the outlet opening of the supporting member, a spring urging said valve to its seat, the valve having a stem extending beyond the supporting member and adapted to be engaged by the sub-tank when the main tank is inverted therein to thereby open the valve, and a shield carried upon the lower extremity of the valve stem, said shield being in the form of a cup having an area approximately equal to that of the outlet opening of the main tank to thereby receive oil flowing from said outlet opening and detain foreign matter contained within the oil.

1,571,796. SHOE AND METHOD OF MAKING. JOHN D. PRICE, Cleveland, Ohio, assignor to Drake Process, Incorporated, Wilmington, Del., a Corporation of Delaware. Filed Feb. 25, 1922. Serial No. 539,130. 3 Claims. (Cl. 36—17.)



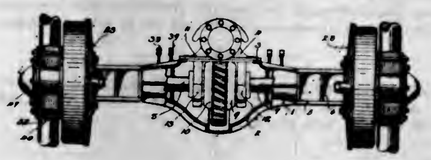
2. A shoe comprising an insole of relatively non-yielding material initially conformed to support all parts of the foot and having a peripheral rabbet, an upper having its marginal edge seated within the rabbet, a shackle bearing upon the marginal edge of the upper, and an integral part of said insole clamped over and binding the margin of the upper and the shackle.

1,571,797. MEANS FOR PRODUCING MECHANICAL DRAFTS. GEORGES JULES ARMAND LOUIS PRAT, Paris, France. Filed Feb. 28, 1924. Serial No. 695,870. 2 Claims. (Cl. 162—4.)



1. In a plant for working with mechanical draft, the combination of a chamber, an inlet passage for smoke or the like to the said chamber, a chimney leading from the said chamber, two rotary fans mounted within the said chamber, casings to the said fans such casings being provided with a perforation, outlets from the said casings to the chamber, the said outlets opening contiguous to one another, a nozzle located in the axis of the chimney and leaving a space between its outer wall and the inner surface of the chimney and three pivoted shutters, one of which is mounted upon a pivot between the outlets of the fans and the other two of which are pivoted respectively to the other sides of the said outlet, for the purposes set forth.

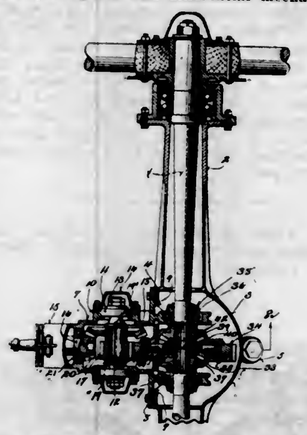
1,571,798. SHOE AND METHOD OF MAKING. JOHN D. PRICE and WALTER H. DRAKE, Cleveland, Ohio. Filed May 29, 1924. Serial No. 716,653. 4 Claims. (Cl. 36—19.)



1. The method of making a shoe consisting in folding the marginal edge of an insulating fabric about the marginal edge of an imperforate sole member composed of rigid material attenuated to resiliency, inserting said marginal edge together with the marginal edge of the upper between spaced parts of an insole organization with the resilient plate resting directly upon said organization and inserting penetrating members at an inclination through said insole organization, the inserted edges of said insulating fabric and upper, and clinching by impingement against the under side of said resilient sole member.

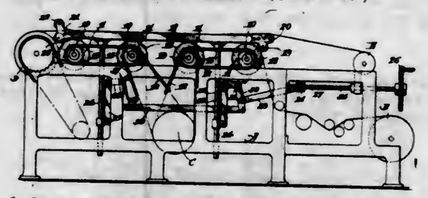
1,571,799. CONCRETE COLUMN. AUSTIN H. REEVES, Newark, N. J. Filed Feb. 16, 1923. Serial No. 619,470. 2 Claims. (Cl. 72—76.)

2. A concrete column, comprising a concrete body having reinforcing members disposed horizontally in spaced relation to one another throughout the height of the column, each reinforcing member comprising a ring having a plurality of radial arms and wires connecting the arms together.



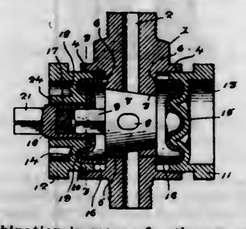
1,571,800. REAR-AXLE ASSEMBLY. WILLARD F. ROCKWELL, Oshkosh, Wis. Filed Sept. 18, 1922. Serial No. 588,926. 2 Claims. (Cl. 74—99.)

1. An axle comprising a load carrying housing; a pair of wheel driving shafts supported in said housing; and differential drive mechanisms for said wheel driving shafts supported in gear housings interchangeably fitting said load carrying housing; one of said drive mechanisms comprising a worm driven differential reduction mechanism and another of said drive mechanisms comprising a spur gear driven differential reduction mechanism.



1,571,801. DOUBLE-REDUCTION BUS AXLE. WILLARD F. ROCKWELL, Oshkosh, Wis. Filed Oct. 4, 1924. Serial No. 741,698. 2 Claims. (Cl. 74—99.)

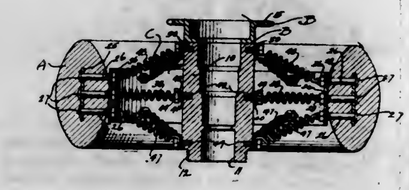
1. An axle comprising a load carrying housing; a pair of axially aligned wheel driving shafts journaled in said housing; a securing and locating section formed on said housing adjacent the inner ends of said wheel driving shafts with an exterior locating surface in a plane substantially parallel to the axes of said shafts; a primary driving shaft; a gear housing in which said primary drive shaft is journalled; a locating section on said gear housing shaped to fit said first mentioned locating section and provided with an exterior locating surface substantially perpendicular to the axis of said primary driving shaft and adapted to abut against said first mentioned locating surface to locate said primary driving shaft with relation to said wheel driving shafts; a differential drive mechanism for said wheel driving shafts supported from and located by said gear housing; and reduction gearing for said differential mechanism driven



by said primary driving shaft supported within said gear housing comprising an intermediate shaft interposed between said locating surfaces and said primary driving shaft.

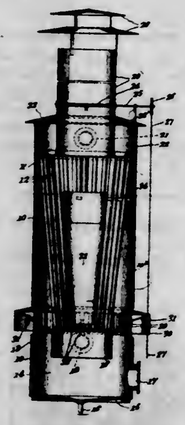
1,571,802. TEXTILE-FINISHING MACHINE. FREDERICK W. P. ROSE, Clifton, and CHRISTIAN WERNER, Passaic, N. J., assignors to Werner & Company, Inc., a Corporation of New Jersey. Filed Dec. 15, 1924. Serial No. 756,025. 6 Claims. (Cl. 26—27.)

1. In a machine for finishing textile materials to impart a natural luster to the same after the dyeing and drying operations, a series of rotating members over which the material is tangentially fed, each of said members including laterally spaced transversely flexible elements of substantially uniform thickness with which the material engages.



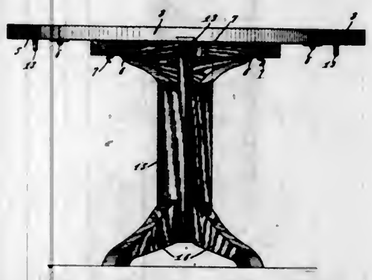
1,571,803. COCK AND VALVE PACKING. JOHN F. RUSSELL, New York, N. Y. Filed Nov. 3, 1924. Serial No. 747,609. 2 Claims. (Cl. 251—103.)

1. The combination in means for the purpose described, of a body having a valve seat and a bore intersecting said valve seat and also having grooves about the ends of said valve seat, a valve disposed in said seat and tapered



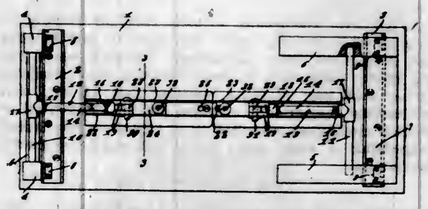
and having an elongated aperture and also having a stem of angular cross-section, closure plugs connected with the body in opposed relation to the ends of the valve seat and having inner corrugated surfaces, one of said plugs also having a central bore receiving the stem of the valve, a corrugated metallic packing member backed by one of said plugs and having a marginal flange disposed in one groove of the body, and a corrugated packing member backed by the other closure plug and having a marginal flange in the other groove of the body and also having a hollow stem receiving the angular stem of the valve and arranged and adapted to be turned in the bore of the closure plug.

1,571,804. VEHICLE WHEEL. JERÓNIMO SAMSON, Pasay, Rizal, P. I. Filed Jan. 8, 1924. Serial No. 685,047. 6 Claims. (Cl. 152—29.)



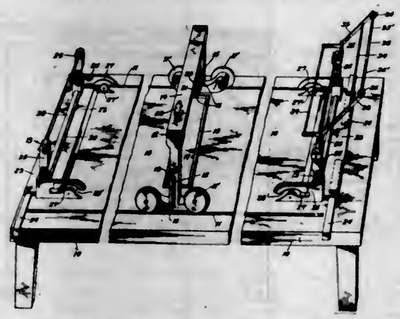
2. A resilient wheel comprising a solid rubber tire, a metal band flexible in character embedded in the rubber tire, bolts carried by said metal band extending radially inwardly through the tire and having exposed shank ends at the inner periphery of said tire, a hub portion, and spring means connecting the inwardly extending ends of said bolts to the hub portion for resiliently supporting the hub portion from the tire.

1,571,805. FRACTIONATING TOWER. FRANK BERNETTE SAMUEL, Baton Rouge, La. Filed Apr. 17, 1924. Serial No. 707,193. 4 Claims. (Cl. 257—36.)



1. In a fractionating tower, a vertical, insulated, non-heat radiating body portion having depending flues therein, means for directing vapor into the upper ends of said flues, means for collecting condensate from the lower ends of the flues, means for carrying off the resultant vapor in a dry or condensate free state from the lower ends of the flues, means for directing an induced draft of air uniformly upward about said flues for their entire length for cooling and condensing part of the vapor therein, means for preventing loss of heat by radiation through the outer body surface of the tower, and means for varying or maintaining any desired temperature drop within the tower irrespective of weather conditions, or seasonal changes.

1,571,806. CONVERTIBLE TABLE. CHARLES J. SCHMITT, Algoma, Wis. Filed Nov. 29, 1924. Serial No. 752,960. 2 Claims. (Cl. 45—9.)



1. A convertible table comprising a top formed of a stationary body portion and a series of extensible sections hinged at the edges of the body portion, said body portion and sections having their lower faces provided with grooves registering when the sections are extended, and locking members slidably connected in the grooves of said body portion and shiftable into the grooves of said sections to slidably connect therewith for maintaining them extended with respect to said body portion, and said locking members having means intermediate their ends engaging into said sections for retaining said members from movement when said sections are in folded position.

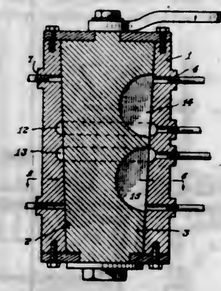
1,571,807. FOLDING TABLE. CHARLES J. SCHMITT, Algoma, Wis. Filed Mar. 18, 1925. Serial No. 16,488. 2 Claims. (Cl. 45—11.)

1. A folding table comprising a top, two pairs of end legs, means for coupling each pair of legs together, a pair of cleats secured to the inner face of said top, means for hinging the legs of each pair at a point removed from their upper ends to the lower face of a cleat, a pair of slidable oppositely movable combined guide and coupling blocks, means arranged at the longitudinal center of the inner face of said top for slidably connecting said blocks thereto, oppositely extending combined brace and coupling elements pivotally connected to said legs, means depending from said blocks for pivotally connecting said elements therewith, and latching devices carried by said blocks and coacting with said first mentioned connecting means for maintaining the legs extended and locked when folded.

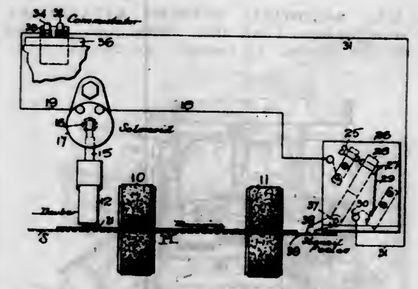
1,571,808. CLOTH-LAYING MACHINE. HARRY SCHWARTZMAN, New York, N. Y. Filed Feb. 21, 1925. Serial No. 10,923. 10 Claims. (Cl. 270—30.)

1. A machine of the class described including a table, a carriage movable thereover, a cloth laying and folding member supported by said carriage, spaced clamping means, and coacting means operable for rotating said member prior to the limit of movement of said carriage in opposite directions, to form a fold in the cloth for engagement by said clamping means.

1,571,809. COMMUTATION RAILROAD TICKET. ARTHUR J. SHAUERS, Haverhill, Mass. Filed Mar. 27, 1922. Serial No. 547,041. 1 Claim. (Cl. 283—26.)



A commutation ticket comprising a sheet of material bearing identification means relating to the holder and bearing matter relating to the issuer, said ticket being provided along its longitudinal edges and at one end with a double row of squares, the squares of both rows being inscribed at one end with the names of the month, certain other of the squares being inscribed with indicia indicating the sex of the holder, which last named squares are adapted to be punched out, certain other squares being inscribed with numerals arranging from zero to nine and adapted to be punched out in multiple to indicate the date, and the remaining squares being inscribed with numerals corresponding to the number of rides for which the ticket is issued and adapted to be punched as the rides are taken, one end of the ticket being formed as an envelope adapted to receive a photograph of the holder and provided with an opening exposing the photograph, a signature line being provided beneath the opening for the signature of the holder.

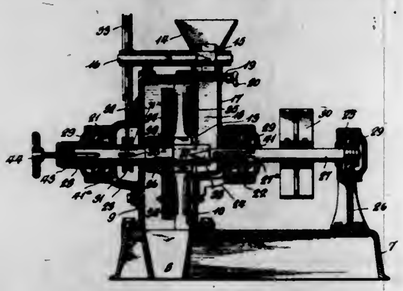


1,571,810. VALVE. ROY S. SHIMP, Penns Grove, N. J. Filed Mar. 27, 1925. Serial No. 18,856. 3 Claims. (Cl. 251—107.)

1. In a valve, a casing provided with longitudinally spaced inlets and with a pair of outlet openings positioned intermediate said inlet openings, a rotary valve plug within said casing and provided with a pair of substantially semi-cylindrical cut-out portions to establish communication between the respective inlets and said outlets.

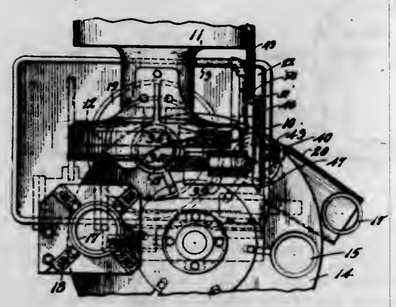
3. In a valve, a valve casing provided with a plurality of inlet openings spaced upon opposite sides of the transverse center of the casing, and provided with a pair of outlet openings positioned in close proximity to the transverse center of the casing, said casing provided with annular grooves the inner surfaces of which communicate with said outlet openings, and a rotary valve plug within said casing having a pair of substantially semi-cylindrical cut-out portions adapted to establish communication between the inlets and said grooves.

1,571,811. ROUTE MARKER FOR ADDRESSING MACHINES. EDWIN R. SMITH, Fitchburg, Mass., assignor to Auto-Mailing Machinery Company, a Corporation of Massachusetts. Filed July 28, 1922. Serial No. 578,183. 5 Claims. (Cl. 101—58.)



1. A route marker comprising a marking device, an electrical operating mechanism therefor including a circuit for the operating current, a normally closed contact device in said circuit opened by engagement with a regular stencil and remaining closed during the printing interval on the presentation thereto of a stencil having special provision to indicate the end of a route, a second and normally open contact device in said circuit in series with said first device, and means to close said second contact device during the printing interval.

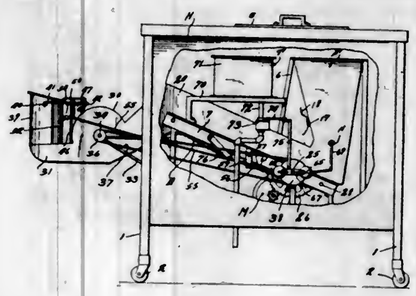
1,571,812. GRINDING MILL. SIMON SNYDER, Muncy, Pa., assignor to Sprout, Waldron & Co., Muncy, Pa., a Corporation of Pennsylvania. Filed Mar. 28, 1923. Serial No. 628,368. 12 Claims. (Cl. 83—8.)



1. The combination, in an attrition mill, of a casing for the grinder composed of two members, one removably secured to the other and to a supporting base, and each having an open-ended bearing box supported on the outer side thereof, an annular anti-friction bearing in each of said boxes including a sleeve on the grinder shaft rotatable therewith and carrying the rotatable member of the bearing, a third bearing mounted on said base in alinement with the first named bearings, a sectional shaft journaled in said bearings, the section

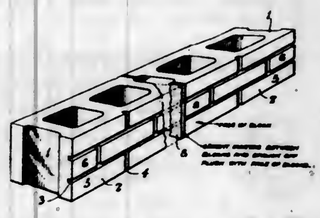
carried by the removable casing member projecting through the fixed casing member into the bearing box carried by the latter member, and the other section having one end journaled in said third bearing and the other end fitted in the sleeve within the bearing box carried by said fixed casing member, and means on the adjacent ends of said shaft sections within the sleeve

thereon whereby both shaft sections and the sleeve are caused to rotate together while permitting a limited longitudinal movement of the shaft section which extends through the casing and adapting it to be disconnected and removed with the removable casing member without disturbing the fixed casing member and the parts associated therewith.



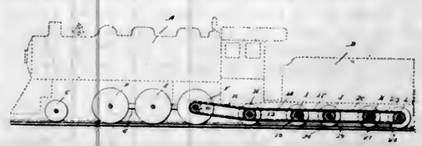
1,571,813. AUTOMATIC BURRING ATTACHMENT. ALFRED L. SOVA, Flint, Mich. Filed Apr. 30, 1925. Serial No. 27,096. 14 Claims. (Cl. 29—38.)

1. The combination with a surface grinding machine comprising a metal working wheel and work holder, means for effecting a relative feeding movement between the work and wheel, of a tool disposed to engage the work in said holder during the grinding operation, and means controlled by said feeding movement to automatically actuate said tool into operative position.



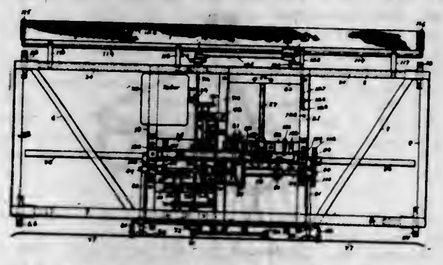
1,571,814. FEEDING DEVICE. CHARLES C. STEWART, Detroit, Mich. Filed June 2, 1925. Serial No. 34,449. 8 Claims. (Cl. 119—56.)

4. A feeding device comprising, in combination, a hollow member having an opening, a door for closing said opening, a supply hopper, means for forcibly discharging feed within the hollow member to be broadcasted through the opening when the door is in open position, means for carrying the feed from the hopper to said first named means, means for maintaining the door in open position when the second named means is in operation, a pipe leading from a water supply, a normally closed valve interposed therein, and an



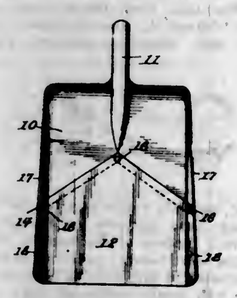
operative connection between said valve and the last named means for maintaining said valve in open position when the second named means is in operation.

1,571,815. IMITATION BRICK CONCRETE WALL AND PROCESS OR METHOD OF LAYING IT. MARION F. STOUT, Fort Thomas, Ky. Filed June 17, 1925. Serial No. 37,721. 3 Claims. (Cl. 72—36.)



1. The herein described process of forming a concrete block wall which consists in first taking a plurality of concrete building blocks each having its face formed in imitation of a plurality of whole bricks in natural color cement and half bricks then laying up said blocks with mortar joints therebetween, then raking out the surface mortar of said joints except between said imitation half bricks of the adjacent blocks, and then giving face of said wall a coating of colored liquid cement.

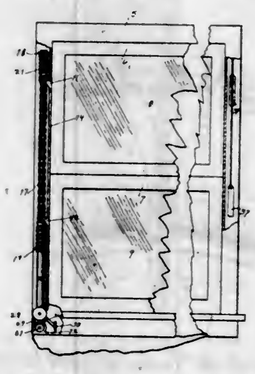
1,571,816. POWER TRANSMISSION FOR TRAINS. ALBERT SUGDEN, Stratford, Ontario, Canada. Filed Sept. 13, 1923, Serial No. 662,503. Renewed May 27, 1925. 1 Claim. (Cl. 105—98.)



In a locomotive and tender having a drive axle, a sprocket on the shaft of the locomotive wheels mounted beneath the fire box, a sprocket on the drive axle, a chain trained about both sprockets, drive connections between all the axles of the tender and a drive connection between the axle of the wheels below the fire box and the adjacent axle of the tender.

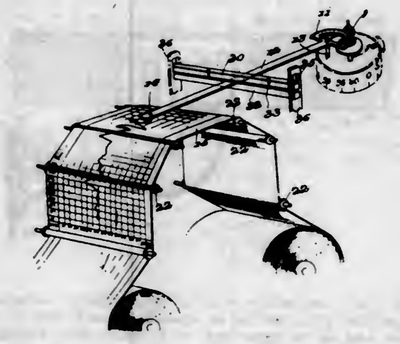
1,571,817. CONCRETE-FINISHING MACHINE. WILLIAM WALTER SWHIER, Portland, Ind. Filed May 22, 1923. Serial No. 640,790. 2 Claims. (Cl. 94—48.)

1. In a machine for finishing concrete roadways comprising in combination with a frame and a motor mounted on the frame, a strike-off blade carried by the frame, means for imparting alternate forward movements to the ends of the blade, and means for simultaneous bodily movement thereof longitudinally of the blade in addition to the regular forward movement of the frame, nd means for connecting said blade whereby said movement will be maintained by the operation of said motor.



1,571,818. RENEWABLE SHOVEL. ALFRED L. TERNAN and EVEN OLSON, Quartzburg, Idaho. Filed May 12, 1924. Serial No. 712,782. 1 Claim. (Cl. 294—49.)

In a shovel, a body portion provided with handle attaching means and having its edge most remote from the handle attaching means tapered off at both sides to define a wedge shape, and a removable end portion adapted to be secured to the body portion and having one edge formed with a slot V-shaped in cross section for conforming engagement upon the wedge shaped edge of the body, and securing members passing through the slotted portion of the removable end and through the body, the body portion and removable end being of the same thickness whereby both surfaces thereof will be flushed.

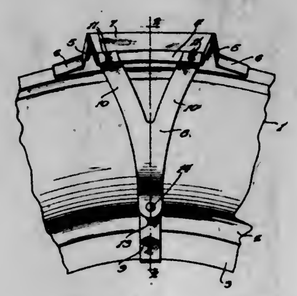


1,571,819. WINDOW OPENER AND CLOSURE. JAMES TORRSAN, Susanville, Calif. Filed Feb. 21, 1925. Serial No. 10,906. 1 Claim. (Cl. 268—4.)

In a window opening and closing device, a window having a sliding sash, a bracket secured to said sash, a rotatable shaft positioned adjacent said window and parallel with the direction of movement thereof, a worm formed on said shaft, said worm having a right and left hand thread, said worm being engaged by said bracket, a helical spring surrounding one end of said shaft and adapted to contact said bracket, a second helical spring surrounding said shaft, at a point remote from said first mentioned spring in such a manner as to be engaged by said bracket, after travelling throughout the length of said worm, means for rotating said shaft, said means comprising a gear, a shaft positioned below said gear, a sliding gear positioned on said second

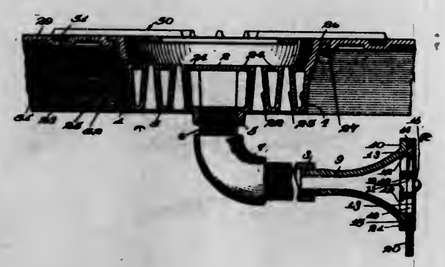
mentioned shaft, means for rotating said second mentioned shaft, and a lever for moving said second mentioned gear into and out of engagement with said first mentioned gear.

1,571,820. SPEED-RECORDING DEVICE. HARRY A. TURNIER, New York, N. Y. Filed May 22, 1922. Serial No. 562,667. 1 Claim. (Cl. 234—30.)



In a speed recording device a frame having spaced lugs mounted thereon, a lower strip fixed to the lugs and bridging the space between them, the lugs being provided above the fixed strip with vertically disposed slots, a strip movably mounted in the slots and bridging the space between the lugs, spaced pins carried by the last mentioned strip and located at points spaced from the ends thereof and bearing at their lower end upon the upper surface of the fixed strip and a pivoted arm having an intermediate portion lying between the strips and located between the said pins.

1,571,821. TRACTION LUG. ISAAC N. TUSING, Rye, Colo. Filed May 19, 1925. Serial No. 31,428. 2 Claims. (Cl. 152—14.)



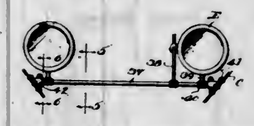
2. A traction lug comprising a body adapted for close fitting engagement with the tread face of a tire, cleats extending transversely across the outer face of said body in spaced relation to the ends thereof, a cleat extending longitudinally of the body intermediate the width thereof from one transverse cleat to the other,

arms adapted to extend transversely along the sides of a tire and each having its outer end portion provided with diverging fingers secured upon the outer face of

said body between the transverse cleats in close proximity to the transverse cleats and longitudinally extending cleat, and means for extending transversely across a wheel felly and connecting said arms.

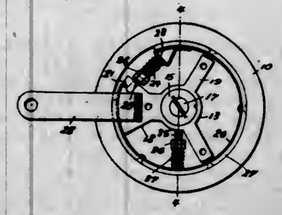
1,571,822. GAS BURNER. EUGENE ELTON WANN, Bradford, Pa. Filed Dec. 29, 1924. Serial No. 758,686. 2 Claims. (Cl. 158—116.)

2. The combination with a substantially horizontal supporting plate having an opening formed with a circular seat at its upper end, of a burner body having a gaseous fuel receiving and distributing space therewithin and having an inlet opening in its bottom adapted for connection with a source of gaseous fuel supply and a plurality of spaced gaseous fuel discharge orifices in its top, said burner body having an outwardly and upwardly extending continuous flange substantially fitting in said opening in the supporting member and having an outwardly extending lip at its upper end adapted to engage with said seat, a grid supported on said supporting plate above said opening in the supporting plate, an imperforate deflecting plate resting upon said grid and extending outwardly beyond the outer edge of said lip, and a second imperforate heat deflecting plate supported on the first deflecting plate in spaced relation to the latter and extending outwardly beyond the outer edge of the first heat deflecting plate.



1,571,823. MUSICAL INSTRUMENTS. FRANK R. WEAVER, Fairgrove, Mo. Filed Nov. 10, 1923. Serial No. 674,004. 1 Claim. (Cl. 84—263.)

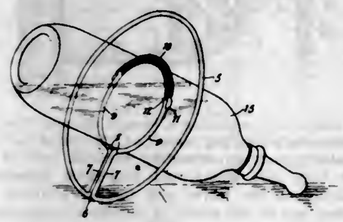
In combination, a musical instrument adapted to support thereon a plurality of sound producing devices and an elastic strap for supporting said instrument from the body of the user and allowing said instrument to be thrown away from the user to cause the automatic



operation of the sound producing devices and thereafter to return the instrument to playing position against the body of the user.

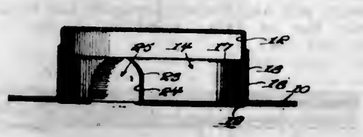
1,571,824. TILTABLE-HEADLAMP MOUNTING. FRANK E. WEILAND, Fort Myers, Fla., assignor of one-half to Richard L. Heverle, Fort Myers, Fla. Filed Nov. 2, 1923. Serial No. 672,356. 1 Claim. (Cl. 240—61.)

In a dirigible headlight mechanism for vehicles, bracket members having plate portions secured to the inner sides of the front fenders of the vehicle, said brackets further including split bearing portions having terminal ears, a rod journaled in said bearing portions, headlamps carried by the rod, means connected with the rod and extending rearwardly of the vehicle to a point within reach of the operator whereby the rod may be turned, and means passing through the ears of said bearings to effect contraction for opposing frictional resistance to turning movement of the rod whereby the rod and lamps will remain in selected position.



1,571,825. SHOCK ABSORBER. ARCHIBALD WILSON WEBB, Jr., Fawn Grove, Pa. Filed May 9, 1924. Serial No. 712,103. 2 Claims. (Cl. 188—130.)

1. A shock absorber for vehicles comprising a drum adapted to be secured to the frame of a vehicle, an expansible split band located within and frictionally engaging the inner wall of the drum, a post mounted



centrally within the drum, a hub mounted for rotation upon said post, an arm extending from said hub and connected to one end of the band, a spring interposed between said arm and the other end of the band to yieldingly force the latter into engagement with the drum, a threaded stud extending radially from the hub, a spring mounted upon the stud and engaging band adjacent one end of the latter to provide a uniform engagement between the band and drum, means mounted upon the stud to regulate the tension of the spring, a cover for the drum, an extension carried by the arm and projecting through the cover and means connecting the arm of the extension to the axle of the vehicle.

1,571,826. NURSING-BOTTLE HOLDER. JOHN J. WELLENHOFFER, Salamanca, N. Y. Filed Sept. 9, 1924. Serial No. 736,722. 5 Claims. (Cl. 248—65.)

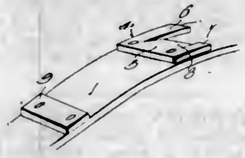
4. A device of the character described comprising an outer circular member, a plurality of arms projecting radially inwardly therefrom, said arms being bent in opposite directions to provide curved nursing-bottle holding members, said circular member, said arms and said nursing-bottle holder being formed from a single piece of material, and a spring secured to and connecting the bottle holding members.

1,571,827. SWEATBAND FOR HATS. FREDERICK WHARTON, New York, N. Y. Filed July 11, 1925. Serial No. 42,949. 3 Claims. (Cl. 2—182.)

1. A sweat band, comprising a strip of material having its edge portions notched, the notched edges of the strip being folded over an intermediate portion of the strip, with oppositely located notched portions in registration, to provide recessed portions opposite the temples of the wearer when the band is in position on a hat.

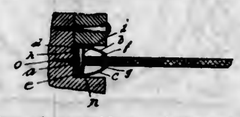
1,571,828. CALENDAR. EMANUEL C. WHITE, Welland, Ontario, Canada. Filed Aug. 3, 1925. Serial No. 47,914. 4 Claims. (Cl. 40—108.)

2. In a device of the class described, the combination with a cylindrical body member having a reduced end, a barrel frictionally engaging the reduced end, and having rows of numbers inscribed on the exterior thereof indicative of the days of a month, a mask encircling said barrel and rotatable with respect thereto and having a window therein for selectively displaying certain of the indicia on said barrel, indicia on the exterior of said mask above said window indicative of the names of the days of the week and beneath which the selected rows of numbesr are aligned, and means operable independently of said mask for concealing part of the selected indicia on said barrel, said means including a blind interposed between said barrel and said mask and mov-



able across said window, and co-acting means between said blind and said mask for locking said blind in a set position.

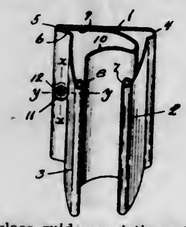
1,571,829. DETERGENT COMPOSITION. CARL T. WIESE, Sand Point, Idaho, assignor to Vapo Products Company, Inc., Sand Point, Idaho, a Corporation of Idaho. Filed Oct. 9, 1922. Serial No. 593,418. 1 Claim. (Cl. 87—5.)



A detergent composition formed from a de-hydrated compound consisting of a soap base formed from 19 pounds of saponified cotton seed oil admixed with 2½ gallons of water, a sassafras and soap bark solution derived from admixing 1 pound of sassafras bark and 8 ounces of soap bark and 2½ gallons of water, fuller's earth to which is added 1 quart of water, hypo-sulphite sodium and salicylate sodium dissolved in 1 quart of water and 5 pounds of borax.

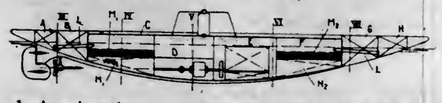
1,571,830. DEMOUNTABLE RIM. IRVIN F. WILLMAN, Muleshoe, Tex. Filed May 7, 1923. Serial No. 637,272. 1 Claim. (Cl. 301—17.)

A demountable rim having a flat lug on its inner side, said lug having two edges extending circumferentially of the rim, and two angular edges extending transversely of the rim and disposed in planes at right angles to said inner side of the rim, both ends of each of said angular edges being disposed at a common acute angle with respect to the edges of the rim, for co-action with a wedge.



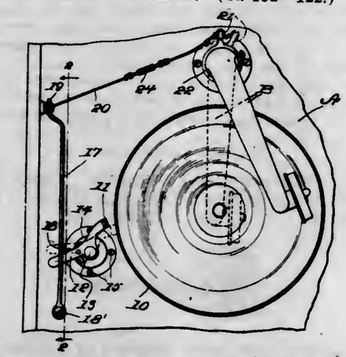
1,571,831. WINDOW-GLASS CHANNEL. EDWIN W. M. BAILEY, Amesbury, Mass. Filed Sept. 22, 1921. Serial No. 502,333. 12 Claims. (Cl. 296—44.5.)

1. A window glass guide consisting of a single strip of resilient sheet metal bent transversely into U-form to provide a bottom portion adapted for attachment to the window casing and a pair of transversely resilient



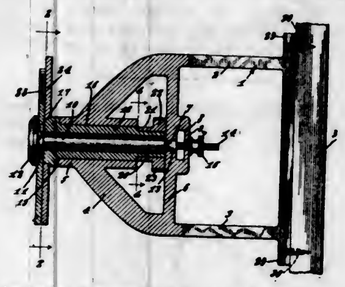
side portions extending convergently therefrom, the edge portions of said guiding portions being inwardly rolled into cylindrical form to form non-yieldable beads arranged to project towards each other beyond their adjacent sides to provide transversely convex guiding faces for the opposite sides of window glass sheets of varying thickness inserted therebetween.

1,571,832. WINDOW GUIDE. EDWIN W. M. BAILEY, Amesbury, Mass. Filed Dec. 8, 1924. Serial No. 754,515. 7 Claims. (Cl. 296—44.5.)



1. A window glass guide consisting of a strip of resilient sheet metal bent to provide a base and a pair of side guides projecting therefrom in position to engage opposite sides of the glass, said base having a lateral extension and a reversely extending connection between said extension and the inner end of one of said guides, said connection being yieldable towards said base and having an outer face arranged for clamping engagement to depress the same and vary the initial set of its guide.

1,571,833. SUBMARINE. VINCENZO DE FEO, Spezia, Italy, assignor to Societa Anonima Ansaldo-San Giorgio, Spezia, Italy. Filed Mar. 1, 1924. Serial No. 696,326. 3 Claims. (Cl. 114—16.)



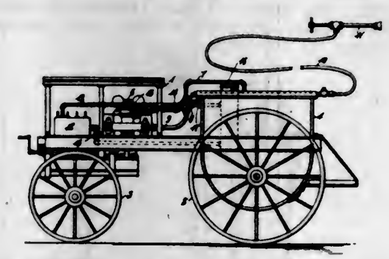
1. A submarine comprising a central resistant body and non-resistant end portions acting as water-ballast tanks, two or more compartments in said end portions, torpedo tubes arranged in some or all of said compartments, said torpedo tubes being inclined to the central longitudinal plane and projecting into said central resistant body.

1,571,834. AUTOMATIC STOP. WILLIAM HENRY, McCarthy, Territory of Alaska. Filed Feb. 27, 1925. Serial No. 12,117. 4 Claims. (Cl. 192—122.)

1. An automatic stop for the turn table of a talking machine comprising a spring pressed pivoted lever, a stop carried thereby, a resilient element designed to engage said lever and hold the stop spaced from the periphery of the table, and means connecting the element with the reproducer arm of the machine, whereby said element is flexed to release said lever, and said arm assumes its final position at the completion of the record.

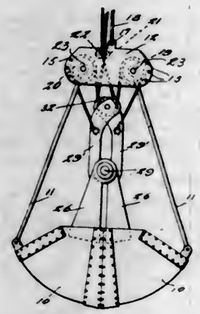
1,571,835. ICE-CARD HOLDER. STEPHEN HERMANOWICH, Ellwood City, Pa. Filed Nov. 4, 1925. Serial No. 66,788. 1 Claim. (Cl. 40—70.)

An indicator comprising a hanger element formed with a lengthwise extending sleeve at the outer end thereof, a revoluble member extending through and of greater length than said sleeve and projecting forwardly and rearwardly of the latter and further abutting against the outer end of the sleeve, a combined supporting, bearing and clamping element extending through and of greater length than the length of said member, an indicator element mounted on the forward end of said member and bodily carried therewith, a stationary concealing member carried by said combined supporting, bearing and clamping element, and said latter element including means for detachably clamping said revoluble member stationary to maintain the indicator element in set position, said means coacting with the forward end of said sleeve, and said concealing member having a cut-out portion to expose an indication on said indicator element.



1,571,836. SOLDERING IRON. HOWARD J. HOCKERSMITH and FLOYD M. ARGERBRIGHT, Great Falls, Mont.; said Argerbright assignor to said Hockersmith. Filed May 14, 1924. Serial No. 713,288. 1 Claim. (Cl. 219—26.)

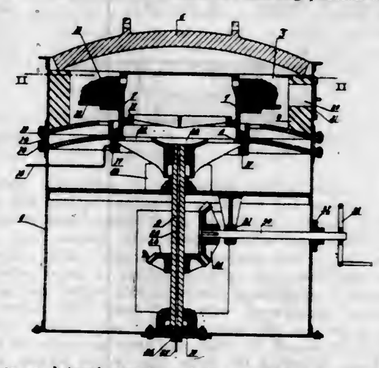
In an electrically heated soldering iron, a hollow copper tip, a carbon block therein, a metal sleeve connected to the tip, a tube of insulating material in the sleeve, a metal sleeve in the tube, a carbon stick carried by said sleeve having a pointed end designed for contact with the carbon strip in the tip, said stick having an annular groove, and said first mentioned sleeve and insulating tube having openings aligning with the groove, a hollow handle to which the first mentioned sleeve is connected and in which the last mentioned sleeve and the insulating sleeve is received, a metal block on the inner end of the last mentioned sleeve, and spring means between the handle and the plug for influencing the sleeve to force the tip of the carbon stick against the carbon block.



1,571,837. COOLING SYSTEM FOR SPRAYERS. JOHN C. HULL, Gasport, N. Y. Filed June 24, 1922. Serial No. 570,751. 5 Claims. (Cl. 299—46.)

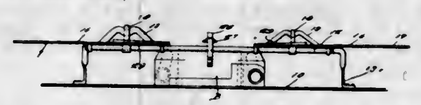
1. In a spraying apparatus, the combination with a solution tank, a pump in communication therewith, a sprayer connected with the discharge outlet of said pump, an explosive engine for driving the pump, means for cooling the engine comprising a water container, a water discharge from the explosive engine jacket to said container, and a feeding pipe from the container to the

explosive engine jacket for introducing water thereto, said water discharge pipe intersecting the traveling stream of solution being conveyed to the pump whereby heat of the water passing to the engine jacket is absorbed by said solution.



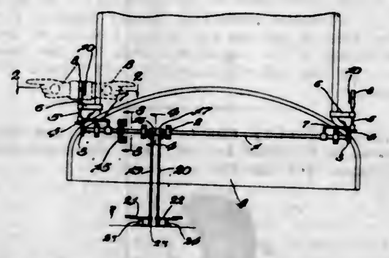
1,571,838. CLAMSHELL-DREDGER BUCKET. ARCHIBALD HUTSON, Erie, Pa. Filed June 11, 1924. Serial No. 719,442. 1 Claim. (Cl. 37—184.)

In combination, a tackle block including spaced side plates and an intermediate plate, both connecting said plates, pulleys journalled thereon and arranged on opposite sides of the intermediate plates, oscillating rods depending from said tackle block, bucket sections supported by said rods, spaced power arms rising from each bucket section, a transverse member connecting each pair of said arms, with the upper extremities of the latter projecting above said transverse member and having alined opening, a lever extension arising from said transverse member between said arms and having an opening in a line with the openings of said arms, said upper extremities of the respective pair of arms being arranged side by side, a pivot passed thru all of said openings, whereby the bucket sections are supported for movement towards and away from each other, pulleys journalled on the free ends of said lever extension, and a power cable trained over the pulleys of said tackle block and including cross rods passed under the pulleys of said lever as for the purpose specified.



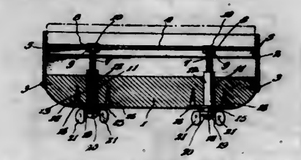
1,571,839. FURNACE FOR THE HEATING AND UNWINDING OF WIRE. ANDRÉ FÉLIX JACQUEMIN, Saucourt, France. Filed Mar. 26, 1925. Serial No. 18,574. 1 Claim. (Cl. 263—7.)

A furnace for heating wires, comprising a chamber in which a sort of revoluble drum-like element is mounted upon a pivot; said drum-like element carries the wire, and its central part constitutes the heating portion of the



furnace, a lateral aperture being provided in the said chamber for the discharge of the wire as it is unrolled from the drum-like element.

1,571,840. FUEL-CONSERVING DEVICE FOR LOCOMOTIVES. WESTFIELD H. KEILER, Watertown, N. Y. Filed Jan. 30, 1925. Serial No. 5,854. 2 Claims. (Cl. 110—150.)



1. In combination with a locomotive having an exhaust nozzle and a smoke stack, of a draft regulating device comprising a frame arranged within the boiler of the locomotive, units mounted for sliding movement on said frame, and adapted to be singly arranged above the nozzle for use, each unit being designed to retard and spread a reduced volume of steam emitted from the nozzle, to cause said steam to fill the smoke stack with a resultant increase of draft therein, means for singly operating said units, and means automatically engaging said units for holding the latter fixed relative to said frame when arranged above said nozzle.

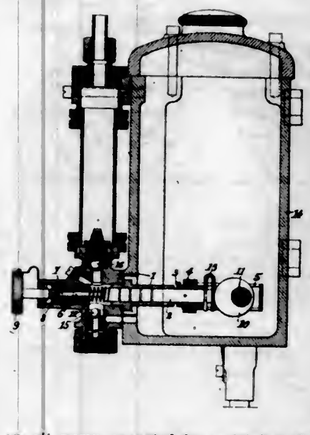
1,571,841. VEHICLE SIGNAL. LOUIS B. KELLER, Chicago, Ill. Filed Mar. 7, 1923. Serial No. 623,561. 2 Claims. (Cl. 74—81.)

1. In a vehicle signal, a shaft, vertical shafts at each end of the first shaft, means operatively connecting the vertical shafts with the first shaft, signal members carried by upper ends of the vertical shafts, collars carried by the first shaft, arms extending from said collars upon opposite sides of the shaft and foot operated means connected to the arms whereby to rotate the shaft in either direction.

1,571,842. SOAP HOLDER. JOSEPH S. LABAY, Sr., Morganza, La. Filed July 10, 1925. Serial No. 42,799. 3 Claims. (Cl. 45—28.)

3. A soap holder comprising a receptacle open at its upper end and including a buoyant bottom and walls carried thereby, a follower fitted within said receptacle for sliding movement between the bottom and open upper end of the receptacle, a threaded stem extending from the inner face of said follower, a sleeve rotatably mounted in an opening formed in said bottom and having threaded engagement with said stem, said sleeve projecting beyond the outer face of said bottom and in spaced relation to its outer end provided with an annular flange engaging the outer face of the bottom, a collar secured to the outer face of said bottom and fitting about the projecting end portion of said sleeve and engaging said flange to prevent outward movement of the sleeve, the extreme outer end portion of said sleeve being flat-sided, a turning key fitting snugly upon the flat-sided outer end portion of said sleeve, and a fastener carried by said sleeve and engaging said key to retain the key in engagement with said sleeve.

1,571,843. COFFEE-URN CROWN. JOHN N. LAUGHLIN and FRED JOHN MYERS, National Military Home, Kans. Filed July 20, 1925. Serial No. 44,881. 3 Claims. (Cl. 53—3.)

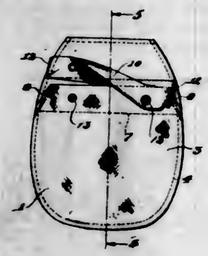


1. A coffee urn crown of the character set forth, comprising an annular member of greater diameter at the bottom than at the top and having a series of spaced slots formed in the top edge thereof for the support of a coffee bag, and a bail overlying and secured to the member.

1,571,844. DISPLAY FORM. WALTER H. LEE, Washington, D. C. Filed Jan. 20, 1925. Serial No. 3,588. 6 Claims. (Cl. 35—12.)

1. A hairdressing form having a hood portion of stiff material adapted to maintain a fixed configuration to enclose and temporarily conceal the hair of the wearer and finished to represent a particular style of hairdressing to determine its effect in association with the face of the wearer.

1,571,845. OIL PUMP. ALBERT LEFEBVRE, Pre Saint Gervais, France. Filed Jan. 6, 1925. Serial No. 891. 4 Claims. (Cl. 103—38.)

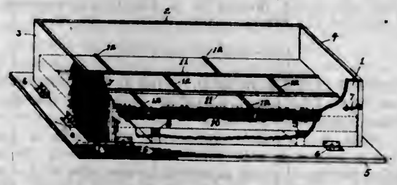


1. In an oil pump operated by a driving shaft, cylindrical pump body, a piston disposed therein, adjustable means for actuating the said piston by the driving shaft, a second piston coaxial with the first-mentioned piston, means for actuating the second piston by hand from the exterior of the pump, means connecting the said pistons together in such manner that they will be longitudinally slidable but not revoluble upon each other, a suction valve, a delivery valve, and seats for the said valves formed in the said pump cylinder.

1,571,846. HIGH CHAIR. WILLIAM C. LEHMAN, Cannelton, Ind. Filed Dec. 19, 1924. Serial No. 756,994. 3 Claims. (Cl. 155—196.)

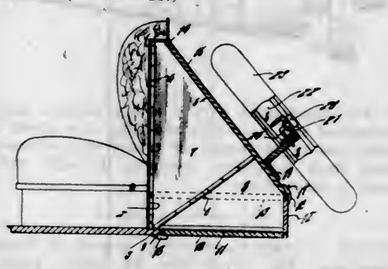
1. A semi-knock-down high chair comprising a support unit including supporting legs, means connecting and relatively bracing the legs, a seat unit comprising a seat bottom and a back rest carried by and extending upwardly from the rear side of the seat bottom, and arm rests extending forwardly from the back rest, and means separably securing the seat bottom to the top of the support unit, including the arm rests thereof, the legs of the support unit, at their lower portions, being spaced apart a distance greater than the width of the seat unit whereby the said seat unit may be positioned within the support unit for shipment.

1,571,847. SAFETY POCKET. ABRAHAM B. LESSER, Chicago, Ill. Filed Jan. 15, 1921. Serial No. 437,467. 1 Claim. (Cl. 2—247.)



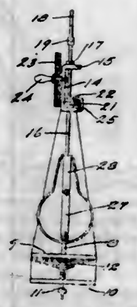
In a garment, the combination with a pocket, of a safety pocket therein, having its mouth opening inwardly of the mouth of the first named pocket, said safety pocket and first named pocket being of equal width and the side and inner edges of said safety pocket being stitched to the garment by stitching of the said first named pocket, the side edges of the safety pocket at the mouth thereof being cut at an angle which extends inwardly from the sewed edges to the free edge whereby to form free edges permitting spreading movement of the mouth of the safety pocket when in use, a closing flap within said first named pocket to form a closure for the mouth of the safety pocket, said closure flap having its edges at an angle and overlapping the free edge of the safety pocket and means for detachably connecting said flap to the body of the safety pocket.

1,571,848. AUXILIARY EYEGLASSES OR SPECTACLES. WALTER LOBENSTEIN, Brooklyn, N. Y. Filed June 19, 1925. Serial No. 38,349. 4 Claims. (Cl. 88—41.)



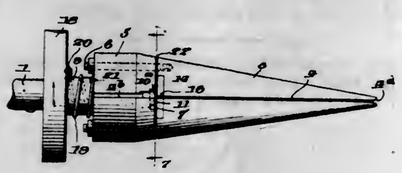
1. An attachment for spectacles or eye-glasses comprising auxiliary lenses, a retractile spring, and means rigid with said lenses and forming a connection between said spring and lenses, said means extending forwardly to position said spring offset in front of the plane of the lenses to prevent contact of the spring with the nose of the wearer.

1,571,849. METHOD OF MAKING BUILDING BLOCKS. EDWARD A. LONG, New Castle, Pa. Filed June 25, 1925. Serial No. 39,478. 3 Claims. (Cl. 25—155.)



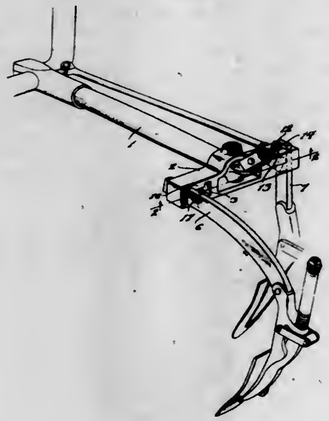
1. The art of making concrete blocks, which comprises placing a layer of plastic concrete upon a matrix having certain configurations formed thereon, with a mortar space former corresponding with said configurations and resting thereon, filling in said concrete to the top of said mortar space former then removing the mortar space former, filling the spaces formed by the mortar space former with concrete of a color different from the first concrete, applying a layer of concrete different from that stated to form a backing, and finally applying concrete different from the others to the face of the last applied layer of concrete to form the main body of the block.

1,571,850. FOLDING CARRIER. OTTO R. LUDWIG, Garvin, Minn. Filed June 15, 1925. Serial No. 37,372. 2 Claims. (Cl. 224—29.)



1. In a device for the purpose set forth, a back member having upper and lower outstanding flanges, sides having their inner and lower edges disposed at right angles with respect to each other and having their inner edges hingedly secured to the back, said sides having their outer edges cut angularly from points adjacent to the top and to the front thereof, each of said sides comprising two members having diagonal meeting edges which are hingedly connected, a bottom hingedly secured to the lower flange of the back and hingedly secured to the lower and upper sections of the sides, a front hingedly secured to the upper edge of the bottom, swingable brace means between the front and the back and a cover board hingedly secured to the upper flange of the back.

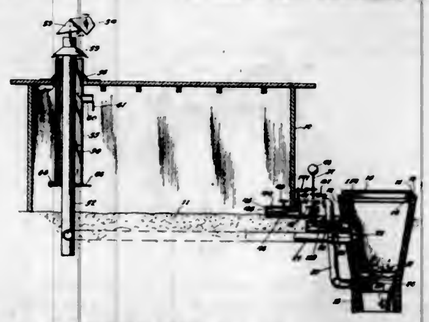
1,571,851. BEATER AND MIXER. RAY W. LYON, Trail, Oreg. Filed Apr. 30, 1924. Serial No. 710,039. 1 Claim. (Cl. 259—135.)



A beater and mixer comprising a bracket having a plate portion provided at its end with angularly disposed flanges one of which is provided with an inwardly disposed lip, the plate portion being provided at a point opposite the said lip with an opening, a gear wheel journaled upon one end portion of the plate and having one side portion disposed under the lip and its opposite side portion passing through said opening, a shaft slidably mounted through the angularly disposed end flanges of the plate portion and adapted to rotate with the gear wheel, means mounted upon the plate portion for rotating said gear wheel, beater members carried by the shaft, a handle having a substantially elliptical head, and a sleeve mounted at the side of the head of the handle at a point between the ends thereof, said sleeve being loosely connected with the shaft.

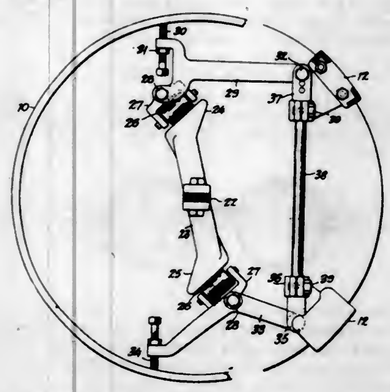
1,571,852. APPARATUS FOR FORMING PAPER CONES. PETER LE ROY MCCALL, Rockingham, N. C. Filed Feb. 7, 1924. Serial No. 691,288. 17 Claims. (Cl. 93—79.)

1. The combination with a rotary mandrel having a longitudinal slot to receive the edge of a blank to be wound thereon, of means for transversely severing the wound blank completely, including the edge which is located in the said slot.



1,571,853. CLAMPING DEVICE. SAMUEL H. MCCOWAN, Greenway, Ark. Filed Apr. 11, 1925. Serial No. 22,315. 1 Claim. (Cl. 37—198.1.)

The combination of a crosshead having an opening therethrough, said opening having a flat end wall and having obliquely disposed walls opposed to said end wall with an open space between said obliquely disposed walls, a shank insertible through the opening in the crosshead to bear against the flat wall of the same and provided in its lateral face with a recess, and a bolt having a shank extending between the obliquely disposed walls of the opening in the crosshead and an enlarged head provided with obliquely disposed faces adapted to engage the obliquely disposed walls and a projection on one side of the head engaging the seat in the lateral face of the shank.



1,571,854. DRAFT REGULATOR. JOHN E. MCLEOD and ARTHUR J. HEWITT, Washington, Kans. Filed Jan. 17, 1923. Serial No. 613,184. 4 Claims. (Cl. 236—6.)

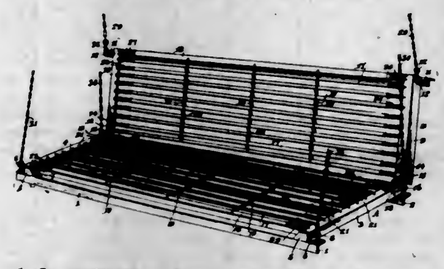
1. The combination with a heating furnace having a flue extending through a space to be heated, of a manifold having a port for said flue and an opening communicating with said furnace, a damper covering said opening, means for controlling the damper, said means including a lever fulcrumed between its ends and supporting the damper at one end thereof, a manipulating rod hinged at the other end of the lever, a thermostat placed in the space to be heated, and connections be-

tween the thermostat and the rod whereby the damper may be automatically operated by the rod and lever in accordance with the temperature in said space.

1,571,855. DIAL-ALIGNING DEVICE. JOSEPH B. MACNAMEE, Llanerch, Pa., assignor to H. Brinton Company, Frankford, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Oct. 21, 1925. Serial No. 63,941. 7 Claims. (Cl. 66—22.)

1. In a knitting machine, a needle cylinder, a dial, and connections between them including a cylindrical roller engaging one face of the fabric transversely of the wales, means in contact with the opposite face of the fabric for holding the fabric in engagement with said roller throughout the length of the roller, and supporting means for the opposed fabric-engaging devices permitting a relative rocking movement thereof in a direction transverse to the wales of the fabric, substantially as set forth.

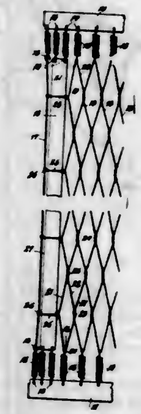
1,571,856. PUZZLE BOARD. VIRD L. MAHURIN, Princeton, Mo. Filed Apr. 1, 1925. Serial No. 19,869. 1 Claim. (Cl. 35—1.)



A cross word puzzle apparatus comprising a board having a bounding edge composed of angularly disposed lengths, the board being provided on one side with a continuous groove having angularly disposed lengths which are disposed parallel with the adjacent lengths of the bounding edge of the board, the board being provided on the same side with a second continuous groove located within the first mentioned groove and having angularly disposed lengths which are disposed parallel with the adjacent lengths of the first mentioned groove and parallel

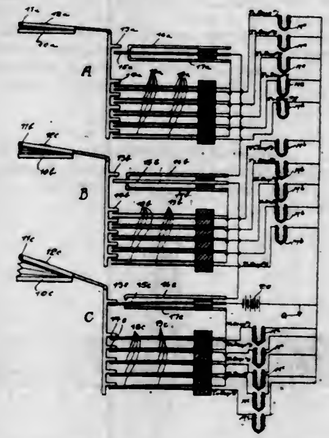
with the adjacent lengths of the bounding edge of the board, the board being provided on the same side with relatively short groove sections which join with the second mentioned groove at the angles of the corners thereof and with the first mentioned groove at points spaced from the angles of the corners thereof, the board

being provided on the same side with a series of parallel grooves located within the second mentioned continuous groove, said parallel grooves being closed at one end and joined at their opposite ends with one of the lengths of the second mentioned continuous groove, and members mounted for movement along all of the grooves.



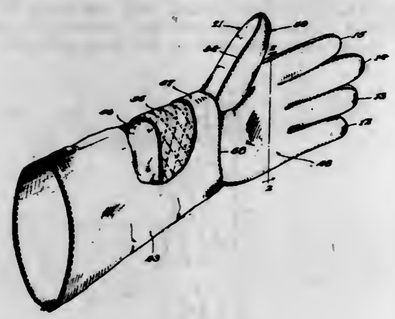
1,571,857. CONVERTIBLE FURNITURE. HAWKINS R. MARTIN, Fort Worth, Tex. Filed Oct. 15, 1923. Serial No. 668,683. 4 Claims. (Cl. 5—124.)

1. In combination, front, back and intermediate longitudinally extending inverted angle bars arranged in spaced relation, two opposed pair of horizontally extending end bars of angle contour, the bars of each pair having their inner ends opposing each other, the forward end bar of each pair having the ends of its vertical leg seating on edge on the top of the horizontal leg of the front and intermediate bars inwardly of an end thereof, the rear end bar of each pair having the outer end of its vertical leg seated on edge on the top of the horizontal leg of the back bar inwardly of an end thereof, means secured on the horizontal legs of each pair of end bars for hinging the inner ends thereof together and for supporting the inner end of the rear bar of the pair, means for securing the forward bar of each pair to the front and intermediate bars, means for securing the outer end of the rear bar of each pair to said back bar, and suspension means secured to said front, back and intermediate bars outwardly with respect to said pairs of end bars.



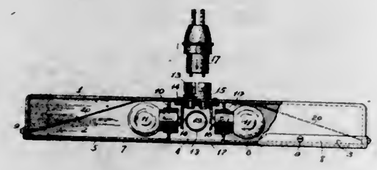
1,571,858. FABRIC FURNITURE SPRING. VINCENZO MASSACESE, New York, N. Y. Filed Oct. 24, 1924. Serial No. 745,677. 1 Claim. (Cl. 5—192.)

In a furniture spring which includes a frame having end rails, helical contractile springs connected with said end rails, and side straps connected at the opposite ends to certain of said helical springs, a fabric connected at its opposite ends to said helical springs and consisting of wire cables inter-twisted together to provide a mesh and having loops formed in the outer side leads of each side cable which loops embrace the side straps for supporting the side edges of the fabric from the strap and rods connected at their opposite ends respectively to the outermost helical springs, arranged parallel and alongside of the outer side edges of the straps and also em-



braced by the loops formed in the outer side leads of the fabric, said loops having a second twist between the straps and rods for spacing and holding the same in a plane with each other, whereby to hold said rods in juxtaposition to the strap for preventing contact and possible cutting of the bed clothing on the edge of said straps.

1,571,859. RECORD-CONTROLLED MUSICAL INSTRUMENT. HARRY P. MAUS and DODE M. LAMSON, Lima, Ohio. Filed May 1, 1923. Serial No. 635,875. 10 Claims. (Cl. 84—88.)

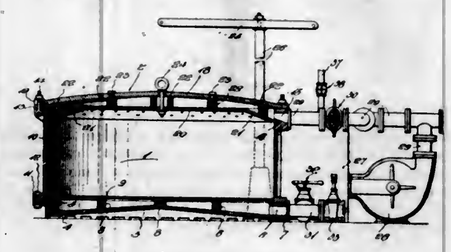


8. A record-controlled musical instrument comprising a plurality of record-controlled mechanisms for respectively controlling the operation of different sounding devices to be played, a plurality of stops, the controlling mechanisms controlling the sounding of a note in a plurality of stops and connections under control of the controlling mechanisms, when two or more are simultaneously operated, to prevent the sounding of notes controlled by all except one of said controlling mechanisms.

1,571,860. BAKING GLOVE. GERTRUDE M. MEYER, Davis, W. Va. Filed Nov. 30, 1923. Serial No. 677,840. 1 Claim. (Cl. 2—169.)

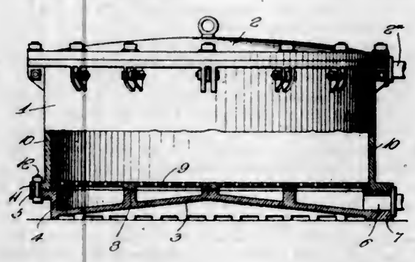
A glove including a body portion and a cuff, said body comprising a semi-trank slit from its forward end to form a palm portion and finger extensions, one finger extension being partially slit midway its width from its forward end to form cooperating side sections constituting the front and back portions of the first finger of the glove when said semi-trank is folded longitudinally along the line of the last-mentioned slit, the rear portion of said semi-trank being formed with a thumb-receiving recess having parallel side edges joined by a curved front edge, back forming strips secured at their sides to each other and to adjacent edges of the finger and palm-forming portions of said semi-trank, a thumb-forming strip having side edges converging forwardly and merging into curved forward edge portions intersecting intermediate the width of the thumb-forming strip, the rear edge of said thumb strip extending at right angles to its axis and the rear corner portions being cut diagonally, said thumb strip being doubled longitudinally and sewed together along its converging side edges and across its forward end, its remaining edge portions being sewed to said semi-trank along the edges of the thumb recess, a reinforcement for the palm and finger portions of said semi-trank, and a reinforcement for the thumb covering the inner and end surfaces thereof and joined to the adjacent edges of the palm portion.

1,571,861. AUTOMOBILE SIGNAL. WILLIAM F. MICHAEL and WALTER A. PAULS, Benton Harbor, Mich. Filed Jan. 24, 1924. Serial No. 688,301. 1 Claim. (Cl. 177—329.)



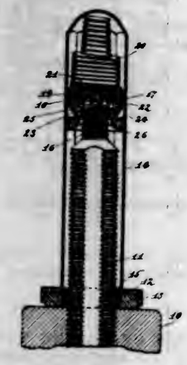
A direction indicator comprising a casing having a socket on its rear wall, an insulating block secured across said socket, conductor elements extending through said block, contact fingers secured to said elements and projecting forwardly in the casing, a front plate for the casing, and webs projecting rearwardly from the front plate and formed with sleeves disposed longitudinally of the casing to support electric lamps in electrical engagement with the contact fingers.

1,571,862. PREVENTION OF FUEL KNOCK. THOMAS MIDGLEY, Jr., Dayton, Ohio, assignor, by mesne assignments, to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Continuation of application Serial No. 419,763, filed Oct. 26, 1920. This application filed Sept. 18, 1923. Serial No. 663,505. 4 Claims. (Cl. 44—9.)



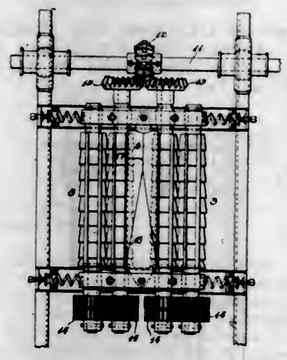
1. A composition of matter comprising aniline, unsaturated gasoline, and a blending agent.

1,571,863. RAW-STOCK-DYEING APPARATUS. FRANK M. MORTON and GORDON W. MORTON, Phoenix City, Ala. Filed Apr. 6, 1925. Serial No. 21,126. 2 Claims. (Cl. 8—18.)



1. A dyeing apparatus comprising an open-topped vat having an inlet port through its side wall near the upper edge thereof, said port having an inwardly inclined bottom wall, a horizontal top wall, and vertical inwardly diverging side walls, a removable cover plate for said vat having a lower side inclining from its edge toward its center, and a substantially horizontal perforated dye-distributing plate secured to said cover plate and disposed in downwardly spaced relation therewith, said perforated plate being receivable in the vat and having an edge portion declined outwardly and disposed in substantially the same plane as said inclined bottom of said dye inlet port, whereby to upwardly direct the incoming dye.

1,571,864. DYE VAT. FRANK M. MORTON and GORDON W. MORTON, Phoenix City, Ala. Original application filed Apr. 6, 1925, Serial No. 21,126. Divided and this application filed Oct. 26, 1925. Serial No. 64,959. 1 Claim. (Cl. 8—18.)



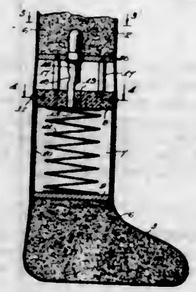
A dyeing apparatus comprising a vat bottom plate declining from its center to its edge and having at said edge an upstanding continuous flange formed with a dye outlet port, the upper edge of said upstanding flange having an outwardly projecting continuous horizontal flange, said bottom plate having upstanding lugs terminating in the same horizontal plane with the upper side of said horizontal flange, a flat perforated false bottom plate resting on said lugs and said upstanding flange, and a vat wall surrounding said false bottom plate and secured to said horizontal flange.

1,571,865. COMBINED DUST CAP AND AIR SEAL FOR TIRE-VALVE STEMS. GEORGE W. OAKES, Crystal City, Mo. Filed Dec. 11, 1924. Serial No. 755,226. 2 Claims. (Cl. 152—12.)

1. A device of the class described, including a dust cap adapted to be placed over a valve stem, and polygonal in cross section, a nut adapted to have threaded engagement with the valve stem, said nut having a polygonal form to correspond with that of the dust cap, and an expansible locking device slidably carried by said nut and adapted to have holding engagement with said cap subject to the screwing of the nut onto the valve stem, the threads of said nut being located materially within the plane of the inner end of the nut, and said nut between the threads and said inner end forming a guide for the valve stem.

1,571,866. CORN-HUSKING MACHINE. THEODORE H. OPPENHEIM and BERNARD SELHORST, Coldwater, Ohio, assignors to The New Idea Spreader Co., Coldwater, Ohio, a Corporation of Ohio. Filed Sept. 25, 1924. Serial No. 739,863. 4 Claims. (Cl. 130—5.)

1. In a corn-husking machine, the combination of working rolls arranged in pairs, dividing bars disposed between the pairs of rolls, and pendent deflectors freely suspended over said dividing bars.



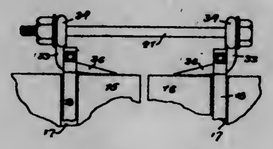
1,571,867. STOCK RING. WILLIS S. PARRISH, Cave City, Ky. Filed Jan. 24, 1925. Serial No. 4,601. 2 Claims. (Cl. 119—135.)

1. A stock ring comprising a substantially straight body portion, angular and oppositely disposed rearwardly and outwardly extending prongs at opposite ends of said portion and an intermediate prong extending from

the body portion upon the same side and toward the outer end of one of the prongs.

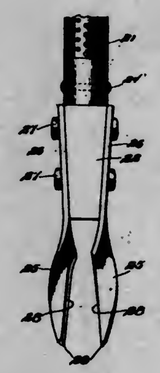
1,571,868. DOLL. GEORGE HARRY PARSONS, New York, N. Y., assignor to Averill Mfg. Co., New York, N. Y., a Corporation of New York. Filed Sept. 11, 1924. Serial No. 737,157. 6 Claims. (Cl. 46—40.)

1. As a new article of manufacture, a doll having longitudinally compressible legs, a whistle in each leg of the doll, and means in each leg of the doll for forcing air through a whistle when the leg is compressed longitudinally.



1,571,869. FISH-CATCHING DEVICE. ANDREW H. PERKINS, Helena, Miss. Filed May 7, 1925. Serial No. 28,729. 2 Claims. (Cl. 43—34.)

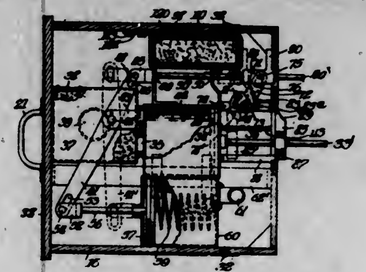
1. A fish-catching device comprising a casing, a hook suspended upon the casing, a shank housed within the casing, a piercing point on the end of the shank, wings pivoted at the base of said point and foldable upon the



shank whereby they may be engaged within the lower end of the casing, a spring carried by the shank and bearing upon said wings to spread the same, means connected with the hook for normally holding the shank retracted, and means within the casing to project the shank when said holding means is released.

1,571,870. CONCRETE PIPE JOINT. EARL L. PETERSON, Corona, N. Y., assignor to United Concrete Pipe Company, New York, N. Y., a Corporation of Delaware. Filed Aug. 13, 1920. Serial No. 403,206. 3 Claims. (Cl. 285—130.)

1. In a concrete pipe joint, an abutment member loose on a pipe end and having an opening to receive a draw-up element, together with draw-up means comprising a draw-up bolt and an associated wedging member adapted to receive the draw-up bolt and having a portion adapted to pass through the opening in the abutment on the pipe end, for the purpose described.



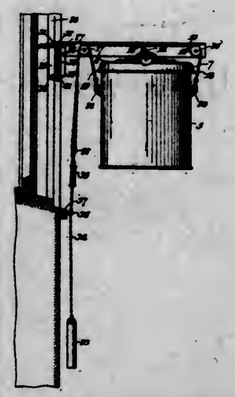
1,571,871. DRIVE-WELL POINT. CHARLES F. D. SMITH, Lake Wales, Fla. Filed May 10, 1924. Serial No. 712,318. 2 Claims. (Cl. 166—5.)

1. A drive well point for engagement with the screens of drive well apparatus in the form of an inverted truncated pyramid having at its upper or base end a shank for engagement with the drive well screen, said point having attached thereto at opposite faces thereof blades formed from flat material and spirally twisted in the same direction.

1,571,872. STERILIZING DEVICE. EDWARD R. ULRICH, Chicago, Ill. Filed July 27, 1923. Serial No. 654,177. 10 Claims. (Cl. 167—3.)

7. In a sterilizer, a sliding drawer, a gas generating chamber, a sterilizing compartment, a reservoir, means for conducting gas from the generating chamber to the sterilizing compartment, means for drawing a portion of the gas contents of the sterilizing compartment into the said reservoir consequent to opening the drawer, and

means for replacing the contents of the reservoir into the sterilizing compartment consequent to the closing of the drawer.

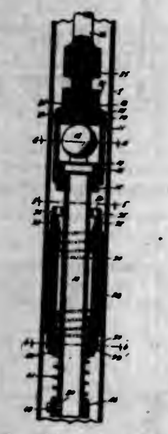


1,571,873. PROCESS OF MAKING TANNING PREPARATIONS AND PRODUCTS THEREOF. THOMAS BLACKADDER, Great Neck Estates, N. Y., assignor to Robeson Process Company, New York, N. Y., a Corporation of New Jersey. Filed June 10, 1924. Serial No. 719,191. 3 Claims. (Cl. 149—4.)

2. The process of making a tanning preparation from waste sulfite liquor which comprises treating digester liquor with slightly more lime than is required to neutralize, the proportion with a liquor requiring 0.5 per cent for neutralization ranging between 1.25 per cent and 2 per cent, separating the precipitate thus produced, concentrating the liquid and adding thereto the amount of sulfuric acid required to precipitate the lime in solution.

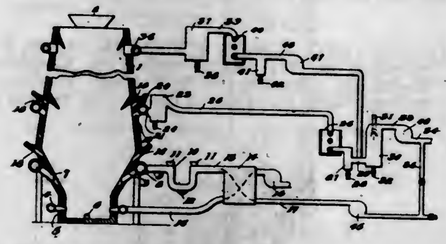
1,571,874. EXPANSION JOINT. ALBERT C. FISCHER, Chicago, Ill. Filed Sept. 11, 1922. Serial No. 587,611. 3 Claims. (Cl. 106—31.)

1. Bituminous expansion joints having incorporated therein corn cob fibre.



1,571,875. RECEPTACLE FOR THE STORAGE OF ARTICLES OF FOOD. FRANK H. LEHMAN, Lebanon, Pa. Filed Nov. 16, 1923. Serial No. 675,170. 10 Claims. (Cl. 45—71.)

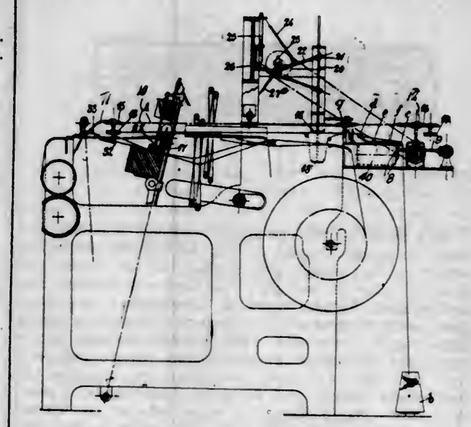
1. A receptacle including a can comprising an open mouthed body and a lid for covering and closing the same, the lid being disposed at a fixed elevation separate from and independently of the body, and the body being



counterbalanced for vertical movement below and in alignment with the lid, whereby the receptacle is adapted to be opened and closed by lowering and raising the body out of and into engagement with the lid.

1,571,876. SWAB. FRANK W. LEIDECKER, Tulsa, Okla. Filed July 2, 1924. Serial No. 723,613. 12 Claims. (Cl. 103—225.)

1. A swab of the character set forth comprising a hollow body, a valve for preventing a downward flow and permitting an upward flow of fluid through said body, an expansible piston surrounding the body and enclosing a chamber that is open at top and bottom, and a valve for controlling the passage of fluid through the open bottom of the piston.



1,571,877. GASIFICATION OF COAL. KARL P. MCELROY, Washington, D. C., assignor to Ferro Chemicals Inc., Washington, D. C., a Corporation of Delaware. Filed May 10, 1920. Serial No. 380,324. 23 Claims. (Cl. 48—208.)

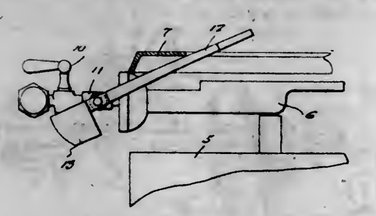
15. In the gasification of coal, the process which comprises establishing and maintaining a vertical column of distilling bituminous fuel with a carbonized base, blasting said base with hot air at a temperature at least sufficient to fuse and run ash components as slag, withdrawing a regulated portion of the hot gases from said base, filtering the withdrawn hot gases through carbon, and transferring the heat of the filtered gases to air in furnishing said hot air.

1,571,878. LOOM FOR WEAVING. OLIVER SHIMWELL, Gawsworth, England. Filed Feb. 27, 1925. Serial No. 12,130. 7 Claims. (Cl. 139—126.)

1. In a loom for weaving, weft supplying means comprising in combination two weft gripping and severing devices disposed in pairs at each side of the loom, means for transferring the weft from one of the devices of each pair to the other of the same pair, other means for drawing out the weft thread stretched between the said devices into loop form, and a weft carrier adapted to

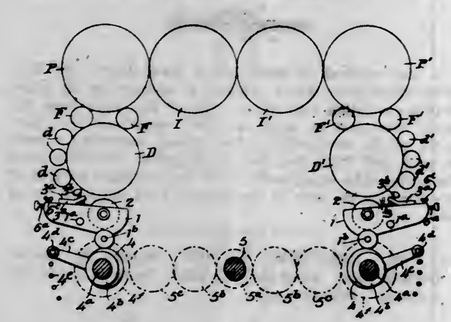
be traversed from side to side of the loom and to carry the halves of the loops successively from opposite sides of the loom through successive warp sheds.

1,571,879. FACEPLATE FOR ELECTRICAL RECEPTACLES. SAMUEL P. WYRPEL, Hartford, Conn., assignor to The Arrow Electric Company, Hartford, Conn., a Corporation of Connecticut. Filed June 21, 1922. Serial No. 569,841. 3 Claims. (Cl. 247—23.)



3. The method of mounting a jewel bull's eye in a sheet metal plate which consists in aperturing the plate, drawing a collar toward the rear of the plate from the metal surrounding said aperture, upsetting the plate metal at the aperture to afford a seat, mounting a jewel in said seat from the rear of the plate, and displacing the collar into engagement with the marginal portion of the jewel at the rear of the plate to hold the jewel to its seat.

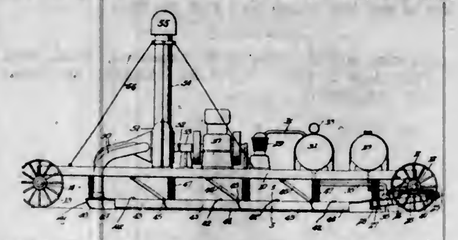
1,571,880. RUNNERED WAGON. WILBER E. YOUNG, Gordon, Nebr. Filed May 22, 1923. Serial No. 640,729. 1 Claim. (Cl. 280—8.)



A vehicle comprising a platform, front and rear axletrees rigidly secured directly to the under side of the platform, runners rigidly secured to the under sides of the axletrees and extending the full length of the platform, wheels on the axletrees adjacent and at the outer sides of the runners, the tread surfaces of the wheels projecting below the tread surfaces of the runners, and filler pieces inserted between the runners and the platform and extending longitudinally of the runners with their ends abutting the axles whereby to furnish a firm support for the platform through the entire length of the same.

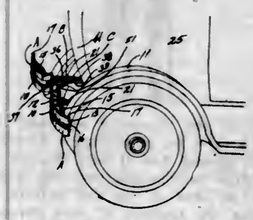
1,571,881. AUTOMATIC FUEL CUT-OFF FOR GAS STOVES. JOHN ZIMMER, Troy, N. Y. Filed Nov. 8, 1924. Serial No. 748,712. 1 Claim. (Cl. 126—52.)

In a stove of the character described, a burner element, a utensil support having an opening above the burner, a fuel supply pipe leading to the burner element, a valve in said pipe and having a rockable control member the axis of which is horizontal, and a one piece lever fixed at an intermediate point of its length with respect to the said rockable control member of the valve and extending at right angles thereto and having an arm extending through the opening in the utensil support and normally extending to a point in a plane spaced above the upper side of the utensil support and also having an integral weight on its outer arm, the first-named arm of the lever and the utensil support being so relatively arranged that the bringing up of the lever against said support stops the rockable control member in closed position.



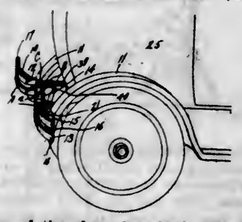
1,571,882. INKING MECHANISM FOR PRINTING PRESSES. HENRY F. BECHMAN, Battle Creek, Mich., assignor to Duplex Printing Press Company, Battle Creek, Mich., a Corporation of Michigan. Filed Feb. 4, 1924. Serial No. 690,647. 5 Claims. (Cl. 101—350.)

1. In inking mechanism for printing presses, an ink drum; an ink fountain having a fountain roll; and means for moving the fountain to move the roll to and from the ink drum to supply ink directly from the fountain roll to the drum, said means comprising a driven shaft and a cam thereon engaging the fountain and partly supporting the latter; with means for laterally adjusting the shaft to correspondingly vary the extent of movement of the fountain roll toward the drum.



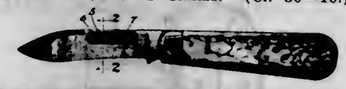
1,571,883. LAND-CLEANING DEVICE. FRANÇOIS X. BÉLANGER, Langdon, N. Dak. Filed Feb. 14, 1922. Serial No. 536,575. Renewed Nov. 24, 1925. 2 Claims. (Cl. 126—271.2.)

1. A land cleaning machine embodying a wheel supported frame, means carried by the frame for producing a flame at one end of the machine, an open bottom flame passage extending longitudinally beneath the machine, said passage being formed of separate sections and each section including downwardly extending side flanges, hinges connecting the sections, a closure



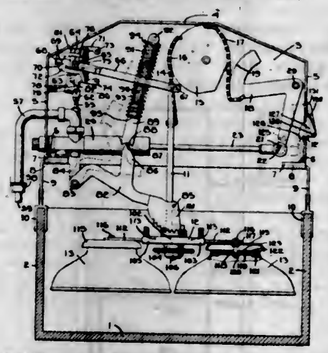
wall at the forward end of the channel, means for yieldingly holding the sections in contact with the ground and means for directing a flame through said passage.

1,571,884. BUMPER. ALGOT W. NORDGREN, St. Paul, Minn., assignor to Marquette Manufacturing Company, St. Paul, Minn. Filed Oct. 26, 1925. Serial No. 64,912. 14 Claims. (Cl. 293—55.)



1. In a device of the class described, the combination of a car body having longitudinal and transverse frame members with a spring bumper and a bumper support connected with said bumper and supported on a longitudinal frame member, a brace connected with the bumper at a point spaced from the point of connection of the support with the bumper, and connected with a transverse frame member.

1,571,885. TWIN BUMPER STRUCTURE. ALGOT W. NORDGREN, St. Paul, Minn., assignor to Marquette Manufacturing Company, St. Paul, Minn. Filed Oct. 26, 1925. Serial No. 64,913. 5 Claims. (Cl. 293—55.)



1. In a device of the class described, a spring bumper element adapted when installed to stand spaced from the end of a fender, a rigid member connecting the ends of said bumper element, a rigid support connected with said rigid member between its ends and extending away therefrom at substantially a right angle thereto, means for fastening said rigid support rigidly to the body of a car, and a brace rigidly connected with the inner portion of said rigid member and inclined therefrom laterally and forwardly to said support, then having a portion extending parallel to said support and fastened thereto, and a portion extending forwardly and inwardly from said parallel portion and adapted to be fastened to the frame of a car.

1,571,886. KNIFE BLADE. SAMUEL A. NORTH, Bridgeport, Conn., assignor to Remington Arms Company, Inc., a Corporation of Delaware. Filed June 11, 1921. Serial No. 476,884. 2 Claims. (Cl. 30—10.)

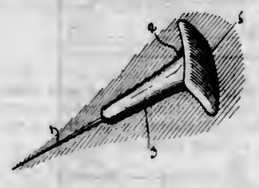
1. In a pivoted knife blade, a panel depressed in said blade, markings extending outwardly from the bottom of a part of said panel, a plain depression between said markings and the wall of said depressed panel, the wall of said depressed panel constituting a shoulder surrounding said outwardly extending markings and spaced therefrom by said plain depression to form nail engaging recesses on opposite sides thereof.

1,571,887. WASHING MACHINE. EMILE C. REUTLINGER, Boston, Mass. Filed Apr. 9, 1923. Serial No. 630,680. 30 Claims. (Cl. 259—126.)

2. A washing machine comprising a reciprocable dasher, a single-acting fluid motor operable to move the dasher in one direction and means intermediate of said motor and dasher for varying the force applied by the motor to the dasher during the motor-actuated movement thereof.

1,571,888. AUTOMATICALLY-THREADING SHUTTLE FOR LOOMS. ALONZO E. RHOADES, Hopedale, Mass., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed Nov. 7, 1925. Serial No. 67,525. 11 Claims. (Cl. 139—223.)

1. As an article of manufacture, a threading block for automatically threading loom shuttles formed in part of cast iron having the thread engaging portions thereof overlaid by a rust-proof covering and a complemental part formed of a softer metal capable of being worked to fit the block to the shuttle wood.



1,571,889. HEAT-EXCHANGE APPARATUS. WILLIAM H. RIPLEY, Hartford, Conn., assignor to The Whitlock Coil Pipe Company, West Hartford, Conn., a Corporation of Connecticut. Filed Mar. 10, 1922. Serial No. 542,566. 1 Claim. (Cl. 257—239.)

In a device of the character described, a cylindrical shell, a longitudinally extending wall therein dividing said shell except at its rear end into a pair of semi-cylindrical passes or chambers, a plurality of tubes in each chamber and arranged in series, and a plurality of baffle plates in each chamber, alternate baffle plates being in the form of segments terminating at their inner

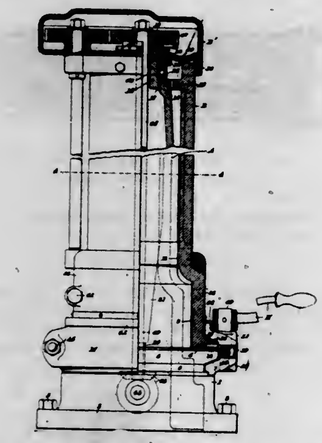
ends short of said division wall and the intervening baffles being arranged in staggered relation to the alternate ones and being in the form of truncated semicircular plates with their inner edges engaging the surfaces of said division wall.

1,571,890. ICE PICK AND THE LIKE. CARL SCHAUM, Philadelphia, Pa., assignor to Fletcher Works Incorporated, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Dec. 27, 1924. Serial No. 758,333. 6 Claims. (Cl. 83—62.)

2. An ice pick handle comprising a head and a shank, said head and shank being integral, the top surface of the head being inclined from one side to the other and said shank being eccentric to said head.

1,571,891. ART OF SOFTENING WATER. ROY G. TELLIER, Chicago Heights, Ill., assignor to The Permutit Company, New York, N. Y., a Corporation of Delaware. Filed May 27, 1916. Serial No. 100,312. 27 Claims. (Cl. 23—112.)

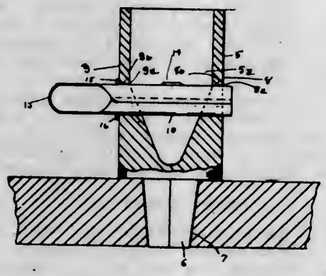
1. The step in the process of softening waters which consists in subjecting such waters to the action of extensive surfaces of a reagent comprising the class of bodies occurring in nature as clays and containing a substantial proportion of alkaline metal silicate.



1,571,892. WATER-SOFTENING ART AND MATERIAL. ROY G. TELLIER, Chicago, Ill., assignor to The Permutit Company, New York, N. Y., a Corporation of Delaware. Filed Sept. 6, 1921. Serial No. 498,876. 24 Claims. (Cl. 23—112.)

1. The method of preparing a water-softener which comprises hardening and substantially dehydrating clay containing a compound of a metal of the alkali metal or alkali earth metal groups by heat treatment so applied as to render the product permeable and highly resistant to the disintegrating action of water, and treating such product with a solution containing alkali.

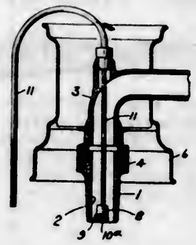
1,571,893. RADIAL-DRILL COLUMN CLAMP. DAVID C. KLAUSMEYER and ROWLAND L. RICKWOOD, Cincinnati, Ohio, assignors to The Cincinnati Bickford Tool Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Sept. 15, 1922. Serial No. 588,461. 25 Claims. (Cl. 77—28.)



2. A mechanism of the nature disclosed combining a base and a non-rotatable post upstanding thereon; a tubular member suspended from the upper end of said

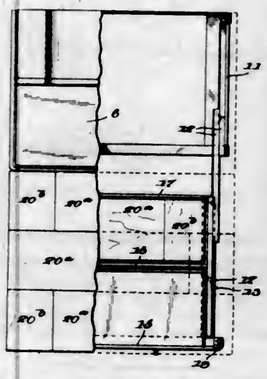
post and having its lower portion circumscribing said post, said lower portion and the adjacent portion of said base being provided with co-acting bearing-surfaces located in a substantially horizontal plane; means for

permitting a limited depression of said suspended tubular member; and a clamping device cooperating with said means for establishing a positive contact between the aforesaid bearing surfaces.



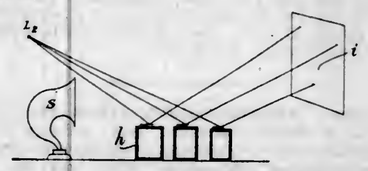
1,571,894. CORE-FORMING DEVICE FOR SASH-WEIGHT CASTING. JOSEPH J. O'BRIEN, Springfield, Mass., assignor to William M. Barnard, Springfield, Mass. Filed Apr. 15, 1922. Serial No. 553,222. 2 Claims. (Cl. 22—13.)

1. A core forming device for sash weight casting consisting of a pair of jaws, one jaw being a U shaped construction and the other jaw having sliding movement therein, the first jaw carrying a casting character thereon, a U shaped spring connecting the jaws to each other and maintaining the same normal interfitting relation and providing a handle for the insertion and removal of the jaws from a core box.



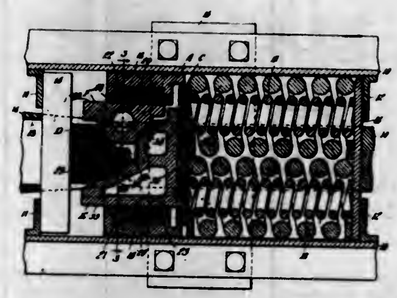
1,571,895. INVERTED INCANDESCENT LIGHT. VICTOR H. SLINACK, Philadelphia, Pa., assignor to Pennsylvania Globe Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Apr. 27, 1921. Serial No. 464,929. 2 Claims. (Cl. 67—94.)

1. An inverted incandescent light comprising an inverted burner having a portion of its bore in the form of an upright cylinder, a fixed cylindrical core impenetrable by the mixture and arranged in and confined to the upright cylindrical portion of the bore of the burner and providing between confronting walls of the cylindrical portion of the burner and of the core an elon-



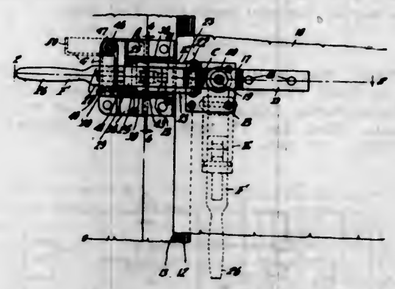
gated upright annular cylindrical discharge duct of substantially contsant cross section and co-axial with the core and with the cylindrical portion of the burner.

1,571,896. COMBINED CHINA CLOSET, BUFFET, AND EXTENSION TABLE. JAMES A. ANDERSON, Grand Rapids, Mich. Filed Jan. 2, 1925. Serial No. 142. 5 Claims. (Cl. 45—113.)



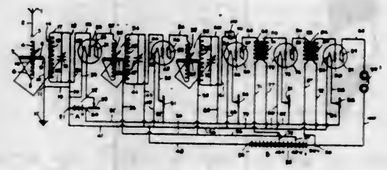
1. In an extension table, a fixed table top and supporting means therefor, pairs of extension slides housed beneath said fixed table top, a plurality of separable leaves adapted to cooperate with said slides to form an extension table, and a compartment carried wholly by and movable with the inner pair of said slides, in which compartment said leaves may be stored when not in use.

1,571,897. TELEGRAPHIC TRANSMISSION OF PICTURES AND IMAGES. EDMUND EDWARD FOURNIER D'ALBE, Kingston-on-Thames, England, assignor of one-half to Bernard Winfield, New York, N. Y. Filed Mar. 12, 1925. Serial No. 15,070. 2 Claims. (Cl. 178—6.)



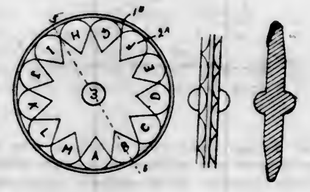
1. An apparatus for the reproduction of pictures or images by television, including resonators, each responsive to a natural note and a reed vibrating with the resonator and having a light-reflecting surface.

1,571,898. FRICTION SHOCK-ABSORBING MECHANISM. STACY B. HASELTINE, Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc., a Corporation of Delaware. Filed Feb. 8, 1923. Serial No. 617,678. 9 Claims. (Cl. 213—32.)



1. In a friction shock absorbing mechanism, the combination with a friction shell having interior opposed friction surfaces relatively converged inwardly of the shell; of a spring resistance; and a friction unit within and cooperable with said shell, said unit comprising a plurality of elements each having engagement with the remaining elements of the unit on faces inclined to the line of the actuating force, the element initially receiving the actuating force tending to expand the unit transverse to the line of the actuating force, and one of the remaining elements operating to overbalance said tendency and expanding the unit in the direction of the applied force during a compression stroke.

1,571,899. DOOR OPERATING AND LOCKING DEVICE. STACY B. HASELTINE, Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc., a Corporation of Delaware. Filed Dec. 31, 1923, Serial No. 683,552. Renewed Sept. 8, 1925. 11 Claims. (Cl. 292—210.)



1. In an operating and locking mechanism for a sliding door, the combination with a fixed abutment member; of toggle means adapted to be detachably connected with said abutment for operating the door, said means being supported entirely on the door and including a hand operating lever movable in a horizontal plane engageable with said abutment to hold the door in fixed position; and means for locking said lever to said abutment when engaged therewith to hold the door in closed position.

1,571,900. TUNED RADIOFREQUENCY RECEIVING SYSTEM. FRANCIS L. LORD, Newark, N. J., assignor of one-half to Henry J. Lucke, New York, N. Y. Filed Mar. 12, 1925. Serial No. 15,082. 3 Claims. (Cl. 250—20.)

1. In a multi-stage transformer coupled, radio frequency system, means for varying the capacity reactance in each transformer secondary circuit, means for varying the self-inductance of each primary and the mutual inductance of each transformer, and means for mechanically coupling said first-named means with said second-named means to thereby vary each of said reactances simultaneously and in the same direction, said coils and said condensers being relatively so proportioned that objectionable feed-back oscillations are substantially eliminated.

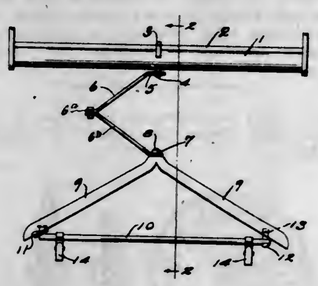
1,571,901. TOY. JÖNS MONSON, New York, N. Y. Filed Feb. 27, 1925. Serial No. 11,929. 10 Claims. (Cl. 213—147.)

9. A spinning toy comprising a disc-shaped body having central projections on its opposite sides and spaced annular projections at the marginal edges of the same sides, said projections forming resting bases of the toy after being spun.

1,571,902. METHOD OF MAKING GARMENT STAYS. CHARLES C. SELEY, Erie, Pa., assignor to George H. Barlow and Joseph J. Desmond, Corry, Pa. Filed July 27, 1923, Serial No. 654,130. Renewed Dec. 7, 1925. 2 Claims. (Cl. 140—91.)

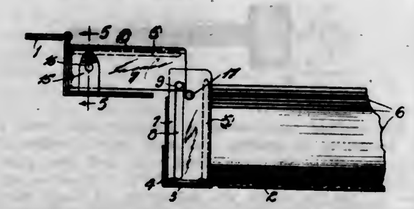
1. The method of forming a garment stay from a wire, consisting in bending the wire into a series of sinuous oppositely disposed helical loops, and then passing said bent wire between press rolls in a direction opposite to that in which the succession of loops were formed whereby said loops are turned over backwards.

1,571,903. SOLDERING IRON. VICTOR J. ROSENBLATT, Alexandria, Egypt. Filed Oct. 17, 1923. Serial No. 669,143. 1 Claim. (Cl. 113—107.)



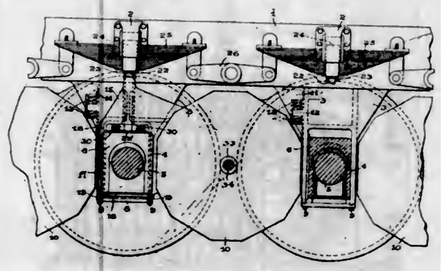
A soldering iron comprising a hollow head having openings in opposite sides and in one end, a hollow

handle secured to one of the unapertured sides of the head and communicating therewith, and a piston in the handle arranged to be reciprocated to draw air



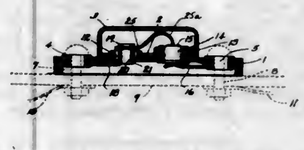
through the head and into the handle, when moved in one direction, and to force said air out of said head upon movement in the opposite direction.

1,571,904. GARMENT HANGER. GROVER A. SIMS, Remlig, Tex. Filed Oct. 11, 1923. Serial No. 667,859. 1 Claim. (Cl. 223—62.)



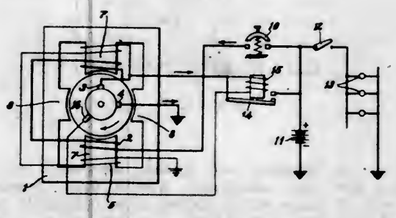
A garment hanger comprising a rod, a ring member having spaced ends and adapted to engage aroond the rod, said ring member being slidable upon the rod. means for holding the ring member against turning movement upon the rod, angularly disposed levers pivotally connected together, the end of one of the levers being pivotally connected with the ring member by a pivot pin which is aligned radially with the center of the ring and the rod and a garment support pivotally connected with the end of the other lever.

1,571,905. LOOSE-LEAF BINDER. OTTO L. HERMANN, St. Louis, Mo., assignor to Buxton & Skinner Printing and Stationery Company, St. Louis, Mo., a Corporation of Missouri. Filed Mar. 16, 1925. Serial No. 15,933. 6 Claims. (Cl. 129—12.)



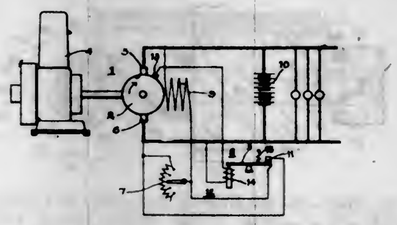
1. A loose leaf binder comprising front and back covers having end members, upstanding pins on said end members, and upstanding flange members at the ends of said end members connected by slot and pin connections, the flange members of one cover having rebent flanges adapted to engage the forward edges of the flange members of the other cover.

1,571,906. MOTOR SUSPENSION. HARALD A. KJELBERG, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Oct. 27, 1923. Serial No. 671,170. Renewed Jan. 7, 1926. 9 Claims. (Cl. 105—82.)



1. A motor drive for electrically operated railway vehicles comprising a plurality of motors having a resilient connection with the vehicle frame and having pedestal arms adapted to engage the journal boxes of the wheel axles.

1,571,907. DETECTOR. THOMAS G. MCCLANAHAN, Seattle, Wash. Filed Mar. 29, 1924. Serial No. 702,756. 2 Claims. (Cl. 250—31.)

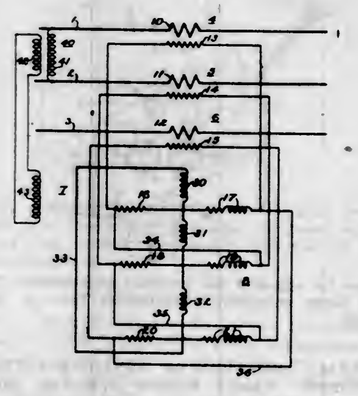


1. A detector comprising a base block of insulating material having openings therethrough one of which is adapted for seating a crystal therein, a spring arm fixed to the block and adapted to retain the crystal adjustably and removably in said opening, a second spring arm fixed to the block and having a contact supporting means at one end extending through another of the said openings, a contact wire supported adjustably in said means for contact with the crystal and means whereby the spring arms may be connected electrically in a circuit.

1,571,908. ELECTRICAL SYSTEM. WILLIAM E. MENZIES, Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 27, 1922. Serial No. 556,822. 5 Claims. (Cl. 290—31.)

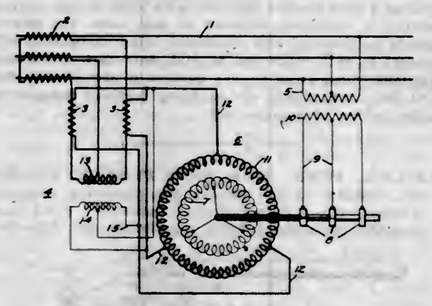
1. An electrical system comprising a dynamo-electric machine having main and auxiliary brushes, a load circuit for said machine, and a cutout for controlling said load circuit, said cutout having a single coil connected across a main brush and an auxiliary brush of said machine.

1,571,909. REGULATOR SYSTEM. WILLIAM E. MENZIES, Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed July 13, 1922, Serial No. 574,736. Renewed Jan. 7, 1926. 5 Claims. (Cl. 171—223.)



1. In a system of regulation, the combination with a generator having an armature, a plurality of brushes therefor, and a field-magnet winding, of a regulator for governing the excitation of said generator, said regulator being responsive to current derived from said generator through one of the brushes co-operating with said armature, said brush being so located as to receive current that decreases with a decrease in armature current.

1,571,910. ELECTRICAL MEASURING SYSTEM. ALEXANDER NYMAN, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Nov. 5, 1920. Serial No. 422,025. 10 Claims. (Cl. 172—245.)

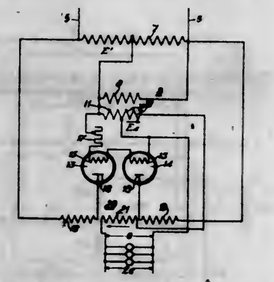


5. The combination with a polyphase circuit and two windings, of static means comprising resistors and reactors connected between the circuit and the windings and having such characteristics that the windings are traversed by out-of-phase currents proportional to components of the positive phase-sequence components of the currents of the circuit.

1,571,911. ELECTRICAL MEASURING INSTRUMENT. ALEXANDER NYMAN, Swissvale, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Aug. 18, 1921, Serial No. 493,338. Renewed Jan. 7, 1926. 5 Claims. (Cl. 172—245.)

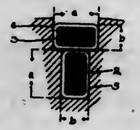
5. In a polyphase electric circuit, the combination of means for segregating a phase-sequence component of an electrical quantity of the circuit comprising a plurality of groups of equal impedances of unlike phase characteristics, said groups being symmetrically connected to different phase conductors of the circuit and an electro-responsive device having a polyphase winding so connected to said impedances as to be energized in accordance with said component.

1,571,912. VOLT-AMPERE METER. BENJAMIN H. SMITH, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 6, 1922, Serial No. 534,286. Renewed Jan. 7, 1926. 9 Claims. (Cl. 171—309.)



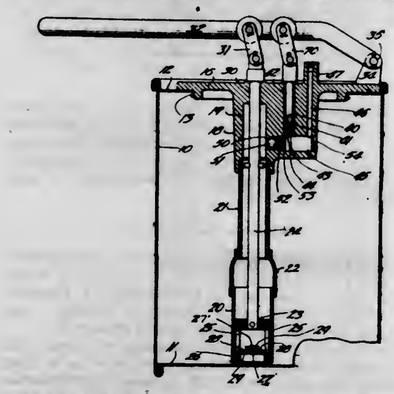
6. In an alternating-current circuit, the combination with a meter, of a translating device including only two inductively related windings, said windings being relatively movable by the inductive effort thereof in accordance with power-factor changes in the circuit for supplying current to the meter.

1,571,913. ELECTRON-TUBE VOLTAGE REGULATOR. PAUL T. WEEKS, East Orange, N. J., assignor to Westinghouse Lamp Company, a Corporation of Pennsylvania. Filed Apr. 23, 1920, Serial No. 375,929. Renewed Jan. 7, 1926. 4 Claims. (Cl. 171—119.)



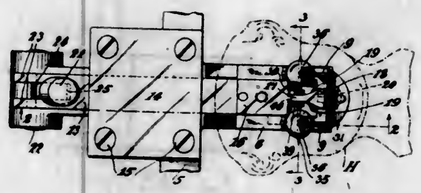
1. In a regulating system for ensuring the supply of a substantially constant electromotive force to a load circuit from a supply circuit of variable electromotive force, the combination with major energizing means for supplying an electromotive force to said load circuit directly from said supply circuit, of minor energizing means

for developing an electromotive force variable with the electromotive force of said supply circuit but magnifying percentage variations in said electromotive force, and



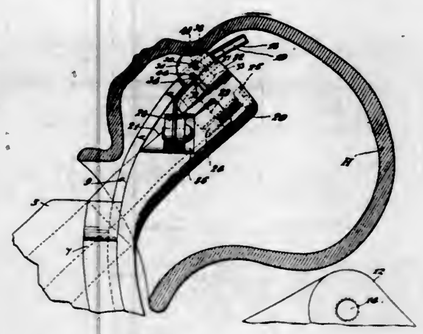
means for opposing the resultant electromotive force to said major energizing electromotive force in the load circuit.

1,571,914. ARMATURE OF DYNAMO-ELECTRIC MACHINES. GEORGE HERBERT FLETCHER, Ashton-on-Mersey, England, assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 2, 1922, Serial No. 585,846. Renewed Jan. 7, 1926. 2 Claims. (Cl. 171—206.)



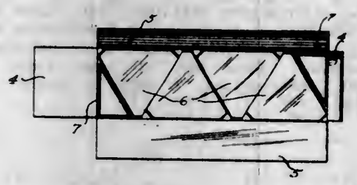
2. An armature for a dynamo-electric machine comprising a core member provided with slots having varying widths, a conductor disposed in said slots, the slot-engaging portions of said conductor being so twisted with respect to each other and to said slots that one of said portions engages the narrow portion of one of said slots and the other of said slot-engaging portions engages the wide portion of another slot.

1,571,915. PUMP. JAMES HENLY FRIEB, Jr., Evanston, Ill., assignor to The Bassick Manufacturing Company, Chicago, Ill., a Corporation of Delaware. Filed Sept. 5, 1922. Serial No. 586,071. 12 Claims. (Cl. 221—80.)



8. A lubricating pump comprising a low pressure cylinder, a high pressure cylinder, and common means for separately controlling the discharge from said cylinders.

1,571,916. METHOD AND MEANS FOR APPLYING EYE MOUNTINGS IN DOLL HEADS. LEO J. GRUBMAN, Belle Harbor, N. Y., assignor to L. J. Grubman, Incorporated, Long Island City, N. Y., a Corporation of New York. Filed Jan. 22, 1925. Serial No. 3,931. 20 Claims. (Cl. 29—84.)



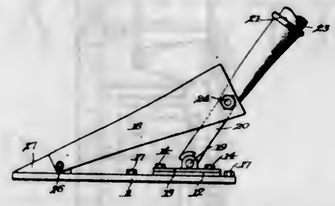
10. Means for mounting an eye setting in a doll head, comprising a support, a cam element slidably mounted upon said support, spaced means on the support to coact with parts of the eye setting and with spaced eye members thereof to position individual fulcrum pins of the said eye members relative to said cam element at the opposite sides of the latter, and means for actuating said cam element to cause the same to coact simultaneously with the inner opposed ends of said pins and axially move the same in relatively opposite directions relative to the eye members to seat the other ends of said pins in spaced surfaces on the doll head wall.

1,571,917. METHOD AND MEANS FOR APPLYING EYE MOUNTINGS IN DOLL HEADS. LEO J. GRUBMAN, Belle Harbor, N. Y., assignor to Grubman Engineering & Manufacturing Co. Inc., Long Island City, N. Y., a Corporation of New York. Filed May 23, 1925. Serial No. 32,302. 19 Claims. (Cl. 29—84.)

8. A tool for applying an eye mounting in a completely formed doll head comprising a supporting arm, means for removably holding an eye mounting on said arm for pivotal movement with respect thereto, a manually operable element coacting with the latter means to pivotally move the same and position the eye mounting with its longer axis in parallel relation to said supporting arm whereby said supporting arm and the mounting may be positioned within a doll head through the neck thereof, and said element being subsequently operable to actuate said pivoted holding means for the mounting and dispose the mounting with its longer axis substantially at right angles to the vertical axis of the doll head whereby the spaced eye members of the mounting may be positioned with relation to spaced openings of the doll head wall, and means operable from the exterior of the doll head and adapted to coact with parts of the eye mounting to engage the same with the doll head wall and permanently fix the eye mounting in an operative position relative thereto.

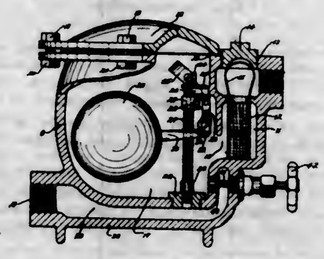
1,571,918. CARTON AND METHOD OF PACKING THE SAME. CESARE BARBIERI, New York, N. Y., assignor to The Vortex Mfg. Co., Chicago, Ill., a Corporation of Illinois. Filed Dec. 3, 1923. Serial No. 678,119. 2 Claims. (Cl. 206—46.)

1. In combination, a rectangular exterior carton, and a plurality of interior cartons, each of the latter being of hexagonal cross-section with alternate sides of smaller width than the intervening sides, said larger and smaller sides being respectively of equal dimensions, whereby said cartons will interfit in the exterior carton under any manner of lateral disposition therein.



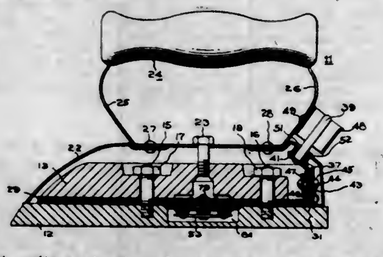
1,571,919. ADJUSTABLE STILT. EDWIN A. BOARDMAN, Hoquiam, Wash., assignor to James F. O'Brien, Seattle, Wash. Filed Jan. 28, 1925. Serial No. 5,334. 4 Claims. (Cl. 272—70.1.)

3. A stilt comprising a pole, a foot rest having an arcuate surface adapted to contact with the adjacent side of said pole, means for adjustably securing said foot rest on the pole, said means including a gripping member united with said foot rest and reaching around said pole and a serrated edge on said member adapted to be pressed against the opposite side of said pole, and a spring inserted between said arcuate surface of said member and the side of the pole.



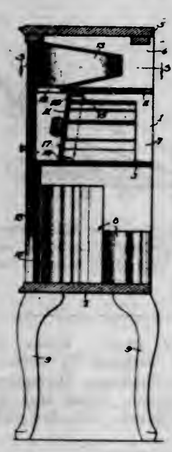
1,571,920. TRACK LINER. JOHN CLARK, Walkerton, Ind. Filed Aug. 6, 1925. Serial No. 48,599. 2 Claims. (Cl. 254—44.)

1. A track liner including a base plate, an operating lever, a movable foot for said operating lever longitudinally slidable on said base plate, said operating lever being pivotally associated with said movable foot, a track-engaging lever pivoted to said operating lever, a pivot for the forward end of said track-engaging lever, and means securing said pivot in fixed relation to said base plate, said means fixing said pivot forcing said movable foot to slide longitudinally on said base plate



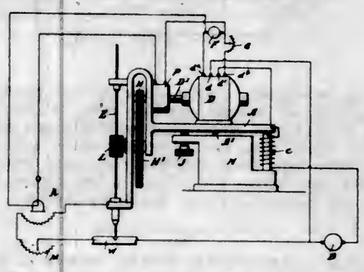
upon any raising or lowering movement of said operating lever and compelling all sliding movement within said track liner to take place between said movable foot and said base plate.

1,571,921. STEAM TRAP. FRANK L. HUTCHINSON, Wauwatosa, Wis., assignor, by mesne assignments, to Milwaukee Valve Company, Milwaukee, Wis., a Corporation of Wisconsin. Filed May 31, 1924. Serial No. 716,980. 4 Claims. (Cl. 236—53.)



1. A steam trap, comprising a casing forming a chamber provided with inlet and outlet openings, a float, a valve provided with a valve stem for controlling said outlet opening, the stem of said valve having a passage providing communication between said chamber and outlet opening, means for closing said passage, and a compound leverage between said float and the valve stem for operating the valve.

1,571,922. ELECTRICALLY-HEATED APPLIANCE. VICTOR G. VAUGHAN, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 8, 1924, Serial No. 704,973. Renewed Jan. 7, 1926. 7 Claims. (Cl. 219—25.)



5. A unitary structure for a device to be heated having a sole plate, comprising an encased heating unit supported by said sole plate, and a thermostatically-actuated circuit-controlling means operatively associated with and directly supported by said heating unit and subjected primarily to the heat of said sole plate.

1,571,923. RADIO APPARATUS CABINET. WILLIAM H. WADE, Chicago, Ill. Filed Jan. 10, 1924. Serial No. 685,340. 2 Claims. (Cl. 45—52.)

1. Radio apparatus comprising a resonator, a telephonic receiver for said resonator, rigid therewith, a radio front tuning panel, means forming a chamber for said resonator and telephonic instrument, the resonator being rigidly mounted therein, means forming a chamber back of said tuning panel, and instrumentalities co-operating with both of said means to form a cabinet-like structure in which one chamber is disposed in fixed relation to the other, whereby said apparatus is combined in one unitary structure in which the resonator is fully enclosed, having a cabinet-like exterior, said tuning panel being set into the cabinet a distance, to provide a space in front of said tuning panel, which space communicates with the interior of the resonator, so that the front of the tuning panel will reflect the sound outwardly.

1,571,924. AUTOMATIC WELDER. OTIS ALLEN KENYON, New York, N. Y., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Dec. 13, 1920, Serial No. 430,407. Renewed Jan. 7, 1926. 1 Claim. (Cl. 219—8.)

In an automatic arc welding machine utilizing an arc between a consumable electrode and the work, the combination of electrode feeding mechanism including a rotating electric motor electrically energized in such manner as to automatically accelerate when the arc is too long and decelerate when the arc is too short, and electro-responsive clutch mechanism for disengaging said motor from the electrode and permitting the latter to remain stationary during the time when an unusually short arc-length is momentarily obtained during the operation of the machine.

Patents Nos. 1,571,925 to 1,572,868.

THE OFFICIAL GAZETTE OF THE United States Patent Office.

Vol. 343—No. 2. TUESDAY, FEBRUARY 9, 1926. Price—$5 per year.

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscription, $5.00 per annum; single numbers, 10 cents each.

PRINTED COPIES OF PATENTS are furnished by the Patent Office at 10 cents each. For the latter, address the Commissioner of Patents, Washington, D. C.

CIRCULARS OF GENERAL INFORMATION concerning PATENTS or concerning TRADE-MARKS, PRINTS, and LABELS will be sent without cost on request to the Commissioner of Patents, Washington, D. C.

Interference Notices.

U. S. PATENT OFFICE, *Washington, Jan. 27, 1926.*

Devon Manufacturing Company, Inc., its assigns or legal representatives, take notice:

An interference having been declared by this Office between the application of Lindeke, Warner & Sons, Incorporated, Fourth and Broadway, St. Paul, Minn., for registration of a trade-mark and trade-mark registered November 7, 1922, No. 161,114, to Devon Manufacturing Company, Inc., 24 Boerum Street, Brooklyn, N. Y., and a notice of such declaration sent by registered mail to said Devon Manufacturing Company, Inc., at the said address having been returned by the post office as undeliverable, notice is hereby given that unless said Devon Manufacturing Company, Inc., its assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

U. S. PATENT OFFICE, *Washington, Jan. 21, 1926.*

James M. Gaar, his assigns or legal representatives, take notice:

An interference having been declared by this Office between the applications for patent of James M. Gaar, 9 East Thirty-ninth Street, New York, N. Y., and Leslie Stevens, 46 East Houston Street, New York, N. Y., and counsel for Gaar having informed the Office that the present whereabouts of Gaar is unknown to them, notice is hereby given that unless said James M. Gaar, his assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

U. S. PATENT OFFICE, *Washington, Jan. 21, 1926.*

James M. Gaar, his assigns or legal representatives, take notice:

An interference having been declared by this Office between the applications for patent of James M. Gaar, 9 East Thirty-ninth Street, New York, N. Y., Jesse B. Hawley, 829 Sixteenth Street, Wilmette, Ill., and Leslie Stevens, 46 East Houston Street, New York, N. Y., and counsel for Gaar having informed the Office that the present whereabouts of Gaar is unknown to them, notice is hereby given that unless said James M. Gaar, his assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

U. S. PATENT OFFICE, *Washington, Jan. 21, 1926.*

James M. Gaar, his assigns or legal representatives, take notice:

An interference having been declared by this Office between the applications for patent of James M. Gaar, 9 East Thirty-ninth Street, New York, N. Y., Jesse B. Hawley, 829 Sixteenth Street, Wilmette, Ill., and Ralph H. Townsend, 829 Sixteenth Street, Wilmette, Ill., and 209 Hillside Avenue, Mount Vernon, N. Y., respectively, Benjamin F. Miessner, South Orange, N. J., and Leslie Stevens, 46 East Houston Street, New York, N. Y., and counsel for Gaar having informed the Office that the present whereabouts of Gaar is unknown to them, notice is hereby given that unless said James M. Gaar, his assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

U. S. PATENT OFFICE, *Washington, Jan. 15, 1926.*

Robert Carr, his assigns or legal representatives, take notice:

An interference has been declared by this Office between applications for patents filed by Thomas Lonet, of 273 Ninth Street, Oakland, Calif., and Robert Carr, of General Delivery, Anaconda, Mont. Counsel for Carr states that the present whereabouts of Carr is unknown to him. Notice is hereby given that unless said Carr, his assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

Condition of Applications Under Examination at Close of Business January 29, 1926.

(Total number of applications awaiting action, excluding Trade-Mark Division, 40,810; Trade-Mark Division, 2,158. Oldest new case, Aug. 1, 1925; oldest amended, July 30, 1925. The dates given are 1925 except where † indicates 1926.)

Room No.	Divisions, Examiners, and Subjects of Inventions.	Oldest new application and oldest action by applicant awaiting office action. New.	Amended.	No. of applications awaiting action.
112	1. LOEFFLER, F. A., Closure Operators; Fences; Gates; Harrows and Diggers; Plant Husbandry; Plows; Planting; Scattering Unloaders.	Nov. 3	Nov. 4	587
126	2. HADEN, C. F., Bee Culture; Dairy; Preserving; Presses; Tobacco	Sept. 30	Aug. 24	592
331	3. RICH, WM. J., Electric Heating; Electrochemistry; Heating; Metal Founding; Metallurgical Apparatus; Metallurgy; Metal Treatment; Plastic Metal Working.	Nov. 3	Nov. 4	701
234	4. MERRITT, A. D., Conveyers, Chutes, Skids, Guides, and Ways; Conveyers, Fluid Current; Conveyers, Power Driven; Excavating; Handling—Hand and Hoist-Line Implements; Material or Article Handling; Pushing and Pulling Implements, Traversing Hoists.	Nov. 6	Oct. 31	543

DECISIONS IN PATENT AND TRADE-MARK CASES.

Commissioner's Decisions.

JACOBI *v.* WINNING *v.* DOUGLAS.

Decided December 16, 1925.

1. INTERFERENCE—MOTION TO DISSOLVE BY APPLICANT IN INTERFERENCE WITH PATENTEE ON GROUND THAT ISSUE IS NOT PATENTABLE.

If the single applicant in interference with a patentee moves to dissolve on the ground that the issue is not patentable, the interference will be dissolved without considering the merits of the case and the moving party will be refused a patent embodying the issue of the interference.

2. SAME—MOTION TO DISSOLVE BY APPLICANT IN INTERFERENCE WITH PATENTEE AND ANOTHER APPLICANT ON GROUND THAT ISSUE IS NOT PATENTABLE.

Where one of two applicants in interference with a patentee moves to dissolve on the ground that the issue is not patentable, the motion will be set for hearing.

ON PETITION.

Mr. Richard S. C. Caldwell for Jacobi.

Messrs. Ervin, Wheeler & Woolard and *Messrs. Cushman, Bryant & Darby* for Winning.

Mr. George L. Cragg and *Messrs. Rector, Hibbin, Davis & Macauley* for Douglas.

ROBERTSON, *Commissioner:*

The party Douglas petitions the Commissioner to exercise his supervisory authority and direct that Jacobi's motion to dissolve be not heard and that the interference be dissolved as to Jacobi on his admission that he is not entitled to a patent including the counts of the issue by reason of his motion, the party Douglas being a patentee.

[1] It has been frequently held that if the single applicant in interference with a patentee moves to dissolve on the ground that the issue is not patentable the interference will be dissolved without considering the merits of the case and the moving party will be refused a patent containing claims embodying the issue of the interference. So far as I am aware there has been no published decision treating a case like the present one, in which one of two applicants in interference with a patentee moves to dissolve on the ground that the issue is not patentable.

The trend of Commissioners' decisions may be perceived in the following extracts:

> The only question to be determined in the interference is whether a patent shall issue to Robins, since he is the *only applicant* claiming the invention, etc. (*Robins, jr. v. Titus and Titus*, 1904 C. D. 154.)
>
> This Office does not refuse to entertain motions or decide questions upon the mere ground that the decision may cast a cloud upon a patent already issued. It does refuse, however, when that is the *only* effect of the decision. (*Baltzley v. Esenberger*, 1905 C. D. 120.)
>
> The question of patentability is not a moot one, and there is no principle of estoppel which prevents this Office from considering it for fear that a patent previously granted will be discredited. In such a case the discrediting of the patent is a mere incident to the decision of a matter which is of vital importance. (*Yarnall v. Pope*, 1905 C. D. 140.)
>
> He (Griffith) contends that it (the motion to dissolve) should not be transmitted because a decision * * * might cast a cloud on Griffith's prior patent. The reason is not sufficient. (*Griffith v. Dodgson*, 1906 C. D. 204.)
>
> A motion to dissolve merely raises the question of whether an interference properly exists. This preliminary question must be disposed of prior to the award of priority. That this determination may incidentally cast a cloud on the patent should not deter the Office from taking proper action. (*Blood v. Ross*, 1910 C. D. 229.)

[2] In the present case the question of patentability is not a moot question, neither is the question whether a patent shall issue to Jacobi the only one to be determined. Even if Jacobi were eliminated upon his alleged admission an interference would go on between Winning and Douglas and the patentability of the issue is just as important as in an interference between two applicants. In fact, as pointed out by Douglas in his reply to Jacobi's opposition, a three-party interference is in effect three interferences, and one of these interferences is between Winning and Jacobi.

Jacobi's changed attitude since he copied the claims for interference does not warrant eliminating him from the interference. Parties who have insisted on the patentability of their claims in ex parte proceedings and parties who have adopted claims suggested by the Office are permitted to attack the patentability of these same claims when thrown into interference. As was said under different circumstances in *Griffith v. Dodgson*, 1905 C. D. 202:

> The moving party is heard to argue against the patentability of the issue for the assistance of the Office in properly deciding a question kept actually and properly before it by the opposing applicant insisting upon his right to a patent.

An additional reason for refusing Douglas's petition is that if Jacobi should be the first inventor and he were excluded from the interference it might occur that priority would be awarded to Winning, and thus there would be two patents for the same invention and neither granted to the first inventor.

The petition is denied.

LOOSE-WILES BISCUIT COMPANY *v.* JOHNSON EDUCATOR FOOD COMPANY.

Decided August 28, 1924.

TRADE-MARKS—OPPOSITION—"COOKIELAND" NOT DESCRIPTIVE.

The mark "Cookieland" is not descriptive, and where opposer does not use it as a trade-mark, but bases its opposition upon the contention that the word is descriptive, *Held* that it is registrable to applicant.

(*Affirmed by the Court of Appeals of the District of Columbia.* *See p. 228 post.*)

Opposition No. 3,583.

APPEAL from the Examiner of Interferences.

TRADE-MARK FOR COOKIES, CRACKERS, CAKES, AND BISCUITS.

Application of Johnson Educator Food Company filed December 28, 1920, Serial No. 141,578, published June 13, 1921.

Messrs. Emery, Booth, Janney & Varney and *Mr. Wm. L. Symons* for Loose-Wiles Biscuit Company.

Mr. Henry C. Thomson and *Mr. Nathan B. Day* for Johnson Educator Food Company.

FENNING, *Assistant Commissioner:*

The Loose-Wiles Biscuit Company appeal from the action of the Examiner of Interferences in dismissing notice of opposition brought against the registration by the Johnson Educator Food Company of "Cookieland" for cookies, crackers, cakes, and biscuits.

There is no suggestion that opposer has ever affixed an equivalent mark to its goods. The record tends to indicate that some of its employees have applied "cookieland" to its factory. The notice of opposition alleges that the applicant's mark "indicates origin and is descriptive of the place or places of manufacture." Opposer urges that registration should be refused since the mark is "quasi-geographical." It urges that cookieland is a common expression to indicate a cooky factory and that the word consequently merely means cookies from a bakery. I am satisfied that the word is a coined word of such fanciful character as to be suggestive rather than descriptive. It is urged that since the mark indicates that the cookies come from a place where cookies are made, to give applicant exclusive right to the mark will tend to indicate to the public that applicant is the only person who makes cookies and that its factory is the one source of cooky supply. This argument is interesting, but too refined and fanciful to be given serious consideration. Opposer breaks the word into its parts, "cookie" and "land", and argues that neither of these parts alone is registrable, and hence the combined word is not registrable. This is a non sequitur and can not prevail. Opposer urges that one of the purposes and effects of the use of the mark—

is to convey at once to the mind of the general public the information that the cookies so described are superior to other cookies.

There may be some suggestion of this sort, but certainly applicant is entitled to employ such a suggestion if it is not absolutely descriptive, and the present mark certainly is not that.

Since opposer admittedly has no trade-mark use of the term, we might be justified in dismissing the opposition on the ground that it has shown no damage, in view of *Touraine Company* v. *F. B. Washburn & Company*, 1923 C. D. 174, but I have gone into the merits of the case and reached the definite conclusion that the mark is suggestive within the degree allowed by cases and not descriptive.

The Examiner of Interferences is affirmed.

TUNSTALL *v.* WHITE.

Decided August 4, 1925.

INTERFERENCE—DISSOLUTION—COMMON OWNERSHIP.

Where it appeared after the argument that the same trustees had become the owners of both applications, the interference was dissolved and the applications restored to the Primary Examiner, who was instructed to see that the proper election was made.

Mr. O. Ellery Edwards and *Messrs. Southgate & Southgate* for Tunstall.

Messrs. Mitchell Bros. for White.

FENNING, *Assistant Commissioner:*

This is an appeal from the action of the Examiner of Interferences awarding priority to White.

Since the argument of the case before me the suit instituted by Conway et al., owners of the Tunstall application, has been argued and decided on appeal to the Circuit Court of Appeals for the Second Circuit. On June 29, 1925, that court handed down a decision directing the district court to enter a decree giving plaintiffs title to the White application here involved. It appears, therefore, that both applications here involved are owned by Conway et al., trustees. Under these circumstances it becomes unnecessary to decide the interference. The burden is upon the owner of both applications to determine for himself on which application he wishes a patent to issue. See rule 94 and *Schreiber* v. *Bauer*, 258 O. G., 813; 1919 C. D. 4.

The interference is therefore dissolved and the applications restored to the Primary Examiner, who will see that the proper election is made.

Court of Appeals of the District of Columbia.

LOOSE-WILES BISCUIT COMPANY *v.* JOHNSON EDUCATOR FOOD COMPANY.

No. 1,773. Decided December 7, 1925.

APPEAL from Patent Office. Affirmed.

Mr. F. L. Emery, Mr. Irving U. Townsend, jr., and *Mr. Alva D Adams* for Loose-Wiles Biscuit Co.

Mr. Henry Calver for Johnson Educator Food Co.

(For Commissioner's decision see p. 227 ante.)

Before MARTIN, Chief Justice, ROBB, Justice, and SMITH, Judge U. S. Court of Customs Appeals.

ROBB, *J.:*

Appeal from concurrent decisions of the Patent Office dismissing appellant's opposition to the registration by appellee of the word "Cookieland" as a trade-mark for cookies, crackers, cakes, and biscuits.

Appellant does not use this mark as a trade-mark, but bases its opposition upon the contention that the word is descriptive. We agree with the Patent Office that "Cookieland" is not descriptive, within the meaning of the Trade-Mark Act, and hence that it is registrable to the appellee. Decision affirmed.

Affirmed.

ADJUDICATED PATENTS.

(C. C. A. Ill.) The Maginn patent, No. 982,217, for car wheel with metal tires, claims 1, 3, and 5 *Held* not infringed. *Maginn* v. *Diamond T. Motor Car Co.*, 8 F. (2d) 609.

(D. C. N. Y.) The Bell patent, No. 1,141,520, for superheater boiler, claims 4, 6, 7, and 9 *Held* not infringed. *Babcock & Wilcox Co.* v. *Springfield Boiler Co.*, 8 F. (2d) 618.

(C. C. A. Ohio.) The Gerosa patent, No. 1,263,879, for crank-case repair arm, *Held* invalid. *Gerosa* v. *Columbia Metal Stamping & Die Co.*, 8 F. (2d) 611.

(C. C. A. Cal.) The Gaertner patent, No. 1,413,467, for net roller on fishing boats, *Held* invalid. *Gaertner* v. *Dragich*, 8 F. (2d) 568.

(D. C. N. Y.) The Pratt reissue patent, No. 15,210, for superheater boiler, claims 1, 2, 4, and 6 *Held* not infringed. *Babcock & Wilcox Co.* v. *Springfield Boiler Co.*, 8 F. (2d) 618.

(D. C. Ohio.) The Pashek design patent, No. 52,962, for automobile tire tread, *Held* invalid. *Pashek* v. *Dunlop Tyre & Rubber Co.*, 8 F. (2d) 640.

ADVERSE DECISIONS IN INTERFERENCE.

In interferences involving the indicated claims of the following patents final decisions have been rendered that the respective patentees were not the first inventors with respect to the claims listed:

Pat. 1,466,098, E. C. Myers, Harvester, decided December 28, 1925, claims 1, 2, 4, 21, and 22.

Pat. 1,477,287, Sauzedde and Buchanan, Spare-wheel mounting, decided December 30, 1925, claims 1 to 4, inclusive.

Pat. 1,497,902, W. J. Grotenhuis, Automobile bumper, decided December 28, 1925, claims 1 and 2.

Pat. 1,502,747, S. Sachs, Foldable turntable for talking machines, decided December 30, 1925, claim 1.

Final decisions in interferences have been rendered against the following registered trade-marks:

T. M. 77,755, Washing compound, Anne E. Rawlins, St. Louis, Mo. Registered May 3, 1910. Decided December 28, 1925.

T. M. 98,089, Vending and dispensing machines, The R. & H. Manufacturing Company, Hartford, Conn. Registered June 30, 1914. Decided December 23, 1925.

T. M. 147,333, Scarfs, stockings, socks, and sweaters for men, women, and children, of textile fabrics. F. C. Huyck & Sons, Albany, N. Y. Registered October 11, 1921. Decided December 30, 1925.

T. M. 186,742, Fresh vegetables, fresh deciduous fruits, W. M. Fewel, Centerville, Calif. Registered July 22, 1924. Decided December 12, 1925.

Disclaimer.

1,418,546.—*Ernest A. Eastman*, Portsmouth, Ohio. SHOE LAST. Patent dated June 6, 1922. Disclaimer filed January 20, 1926, by the patentee.

Hereby enters this disclaimer to that part of the claims in said specification which are in the following words, to wit:

"5. A shoe last, the toe portion of which is provided with two rearwardly extending divergent slots and wedge shaped shims inserted in said slots deflecting the lateral portions of the last in opposite directions in relation with the medial body portion thereof.

"6. A shoe last having in the toe portion thereof rearwardly extending horizontally and vertically disposed intersecting slots, and wedge shaped shims inserted within the intersecting horizontal and vertical slots to expand the last toe vertically and laterally.

"7. The herein described method of altering shoe lasts consisting in providing rearwardly extending divergent kerfs in the toe portion of the last to form lateral yielding tongues and deflecting said tongues outwardly by inserting in said kerfs wedge shaped shims whereby the greatest degree of expansion will be effected at the forward extremity of the last.

"8. The herein described method of altering shoe lasts consisting in providing in the toe portion of the last, a rearward extending kerf, inserting in said kerf a spreading wedge forming in said toe portion a second kerf intersecting the plan of the first mentioned kerf and inserting a second spreading wedge in said second kerf."

Notices of Cancellation.

U. S. PATENT OFFICE, *Washington, Jan. 25, 1926.*

Bidart Machinery Corporation, its assigns or legal representatives, take notice:

A cancellation proceeding having been instituted by this Office upon the application of Kimberly-Clark Company, of Neenah, Wis., to effect the cancellation of trade-mark registrations No. 98,455, dated July 21, 1914, and No. 102,015, dated January 26, 1915, to American Rotogravure Company, of No. 432 Fourth Avenue, New York, N. Y., and it appearing by the statement of the president of the said American Rotogravure Company, made under oath in response to interrogatories addressed to it, that the title to the trade-marks concerned no longer remains in the said American Rotogravure Company, but has been transferred to the Bidart Machinery Corporation, and it further appearing that the said Bidart Machinery Corporation, of New York, N. Y., has been substituted to defend the registrations concerned and that the Office has failed to secure proper service on the said Bidart Machinery Corporation notice is hereby given that unless said Bidart Machinery Corporation, its assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the cancellation will be proceeded with as in case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

U. S. PATENT OFFICE, *Washington, Jan. 19, 1926.*

New York Incandescent Lamp Company, its assigns or legal representatives, take notice:

A cancellation proceeding having been instituted by this Office upon the application of Manhattan Electrical Supply Company, Incorporated, of 17 Park Row, New York, N. Y., to effect the cancellation of the trade-mark registration of the New York Incandescent Lamp Company, of 132 West Fourteenth Street, New York, N. Y., No. 82,351, dated June 20, 1911, and the notice of such proceeding sent by registered mail to the said New York Incandescent Lamp Company at the said address having been returned by the post office as undeliverable, notice is hereby given that unless said New York Incandescent Lamp Company, its assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the cancellation will be proceeded with as in case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

TRADE-MARKS

OFFICIAL GAZETTE, FEBRUARY 9, 1926.

[VOL. 343. No. 2.]

The following trade-marks are published in compliance with section 6 of the act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed within thirty days of this publication.

Marks applied for "under the ten-year proviso" are registrable under the provision in clause (b) of section 5 of said act as amended February 18, 1911.

As provided by section 14 of said act, a fee of ten dollars must accompany each notice of opposition.
